THE FINANCIAL SITUATION.

It should not escape notice that every new Government Board or Commission that is created or proposed by Congress carries with it inquisitorial powers for prying into the most intimate every-day affairs of business concerns. In the process of regulating trade the movement has advanced so far that now there is scarcely a business detail or secret, however carefully it may have been guarded in the past, that must not be disclosed at the beck or call of some deputy or agent appointed by the powers that be. Just now Congress is being petitioned to establish a Tariff Commission for the purpose of insuring scientific revision of tariff rates and schedules in the future, although there have been similar tariff commissions in the past and they have never been able to command respect for their conclusions and deductions from Congress. To provide for such a Tariff Commission a bill was introduced in Congress on the 1st inst., prepared at the instance of the Administration, and was referred to the Committee on Ways and Means.

The most striking feature of this Tariff Commission bill of the Administration is the extent of the inquisitorial powers that are to be conferred upon the Commission. These powers are found in Section 7 of the bill, which provides "that for the purposes of this Act the Commission, or its duly authorized agent or agents, shall for the purpose of examination and investigation at all reasonable times have access to and the right to copy any documentary evidence of any person, firm, co-partnership, corporation or association engaged in the production, importation, or distribution of any article under investigation, and in such connection such Commission shall have power to summon witnesses, take testimony, administer oaths, and to require any such person, firm, co-partnership, corporation, or association, to produce books or papers relating to any matter pertaining to such investigation."

The language here is about as broad and comprehensive as could be devised, and in addition any member of the Commission is to have the right to sign subpoenas. The power "to copy any documentary evidence of any person, firm, co-partnership, corporation or association engaged in the production, importation or distribution of any article" would leave nothing outside the pale of the inquisition and would make trade secrets and trade agreements public property, besides subjecting every business man to no end of harassing and annoyance when it suited the Commission's purpose to overhaul his books and accounts and his factory processes and costs.

When the Federal Trade Commission bill was under consideration, we called attention to the similar powers of investigation and inquiry that were to be conferred upon that board, and the Commission has now given notice of its intention to avail of these powers. Edward N. Hurley, Vice-Chairman of the Federal Trade Commission, speaking at the annual meeting of the Rubber Club of America, held at the Waldorf-Astoria on Feb. 2, made known the purpose of the Commission, as pointed out in these columns last Saturday, to request from business men in the next few weeks information concerning their products, their annual sales, the capital invested, and other items, such as depreciation provisions, and the like. Of course, we are told that the movement is not proposed in an inquisitorial spirit. The Commission professes to have no desire but to be helpful to the

It is animated by the best of intenbusiness man. tions. With sorrow it has noticed that the business man in so many instances has failed to conduct his affairs with success. Accordingly, the Commission, in truly paternalistic fashion, contemplates ascertaining what is wrong and then starting him on the sure road. To that end he must unbosom himself and tell the Commission all about his sales, show his cost sheets, disclose the prices he charges, &c., &c. These official functionaries, fresh from political triumphs and with no preconceived notions as to trade methods, are obviously so much better qualified than the business man himself to conduct his affairs, so it is natural that they should ask him to bare his business methods and secrets. He will be called upon to fill out, we suppose, lengthy blanks and schedules calling for all sorts of information and to dig around in his books and papers with the view to posting the Commission as to his methods and furnish proofs of his incapacity. If, perchance, he should not be able to furnish some of the items, he will no doubt be asked to have the information compiled or suffer the penalty, for all these Government bodies have power to punish. In the case of the proposed Tariff Commission, as in the case of the Trade Commission, authority is given to invoke the aid of the courts where there is refusal to respond to the demands of the Commission.

The railroads are now obliged to spend millions of dollars annually in compiling facts and data of every conceivable nature at the behest of State and national commissions, and the worst of it is that a great part of the elaborate statistics thus prepared is never availed of, but lumbers up the official document room. Now that Congress, in its superior wisdom, has taken it upon itself to regulate trade affairs as well, the business man will have to be prepared to submit to similar vexatious and costly burdens unless he rises up and vigorously protests. With each session of Congress some additional official or Governmental authority is vested with power to investigate and examine and inquire, until the lot of the business manager is becoming an unhappy one. It being difficult to devise means of protection and defense, he unfortunately has no alternative but to comply, once such a measure gets upon the statute books. The Census, under Constitutional grant, was supposed to provide only for an enumeration of population, but since the days of the fathers we have got so far away from first principles that every one in business is called upon to fill out lengthy schedules covering every detail of his operations. No one dares to resist or to challenge the assumption of power by the Director of the Census. The Secretary of the Treasury is making the Income Tax Law the basis for extracting information for which no authority exists under the Act, and which was never within the contemplation of the framers of the Act, but again no one dares resist. And so the movement goes on, with very few apparently cognizant of what is in progress, but everyone finding out, when too late, that inquisitorial powers have been vested in some new body or agency and are now to be exercised, the action just taken by the Federal Trade Commission being a case in point.

The charter powers of the national banks apparently do not permit dealings in securities, and yet the practice is widely indulged in, as everyone knows. In an opinion by M. C. Elliott, Counsel to

the Federal Reserve Board, there is incidental allusion to this absence of power on the part of the national banks to engage in the business of buying and selling securities. The opinion was called forth by an inquiry as to the right of national banks to engage in an insurance business. We print the opinion in full on a subsequent page (page 570). Mr. Elliott points out that the power to write insurance, act as insurance agent or broker, is not specifically enumerated in the National Bank Act, and, according to well-settled principles, unless such business can be considered as incidental to some of the enumerated powers of national banks, it is illegal "and prohibited by implication as clearly as if by expression." In support of his conclusions, Mr. Elliott quotes from Farmers & Merchants National Bank vs. Smith (77 Fed., 129), where it was held that it is not within the powers of a national bank to engage in the business of selling mortgage bonds on commission. Circuit Court Judge Thayer, in that case, said: "The brokerage business is entirely distinct from the business of banking which it was authorized to transact. If a national bank can lawfully act as a broker in selling farm mortgages for a commission, no reason is perceived why it may not act in the same capacity in selling any other species of property, real or personal. The National Bank Act does not, in terms, or by necessary implication, authorize national banks to act as brokers in negotiating the sale of securities, and it is generally agreed that they cannot lawfully engage in such business."

Mr. Elliott also quotes from a decision of the Supreme Court of Pennsylvania in Pepperday vs. Citizens National Bank (183 Pa. St., 519, 524), which was to the following effect: "It is no part of the business of a national bank to engage in the selling of stocks for anybody. It was a transaction outside of its regular banking business and not within its chartered powers." A Maryland decision (Weckler vs. First National Bank, 42 Md., 581) is strongest of all in discountenancing the practice. It says: "Nor can we perceive it is in any wise necessary to the purpose of their existence, or in any sense incidental to the business they are empowered to conduct, that they should become bond brokers or be allowed to traffic in every species of obligations issued by the innumerable corporations, private and municipal, of the country." To get around the prohibition of the statute some of the larger institutions have, as is known, organized outside companies through which dealings not allowed to the banks themselves are carried on. The Comptroller of the Currency at one time embarked in an attempt to break up as illegal the ties between the banks and the special organizations created by them and under their exclusive control, but nothing ever developed out of the movement.

The exhibit of commercial failures for January 1915 cannot be considered as otherwise than favorable. It is true, of course, that the number of insolvencies reported and the aggregate of failed liabilities are in excess of any month since April last, but that in itself proves nothing. Rather, is it to be remembered that the opening month of the year is a time of especial stress, owing to its being the period of annual settlements and consequently it is quite the rule that some expansion in the country's business mortality then occurs. The only true basis of comparison is with the same month a year by both sides along the western frontier. What

ago and on that basis there is a striking decrease in number of failures and a great contraction in liabilities. While there were a number of failures for large amounts during the month this phase of the situation was not in any sense a special feature. Altogether, there were 27 suspensions for \$100,000 or over, aggregating in all \$10,034,603, but the only one for really large amount was the Auto-Sales Gum & Chocolate Co. for approximately \$3,400,000.

According to Messrs. R. G. Dun & Co.'s compilation the number of mercantile disasters in January was 2,009, against 2,848 in 1915 and 1,857 in 1914, the liabilities standing at \$25,863,286 and \$49,640,-575 and \$39,374,347 respectively. The trading division makes a very satisfactory showing numerically, 1,494 failures comparing with 2,184 in 1915, and the volume of debts dropping to \$12,360,538 from \$20,227,896. In the manufacturing group there was an even greater proportionate contraction in liabilities, this year's total standing at only \$11,-759,745, against \$27,041,279 in 1915, that aggregate having been in greatest part made up of the debts of the Rumely Co. The chemical and drug manufacturers made no contribution whatever to the January total and, beside machinery and tools, in which the Rumely Co. classed, noteworthy decrease in indebtedness occurred in iron and foundries, woolens, carpets, &c., printing and engraving and liquors and tobacco. Among brokers, agents, &c., a decrease in both number and amount is to be recorded, the comparison being between 98 for \$1,743,-603 and 113 for \$2,371,400.

A change in the functions of the British Secretary for War is announced and is believed to mean the transfer to active duty of the present incumbent, Lord Kitchener. The change is contained in a new order whereby the Chief of Staff, Gen. Sir William R. Robertson, and not, as heretofore, the War Secretary, "shall be responsible for issuing the orders of the Government regarding military operations." The London press as a whole seems to interpret the new order as presaging the early retirement of Kitchener. The London "Daily Sketch" predicts that he will leave the War Office "to undertake work of an important character elsewhere," and that Chief of Staff Robertson will take over active direction of the war "without interference except from the Cabinet as a whole"; also, that a civilian gifted with the intricate and essential art of organization will succeed Kitchener as War Secretary. There seems reason to believe that the latter prediction has reference to David Lloyd George, who has, as Minister of Munitions, succeeded in solving the what at first appeared very dubious problem of organizing the British munitions industry. Another report is that Lord Derby, of recent recruiting campaign fame, is to become War Secretary. Signs are not wanting that the spring campaign in the West is to be pushed with vigor and that after nearly two years of "bungling through" the British offensive is to be conducted by younger men who will show greater aggressiveness than heretofore has been the case. There seems, too, a wider disposition to depend upon force of arms and direct attack rather than await the "economic exhaustion" which Germany appears to be so efficient in avoiding.

Already there is evidence of great military activity

were at the beginning local attacks in the Artois and south of Arras have become furious contests that are spreading along the entire line. The net results still remain slight, first one side claiming minor advantages, and then the other. Official French advices suggest that the French have been counter-attacking almost without cessation for forty-eight hours in the Vimy Heights region. The French War Office reports the recapture of practically all the positions taken by the Germans in the Artois region and successful attacks in the severe fighting near Frise. The battle has spread to the British front, where a heavy artillery duel has been in progress for more than twenty-four hours. In the eastern theatres renewed activity also is being shown. Special significance appears to be attached to the news that Emperor Nicholas on Thursday left Petrograd for the front. In Vollhynia and on the East Galicia frontier the Russians are strongly on the offensive against the Austro-Hungarians. Northwest of Tarnopol the Russians, after bitter fighting, succeeded in occupying Austro-Hungarian trenches, but later were ejected from them, while on the Bessarabian frontier the Russians have been driven from an advance position to their main one. Small engagements by infantry have taken place at various points of the Austro-Italian front, in all of which Rome reports Italian victories.

Once again is the controversy between Washington and Berlin over the Lusitania case "nearly" settled. Washington has made no official announcement, but a high Administration official stated on Tuesday that "a settlement of the Lusitania case is in sight, probably within the next few days. The United States has not increased its demands; it has not reduced them. You can draw your own conclusion as to the basis of the agreement." Referring to wording proposed by Germany, the same official said that it appeared "to cover the position of the United States. It is not fair to assume that there will have to be any further admissions or concessions from Berlin." He added that the German proposal was "substantially satisfactory." There remains for final determination the exact phraseology of the agreement, certain changes having been suggested by Secretary Lansing which the German Ambassador believes his Government will accept.

Our State Department has been informed unofficially by representatives of Germany and Austria-Hungary that each of these Governments contemplates issuing an order, to become effective on March 1, that armed belligerent merchant vessels will be sunk without warning by the warships and submarines of the Teutonic Allies. This action follows proposals made by our Government to the Governments of the various European belligerents with the object of effecting a modus vivendi, under which the belligerents would subscribe to a declaration of principles affecting attacks on merchant vessels and agree that merchant vessels should not be armed. These proposals were made to England, France, Italy, Russia, Belgium and Japan in January, in communications which Secretary Lansing handed to their diplomatic representatives in Washington. It has been definitely learned that the Entente Allies will reject the American proposal. Obviously, with that expectation in mind, the Teutonic Allies have decided to issue orders to sink armed enemy merchant

vessels without warning. It will be appreciated that this opens up a highly important new source of possible friction between our own country and Germany and its Allies, and is a feature that has become the source of considerable concern in Administration circles in Washington.

Cables from London intimate that the movement of the British Treasury to obtain control of American railroad bonds is proving a success but that very distinct obstacles have developed in the acquisition of shares. The London correspondent of the "Evening Post" suggests that the Treasury's activities may be mostly confined to bonds, leaving the British public to sell American shares on its own account in the open market if so disposed. Nevertheless, the British Treasury is continuing to furnish daily quotations at which it will purchase both stocks and bonds, these quotations being changed in consonance with the changes of the New York market and the fluctuations in exchange. The recent attacks by Zeppelins on British towns have had somewhat of a restraining influence on the London Stock Exchange this week. In addition, the activity of funds in seeking Treasury bonds has drawn such funds away from investments in Stock Exchange securities. British home rails have lagged somewhat, as the dividends have in no instances exceeded general expectations. The report of the Committee on War Loans for Small Investors, which was presided over by E. H. Montagu, Financial Secretary of the Treasury, has just been issued. It does not commend lottery bonds, although some members favor this method of securing money. Nor does it consider a compulsory loan necessary or desirable. Compound interest at 5% per annum is suggested for wage earners on money left with the Treasury for five years; and proposals are formulated for the establishment of local committees for thrift propaganda and to receive savings throughout the country. As to the proposed new war loan, there is not likely to be any definite action until the opening of Parliament on Feb. 15. A new war credit will undoubtedly be promptly granted and the Budget proposals, it is promised, will be immediately placed before the Commons. Parliament is to be opened by a Royal Commission instead of the King in person. In explantaion of this the following official statement has been issued:

His Majesty is quite prepared to carry on the practice which obtained throughout his and the perceding reign, but has yielded to the opinion of his medical advisers that he should not at this stage of convalescence, after his severe accident, venture to undertake the ceremony.

Details of the injury which King George received while reviewing the First Army in France have never been officially announced. The impression seems to be gaining ground that the King is suffering from serious injury to his spine.

In a lecture on Friday night of last week at the London School of Economics Sir George Paish, editor of the "Statist," argued that the economic and financial strength of Great Britain will be subjected this year to the severest possible test, as she proposes to provide her allies and colonies with loans of at least £400,000,000 (\$2,000,000,000) and possibly £600,000,000 (\$3,000,000,000), and to support a bigger navy than ever and 4,000,000 men in the field. The speaker expressed the belief that nobody could accuse the British nation of any superabundance of

brain power, adding that her very mediocrity in this respect was probably the cause of her strength. The really clever man or nation, he said, frequently became a public danger, but the British nation never made the mistake of being too clever. The greatest qualities of the British people, he said, were common sense and courage, combined with lack of imagination. At the end of the war Great Britain would stand about where she stood at the beginning, except that she would have lost her new savings. He asserted that the loss already amounted to £600,000,-000 (\$3,000,000,000), and expressed the belief that if the war lasted another year the loss would reach £1,000,000,000 (\$5,000,000,000). But he said in conclusion that the entire nation was learning to work more efficiently and skilfully than before and that after the war her productive power would be greater than ever.

The report of the British Board of Trade for the month of January shows an increase of £7,702,000 in imports and of £8,509,000 in exports. The principal increases in imports were: Food, £3,750,000; raw materials, £1,000,000, and chemical dyes, £1,000,000. The increase in exports was principally in manufactured articles. Exports of cotton goods for the month were 424,104,000 yards, against 349,442,000 yards for January 1915. The following table shows the trade of the United Kingdom in January 1916, compared with the corresponding period in 1915:

January—	1916.	1915.
Imports	£75,103,006	£67,401,006
Exports	36,756,592	28,247,592
Excess of imports	£38,346,414	£39,153,414

M. Ribot, French Minister of Finance, accompanied by the Governor of the Bank of France, returned to Paris from London on Thursday, having made arrangements whereby the Bank of England will lend assistance to the Bank of France to facilitate commercial credit in England. The Finance Minister also completed arrangements by which purchases made by the French Government in the United States and Great Britain would be financed in co-operation with the English Treasury. M. Ribot reported that the London Stock Exchange would admit securities belonging to French holders to be dealt in on condition that the intermediaries should be the Bank of France and the Bank of England, and that the proceeds of the sales should be employed in paying for purchases in England.

The proposed taxation of war profits seems the source of some differences of opinion in French official circles. One deputy has proposed a plan to tax capital. The argument used in favor of this plan is that it will reach only 236,000 persons. As Yves Guyot, in a cable to the "Tribune," points out, it is a system of voting by the majority a tax to be paid by the minority, and one arrives quickly from that to the reverse of the proposition: "No taxation without representation." It is a dangerous sea for democracy to embark on.

A number of large financial transactions aside from the new British war loan are soon to be announced. The London "Times" states that it learns from an authoritative source that Russia is planning to float a loan of \$25,000,000 in Tokio in payment for its munitions indebtedness. In addition, advices from Petrograd quote newspapers of that city as

reporting that the Government has decided to issue in the near future a new interior loan of 2,000,000,000 rubles at 5 per cent, under the same conditions as the preceding one. Under normal exchange conditions the equivalent in American money of 2,000,-000,000 rubles would be approximately \$1,000,000,-000. The preceding Russian loan, issued last November, was for 1,000,000,000 rubles. It was sold at 95, pays 5½ per cent and runs for ten Advices from Bucharest state that the Rumanian Government will submit a bill for additional credit for the army, to the amount of \$40,000,000. The Swedish Parliament has accepted a bill empowering the King to authorize the National Bank to refuse gold offerings and also cease coining, according to a dispatch to the Exchange Telegraph Co. from Copenhagen. The measure was introduced, says the dispatch, owing to fears that the bank would be overloaded with gold, the amount of which held has increased from 113,000,000 kroner in December to about 160,000,-000 kroner.

Dr. Karl Helfferich, Secretary of the German Imperial Treasury, on Monday made public his reply to questions propounded recently to him by Sir Edward Holden, Chairman of the London City & Midland Bank, at the annual meeting of that insti-To the question whether German assets in foreign countries still existed, Dr. Helfferich said that billions of German assets were being withheld by England under receiverships and against law and equity. He then asked what conclusion was to be drawn as to English finance from the fact that Great Britain, through Sir Edward, floated a loan in the United States to strengthen the exchange rate on the English pound. With regard to the decrease in German exports, Dr. Helfferich pointed out that Great Britain's exports had shrunk by half and that imports, inclusive of those of the Government, had swelled to such an extent that the balance of trade against Great Britain was now \$2,500,000,000 instead of \$750,000,000 as formerly. To Sir Edward's question whether Germany's foreign security holdings had not all been sold, Dr. Helfferich replied that Great Britain's search of mail on neutral ships for foreign securities "and the discoveries made on these occasions must sufficiently edify Sir Edward concerning the actual existence of large German holdings of such securities." Dr. Helfferich, with regard to the charge of inflation of German paper circulation, said the war credit banks, mortgage banks, and insurance companies never issued bank notes. He said also that the Reichsbank statements did not mention an ounce of gold which was not in the bank's vault. He said reports of riots in Germany in which hungry women were shot down by the military were inventions. As to future taxes in Germany, the Secretary said the war was costing 50 cents per head of the population in Great Britain as against 25 cents in Germany.

The comment in financial London on Dr. Helfferich's reply is that it was exceedingly weak. He ignored three questions, and the only one he answered categorically was that every ounce of gold in the Reichsbank's statement was in the Reichbank's vaults.

Berlin advices state that a ban on the importation of articles of luxury of every description in Germany is impending. The Hansabund, an organization of large German industrial concerns, after a two days' session, which was attended by representatives from all parts of Germany, decided on Monday to ask the Imperial Chancellor to draw up and present to the Bundesrath a measure creating an "economic general staff" to handle and control the multifarious business problems, especially exports and imports after the war, and to have charge of the transfer of German business and industry after the war. Individual members of the Hansabund argued the urgent need of some such body immediately to handle the badly tangled real estate situation, the labor market problem, the supplying to industry of raw material, finance and kindred matters.

Official bank rates at the leading foreign centers may once again be repeated as they remain at 5% in London, Paris, Berlin, Vienna and Copenhagen; $5\frac{1}{2}\%$ in Italy, Norway, Sweden and Portugal, 6% in Russia and $4\frac{1}{2}\%$ in Switzerland, Holland and Spain. The open market, too, in London remains unaltered, being $5\frac{1}{8}\%$ indiscriminately for sixty and ninety-day bills. A private bank rate of $4\frac{1}{4}\%$ is quoted from Berlin, but there have been no quotations received of private discount rates from other Continental centers, all private rates being apparently regulated by the official Bank figures.

The Bank of England presented a stronger statement than has recently been usual, reporting an increase of £1,591,588 in the gold item and of £2,925,-000 in the reserve, note circulation having registered a contraction of £1,334,000. The proportion of reserve to liabilities is now 24.43% against 23.54% last week and 31.63% at the corresponding date a year ago. Public deposits show the large increase of £4,395,000 and other deposits an expansion of £1,-904,000. Lombard Street borrowed £3,391,000 net. The Bank's gold holdings amount to £54,279,564 and compare with £67,204,485 at this date a year ago, and £43,154,292 in 1914. The reserve stands at £39,864,000. One year ago it was £51,239,215 and two years ago £33,494,742. The loan item (other securities) is £108,531,000, which compares with £104,615,640 in 1915 at this date and £35,995,885 in 1914. The Bank reports as of Feb. 5 the amount of currency notes outstanding as £93,689,155, against £92,528,149 the week preceding. The amount of gold held for the redemption of such notes remains at £28,500,000. Our special correspondent furnishes the following details of the gold movement into and out of the Bank for the Bank week: Inflow, £1,826,-000 (of which £1,311,000 bar gold bought in the open market, £250,000 released from miscellaneous account and £265,000 net received from the interior of Great Britain); outflow, £234,000 (of which £21,000 exported to the United States, £178,000 to Continent, £3,000 to Canada, £25,000 to Argentina and £7,000 bar gold sold). We add a tabular statement comparing for the last five years the different items in the Bank of England return:

The Bank of France's stock of gold is 4,974,000 francs higher for the week and its stock of silver shows an increase of 1,265,000 francs. Meanwhile note circulation indicates the large expansion of 110,325,000 francs, general deposits an increase of 23,675,000 francs, bills discounted a decrease of 29,841,000 francs, treasury deposits a decrease of 31,103,000 francs, and the Bank's advances a decrease of 7,305,000 francs. The gold holdings are once again at a new high level, amounting to 5,024,-474,000 francs, which compares with 4,241,600,000 francs at this date in 1915 and 3,474,421,000 francs in the year preceding. Note circulation likewise establishes a new high record, amounting to 14,144,-325,000 francs, against 10,749,650,000 francs in 1915 and 5,845,047,000 francs in 1914.

No particularly new features have been developed in the week's local money situation. Rates remain virtually as last quoted. Supplies of loanable funds are still very large, but lenders show no disposition to compete for business by lowering their quotations. The restricted demands by borrowers is one of the most curious features of what is in reality a perplexing situation. Notwithstanding the conceded activity in trade and industry throughout the country, funds are more than abundant. Meanwhile loans in the New York banks alone are about \$1,000,000,000 greater than they were a year ago. Instead of this large increase representing accommodations to trade and industry, there is excellent basis for the belief that it represents in no inconsiderable measure loans upon securities that have been returned to this center from abroad. Hence the loan item may hardly be accepted as an explanation of the backwardness in seeking bank accommodation that exists generally in mercantile and manufacturing circles. That the activity that is reported in trade and industry is not altogether exaggerated is confirmed by the gratifying increase that is being shown progressively from week to week by the great railroad systems of the country. It also is indicated clearly by the bank exchanges to which reference has already been made on a preceding page.

Applications in the capital market by bankers have not this week been large, but offerings have been promptly absorbed. An issue of \$30,000,000 Chicago Union Station first mortgage 41/2% gold bonds by New York and Chicago banks and bankers was eargerly taken, the subscription books having been closed immediately after they opened. As to-day is a holiday this week's bank statement was issued yesterday. It showed an increase of \$29,903,-000 in the loan item and of \$35,396,000 in the demand deposits, while time deposits decreased \$3,615,000. The total reserve increased \$4,198,000 but the surplus reserve showed a contraction of \$1,582,920, the expansion in deposits having increased the requirement \$5,780,920. Note circulation was issued to the amount of \$29,000 net. Reserve in own vaults increased \$6,015,000 to \$527,094,000, including \$451,147,000 in specie. One year ago the surplus reserve was \$138,900,820, against \$168,822,950 this year. The loan item is \$3,327,547,000, which compares with \$2,287,379,000 a year ago. Reserve in Federal Reserve banks decreased during the week \$2,888,000 to \$171,059,000, and reserves in other depositaries increased \$1,071,000 to \$58,571,000.

Referring to money rates in detail, the range for demand loans this week has again been 134@2%,

these figures being the lowest and highest respectively every day. The ruling figure was 13/4% on Monday, Tuesday and Wednesday and advanced to 2% on Thursday, returning to 134% on Friday. Rates for fixed maturities also remain without alteration, being $2\frac{1}{2}$ @ $2\frac{3}{4}$ % for sixty days, $2\frac{3}{4}$ % for ninety days, 23/4@3% for four months and 3% for five and six months. A year ago rates for the various maturities were 2@3% up to four months and 31/4@ 3½% for five and six months. Bank acceptances remain quiet at 2% for sixty days and 21/4% for ninety days. Commercial paper is in good demand, but scant supply. Buyers are quoted 3@31/4% for sixty and ninety day endorsed bills receivable and for six months single names of choice character. Most business seems to be passing at the lower figure. Names no so favorably known still require $3\frac{1}{2}\%$. No changes in rediscount rates have been reported by the Federal Reserve Bank in the various districts this week.

horized rate for discount of bankers' acc te of 3% to 4% on purchases of trade acc Atlanta Federal Reserve Bank in the ope bank, was approved Dec. 16.

Very little of interest is passing from day to day in sterling exchange circles. Rates are maintained within a shade of 4 86 for demand bills, which, as we have recently noted, seems to be regarded in banking circles identified with this business as the normal rate under current conditions. The continued movement of securities in this direction across the Atlantic is apparently effectively stabilizing the situation. Latest advices received by bankers from London intimate that the British Treasury is showing less evidence of its former determination to utilize the American securities it has accumulated as collateral (instead of selling them outright). There have, in fact, been reports that some sales of the recently acquired securities already have been made to the New York market. It is not possible, apparently, to obtain definite confirmation of this statement and as a matter of fact the information does not appear to be very generally credited. It is conceded, however, that either in the form of sales or as collateral for loans, the so-called "mobilized" securities will be represented in any new credit arrangements or loans that are to be negotiated by or for the British Government in this market. As no one doubts the ability of the British Treasury to support sterling exchange in the New York market there is no mystery connected with the firm undertone that is being displayed. The proposal in Britain for a limitation of the importations of luxuries may also be regarded a sustaining factor in the general situation. Meanwhile, as is well known, the exportations of munitions to the Entente Govern- | Paris demand bills closed at 5.871/2, against 5.90 a

ments are, as a rule, being conducted without direct connection with the sterling exchange market, and to that extent, are not present as a day-to-day influence on sterling exchange rates. There is, however, a good supply of bills of every kind. No importations of gold have been reported this week.

Compared with Friday of last week, sterling exchange on Saturday was weaker and demand declined to 4 75\\(^3\)4\(@4 75\)7\(8\), cable transfers to 4 76 7-16\(@0\) 4 76 9-16 and sixty days to 4 721/8@4 721/4. On Monday trading was extremely dull, the market being at times almost at a complete standstill; the tone was firm, however, although the range was unchanged at 4 75\(^3\)4\(@4 75\(^3\)8 for demand, 4 76 7-16\(@4 76 9-16 for cable transfers and 4 721/4@4 723/8 for sixty days. Buying by a prominent banking concern caused a slightly firmer tone on Tuesday, but the volume of transactions continued small; demand bills advanced $\frac{1}{8}$ c. to 4 $\frac{75}{8}$ @4 $\frac{76}{4}$ and cable transfers to 4 $\frac{76}{2}$ @ $4.76\frac{5}{8}$, though sixty days were easier at $4.72@4.72\frac{1}{4}$. On Wednesday increased firmness was evident, mainly as a result of a falling off in the supply of commercial offerings; quotations ranged at 4 76@ 4 76 1-16 for demand, 4 76 9-16@4 76\% for cable transfers and 4 721/4@4 723/8 for sixty days. Dealings in sterling exchange again relapsed into dulness on Thursday and fractional recessions were recorded, with demand at 4 75 1/8 @4 75 15-16, cable transfers at 4 76\\(^3\)8@4 76 7-16 and sixty days at 4 72\(^1\)8@ 4 721/4; the fact that Saturday's mail steamer was an unusually slow one served to restrict operations. On Friday the market ruled very dull, demand being quoted at 4 75 1/8@4 75 15-16, cable transfers at $4.76.7-16@4.76\frac{1}{2}$ and sixty days at $4.72\frac{1}{4}@4.72\frac{3}{8}$. Closing quotations were 4 721/4 for sixty days, 4 75 15-16 for demand and 4 76 7-16 for cable transfers. Commercial on banks (sixty days) closed at 4 71¼, documents for payment (sixty days) finished at $4.71\frac{1}{2}$ and seven-day grain bills at $4.75@4.75\frac{1}{8}$. Cotton for payment closed at 4 75\(\)4@4 75\(\)8; grain for payment at 4 $75\frac{3}{4}$ @4 $75\frac{7}{8}$.

The feature of the Continental exchanges has been the strength in German Reichsmarks and in Austrian kronen, demand bills on Berlin having risen as high as 78, against 73 13-16 on Friday of last week; while demand on Vienna, which closed at 12.55 a week ago, advanced to 15.25, though closing at a reaction to 14.00. On the recent weakness Reichsmark was quoted at about 72 and kronen at 12.50. strength that has developed may be considered a response to the measures employed in the recent act of the Bundesrath creating a monopoly under auspices of the Reichsbank for buying and selling foreign exchange. Official rates in accordance with this plan for foreign exchange business are posted on the Berlin Bourse every day. As cabled, Thursday's figures were: New York, 5.365@5.385; Holland, 2281/4@2287/8; Denmark, 1511/4@1513/4; Sweden, 1511/4@1513/4; Norway, 1511/4@1523/4; Switzerland, 1025/8@1027/8; Austria-Hungary, 71.575@71.675; Rumania, 84.5@85; Bulgaria, 763/4@773/4.

The closing quotation for demand bills on Berlin yesterday was 755/8, which compares with 73 13-16 a week ago; bankers' cables finished at 753/4, against 73% last week. As already noted, Austrian kronen bankers' sight finished at 14.00, against 12.55 a week ago. In Paris, checks on London finished at 28.03 francs, against 28.02 last week. In New York week ago, and bankers' cables finished at 5.87, against 5.89½. Swiss exchange is 5.22 for sight and 5.21¼ for cables, against 5.22½ and 5.21½, respectively, a week ago. Italian lire are 6.75 for sight and 6.74 for cables, against 6.76 and 6.75, the corresponding figures a week ago. Greek exchange remains at 5.15¼ for sight drafts. Copenhagen checks are 27.60, against 27.30 a week ago, while demand bills on Norway and Sweden are 27.90, against 27.60. Russian rubles are firmer, closing at 31¼, against 29¾ a week ago. Sight bills on Amsterdam are 42, cables 42½, and commercial sight 41½. The corresponding figures last week were 41 11-16@41¾ for sight, 41 13-16@41⅓ for cables and 41½ for commercial sight.

The New York Clearing House banks, in their operations with interior banking institutions, have gained \$6,092,000 net in cash as a result of the currency movements for the week ending Feb. 11. Their receipts from the interior have aggregated \$12,564,000, while the shipments have reached \$6,472,000. Adding the Sub-Treasury operations and the gold exports, which together occasioned a loss of \$4,339,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a gain of \$1,753,000, as follows:

Week ending Feb. 11.	Into Banks.	Out of Banks.		Change in Holdings.
Banks' interior movement Sub-Treasury oper. and gold exports	\$12,564,000 16,932,000	\$6,472,000 21,271,000		\$6,092,000 4,339,000
Total	\$29,496,000	\$27,743,000	Gain	\$1,753,000

C July 30 1914 in both years. h Aug. 6 1914 in both years.

THE LUSITANIA NEGOTIATIONS.

Precisely what is to be the real scope and significance of the German Government's newly announced policy—the torpedoing without warning of enemy merchant ships considered to be armed—and what the bearing of that policy will be on our own negotiations with Germany, it is too early yet to say. It will, at least, be deplored that a step with possibilities so wide and dangerous should have been taken at the moment when the Lusitania controversy was apparently approaching final settlement. We shall merely undertake, for the present, to discuss the aspects of that negotiation, considered by itself.

Two different views will presumably be taken by different sections of our people regarding the form and purport of the agreement which has seemed, by this week's earlier news, to be impending. It will be remarked on the one hand that our State Department has forced Germany to abandon her original position to the effect that neutral ships entering the war zone, and neutral passengers embarking on enemy merchant ships traversing that war zone, do so

at their individual peril. We have induced the German Government to issue orders forbidding submarine commanders hereafter to torpedo without warning even enemy merchant ships, if unarmed, and, further, we have brought Berlin to acknowledge the wrongfulness and illegality of destroying neutral property or life under such conditions. Our Government has done this without conceding on its own side either the contention that a passenger ship carrying a moderate defensive armament thereby becomes a warship, or the contention that the carrying of munitions as part of such a vessel's cargo makes the ship fair game for such treatment as was directed at the Lusitania. All this has, moreover, been accomplished without a breach of international relations, and without a threat of war, except the solemn and dignified warning of the inevitable consequences which must follow persistence in such acts.

This being so, one part of American opinion will undoubtedly conclude that a real diplomatic victory has been won by the United States of high importance to the safeguarding of neutral rights and humane principles, during and after the war. Another body of opinion, however, will doubtless continue to stand on the fact that no naval commander has been rebuked or punished for an act of almost unprecedented barbarity in naval warfare; that the United States has not expressed abhorrence of that act by refusing to continue friendly relations with the Government responsible for it, and, furthermore, that the question whether the act of the submarine which sunk the Lusitania was or was not illegal on general principles of international law, is not even yet settled.

The general basis of the preliminary adjustment with Germany is thus outlined in the Washington dispatches:

First—Germany, while considering reprisals against an enemy legal and knowing that the United States Government regards reprisals as illegal, admits that the attack upon the Lusitania was an act of retaliation that was not justifiable in so far as it involved the lives of neutrals, and also assumes liability for such loss of neutral lives.

Second—Germany is willing to pay an indemnity for the American lives lost in the sinking of the Lusitania and to make this reparation as an act of liability.

Third—Germany gives guarantees that the incident will not be repeated by declaring that liners will not be sunk by German submarines without warning and without safety of the lives of non-combatants, provided the liners do not try to escape or offer resistance.

It will be observed that the German concessions describe the attack on the Lusitania as unjustifiable only "in so far as it involved the lives of neutrals." The Berlin Foreign Office bases its main contention on the right to overstep the strict bounds of international law when retaliating for what is asserted to be a similar violation by the enemy. The question will probably be put, how far does the United States assent, explicitly or tacitly, to the German position in that matter. In its own official orders of the Civil War and other periods, our Government has declared that "the law of war can no more wholly dispense with retaliation than can the law of nations." Yet the same order adds the comment that "unjust and inconsiderate retaliation removes the belligerents further and further from the mitigating rules of regular war and by rapid steps leads them nearer to the internecine wars of savages," and it cites with approval the declaration, elsewhere enunciated, that reprisals "must in all cases take account of the laws of humanity and morality."

This is a fairly definite statement of the American position on an undoubtedly perplexing question. It can hardly be contended that the form of settlement as above outlined elicits from Germany a disavowal, under any circumstances, of the policy of doing what was done in the case of the Lusitania, or that it reiterates, as one might perhaps have wished, the position on our Government's part, that the act from which the controversy arose was wrongful and illegal under any circumstances. Still, the note sent to Germany by our State Department on June 9 declared that, "whatever be the other facts regarding the Lusitania, the principal fact is that a great steamer, primarily and chiefly a conveyance for passengers, and carrying more than a thousand souls who had no part or lot in the conduct of the war, was torpedoed and sunk without so much as a challenge or a warning, and that men, women and children were sent to their death in circumstances unparalleled in modern warfare." It added that the United States Government "is contending for nothing less high and sacred than the rights of humanity." This is surely explicit enough as a statement of our own position, and it is possible that the same aspect of the question will be brought out in the final exchange of diplomatic communications. But to very many people there will certainly be disappointment that the barbarity of the Lusitania episode had not been so disavowed by the German Government itself as to settle the question for all time in international law. That must apparently be left for the declaration by a convention of the great States after the war.

It is particularly unfortunate that these final negotiations should have been accompanied by interviews cabled from Berlin indicating that, in the German Government's view, its concessions were already greater than could ordinarly be asked by a reasonable neutral Power. This was true of last week's statement by Dr. Zimmermann, Under-Secretary of Foreign Affairs at Berlin, in which he declared to the Associated Press that "the Government is willing to do everything in its power, and has done everything in its power, to meet American wishes," but that "there are limits beyond which even friendship snaps." It is equally true of the further statements in that interview; first, that the United States has "suddenly made new demands which it is impossible for us to accept," and, second, that "in no circumstances will Germany concede the illegality of her submarine campaign in the war area."

But the statement as to new demands has no visible foundation, since the United States has merely, in each successive note, reiterated its original demands of last May. Moreover, the declaration regarding Germany's position as to a submarine campaign wholly evades the real issue. The same impression is created by the remark of the German Chancellor to Mr. von Wiegand, cabled to New York on Wednesday, to the effect that while "I have been and am willing to concede to America everything that Germany can concede within reason and fairness," nevertheless "I cannot concede a humiliation of Germany and the German people, or the wrenching of the submarine weapon from our hands, even to placate America." We say that this is unfortunate

for Germany herself, and the reason is that such interviews inevitably make the recognition of humane principles by the German Government appear as an unwilling concession, extorted by force of circumstances. This will necessarily remain the appearance of things, even when allowance has properly been made for the factor of national pride and for the difficulty in which the German Government might be placed, if making a larger concession, in its relations to the German people.

These are the more unpleasant considerations which will surround the really great vindication of the rights of neutrality and humanity by our Government. The situation contrasts strikingly with that created by our own Government's manner of repudiating, on the demand of the British Government, the capture of the Confederate envoys by an American warship from an English merchant vessel in 1861. The Cabinet at Washington was then divided over the propriety of yielding to the English demands, just as the German Ministry may have been divided over the Lusitania. The American people of 1861 were openly enthusiastic over Captain Wilkes's exploit, just as the German people are reported to have been over the sinking of the Lusitania. Moreover, no question of inhumanity or barbarity was involved.

Our Government yielded; but Secretary Seward, writing under President Lincoln's personal direction, declared to the British Ambassador that "what has happened has been simply an inadvertence, consisting in a departure by the naval officer, free from any wrongful motive, from a rule uncertainly established"; that "for this error the British Government has a right to expect the same reparation that we should expect from Great Britain or from any other friendly nation in a similar case," and finally, referring to the long previous controversy with the British Government over the English navy's assertion of the right to stop American ships and take sailors from them for the crew of a British war vessel, "If I decide this case in favor of my own Government, I must disavow its most cherished principles, and reverse, and forever abandon, its essential policy. If I maintain those principles and adhere to that policy, I must surrender the case itself."

One might have wished that the German Government could have extricated itself from the Lusitania controversy by a similar frank and convincing declaration.

THE RAILROAD SITUATION AS SEEN BY HOWARD ELLIOTT.

In an address on Tuesday to the Chamber of Commerce of the United States in Washington, Mr. Howard Elliott continued the earnest effort to get the country to come to reasoning together concerning railroad services and needs which he began almost as soon as he came from the West to associate himself with the largest and most unfortunate road in this section of the country. He placed in conjunction two most significant facts: first, that while the demands for railroad service have never been greater, the mileage construction in 1915 was less than in any year since 1864 and was equaled in smallness by only three years since 1848, a year which was at the very beginning of the railroad in this country. Next, the mileage which went into receivership in 1915 was exceeded only by the panic year 1893; in 1915 alone 20,143 miles, representing a capitalization of 1,0703/4 millions, went into receivers' hands, against 4,222 miles and 199½ millions of capitalization in 1914, and the total mileage in that unhappy condition was 41,-988 and over 2,264 millions capitalization at the end of 1915.

Grouping once more some figures which ought to have become familiar but are not, Mr. Elliott said that at least 1½ millions of persons directly own railroad securities and four times as many others may be justly assumed dependent on those direct owners; that insurance companies and savings banks, which are themselves owned by the common people, (the latter alone having some 11 millions of depositors and the insurance companies having 30,000,000 policy holders) have 2,300 millions of others' funds invested in railways, so that 41 millions of persons have this nominally indirect yet very close concern in railway life. More than 13/4 millions of persons are employed in railway service, and upon them an average of four or five others may be assumed to be dependent; another million, with several millions dependent upon them, are workers in industrial plants that practically live upon railroads. So much for the hazy notion that the roads belong to a few of the rich and that any difficulty they may have, either with employees who periodically demand more wages, or with politicians who keep turning the regulative screws down harder upon them, is for the roads and the rich to settle, it does not concern the common people.

Taking another point of view, Mr. Elliott pointed out (still once more) the significance of the evident fact that in a time of peace in this country the roads are congested and cannot bear their total load of transportation satisfactorily, as proved by complaint from all directions. "What could they do in their present condition" he asked "if the added burden of war were thrown upon them? Many industries would have to stop, because the railways first duty would be to handle the men and material incident to var."

Here we wish to supplement him by pointing out how extremely valuable, and really indispensable, the roads of Germany have been in her war; shifting of troops and munitions between the eastern and the western fronts of the struggle has been comparatively easy, and, furthermore, we should observe that Germany has had an advantage which this country would lack in a time of emergency, by having to deal only with comparatively short distances.

"Railway preparedness" proceeded Mr. Elliott "is therefore a vital sine qua non for adequate national preparedness; the serious freight congestion of 1906-07 and the recent one emphasize the fact that the railways have a very small factor of safety with which to meet the strain of a sudden and increased load." This is as true as arithmetic, and is it appreciated or thought of, or even noted, in Washington, in any other city of considerable size, or by the press or the persons that are talking incessantly about national preparedness for defense?

What is requisite for bettering the condition and facilities of the roads, aside from loosening the grip upon their necks? Mr. Elliott cited a report in 1912 that 8,500 millions would be needed in the next five years to keep facilities equal to demands. Net operating income is the most important factor in attracting new money, yet in the fiscal year ending with June of 1914 the increased new operating income as compared with seven years before was less than two-

tenths of one per cent of 4,500 millions of new money expended in that interval.

As to the menace now held up by the roads' employees, Mr. Elliott said that the employees now get 45.3% of gross earnings, that the demand would increase operating expenses an estimated 25 to 40%, and that the money needed "could be obtained only by either a reduction of wages of other employees, or by reduced payments of interest and dividends, or by curtailing betterment expenditures needed by the public, or by increased passenger and freight rates." As for even "the conception of a plan to paralyze the entire railway system of the United States," he pointed out how capital has been interfered with in denial of its right to do just as it pleases with its own, and why should an unrestricted similar right be conceded to labor? So he raised (and left with his hearers and the country) the question the "Chronicle" has put more than once: whether the man who elects to get subsistence by working for a public service corporation does not "enter into a moral obligation to the public to keep that corporation at work pending a dispute over wages and working conditions until that dispute is settled in an orderly manner?" To hold the affirmative and make it enforceable by law "would be no more an interference with human liberty than it is to insist that railways cannot vary rates.'

Emphatically not. This human life is full of obligations, all of them standing morally, and many of them legally, upon the proposition that those who assume them cannot toss them aside lightly for bad or good cause. This whole subject is before the people, and the people will have to learn that it cannot be made a football of politicians or be left as a mere spectacle for curious contemplation.

IMMIGRATION AND EMIGRATION IN 1915.

The principal feature connected with the movement of aliens to and from the United States in 1915 was its comparative meagerness. Still, the result is not at all surprising nor in the least out of consonance with the situation in Europe—the direction from which our immigration largely comes. From the belligerent countries, departure, if permitted, could only be accomplished, if at all, under extreme difficulties. In addition, lack of transportation facilities would act as a bar. With many steamers requisitioned for war purposes and much of the remaining tonnage engaged in the transportation of munitions and supplies, accommodation for immigrant passengers has been so greatly reduced as to be almost negligible. It is therefore not surprising that we should have to go back almost 20 years (to 1897) to find a smaller inward movement of aliens than in 1915.

The number of aliens who entered the United States in the late year was perhaps larger than expected, and yet was relatively small, reaching only 327,641 (of which 258,678 immigrant and 68,963 non-immigrant), this comparing with 848,231 in 1914 and 1,616,903 in 1913 (which is the high record of arrivals). Moreover, there was in 1915 an almost offsetting outflow made up in considerable measure of those returning to the mother country to enter the war, and consequently the net gain in foreign born population fell below that of any like period since 1908, when, as a result of depression here, the efflux of aliens was so great that a net loss of 41,198 re-

sulted. Specifically, the net gain in the foreign born in 1915 was only 43,005, against 262,853 in the previous year, 1,017,957 in 1913 and 646,742 in 1912. Details for the last five years are appended.

Alien Arrivals— Immigrant Non-immigrant	1915. 258,678 68,963	1914. 688,495 159,736	1913. 1,387,318 229,585	1912. 1,026,360 195,270	1911. 782,545 154,969
TotalAlien Departures—	327,641	848,231	1,616,903	1,221,630	937,514
Emigrant	160,641	293,635	274,209	299,385	352,423
Non-emigrant	123,995	291,743	324,737	275,503	259,050
Total Net gain in population	284,636 43,005	585,378 262,853	598,946 1,017,957	574.888 646,742	611,473 326,041

Only brief comment on the nationality of the year's arrivals seems to be called for. With the aggregate gross inflow showing so decided a diminution, it is self-evident that the immigration from practically every country exhibited a drop from even the restricted movement of 1914. In fact, in some instances the return movement exceeded by a wide margin the flow this way. In particular, Italian reservists in great numbers departed to engage in the war. Of this nationality, in fact, arrivals the last half of the year were outnumbered nearly 5 to 1 by departures, and for the twelve months the net outflow was 67,011, against a net inflow of 4,182 in 1914 and over 250,000 in 1913. The net influx of Poles dropped to virtually nominal proportions, and a marked decline in the inflow of Hebrews is to be noted-11,956 against 63,648 and 131,472, respectively, in 1914 and 1913. Russian and English departures exceeded arrivals, but of Mexicans, due to the trouble in their country, and of Irish, French, Dutch, Germans and Greeks there was a net

Analysis of the compilation covering the occupations of those who arrived in 1915 discloses nothing special worthy of note. Among the various classes of skilled workmen, important diminution as contrasted with 1914 was the rule, but quite generally arrivals exceeded departures, the exceptions being barbers and unclassed mechanics, evidently Italians in the main. In the miscellaneous, or unskilled division, ordinary laborers made up about two-fifths of the inflow, or 44,793, but against this there were departures of 150,449. Of servants and farm laborers there were small net gains.

RAILROAD GROSS EARNINGS FOR THE CALENDAR YEAR.

In reviewing the gross earnings of United States railroads for the calendar year 1915, one gets only an imperfect idea of the character and condition of the railway transportation industry for that period from the general results. The reader knows of course that the railway system is of great magnitude, with yearly revenues of tremendous proportions, the total of the annual gross earnings running in excess of three billion dollars. Our compilations to-day cover substantially the whole railroad mileage of the country and show that in 1915 aggregate gross earnings were \$3,164,299,827, as against \$3,015,678,281 in the calendar year 1914, there being thus an increase of \$148,621,546, or 4.92%. Judged merely, therefore, by these totals, the conclusion would be that the year had been one of moderate improvement, or rather that there had been a partial recovery of the loss sustained in 1914, which was a poor year throughout.

As a matter of fact, however, the year 1915 did not pursue an even course at all. As in everything else, the year in earnings was one of decided contrasts.

At its beginning the railroads were still weltering in depression and the outlook appeared discouraging in the extreme. At its close they were swimming in prosperity, making such phenomenal earnings that all previous records in that respect were broken. In the general totals we have an averaging up between the poor returns of the early months and the exceedingly good returns of the closing months. Trade and business in its activity and revival may be said to have gained increasing momentum throughout the twelve months, at first slowly and unevenly, and later with accelerating pace. But during at least the first eight months of the year, the railroads did not share in this improvement or reflect it in any way. In our review of the figures for the first half of the year, we alluded to this apparent anomaly, saying that one of the remarkable circumstances connected with the current very remarkable period was that, though business conditions in the United States, stimulated by the large war orders from abroad, considerably improved during the six months, and tone and sentiment changed very decidedly for the better, no reflection of the fact was found in the revenue returns of the country's railroad transportation systems.

In the West and Southwest some instances of considerable gains were recorded during the first six months, but these arose out of the fact that the previous season's abundant harvests, contrasted with the very poor harvests of the season preceding, had given the railroads in those favored parts of the country a greater agricultural tonnage in 1915 than they had had in 1914. The great railroad systems of the East, however, which are dependent mainly for the course of their traffic and revenues upon general manufacturing and industrial activity, gave no evidence of revival in trade sufficient to affect very materially the course of traffic or revenues. The New York Central, it was true, made some recovery (outside of the lines where the mineral traffic largely predominates, such as the Pittsburgh & Lake Erie), but on the other hand the Pennsylvania Railroad, which is usually considered a typical railroad system and representative of the country's varied activities, was at that time suffering a further considerable shrinkage on top of a

shrinkage sustained the previous year.

For the railroads as a whole in the United States, the record for the first half of the year was a loss of \$41,423,035. In the first four months there were steady decreases, and in two of these months the losses were very heavy. In May and June the general totals showed increases, but only of slight extent. This same situation continued in July and August, there being gains, but of very moderate proportions. In September, about the middle of the month, a wonderful transformation occurred, and railroad traffic and railroad revenues all of a sudden began to expand in a most notable fashion, particularly in the case of the roads in the manufacturing districts of the East, some of those in other parts of the country even then remaining laggards. The Pennsylvania Railroad achieved such distinction in September that in its statement for that month, issued at the end of October, the management deemed the occasion worthy of special mention, and in an explanatory statement pointed out that "due to an extraordinarily heavy traffic in the eastern part of the country, largely as a result of the shipment of material of most every kind manufactured for use in European countries, the gross earnings of the Pennsylvania Railroad lines east of Pittsburgh directly operated for the month of September were \$20,817,-361, the largest of any one month in the railroad's history except August and October 1913, which were but slightly larger."

The improvement on the Pennsylvania, however, was more pronounced than in the case of most other roads, and in the general total for all the roads for that month the gain was not exceptionally striking, reaching no more than \$17,783,141, or 6.43%. But thereafter the improvement proceeded at a progressive rate, all the roads gradually participating in it. For October the increase amounted to \$37,087,941, or 13.57%. In November the gain reached no less than \$66,310,622, or 27.58%, and for December it aggregated \$60,884,583, or 26.87%. Thus almost the whole of the year's gain of \$148,621,545 may be said to have been made in November and December, while for the last four months of the year the aggregate of the increase was \$182,066,287. In part the gains in the closing months were so large because comparison was with exceptionally poor results in the preceding year, occasioned by the outbreak of the war in Europe, but the 1915 gains far surpassed the 1914 losses for those months. The record of the monthly totals is furnished in the following:

	M lles Road			ings.			
Month.	1915.	1914.	1915.	1914.	Inc. (+) or	%	
	1010.	AUAT.	1010.	1014.	Dec. (-).	70	
January	246,959	243,559	\$220,282,196	\$236,880,747	-\$16,598,551	7.01	
February	246,186	242,837	210,860,681	212,163,967	-1,303,286	0.61	
March	246,848	243,598	238,157,881	253,352,099	-15.194.218	5.99	
April	247,701	245,170	237,696,378	241,090,842	-3.394.464	1.4	
May	247,747	245,207	244,692,738	243,367,953	+1.324.785	0.5	
June	240,219	235,828		247,535,879	+1,313,837	0.5	
July	243,042	241,796	262,948,115	260,624,000	+2.324,000	0.8	
August	247,809	245,754			+5,272,843	1.9	
September	245,132	243,463		276,458,199	+17,783,141	6.4	
October	248,072	247,009	311,179,375	274,091,434	+37,087,941	13 5	
November	246,910	245,858	306,733,317	240,422,695	+66,310,622	27 5	
December	242,394	241,867	287,545,679	226,661,096	+60,884,583	26 0	

For the year as a whole the gain of \$148,621,546 falls considerably short of the loss sustained by United States railroads in 1914. This loss then reached no less than \$219,701,002, or 6.79%. In 1913 and 1912, however, there were gains in both years—in 1913 \$145,727,242, or 4.76%, and in 1912 \$220,312,932, or 7.78%. This improvement for 1912, though, was deprived of some of its significance by the fact that it followed a loss in 1911, thus representing in part merely a recovery of such loss. The shrinkage in 1911 was \$31,026,566, or 1.09%, and it should always be borne in mind that the normal state of things in the United States, when there are no extraneous circumstances to interfere with the onward march of business, is one of steady growth from year to year.

If we go back to 1910 we find that there was an increase then for the twelve months of \$239,901,258, or 9.25%, and that it was additional to an improvement in 1909 over 1908 of \$282,453,959, or 11.50%. This last, however, was wholly a recovery of the prodigious loss sustained in 1908, following the panic of 1907. Our tables for 1908 registered a loss of no less than \$301,749,724; actually the loss was of still larger extent, as our figures then covered only 199,726 miles of road. Careful computations which we made at the time showed that, if we could have had returns for the whole railroad mileage of the country, the decrease in gross earnings would probably have been no less than \$345,000,000. Prior to 1908, of course, we had an uninterrupted series of gains year by year back to 1896, as will appear from the following summary of the yearly totals. The mileage covered in each year is indicated in the table.

Ton 1 40	A	Alleage.		Gross E	Carnings.	Increase (+)

1915	249,534	247,910	0.65	3,164,299,827	3,015,678,281	+148,621,546 4	.04

The part played by good crops in swelling the earnings during 1915 was by no means unimportant. The grain movement over the railroads to the seaboard ran in excess of that for 1914, which in turn had been very much heavier than that for 1913, and the grain receipts at the Western primary markets were almost up to the level of the extraordinary movement of 1914. The seaboard receipts for the calendar year aggregated 447,580,000 bushels against 373,111,000 bushels in the 52 weeks of 1914, being an increase of 74,469,000 bushels. Of this increase, 55,852,000 bushels occurred in the first 26 weeks. The details of the seaboard movement are shown in the following:

GRAIN AND FLOUR RE	CEIPTS AT	SEABOAR	D FOR 52 W	EEKS.
Receipts of— 1915. Flourbbls_ 26,793,000	1914. 24,075,000	1913. 13,606,000	1912. 18,754,024	1911. 19,279,879
Wheatbush.216,318,000 Corn51,526,000 Oats149,078,000	31,614,000 75,058,000	51,003,000 54,070,000		68,194,983 47,296,134
Barley 15,773,000 Rye 14,885,000 Total grain 447,580,000	8,556,000	3,031,000	1,154,183	1,041,677

At the Western primary markets there was a further increase in the receipts of wheat, but a falling off in both corn and oats, though some gain in barley and rye. Altogether the receipts of wheat, corn, oats, barley and rye for the 52 weeks of 1915 reached 998,903,000 bushels as against 1,012,568,000 bushels in 1914 and 950,643,000 bushels in the 52 weeks of 1913. The details of the Western grain movement in our usual form are set out in the following. It deserves to be mentioned that in the first 26 weeks the receipts at the Western primary markets showed an increase of 34,324,000 bushels, from which it is evident that in the last 26 weeks there was a falling off of 47,989,000 bushels.

The cotton movement in the South also ran heavier than in the preceding year, wholly, however, by rea-

son of the gains in the first half of the year, when the 1914 crop, which was of extraordinary dimensions, and the marketing of which in 1914 was delayed by the outbreak of the European war, came forward. The shipments overland for the twelve months of 1915 reached 2,277,433 bales, against 1,654,171 bales in 1914 and 1,757,582 bales in 1913. Of the gain over 1914 of 623,262 bales, 459,903 bales was made in the first six months. The receipts at the Southern outports for the twelve months were 9,734,000 bales, against 7,953,651 bales in 1914 and 9,533,855 bales in 1913. In this case the gain over 1914 is 1,780,349 bales, which is less than the gain of 2,240,009 bales made in the first six months. The receipts at each of the ports for the last six years appear in the table we now annex.

RECEIPTS OF COTTON AT SOUTHERN PORTS FROM JANUARY 1 TO DECEMBER 31 1910 TO 1915, INCLUSIVE.

The live stock movement in the West appears to have been larger than in the preceding year, except that there was a big decrease in the receipts of sheep at Chicago. The cattle receipts at that point were roughly 2,260,000 head, against 2,237,881 head in the calendar year 1914; the receipts of calves, 423,000 head against 363,614; of hogs 7,678,000 against 6,618,166; of horses 166,000 against 106,282; but of sheep only 3,512,000 head against 5,378,345. together, the live stock receipts at Chicago foot up 14,039,000 head against 14,704,288 in 1914. At Omaha, the live stock report of the Union Stock Yards Co. shows receipts of cattle for 1915 of 1,218, 342 head against 938,817 for 1914; of hogs, 2,642,973 against 2,258,620; of sheep, 3,268,279 against 3,113,-889, and of horses and mules, 41,679 against 30,688, making the total live stock movement at that point 7,171,273 head against 6,342,014 in 1914.

At Kansas City the receipts of cattle were 1,860,235 head against 1,827,246; of hogs 2,530,730, against 2,264,805, and of sheep 1,814,683, against 2,002,042, making the total live stock receipts at that point 6,205,648 head, against 6,094,093 in 1914. The South Omaha "Daily Drovers Stockman-Journal" has made up a statement covering eight other points besides Chicago, South Omaha and Kansas City, and from this it appears that the total live stock movement at the whole eleven markets reached 49,006,924 head in 1915, against 44,905,125 head in 1914.

In trade and business the tendency was in the direction of growing activity, particularly in the iron and steel industry, which was stimulated beyond all others by war orders on behalf of the belligerent countries of Europe. The manifestation of this activity, however, did not become strongly pronounced until about the middle of the year, owing in part, no doubt, to the circumstance that plant and equipment had to be provided for turning out shells and other munitions of war on a scale commensurate with the huge requirements of the Entente countries.

All the statistics furnish evidence of the increased

The make of pig iron in the United industries. States for the twelve months was roughly 30,000,000 tons, against 23,332,244 tons in 1914 and 30,966,152 tons in 1913. In the first half of 1915, however, though the product kept increasing month by month, the output was only 12,233,791 tons; in December the make was at the rate of 39,000,000 a year. The U.S. Steel Corporation reported unfilled orders on the books of its subsidiary companies Dec. 31 1915 of 7,806,290 tons, against only 4,678,196 tons June 30 1915 and 3,836,643 tons Dec. 31 1914. The Lake Superior iron ore shipments for the season of 1915 reached 46,318,804 tons, against 32,021,897 tons in the season of 1914 and 49,070,478 tons in the season of 1913. The shipments of Connellsville coke in 1915 were 17,920,841 tons, against 14,075,638 tons in 1914, but comparing with 20,097,901 tons in 1913.

Anthracite coal production, as it happened, did not equal that of the preceding year, the decrease being due to the failure of dealers and consumers to purchase coal during the summer months and to take advantage of the spring and summer discounts. Weather conditions, it is proper to state, were not much of a drawback anywhere in the early months of the year, the winter having been open and mild in 1915 as it had been in 1914 and in 1913. Aggregate shipments of anthracite to tidewater were only 66,-122,062 tons in 1915, against 68,342,601 tons in 1914 and 69,069,628 tons in 1913. Shipments of bituminous coal, however, and of coke—at least over the roads running through the Eastern manufacturing and mineral districts—were generally heavier than in the year preceding. Over the Pennsylvania Railroad lines east of Pittsburgh and Erie the shipments of both anthracite and bituminous decreased slightly, the former 70,048 tons and the latter 168,116 tons; the coke shipments, however, increased no less than 2,524,160 tons. The combined shipments of coal (anthracite and bituminous) and coke over the Pennsylvania Eastern lines in 1915 were 67,570,921 tons, against only 65,284,925 tons in 1914, but comparing with 76,130,427 tons in 1913. In the first half of 1915 these shipments over the Pennsylvania lines registered a decrease of 2,046,173 tons, from which it follows that there must have been an increase in the last six months of about 4 1-3 million tons.

Contrary to the experience in the previous year, strikes and labor troubles played little influence in affecting the volume of traffic over the roads, and, as already indicated, weather conditions also exercised little or no adverse influence on railroad traffic or railroad operations. A distinct favoring circumstance, though on the whole of minor consequence, was the fact that the Inter-State Commerce Commission granted some relatively slight increases in rates in the case of a few commodities and in limited districts.

In face of all this, there are not lacking roads which have sustained important decreases. This shows that conditions were not altogether favorable during the year. The roads with losses are most of them found in the South, and in that part of the country very decided depression prevailed during all of the early portion of the year, owing to the collapse in the price of the South's main staple, cotton, following the outbreak of war in Europe in the summer of 1914 and the cutting off of much of the European demand for the staple. As 1915 progressed, the price of cotton improved, and the latter part of the year the South shared in the general trade revival and imactivity of the iron and steel trades and the related portant gains on this group of roads occurred to ofiset the early losses. In other words, at one time during the course of 1915 the aggregate of losses was considerably larger than it is now found to be at the end of the twelve months.

Taking the roads that have suffered a falling off for the twelve months in excess of a half a million dollars, they are all without any exception Southern lines. The shrinkage in earnings followed not from any contraction in the cotton traffic itself—this, indeed, having, as already pointed out, been much heavier than in 1914—but from a diminution in general traffic due to the fact that the war dealt the South such a serious blow and that exceedingly gloomy views as a consequence prevailed for many months. Southern Railway falls \$2,723,807 behind as compared with the calendar year 1914; the Atlantic Coast Line has lost \$2,518,592, the Seaboard Air Line \$1,131,171, the Louisville & Nashville \$989,439, the Mobile & Ohio \$759,225, the Kansas City Southern \$753,466, the Central of Georgia \$750,362, the Trinity & Brazos Valley \$630,757, and the Illinois Central (which has a line to New Orleans) a decrease of \$535,-This comprises all the roads whose losses There are some other roads with exceed \$500,000. losses below that amount, but these, too, are mostly in the South. The remaining roads consist of lines or systems which have had special drawbacks of one kind or another to contend against. Thus the New York Ontario & Western reports a decrease of \$397,-963, but the shipments of anthracite to tidewater over that road in 1915 were only 2,088,577 tons against 2,352,486 tons in 1914.

After all, however, the roads with decreases cut a small figure in the year's results, and we refer to them at length here merely so that the reason why they form an exception to the rule should be clearly understood. The gains overshadow the losses to a preponderating degree, and some of them are of prodigious dimensions. The bulk of the gains, too, in nearly all cases was made in the closing months of the year. As indicating the magnitude of the improvement for the twelve months, the Pennsylvania RR. on the lines directly operated east and west of Pittsburgh and Erie shows an increase of no less than \$17,841,958. The amount is brought up to \$20,755,357 when all the lines owned and controlled which make monthly returns to the Inter-State Commerce Commission are taken into consideration. The New York Central, with the Lake Shore and the other lines recently merged in the same, shows an augmentation as compared with the previous year (the 1914 figures having been revised to bring them to the same basis) of \$15,572,860. Adding the various auxiliary and controlled roads, like the Michigan Central, the Big Four, the Nickel Plate, &c., the whole going to form the New York Central System, the result is a gain of **\$27**,329,830. The exhibits of these two important systems afford an indication of the magnitude of the improvement for which the year is distinguished.

But in other parts of the country there are equally noteworthy gains, though not quite so large in amount. The Southern Pacific, for instance, added \$9,872,736 to its total of the previous year, and the Atchison \$9,239,768. And this calls attention to the fact that out on the Pacific Coast several of the large systems derived important benefits from the travel to and from the Panama Pacific Exposition at San Francisco. The trans-continental lines further

continued more or less depressed, business particularly in the lumber industry, until well towards the end of the year. For the Great Northern Ry. the gain for the twelve months is only \$1,019,497, and for the Northern Pacific \$1,131,692, and the Chicago & North Western and the Burlington & Quincy have gains respectively of \$1,116,989 and \$1,603,487. Even the Union Pacific has an incresae of no more than \$2,785,621. The Milwaukee & St. Paul, on the other hand, has added \$5,018,239 to its total of the previous year. On account of the urgent demand for iron ore in connection with the revival of the steel trade, the roads serving the Lake Superior iron ore districts are able to show very large amounts of gain, notwithstanding that the roads themselves comprise only a relatively small mileage. The Duluth Missabe & Northern shows an augmentation of \$4,910,366 and the Duluth & Iron Range a gain of \$1,432,928. The Bessemer & Lake Erie has a gain of \$1,425,671 and the Elgin Joliet & Eastern of \$1,343,449, these latter two being also ore-carrying roads though not from the Lake Superior regions. Speaking generally, the roads everywhere had a good year outside of the South, though the extent of the improvement varied considerably and was governed more or less directly by the character of the returns in the year preceding. In 1914 losses were common to nearly the whole railroad system of the country, but some roads then suffered more severely than others. The ore-carrying roads, for instance, which for 1915 have such large gains, in 1914 were equally distinguished for the extent of their losses. In the following we show all changes for the separate roads for amounts in excess of \$500,000, whether increases or decreases.

Colorado & Southern (3) 1,086,190 in our compilation...\$10,800,558

Note...—Figures in parenthesis after name of road indicate the number of lines or companies for which separate returns are given and which we have combined so as to make the results conform as nearly as possible to those given in the statements furnished by the companies themselves.

a This is the result for the Pennsylvania RR.. together with the Pennsylvania Company and the Pittsburgh Cincinnati Chicago & St. Louis, the Pennsylvania RR. reporting \$9,376,318 increase, the Pennsylvania Company \$6,159,350 gain and the P. C. C. & St. L. \$2,306,290 gain. Including all lines owned and controlled which make monthly returns to the Inter-State Commerce Commission, the result is a gain of \$20,755,357.

b These figures cover merely the operations of the New York Central itself. Including the various auxiliary and controlled roads, like the Michigan Central, the Lake Shore, the "Big Four," the "Nickel Plate," &c., the whole going to form the New York Central System, the result is a gain of \$27,329,830.

c These figures are for eleven months only.

In the foregoing we have been dealing entirely with the gross revenues of the railroads. Net earnings followed an independent course. In their case there was an improvement month by month throughout the whole year with the exception of the opening month, January. Gains of considerable amount were reported even when the gross was recording material falling off. The outlook for the carriers appeared to the north naturally benefited only indirectly from so dismal that as a matter of self-preservation rigid the Exposition, and on the North Pacific Coast curtailment of expenditures had to be practiced.

Repairs and renewals were kept up, of course, but only strictly necessary outlays in these respects incurred. When gross receipts all of a sudden began to expand in singular fashion in the closing months of the year, repair work was still on the modest basis arranged at the beginning of the year, and as a consequence the greater portion of the large gains in gross now being recorded were saved for the net. The result was ratios of improvement in the net which have rarely if ever been equaled. Large systems like the New York Central and the Pennsylvania were able to show gains in net in some of the monthly returns of fully 100%. As indicating the accelerating rate of growth for the roads as a whole, we may note that in August the increase in net was \$10,039,578, or 11.21%; in September it was \$18,546,361, or 19.90%; in October, \$30,079,562, or 33.70%; in November no less than \$50,002,894, or 73.52%, with the December figures still to come. Complete returns of the net for the calendar year are not yet available and will be dealt with in a separate article two or three weeks

To complete our analysis we now insert six-year comparisons of the gross earnings of leading roads, arranged in groups.

GROSS EARNINGS FOR JANUARY.

The first month of the year opens in promising fashion as far as railroad earnings are concerned. From present indications the amount of gain is not likely to reach the extraordinary dimensions of that for December or November, the two months immediately preceding, and yet is certain to reach a very considerable sum. The early compilation which we present to-day makes that fact plain. This compilation comprises mainly Western graincarrying and Southern cotton-carrying roads, together with the three leading Canadian systems, namely the Canadian Pacific, the Canadian Northern and the Grand Trunk Railway with the Grand Trunk Pacific. Altogether, we have an aggregate of 90,860 miles of roads and on this mileage there is an increase of \$11,475,887, or 20.48%, as compared with the earnings of the same roads for January of last year. As indicating that the improvement is diminishing we may note that for December our early compilations comprising substantially the same mileage, showed a gain of \$20,778,954, or 32.81%.

If, however, the improvement is not of the same extraordinary dimensions as before, it is yet of satisfactory amount, and what is more, is general in its nature, the only exceptions to the rule being a few Southwestern roads. It must also be remembered that the improvement has occurred in face of a great shrinkage in the cotton movement in the South. The last cotton crop was a small one, as is known, and there was likewise a curtailed foreign demand for it. The result has been a heavy contraction in the movement of the staple to market. It is a noteworthy circumstance that the leading Southern systems are able to show large gains in gross earnings, notwithstanding the smaller cotton traffic. The Louisville & Nashville has \$910,279 gain, and the Southern Railway \$768,785 gain. The situation now as regards these Southern roads is just the reverse of that a year ago. Then there were heavy losses in earnings in face of a larger cotton movement while now there is decided improvement, notwithstanding a contraction in the cotton movement again. But last year there was business depression in the South, while now there is business revival. The whole thing merely goes to show that the state of business is a more potent factor in affecting railroad revenues than the size and extent of the crop movement.

It deserves to be mentioned, likewise, that unfavorable meteorological conditions have also played their part in curtailing the revenues of one group of roads. Here in the East and over the United States generally there has been little occasion for faultfinding as to the weather, the winter having been mild and open, the same as in January of the three preceding years—barring limited local districts here and there. Out on the Pacific Northwest, however, weather conditions of unusual severity, with snowfalls of exceptional depth, have been encountered. As one illustration of the snow troubles it may be noted that early in the morning of January 22d several persons were killed and a still larger number injured when a westbound Great Northern Cascade Limited train was struck by an avalanche of snow near Corea Station. Corea is about 100 miles east of Seattle and the train had been held at that point by a small snowslide. When the track was about cleared an avalanche broke from the mountain and caught the dining car and day coach, carrying them down the mountainside like chips. The diner then caught fire and was destroyed. Again, dispatches from Seattle last Saturday (February 5) stated that transcontinental trains had begun to get through the mountains that day for the first time in a week. Two eastbound trains from Seattle, it was stated, had penetrated the Cascades and proceeded on the Northern Pacific Railroad. The Great Northern was then still detouring its trains. but counted upon a clear line by midnight. The Milwaukee & St. Paul expected that its rotary snowplows would give it also a clear track by night. Trains from the East had then begun reaching Portland, Oregon, following a four-day blockade, according to the dispatch in question.

Of course, comparison is with poor results a year ago and that fact must be taken into account, for it indicates that this year's January improvement is mainly a recovery of last year's losses. As a matter of fact, the gain now recorded is but little larger than the amount of the falling off in January of last year. Our early statement for January 1915, covering a somewhat larger mileage than is represented the present year, registered a decrease of \$10,072,625, or 9.50%. Moreover, this followed a decrease even in January 1914, when our early statement showed \$3,713,220 decrease, or 5.32%. To be sure, in 1914 we were comparing with a period of very large increases in January 1913, but the extent of these increases was in a measure misleading, inasmuch as they followed from the fact that the weather was so extremely mild then, while in January 1912 meteorological conditions had been the worst experienced for a generation, with the effect of seriously curtailing railroad revenues at that time.

As an indication of the effect exerted by adverse weather conditions in January 1912, we may note that our early statement for that month registered a decrease. This decrease was not large, being no more than \$103,181, or barely 1-5 of 1%. The showing at that time, however, would have been a great deal worse except for the fact that the Canadian systems were then still reporting phenomenal gains, the three having contributed altogether an increase of \$1,997,547. With these eliminated, the result for the roads in the United States would have been a loss of \$2,100,728. Nor were the earnings for January 1911 particularly good. Our early January statement for that month showed only \$1,360,699 increase, or 2.31%. Prior to 1911 there were some noteworthy records of expansion. The following furnishes a summary of our early January totals back to 1897. From this it will be seen that, except where weather conditions interfered seriously with railroad transportation, or where panicky conditions prevailed in business, the January record prior to the year 1912 was one of continuous growth:

Janua	PM	A	fileage.		Gross Earni		ings.

Note.—Neither the earnings of the Mexican roads nor the mining operations of

We have referred above to the falling off in the cotton movement. The shipments overland were 296,871 bales, against 234,173 bales in January 1915, 230,506 bales in January 1914 and 247,176 bales in January 1913. The diminutive character, however, of this year's movement appears only in the receipts at the Southern outports, which for January amounted to only 669,937 bales, against 1,799,080 bales in January 1915 and 1,166,295 bales in January 1914. At many of the ports the receipts were only about one-third of those of last year, as will be seen from the following:

The Western grain movement as a whole apparently did not differ greatly from a year ago. The receipts of corn were heavily reduced, but on the other hand, the deliveries of the other cereals and particularly of wheat, greatly increased. Combining wheat, corn, oats, barley and rye, aggregate grain deliveries for the four weeks ending January 29 the present year were 96,646,000 bushels, against 95,284,000 bushels in the corresponding four weeks of 1915. For the four weeks of 1914 the aggregate was no more than 63,598,000 bushels. In the following we give the details of the Western grain movement in our usual form.

As far as the separate roads are concerned the Missouri Kansas & Texas is the only company showing a decrease of any substantial amount, its loss being \$383,440 and explained, no doubt, by last season's short cotton crop and the small amount of it coming to market. There are also five other roads with decreases, but they are all inconsequential. In the following we bring together all changes for the separate roads, whether increases or decreases, for amount in excess of \$30,000.

ANIAMERICAN ABROAD IN DEFENSE OF GERMANY.

Lausanne, January 10 1916. To the Editor of the Commercial & Financial Chronicle, N.Y.

Sir:-The article in your issue of November 27th last, entitled "Patriotism and Plunder," in which you take as your illustration the history of the growth of Prussia from the Great Elector to Emperor William I, calls for a few suggestions from the impartial in the interest of unbiased conclusions. To those of your readers who are familiar with the general subject, it will no doubt have occurred at once that the conquest, absorption, or "progressive aggrandizement" you recall, is not at all peculiar to Prussia-or Germany, but is equally applicable to all the other great modern States, all of which have grown from small beginnings orembryos.

England absorbed Scotland, Wales and Ireland (and her digestion of the last of these is, after centuries, as unfinished as is the case with the very recently "absorbed" Alsace-Lorraine). The various dukedoms into which France was once divided were (mostly by force and conquest) finally united into a kingdom which reached its apogee under Louis XIV. The dukes of Savoy by a long series of conquests finally reached the kingly throne of united Italy. Russia's growth into its present colossal proportions presents the same sort of "progressive aggrandizement" on a much larger scale. Even little Switzerland has grown from the original three cantons into the twenty-two of our day. Yes, even in our case, the "struggling colonies" have expanded (not entirely without "conquests") into our present United States.

Why not see in all this procession of facts the accomplishment of the laws of historical evolution in one case as in that of all the others? The details vary—some developed earlier and others, like Italy and Germany, only comparatively recently-but the process and results are in all cases (except heterogeneous Russia) the same, namely the national union of relatively homogeneous populations.

But when we come to consider colonial expansion, or conquests on other continents, the difference, as a map of the world shows plainly, becomes very great, and the following quotations from Professor Burgess's instructive little volume "The European War" (p. 97), indicates this difference very plainly. From 1890 to 1910 Great Britain "acquired nearly 2,000,000 square miles of foreign territory, Russia almost as much, France 600,000 to 800,000, Belgium 1,000,000, and even the United States of America about 150,000; while Germany in this same period "acquired less than 200,-000, and then in about every case, by purchase or lease, while "all the other countries seized most, if not all, of their gains by military conquest." Again, "Germany does not find it necessary for her existence to be continually grabbing the territory of the world for colonial markets. The open door is all Germany needs." And finally, "Her economic system is thus not the system of a land-grabbing empire."

The two exhibits (1 and 2) herewith, supply details in

EXHIBIT II. Some of Great Britain's conquests and other additions to her domains since 1870

(not including many islands in Asia and	I in the Mediterranean):
Asia. 1877—Beluchistan.	Africa (continued). 1885—Nigeria. 1887—Zululand.
1888—North Borneo. 1890—Sikhim (taken from China). 1905—Hinterland of Aden.	1887—Zululand. 1888—Rhodesia (acquired). 1896, &c.—Soudan.
1909—Federated Malay State. Africa.	1900—Orange Free State. 1900—Transvaal Province.
1871—Basutoland. 1882—Egypt (occupied).	1901—Somaliland. 1914—Definite protectorate over Egypt (Dec. 17).

ome of France's conquests or acquisitions since 1870: -Tunis (protectorate). -Congo. -Tonkin and later Anam (taken

from Siam). As for Japan (the most recent and comparatively strongest of "militarist" nations), her conquests are too recent to require repetition here.

ory (occ ed since the days of Peter the Great, and avowedly will not be arrested until she shall possess an iceless port,

Your article also contains an account furnished you by "returning Americans" of the "shipment" home to France of the helpless population in the invaded Departments, and you present this as "plunder" in an "advanced stage" and to give color to such interpretation, you ascribe this "shipment" to sinister "motives" on the part of the invader. You have evidently been completely misled. No doubt these civilian passengers on these trains crossing Switzerland into France are in sore straights, victims of the war—their homes destroyed, and a year passed without work or wages—as for their appearance, it is not so much different from what is to be expected when viewed by those familiar with the normal appearance of the not over prosperous populations of the factory and mining towns of Northern France, whence they come.

But as to the "motives," permit one familiar with this matter from its inception (having resided here since the war broke out) to say that what has taken place is the result of successful negotiations between the two belligerents, through Switzerland as mediator. The negotiations were successful because both parties wanted it so. France wants these of her sturdy women and children back into her fold in safety. Aside from the humane reason, she has the economic one of preserving all she can of her population, now more than ever. As one who has talked with many of them, let me say how grateful they are to have been chosen among so many, to leave the war zone with all its dangers and privations. Your informants err in stating the number as more than 100,000—as official returns show less than 32,000 at the date of your issue—the movement has now again begun.

Consider that all the north of France looks forward to the day when the French army shall wrest the invaded territory from the enemy, but they realize that this conquest will be only step by step, and that the effects of battles and bombardments will leave only the ruined country and smoking cities with all the risk of tremendous and widespread loss of life among the civilians. The return of these French populations to the protection of their flag is, therefore, like the interchange of the mutilated prisoners, one of the humane acts of this war which should be so cited and signalled, as distinguishing it from all previous wars. And it is a pleasant duty to add—all honor to humane Switzerland for her tender charitable and efficient help and mediation.

P. S. The general tenor of your article makes it perhaps not amiss to recall that of all the Governments of the great European States, that of the German Empire most nearly resembles our own; it is a confederation of twenty-four independent States, each with its own executive, judicial and legislative departments, acting under a written constitution adopted by delegates chosen by universal manhood suffrage, and ratified by the legislatures of the different States. Over and above these States, and following our model, is a national judiciary with federal jurisdiction and a national legislature consisting of the lower or popular branch, and the higher representing the States. The Emperor's powers and duties are as clearly defined as those of our President. It is evident how far the Government of such a State is removed from the arbitrary, the autocratic and the centralized form of government so often held up to our contemplation as attributable to the said Empire.

PIERRE JAY ON THE DEVELOPMENT OF A DISCOUNT MARKET AS AN AID TO FOREIGN TRADE.

At the National Foreign Trade Council in New Orleans at the end of January, Pierre Jay, Federal Reserve Agent of the Federal Reserve Bank of New York, delivered an able and instructive address on the subject of the development of a discount market in this country as an aid to our foreign trade, and we print the address in full below. In prefatory remarks he deals with the London discount market, and his description of that market is the best we can recall having seen. Mr. Jay makes it plain, as have many others who have discussed the subject, that London has brought its discount and acceptance business to such a state of scientific perfection and has attained such a distinct position of superiority through the course of years that English supremacy in that regard is not likely to be seriously endangered, but that we can nevertheless build up an international credit market of our own in the course of time if we closely study the requ concludes with the statement that "The permanence of our position as bankers for our own trade will depend largely upon the skill with which we create facilities at least equal to those enjoyed by our competitors, and upon the assurance which we can afford to the world that a bill drawn in dollars for acceptance by an American bank, can be converted into cash in any part of the world with any bank in the world, either American or foreign owned, at rates of exchange which are stable and dependable and upon the like assurance that

such bills, when accepted, can be converted into cash here at rates at least as low as those prevailing in any other money centers of the world." All of which indicates that the undertaking is not going to be an easy one. Mr. Jay says:

In discussing "the development of a discount market and its relation to our foreign trade," it will be well first to describe briefly the London discount market in order that what is desired in this country may be clearly understood.

THE SITUATION IN LONDON.

The development of modern international commerce has made London the settling market, and the sterling bill the settling medium, of the world. England's vast foreign trade, her shipping and her overseas investments bring a constant flow of funds to London. Gold moves freely in and out of London, and London banks and bankers keep revolving there a great volume of credit instruments, of instant negotiability and recognized the world over as the most liquid of bank investments. It is these acceptances, the direct or contingent obligations of banks and bankers, which constitute the London discount market. Paris and Berlin, and to a lesser extent Amsterdam, are also settling centers and have their discount markets, but the volume is relatively light, and the transactions are more between banks than in the open market through brokers.

banks than in the open market through brokers.

Paris, Berlin and Amsterdam finance much of their own foreign trade. England finances not only its own but the foreign trade of many other nations, including the greater part of ours. Foreigners settling for goods, foreigners settling for freight, foreigners settling for interest, and foreigners settling for the financing of their commerce, make a constant flow of funds towards London. London funds are in demand in every corner of the globe, and the sterling bill has a currency far above that of any other. Just as in many of our clearing houses, differences are settled in New York funds, so in many parts of the world, especially in countries where the gold standard is not firmly established, local and international balances are settled in London funds.

At the London end the credit mechanism has been highly developed. The banks give credit not merely by discounting notes and drafts, or opening drawing accounts, but also by accepting drafts payable in from sixty to one hundred and eighty days, for which a commission of from ½ to 1%, or from 1 to 2½% per annum, is charged; the customer agreeing to provide funds to meet the acceptance shortly before it matures. Until recently these acceptance credits have been granted primarily by a few firms with large capital which make this their sole business, and only to a limited extent by the clearing banks. The latter, having other kinds of liabilities, accept more moderately in proportion to their capital than the acceptance houses. The volume of acceptances normally outstanding has been estimated at considerably in excess of £300,000,000.

The advantage of credit extended by bankers' acceptance is:

(1) It does not use the funds of the acceptor;
(2) It transforms a commercial obligation into a bank obligation and:
being based usually upon the movement of goods, it is of a self-liquidating

nature.

Accepted bills are distributed mainly through the medium of the bill brokers, who either sell them to the discount companies and houses, or carry them for their own account; occasionally they sell them to the clearing banks. The discount houses also assist in the distribution. Not only is active trading carried on in bills just accepted, but bills held by banks, discount houses and brokers are constantly changing hands to meet their requirements for funds or their views of the probable course of money rates. Back of the market at all times stands the Bank of England, itself a ready buyer of and lender on bills at its minimum discount rate, which regulates the market, but is generally slightly above the rate at which bills are actually moving. Except in times of crisis the rates are low and

fluctuate within narrow limits, judged by American standards.

The Bank of England is prepared to relieve the market in case a sudden tightening of money should raise market rates to the Bank's minimum rate. The Bank also goes into the market and buys bills below its rate if for any reason it wishes to raise the rates to protect its reserves.

One cause which contributes to this stability is the number of different parties to the discount market, each approaching it from a somewhat different angle; the acceptor who gets his accepting commission; the broker who gets his settling commission, but may also be interested in seeing rates decline; the bank buyer, who is interested in getting the best rate for his money; and the discount house, whose position may be either like the bank, that of an investor, or like the broker, that of an operator for a decline. The resultant of these forces is a steady rate but one which moves largely in accordance with the ebb and flow of commerce, credit and gold.

The primacy of the sterling bill has compelled important banks and merchants all over the world to keep funds in London, and many foreign banks to maintain branches in London, in order to facilitate the dealings in sterling bills which they are inevitably compelled to transact. Over 150 such banks maintain London offices; they are not only acceptors, but also buyers or sellers of bills according to their judgment of the profitable course from time to time to be pursued.

The sterling bill is also a favorite international investment. When the discount market is higher in London than in Continental centers, banking funds not needed at home will flow to London for investment in bills, returning when the London rate has been equalized, or when home demands quicken. This influx and return of foreign funds has been another potent influence in keeping the London discount rate steady and enabling London to finance cheaply its own and other foreign commerce.

With these bills, which are either the direct obligations of banks or

With these bills, which are either the direct obligations of banks or bankers of the highest credit, or bear at least one bank indorsement, the security of individual names is scarcely necessary.

scrutiny of individual names is scarcely necessary.

Prime bills sell or change hands like so much cotton or wheat. There is always a market for them at a price, and almost the sole consideration which leads to buying or selling is the present or prospective discount rate. The Bank of England keeps a watchful eye over the market, which serves to restrain the granting of excessive acceptance credits, for no prime acceptor could afford to have his bills declined, or even discriminated against in rate, because of an over-supply of them in the market.

THE SITUATION IN THE UNITED STATES.

What was the situation in the United States prior to the European war and the inauguration of the Federal Reserve system? Our banks had no authority to grant acceptance credits and our merchants and manufacturers had to depend almost entirely on London or Continental centers for the credits upon which their foreign purchases and sales could be financed. New York could not become an international credit market, attracting to it at favorable times the banking funds of other nations, because unlike London it had no credit instrument of the necessary standard of safety liquidity and instant convertibility, and no open discount market. A few European banks occasionally lent money here on call, but the free movement of European banking funds to this market when rates were attractive has not been practicable. We have had no satisfactory medium through which we could ease a credit strain either by attracting funds from

other markets or by throwing off upon other markets a portion of the

burden carried by our banks.

At the beginning of the European war, the customers of some of the larger New York institutions, finding themselves cut off from their London credits, sought similar credit facilities in New York. Having just received authority to accept bills, these institutions promptly adjusted themselves to the new conditions. The kind of bills which they had formerly been buying and sending forward to London for acceptance, they now accepted themselves under special arrangements. The bills were sold in the United States and the beginnings of a discount market were established.

In New York only about a dozen national banks, State banks, trust companies and private bankers have thus far accepted bills in substantial volume, although the number is constantly increasing. A few banks in Boston, Philadelphia, New Orleans, Charleston and elsewhere are also taking advantage of the new privilege. Under present abnormal condi-tions some banks have preferred making direct advances at going rates to accepting for the smaller commission of 1% to 2% per annum. them, during the present period of surplus reserves and relative scarcity of loans, have purchased their own acceptances from their customers. The amount of bills actually offered in the open market has been reduced and dealings in them somewhat retarded by this practice, as well as by the custom which some banks have of offering their acceptances direct to the Federal Reserve bank. In view of the desire of Federal Reserve banks to accumulate a substantial volume of acceptances to cover operating expenses, the custom has not been discouraged, but eventually, if we are to have a really open market, dealings must not be direct between the accepting bank and the purchaser of the bills, but must be conducted through the medium of brokers in the open market, just as in the case of securities cotton, wheat, or other commodities.

At present three or four brokers in New York have interested themselve in acceptances. But the commissions and volume are so small and the rate on acceptances is so low, having stood for several months at about 2% for prime acceptances covering imports or exports, that they look upon their acceptance dealings as very much of a side issue. The total volume has probably not much exceeded \$100,000,000 to \$125,000,000 at any time Some State laws authorize State institutions to accept for domestic as wel as foreign transactions and a considerable proportion of the total volume of acceptances is composed of bills based upon the movement or storage of goods within the country. It is to be hoped that national banks will soon receive this privilege as well, and that their domestic acceptances will substantially swell the volume of bills now current in the market.

It has been suggested that the relatively small volume of acceptance credits which has been availed of is perhaps a reflection upon the enterprise of American banks, but I am satisfied that even under the exeptional opportunities now prevailing this has not been due to any unwillingness or lack of enterprise on the part of the banks, but to far more fundamental diffi-culties and obstacles quite beyond their control, of which I will mention a few of the more important.

In the first place, but few, even of the large banks, have foreign connec sufficiently extensive for the prompt development of the use of their

credit facilities in large volume.

Second, with but few exceptions the buyers of bills originating in foreign countries are not American. They do not know whether the discount market in New York is a permanent or only a temporary one, or which of the multitude of American banks it ranks as "prime" acceptors. They naturally prefer bills drawn in a currency recognized as the standard the world over to bills drawn in a currency relatively new in international trans-actions, and consequently do not quote as low rates on dollar as on sterling bills. Figuring exchange in dollars is new to them, and the conversion of prices into dollars through the medium of sterling is often an unfavorable

Third, besides this natural reason, there is a patriotic reason as well, for the largest and most important of the foreign trade banks operating outside of Europe are English owned, with head offices in London, and their influence may be counted on to preserve for London and the sterling bill their primacy in international settlements. They do not look with favor upon the entrance of a strong competitor into the field.

Fourth, this feeling is no less strong in London than in the distant places of the earth. The joint-stock banks and the accepting houses there, whose names have given the sterling bill the highest international currency, have no desire to lose any part of this busines

Fifth, prompt delivery of bills to their destination being fully as important for their currency as the prompt delivery of goods, the dollar bill is at a dis-advantage compared with the sterling bill in every place in which the mail communication with America is not equal to the mail communication with

sixth, in distant countries like the Orient and South America, especially while sterling exchange is in the present fluctuating condition, another consideration militates against the dollar bill. The purchaser must figure not only the usual time, interest and other factors attaching to any bill, but in the case of the dollar bill, unless the movement to and from America substantially balances, he must figure also the probable cost of transferring the proceeds of the bill from New York to London, for London is the settling center and it is there he wants his funds, not in New York.

When these and other obstacles have been gradually lessened and overcome, we should be in a position like England, to finance not only our own foreign trade but the foreign trade of other countries as well. Naturally, however, the development will follow the line of least resistance and the first efforts will be concentrated upon financing our own foreign trade.

RECENT PROGRESS

What progress towards the removal of these obstacles to the development of a discount market have eighteen months of the war and the Federal Reserve system brought about?

First, an enlargement of our banking power anticipating over a decade of normal growth, which, if retained after the war is over, should permit large credits to be extended in aid of our foreign trade.

Second, a volume of bankers' acceptances which, however modest, would

normally have taken years to create.

Third, a beginning of the establishment of American banks and branches of American banks in foreign countries needing capital, primarily in South tering of foreign-trade banks and permit national banks to hold their stock. The National City Bank of New York has established several branches in South America and acquired the International Banking Corporation, with several branches in the Orient. Private bankers in New York have organized the Mercantile Bank of the Americas to operate in Central and South America

Fourth, a realization by our banks and bankers that part of their vast resources, hitherto devoted almost exclusively to domestic development can and should be permanently and profitably employed in developing trade and financial relations with debtor countries abroad.

Fifth, a beginning of lending abroad, the aggregate loans for the year 1915 having been nearly a billion dollars; and coincidently therewith the

re-purchase during 1915 of our securities from abroad to an extent estimated at not less than a billion dollars in addition.

Sixth, the organization of the American International Corporation to

facilitate investment in and trade with foreign countries.

Seventh, the adoption by the Federal Reserve banks of the policy of abilizing the discount market by buying bills freely at low rate

The progress is undoubtedly substantial, but as yet neither the volume nor the number and kinds of parties interested in the discount market, are sufficient to make it either real or stable.

How can further progress be made and the volume increased until a real market is developed? One sometimes hears a suggestion that our bank might accelerate it by compelling their customers to take our dollar credits instead of continuing to provide them with sterling credits. Thoughtful bankers know that this is neither practical nor desirable, that nothing is so elusive and uncompellable as credit, and that our discount market can be developed only by service and merit, and not by pressure.

We must proceed in developing the discount market by removing obstacles which now prevent its growth along natural lines. Our importers can help by opening dollar as well as sterling credits and encouraging the use of the former wherever they are as cheap and available as the latter; our exporters, by a greater willingness to extend credit to foreign purchasers; our investors by studying the opportunities for extending long-time credits to countries with which we desire to increase our trade; our bankers, either directly through branches, or indirectly through foreign trade banks, by extending short-time credits in such countries and by buying dollar bills there on terms as favorable as those which sterling bills enjoy; our transation companies by giving us quick and steady mail service; our Federal Reserve banks by maintaining as low rates of discount for dollar bills as market conditions justify; and our national and other banks by carrying as a secondary reserve such volume of bills as the market develops.

RELATION OF THE DISCOUNT MARKET TO FOREIGN TRADE.

We now come to our subject, the relation of the discount market to foreign trade. When we talk about extending our foreign trade, what we usually have in mind is our exports; and our efforts in this direction are largely devoted to increasing our exports to distant debtor countries like South America, the Orient, British colonies and others. To retain the far larger markets of creditor countries in Europe, no less care and effort is required. Nor should we overlook our imports as well. Trade, in the international sense, implies the exchange of commodities, and our imports must keep pace with our exports, otherwise we shall have such unwieldy balances as those we are now creating, which only the stress of war enables us to maintain.

The development of a discount market in the United States has a more direct relation, perhaps, to our imports than to our exports, for it will enable our importers to furnish letters of credit abroad more cheaply at times in dollars than in sterling. Heretofore our importers, unless large enough to maintain direct relations with a London bank or accepting house, have had to procure their letters of credit through a bank in this country has naturally charged a commission for guaranteeing the credit, in addition to the commission charged by London for issuing it. While the prospective course of exchange will always be the controlling consideration, the dollar credit, when it can be availed of, will often reduce the cost to the importer, will secure for American bankers the commissions connected with it, and will add much needed volume to our discount market.

With exports to countries or purchasers not demanding credit from the seller, and able to furnish a bankers' credit against which our sellers may draw, the situation is substantially the same. Such purchasers in foreign countries will gradually establish credits here and use them whenever they are cheaper than sterling or other credits.

The relation of the development of a discount market to our export trade with debtor countries, with which this Council seems particularly interested, is somewhat less direct. In dealing with such countries our manufacturers and exporters must be ready to extend credit there. While we usually and exporters must be ready to extend credit there. While we usually buy from such countries for cash, we must usually grant credit on the goods we sell them. But our exporter does not wish to tie his working capital up in distant lands. He draws his bill on South America, but is not content to send it forward for collection 90 days or more after the goods are received. He wants to cash his sales just as quickly as he can. To do this he has been taking his export drafts to his bank and selling or obtaining advances upon them. The existence of a discount market permits this to be done in a new and perhaps cheaper way. If the acceptances of his bank have a ready market, the exporter may now turn over to his bank his export drafts, with documents attached, and instead of asking for a loan, may draw a draft at 90 days or perhaps longer upon the bank for the amount desired and authorized, and sell it in the open discount market. In this way the bank makes a commission without using its funds, and the exporter obtains his advance probably more cheaply than under the former plan. Already many of the acceptances purchased by Federal Reserve banks have been of this nature.

Whether the accepting bank grants such credit primarily on the strength of its customer, the exporter, or of the foreign purchaser, depends on its knowledge of the credit of the latter and the authority under which the draft In any case, unless arrangement is made to draw without recourse, which is rare, the exporter stands obligated to his bank even though the goods may have passed out of their control.

When the acceptance matures, the exporter must have funds in bank to meet it. If the proceeds of the goods delivered in a foreign country have not been received, an extension may be arranged by drawing on the bank a

scond time, and selling the draft, when accepted, in the open market. It should be clearly understood that drafts drawn by exporters on forign merchants for goods sold to them, while strictly commercial and negotiable by American banks and institutions, will not sell in the open discount market, because they are to be accepted payable in a foreign country. The kind of bills which constitute our discount market are naturally bills drawn in dollars and payable in United States. It is particularly in the case of such transactions that foreign branches of American banks or foreign-trade banks will assist. Through their branches, agencies and correspondents, they will be able to have accurate knowledge of the standing and credit banks will assist. of the foreign merchant, and will be ready to negotiate drafts on good foreign acceptors, or act as the medium for the collection of such drafts and on of the proceeds to this country. It would be impo for the many thousands of banks in this country to keep themselves accurately informed as to the standing of foreign purchasers of American goods Foreign-trade banks and the American banks all over the world. foreign branches equipped especially for this purpose are the natural and safe channels through which such drafts should pass from all points in the United States. Through these media, therefore, American exporters and American banks will be enabled to accommodate their customers with a minimum amount of risk, each doing its share toward facilitating the export business of the United States.

In any case, the exporter wishing to negotiate his export drafts must, either directly or through his local bank, establish satisfactory relations with the institution through which he expects to realize upon them. No

way is likely to be devised whereby the drafts themselves can be realized upon in the open market

It has been suggested that Federal Reserve banks should establish branches or agencies in countries in which we are seeking to expand our trade, in order to facilitate its movement. It would seem, however, as though this could be at best a temporary and partial expedient. Federal Reserve banks acting as the depositaries of the banking reserves of the country, with their investments properly limited to discounts of the most liquid nature, principally bearing the endorsement of other banks, should not go into foreign countries to extend or assist in extending credit direct to foreign merchants. For Federal Reserve banks to establish agencies in these countries merely for the purchase of dollar bills would be to undertake a service for which the volume would not provide for the expense. We should look ahead and organize branches, or agencies, in which our national, State and private banks may participate, which may operate with-out restriction in such countries and give them the varied service and help Part of their regular business, and one of the safest parts will be the purchase of dollar bills, and the establishment of Reserve bank agencies to purchase such bills would have a distinct tendency to discourage the establishment of branches or trade banks with their far broader func-tions and usefulness. Federal Reserve banks can facilitate the purchase of dollar bills in foreign countries by whatever agencies may now or hereafter exist by quoting forward rates at which they may be discounted on arrival at the United States. The Federal Reserve Bank of New York has offered to quote forward rates to the leading bill buyers when desired, and has done so in a number of instances.

The London discount market consists primarily of bills drawn to finance foreign trade, and the development of our discount market is likely to be along similar lines. Therefore it bears a direct relation to our foreign trade. But it is not in itself a panacea for our foreign trade problems, nor will it by itself even stimulate foreign-trade expansion. We should have no discount market worthy of the name without foreign trade; but for years we have had a vast foreign trade without any discount market whatever The discount market is a tool whereby we may facilitate and finance at home our foreign trade, and an international medium whereby the ebb and flow of credit between nations may be equalized. Through it those methods will gradually evolve which are best adapted to financing our foreign trade, and foreign funds will be attracted here to relieve periodical credit strains. Just as the Federal Reserve note was designed as a safety valve in currency strains, so the discount market was contemplated by the Reserve Act as a safety valve in credit strains, enabling us to exert some control and regulation of our gold position. While its development will be accelerated by the growth of the very trade which we desire it to facilitate, its development seems likely to be accelerated even more by the establishment of the kind of agencies before referred to, through which the extension of both short and long-time credit may be made or encouraged in countries needing it, so that in time we may become an important settling center, like London, towards which funds are always flowing and on which dollar ex-

change is everywhere as current as sterling.

The permanence of our position as bankers for our own trade will depend largely upon the skill with which we create facilities at least equal to those enjoyed by our competitors, and upon the assurance which we can afford to the world that a bill drawn in dollars for acceptance by an American bank can be converted into cash in any part of the world with any bank in the world, either American or foreign owned, at rates of exchange which are stable and dependable and upon the like assurance that such bills, when accepted, can be converted into cash here at rates at least as low as those prevailing in any other money centers of the world.

OSCAR W. UNDERWOOD ON PROBLEMS OF RAILROADS.

Senator Oscar W. Underwood, in an address delivered in Chicago on Saturday last depicted the problems which are facing the railroads of the country, and ventured the opinion that the transportation system as a whole, so far from performing its proper functions in the transportation of our freights to their ultimate markets and the carriage of passengers to their destination with safety and economy, is breaking down. Senator Underwood's remarks were made at the dinner of the American Electric Railway Association and the American Electric Railway Manufacturers' Association. He also alluded to the proposal of Congress to investigate, through a committee, the railroad situation with a view to drafting legislation which will be helpful, and not hurtful -"legislation that will bring lasting and complete prosperity to the people of America." The following is taken from his address:

There is no more important question now pending before the American people that awaits proper solution than the settlement along just and

economic lines of the vexed problems of transportation.

We have recently solved the banking and currency problems of the country by passing legislation that seems to have met with almost universal approbation. This legislation was only accomplished after full and careful investigation by a commission appointed by the President of the

The President of the United States in his recent message to Congress has recommended that a commission should be appointed to give a thorough investigation to all the problems that confront us in the field of transportation.

As I understand the purpose of this investigation, it an inquest on what has happened in the past. If errors have been committed or injuries have been done, that is a question for the courts and not a question of legislation. The real purpose to be accomplished by the investigation is to give an opportunity for all concerned—the farmer the merchant, those directly engaged in transportation, the Inter-State Commerce Commission and the railroad managers, to appear before a committee of Congress and state their views in reference to the solution of this great problem, with the view in mind that in the counsel of many

we shall find wisdom to guide our legislative course.

You may ask me, Why the need of an investigation at all? There may be those present who believe that the transportation companies of the United States are engaged in private business and that they should not be interfered with by Government regulation. To them I can only say that the transportation of the commerce of this country by the carriers is

so closely allied to the healthy growth and the economic business develop-

ment of the nation that its regulation was inevitable from the beginning.

More than that, revolutions do not move backward, and if we are unable to successfully and fairly regulate the transportation systems of America, the country will demand that we go forward and the next step ahead is the Government ownership of the railroad lines. I think a step in that direction would be most unfortunate. It would probably lead to many evils that we dream not of to-day; to avoid which, we must work out a satisfactory system of Government regulation, both for those engaged in the shipment of freights, and those who have their money invested in the means of transportation. It is, therefore, a matter of great importance that we should earnestly endeavor to reach a fair and reasonable solution of the problem of regulation at as early a date as possible.

as been said a nation is an organism, not unlike a living individual, wherein the channels of transportation are arteries and veins; if the flow in these be sluggish, industrial disorders and indicated, if it be clogged, industrial diseases follow, if it be stopped, national disaster results.

Something long has been, is, and will apparently continue to be wrong in the relation between the people and those who are engaged in the transportation business—something so wrong as at times to border on open hostili-ties. Drastic remedies spasmodically applied—and ill-considered and misapplied laws—have not reached but have rather more deeply rooted the ential wrong

The capital invested in transportation is about one-sixth of all the wealth of the country and about one-twelfth of all our people depend for their livelihood on the wages paid by transportation corporations. Seventeen thousand million dollars of the people's savings are invested in

transportation securities.

In almost all countries the railroad question is one of first import and has been met in foreign lands either by Government regulation or Government ownership. In other countries the problem has not been as difficult of solution as in our own, due primarily to two causes. Our large population and vast natural resources located far inland and at great distances from water transportation makes railroad carriage indispensable and industrial freedom could be guaranteed only by just regulation. The most serious difficulty that has in the past prevented the solution of the problem here and is not met abroad, is a political one. Our system of Government, under which the States possess certain inherent Governmental rights and the Federal Government the great powers that were delegated to it in the beginning by the States, increase the difficulties and unce

ties that surround the problem before us.

It has been said that "no man can serve two masters," and under the regulation of to-day the transportation companies of America must obey the mandate of the Federal Government and at the same time the orders of each State through which the railroad line makes its way. All of the important railroad lines run through two or more States and are subject to different laws and regulations whenever a train crosses a State line. Go into the baggage car of an express train leaving Chicago and you will find a package that will reach its destination within the State of Illinois resting against a parcel whose destination is beyond the State line. Consider for a moment that the one package is subject to the rule of one master and the other must obey the mandate of at least three masters. Our courts have held that under the protection of the Federal Constitution the right of the railroads to charge rates that will produce a reasonable income on invested capital must be held inviolable, then how can we successfully determine what is a reasonable charge to be allowed for invested capital when you leave the determination to three or more sovereignties, each cting in its individual sphere?

Low rates and adequate facilities are demanded by the public, but the granting of one is often the denial of the other. Adequate facilities very often require the expenditure of large sums of money, but low rates prevent the accumulation of surplus capital and lessen the borrowing power of the

Without new railroad facilities our commerce cannot be expanded beyond our present limitation and trade has met a permanent barrier its future development.

Two decades ago the great trunk lines of the country were able to borrow in this country and abroad the money necessary to increase their facilities at 4 and 4½% interest. Railroad bonds were considered by the investing public a first-class investment. How is it to-day? It is often with great difficulty that the best transportation systems in the United States are able to renew their old loans or place new ones. Practically none of these loans can now be placed at 4% interest. A large majority of the bonds or notes sold in the last year earn above 5½% interest and some are placed at rates as high as 7 and 7½%. What is the effect of this condition on the shipping public? It must be borne in mind that on every dollar that is earned by the transportation companies of America, eighty-eight that is earned by the transportation companies of America, eighty-eight cents must go to pay wages, upkeep and operating expenses, and only twelve cents goes to the capital account. It must also be borne in mind that there is no speculative enhancement in the value of the railroads that can be converted in the coffers of the company because the property of the railroad is needed for its operation, and when the lines are once built, the operation must continue in the interest of the public, and whatever their relative value may be does not affect the earning capacity of the company.

The sole source of revenue for the maintenance, development and expansion of our railroad systems must come from the men who ride on the trains as passengers and from the men who ship their goods over the railroad lines.

If you increase the interest rates, the transportation companies must pay, in the end you must get the money to meet the increases either by the reduction of wages, the curtailment of facilities or by an additional charge

on the passengers and shippers of freight.

Practically speaking, the last alternative is the one we must adopt.

Where a transportation company placed its bonds at 4% interest twenty years ago, and renews them to-day at 6%, so far as the public is concerned it is identically the same as if the company had increased its bonded indebtedness by one-half at the old rate of interest. And yet, the public

derives no benefit whatever from the increased charge.

It is, therefore, necessary in the solution of the problem before us in the interest of the public, even more so than in the interest of invested capital, that the credit of our transportation companies should be so good future development at the lowest possible charge.

There may be many reasons to account for the changed status of railroad securities as investments in recent years. You may say that it is due to adverse legislation that has alarmed the investing public. Whether the legislation has been unwise and ill-considered, or whether it has been just and fair, there can be no question that the investing public has become alarmed as to the solvency of railroad securities. It is also true that recent legislation of Congres ss exempting State and municipal bonds from national taxation has invited capital into that field of investment. Again it is true that the past generation regarded industrial securities as a more or less speculative investment, but the development of the great industries of our country to-day along safe and conservative lines has opened a field for the use of capital at higher rates of interest than the transportation companies of America can afford to pay because there is no Governmen-

tal limitation on the profits that can be made in industry and there is a hard and fast limitation, fixed by law, on the earning capacity of railroad

The opening of new fields for investment has taken away from the transportation lines much of the market they enjoyed for their securities in

The rates of taxation have increased in every State of the Union. have gone up. The cost of equipment and supplies have greatly increase If it had not been for economic management, many of the railroads that are running to-day would have been forced into the hands of receivers.

There is yet another problem that we must consider and that is the safety of the employees, passengers and freights that are carried over our transportation lines.

Statistics show that there are at least ten employees killed or injured on American lines to one on the railroads of Great Britain. It cannot be truthfully said the engineers who constructed these roads have builded them with less ability than the engineers who constructed the English roads. It cannot be said that our iron and steel, our timber and rock, are not as good building material as that which is found in the British Isles. It cannot be said that the men who sit at the throttle, or watch the signal tower are less capable, sober and alert than the men who occupy similar positions in a foreign land. Then why should we face conditions in this country that endanger human life, and make a serious charge on transpor-tation that in the end the public must bear, if it is not due to the causes I have named? To my mind, it is clear that the dangers involved in our transportation system are almost entirely due to the lack of proper trans-

We endeavor to run trains over a single track where the needs of busine require double tracks. We load our freight on weak and defective cars where new cars should long ago have taken their place. We rely on antiquated methods for the movement of our trains when our tracks should be provided with the latest and best signal devices.

In fact it cannot be denied that to adopt modern methods and provide

proper facilities for transportation would be true economy in the end.

Then why has it not been done? Largely because the transportation companies of America have been unable to earn sufficient capital to enable them to meet their operating expenses, interest charges and accumulate a surplus with which to provide for betterments and improved facilities, and that their credit has been so seriously disturbed that they are unable to borrow money for the new improvements at reasonable rates of interest

In fact, I think it can be said without expectation of contradiction that, taken as a whole, the transportation system of the United States, so far as performing its proper functions in the transportation of our freights to their ultimate markets and the carriage of passengers to their destination

with safety and economy, is breaking down.

What, then, must we do to solve the problem? To restore confidence in the minds of the investing public as to railroad securities? To insure rapid transportation of passengers and freights to their ultimate destination at reasonable rates, and to provide for the safety of transportation and the increased facilities that are necessary to transport the growing business of the nation? These results cannot be accomplished by moving backward or divorcing our transportation system from Government control? Nor can it be accomplished without great danger and great cost to the people by progressing to the ultimate step in advance and accepting Government rship of the transportation lines

In my judgment, we must find the golden mean. We must solve the problem along lines of private ownership and Government regulation. We must consider the wisdom of substituting one master for the forty-nine masters that regulate our commerce to-day. We must consider the wisdom of Government supervision of the issuance of all securities by our transportation companies with the assurance to the public that new capital will be invested to secure proper facilities and used for legitimate purpos for speculation. We must assure the public that when they invest money in railroad securities which are supervised by Government regulation, we stand for a system of regulation which will allow the transportation companies to charge such rates for carriage as will enable them to promptly meet their interest account as well as their operating expenses. a system of regulation that will recognize that the transportation lines of America are great public highways in which the people are as much interested as those who have invested their capital in them; that every shipper in America must have equal rights in the transportation of his goods along se highways; that rebates and discriminations of all kinds must be of the past and prohibited in the future, and we must recognize that the man who is willing to invest his money at a moderate rate of interest in railroad curities is not exploiting the public but is a public benefactor.

In my opinion an adequate transportation system means:

1. Roadbeds must be made more secure and more permanent.

2. Trackage must be enormously increased and many roads double-

3. Safe equipment must be sufficient to satisfy requirements at any and

4. Terminal facilities must be greatly improved and largely increase Stated briefly, then, our question is, whether the American people are willing to put up with an unsafe, inferior and inadequate transportation system or have the intelligence to pay for one that will supply their needs and protect the lives of the people

The main trouble with the regulation of the railway system is that corporate law has been destructive, not constructive, has been pieces not comprehensive.

To solve these problems, it is proposed that a committee of Congress shall give a thorough and complete hearing to all who desire to present their views. Let us hope that the result of the investigation will be productive of wise legislation—legislation that will build up and not destroy gislation that will be helpful and not hurtful—legislation that wil bring lasting and complete prosperity to the people of America.

HOWARD ELLIOTT ON "THE MALADY OF THE RAILWAYS."

The duty of the public to help in curing the present "Malady of the Railways" was impressed upon the members of the Chamber of Commerce of the United States this week by Howard Elliott, Chairman of the Board and President of the New York New Haven & Hartford Railroad Co. Discussing the subject under the above caption, Mr. Elliott stated that whatever the reasons for the present malady of the railways, two facts stand out prominently in the history of the railways of the United States for the year 1915. One is that less mileage was built in that year than in any year since 1864, and the other fact has to do with the amount of railway

mileage in the hands of receivers in 1915. the railways cannot be cured, he said, until:

 The public thoroughly realizes the fact that the railways are no different from any other kind of business in their ability to increase expenses and at the same time reduce or not to advance the price of the article they have to sell.

2. The public realize that extreme and conflicting regulation is hurting

There is reasonable control and regulation of the great organizations of labor that are engaged in work of public utilities, including railways, upon which the welfare of society depends.

4. Instead of passing additional laws an account is taken of those now in

existence, to be followed by classification, amendment and repeal some

It is realized that the railways are more and more national and less and less State in character, and that State control and regulation must be subordinate to national control.

The nation has a right to expect of every man that he give the maximum of personal and mental effort in whatever position he occupies.

7. Men of commerce give more attention to these important questions and use their influence with lawmakers and executives in an effort to bring about a more reasonable treatment of all business, including that of the

On the subject of "preparedness," discussed on all sides, Mr. Elliott noted that there are several kinds of "preparedness." "All of our industries," he said, "must be preparedour young men must be prepared—labor must be prepared capital must be prepared—our army and navy must be prepared, the Government itself must be prepared—and last but not least, our railways must be prepared." "What could they do in their present condition if the added burden of war were thrown upon them? Many industries would have to stop because the railways' first duty would be to handle the men and material incident to war." Mr. Elliott discussed at length the effect of the demands of labor leaders for "eight hours or less," and also had something to say with regard to the excessive legislation and regulation directed against the railways.

RIGHT OF A NATIONAL BANK TO WRITE INSUR-ANCE OR BECOME STOCK OR BOND BROKERS.

In deciding that national banks have no express or implied power to write fire, cyclone, liability, or other kinds of insurance, or receive the profits from insurance contracts entered into by its officers, M. C. Elliott, counsel for the Federal Reserve Board, has written an opinion which is published in the latest issue of the "Fede ralReserve Bulletin," and which we reprint below.

Incidentally, it will be noted, Mr. Elliott quotes a Circuit Court decision, saying that "the National Bank Act does not, in terms or by necessary implication, authorize national banks to act as brokers in negotiating the sale of securities, and it is generally agreed that they cannot lawfully engage in such business.'

Mr. Elliott also quotes from a decision of the Supreme Court of Pennsylvania, holding that "It is no part of the business of a national bank to engage in the selling of stocks for anybody. It was a transaction outside of its regular banking business and not within its chartered powers."

Finally, Mr. Elliott quotes from a Maryland decision to the following effect: "Nor can we perceive it is anywise necessary to the purpose of their existence, or in any sense incidental to the business they are empowered to conduct, that they should become bond brokers, or be allowed to traffic in every species of obligations issued by the innumerable corporations, private and municipal, of the country."

The text of Mr. Elliott's opinion is as follows:

January 13 1916.

-The question has been raised whether it is lawful for the officers of a national bank to write fire, cyclone, liability, and other kinds of insur-ance, all the profits derived from such business being turned into the bank. The powers of national banks are defined by Section 5136, United States Revised Statutes, Article VII of which provides:

To exercise by its board of directors, or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business of banking; by discounting and negotiating promissory notes, drafts, bills of exchange, and other evidences of debt; by receiving deposits; by buying and selling exchange, coin and bullion; by loaning money on personal security; and by obtaining, issuing and circulating notes according to the provisions of this title.

The power to write insurance, act as insurance agent or broker, is not specifically enumerated in this section, and unless such business can be considered as indidental to some of the enumerated powers of nationa banks it is illegal and prohibited by implication as clearly as if by expression. (Logan County National Bank v. Townsend, 139 U. S., 67.)

In Farmers & Merchants National Bank v. Smith (77 Fed., 129) it was

held that it is not within the powers of a national bank to engage in the

business of selling mortgage bonds on commission. Circuit Court Judge Thayer, on page 137, said:

The brokerage business is entirely distinct from the business of banking which it was authorized to transact. If a national bank can lawfully act as a broker in selling farm mortgages for a commission, no reason is perceived why it may not act in the same capacity in selling any other species of property, real or personal. The National Bank Act does not, in terms, or by necessary implication, authorize national banks to act as brokers in negotiating the sale of securities, and it is generally agreed that they cannot lawfully engage in such business.

In Pepperday v. Citizens National Bank (183 Pa. St., 519, 524) the Supreme Court of Pennsylvania said:

It is no part of the business of a national bank to engage in the selling of stocks for anybody. It was a transaction outside of its regular banking business and not within its chartered powers.

In Weckler v. First National Bank (42 Md., 581) the Court said, on

Nor can we perceive it is in anywise necessary to the purpose of their existence, or in any sense incidental to the business they are empowered to conduct, that they should become bond brokers or be allowed to traffic in every species of obligations issued by the innumerable corporations, private and municipal, of the country.

By analogy it would seem that writing insurance on commission is in no sense incidental to any of the enumerated powers of a national bank

It is contended that the national bank, in the instance under consideration, is not acting as agent for the insurance company, but that its officers write the insurance in their individual capacities and turn in all the profits to the bank.

If the bank receives all the profits of writing the insurance, its officers are, in substance, acting as agents for the bank, and the bank is estopped to deny that it is engaging in the insurance business.

In Schuyler National Bank v. Gadsden (191 U. S., 451) it was held that the taking of real estate security by the president of a national bank in his individual name for the benefit of the bank was in legal effect but the taking of security by the bank itself, and the president acted as its agent

Where a national bank retains and enjoys the proceeds of a transaction, it is estopped to deny that the act of the officer who enters into the transaction is its own. (Peoples Bank v. National Bank, 101 U. S., 181.) National banks, as such, must of necessity act through their officers or

Inasmuch, therefore, as this class of business does not come within either d or implied powers of national banks, an administrative board or officer cannot authorize it. Any such extension of the powers of national banks must be left to the consideration of Congress.

Respectfully, M. C. ELLIOTT, Counsel.

To HON. C. S. HAMLIN, Governor Federal Reserve Board.

PRESIDENT WILSON UPHOLDS COURSE OF U. S. BEFORE NATIONAL CHAMBER OF COMMERCE.

President Wilson was a speaker at the banquet on the 10th inst., which brought to a close the fourth annual meeting of the Chamber of Commerce of the United States. Unstinted applause greeted his remarks bearing on the course pursued by the United States during the existing disturbed conditions abroad; on this point the President said:

It is a cruel thing to have it supposed, as it is in so many quarters, that we have kept out of this war simply because we wanted to keep out of trouble and simply because we wanted to profit by the trouble of others, and yet misunderstandings for the time being are not to be reckoned as against the consciousness that we must ourselves have that we have pursued the

right and only serviceable course.

I am not afraid, for one, of the slow verdict of history as to regard to the neutrality of the United States, and I believe that we are justified in exer cising every degree of patience in making it clear what our position is and how sincerely we are determined not to allow this quarrel to become part of ours. I have only this to say, though: We hold this trouble at arm's length and keep, or attempt to keep, our own judgments cool, but the rest of the world is hot, and it may be that any time without our co-operation and without our ability to stop it, the flame may extend to us. And, therefore, I am glad that the United States has been put in a position to mobilize its financial resources and to get into the position which it must

at last get into, whether it wants to or not.

It is amazing to me, it has been amazing ever since I was a thoughtful man, that the business men of America have concerned themselves so little with the commerce of the world as distinguished from the commerce of They have been doubting and timid. They have not known what they should have known about the opportunities of foreign commerce and they have been slow to avail themselves of those opportunities when they were known; and now in the strange turn of events we are called upon to exercise, I believe, in the decades immediately ahead of us the chief part in those every functions which we have hitherto been avoiding

America is going to be thrust out into the economic leadership of the world, and it is a matter of congratulation that we have gained the instrumentalities which are necessary for the exercise of this great part

The President again commended the Federal Trade Commission, and spoke on the need for a "really scientific Tariff Board." He also alluded to the Federal Reserve Act, and declared that "the United States never was in a condition of such financial strength as she is at present, or in a position to use her financial strength with greater facility than she is at present."

GENERAL MILES AND PREPAREDNESS-COAST DEFENSES ADEQUATE.

At a hearing on the Administration's proposed defense measures, before the House Military Committee on the 8th inst., Lieut.-Gen. Nelson A. Miles voiced his disapproval of the Continental Army proposal, condemned conscription and declared the coast defenses of the United States were equal to those of any place in the world, not excepting the fortifications of the Dardanelles. According to General Miles, "the landing of an invading army of 500,000 men in this country would be impossible if our submarines were active." He is further quoted as saying:

The continental army plan would be a very dangerous step toward centralization. It would put a tremendous power into the hands of some future President. It is un-American. Why try to Germanize the American You cannot Germanize American citizens.

If 500,000 men were landed on either of our coasts and we were not able to raise enough men to drive them out, I would want to move to another country. Overseas expeditions, such as we are told would succeed against the United States, are expensive, and are, as a rule, disastrous. If subjects were ordered by a European country to cross the water to America, I believe they would refuse to come because of their fear of meeting a liberty-

loving nation of men defending their own homes. These overseas expeditions spring from the minds of men writing about preparedness who know less about preparedness than anything else.

In asserting that conscription would never succeed in this country, General Miles declared that "this was demonstrated during the Civil War, when draft riots broke out and active troops were withdrawn from the field at Gettysburg to suppress Philadelphia riots because of the unpopularity of the idea.'

General Miles recommended expansion of the National Guard rather than the creation of a Continental Army, favored three-year enlistments, favored a regular standing army of 140,000 or 150,000 men, and submitted an army reorganization plan of his own contemplating recruiting a force of 1,200,000 men by expanding the units of organization. He contended that the National Guard should be organized the same way, and said it would be easily possible to raise 2,000,000 men if necessary in a reasonably short time.

Rear-Admiral Victor Blue, Chief of the Bureau of Navigation, on the 8th inst. told the House Committee on Naval Affairs that the navy is ready to meet any enemy it might be called upon to encounter in the Pacific. His remarks were made in answer to Representative Britten of Illinois, a Republican member of the Committee, who wanted to know whether the witness agreed with Admiral Fiske that it would take five years to get the navy in readiness to meet an efficient enemy. Admiral Blue replied that Admiral Fiske might have meant it would take him (Admiral Fiske), as aid for operations, five years to whip the navy into shape for battle with an enemy. Mr. Britten pressed the witness, insisting on a direct reply to the question as to "whether the navy is now ready to fight," and was met with the response from Admiral Blue that "the fleet could undertake anything on the Pacific Coast as soon as it could get there—the navy is prepared to meet any enemy it could possibly meet in the Pacific at the present time."

The Senate Committee on Naval Affairs, by a vote of 9 to 3, on the 8th inst. ordered a favorable report on Senator Tillman's bill calling for an appropriation of \$11,000,000 for the acquisition or establishment by the Government of an armor plate factory with an annual capacity of 20,000 tons. Before the vote was taken Senator Penrose is alleged to have stated that if the Government undertook the manufacture of armor, the private manufacturers would decline to supply armor to the Government at the present prices, but would add about \$200 a ton to the price. Senator Tillman, in declaring that, if necessary, the Government would seize their plants, said:

The threat of the armor barons to hold up the Government will not affect Congress. We were given to understand that the armor manufacturers would increase their price because Government manufacture of armor plate would force them to go out of business, and that they would charge this enormous increase in order to provide themselves with an amortization fund. But I guess we can find a way to stop the robbers. In time of trouble we could seize the plants and operate them by right eminent domain.

It is pointed out that if the Government is required to pay \$200 additional for armor plate under the five-year building program, the increase of prices based on 12,000 tons of armor called for by the Navy Department estimates would be \$24,000,000.

RESIGNATION OF SECRETARY GARRISON. Secretary of War Lindley M. Garrison tendered his resignation to President Wilson on the 10th inst., because of differences of opinion on the question of national defense and the principal embodied in the Clarke amendment carried in the Philippine Bill, providing for the independence of the Islands within four years. Secretary Garrison's resignation was immediately accepted. Henry Breckinridge, Assistant Secretary of War, resigned with his superior, stating in his letter of withdrawal to the President that he shares without exception the convictions of Secretary Garrison. Major-Gen. Scott, Chief of the Army Staff, has been designated by the President as Acting Secretary of War "for thirty days." In his report filed with the House Committee on Military Affairs on Jan. 6, Secretary Garrison proposed that the army force be supplemented by 400,000 to be raised in annual increments of 133,000 each from districts approximating the 400 Congressional districts, each to supply 333 men annually, the men to enlist for three years with the colors and three years on furlough. "For convenience of designation," this force, the Secretary stated, "has been called the Continental Army, but in fact it is a system of Federal volunteers, raised, organized, equipped and trained in time of peace." In his message to Congress in December President Wilson indicated that he was in accord with the proposed plan, but the evident subsequent weakening of his views in the matter brought about the rupture between the two. With regard to the Clarke amendment contained in the Philippine Bill, Secretary Garrison characterizes it as "a breach of trust toward the Filipinos." The correspondence which passed between the President and Secretary Garrison, leading up to the latter's withdrawal from the Cabinet, and in which the Secretary criticized the program of Chairman Hay of the House Committee on Military Affairs, is given herewith:

WAR DEPARTMENT.

Washington, Jan. 12 1916.

My Dear Mr. President.—In my judgment, we are facing a cricital juncture with respect to the military part of the national defense progam.

I am convinced that unless the situation is dealt with promptly and

effectively we can indulge in no reasonable expectation of any acceptable result.

So far as the military part of national defense is concerned, there can be

no honest or worthy solution which does not result in national forces under the exclusive control and authority of the National Government. Any other solution is illusory and not real, is apparent and not substantial. There is a perfectly legitimate field of discussion and debate as to the means of obtaining these national forces. The proportion thereof that should be the regular standing army; that should be drawn from the body of citizens for shorter periods of national service than those in the regular standing army, are all legitimate and proper matters for consideration, analysis and

But there is absolutely no dissent from the military standpoint from the conclusion that the only measure of national defense that possesss any virtue is one which produces national forces. From the beginning of Government to this time, excepting during period of actual war, the acknowledged weakness and defect of the situation arose out of the lack of any system producing these Federal forces. The situation was rendered worse by the presence of State troops, raised, officered, trained and governed by the States, that were assumed to be a military reliance for the nation, when, in fact, they are not and can never be made to be. Under the Constitution of the United States, these State troops must always be

governed, officered and trained by the respective States.

The very first line of cleavage, therefore, which must be encountered and dealt with by the student of the situation is between reliance upon a system of State troops, forever subject to Constitutional limitations which render them absolutely insecure as a reliance for the nation, or reliance upon national forces raised, officered, trained and controlled by the national authorities. Upon this subject there does not exist and there cannot legiti-mately exist any difference of opinion among those who are unbiassed and

who believe in real national security and defense.

The policy recommended to you and adopted by you squarely placed the nation upon the sure foundation of national forces. If that policy is made effective by legislation there will be secured to the country for the first time a real, stable foundation for the military part of its national defense. If, however, instead thereof a policy is adopted based upon the State troops as the main reliance of this country for its military arm, not only has no advance been made from the deplorable and inexcusable situation in which we have so long been but an effective block has been placed across the pathway toward a proper settlement.

The adoption of such a policy would serve to delude the people into believing that the subject had been settled, and therefore required no fur-ther consideration upon their part. It would, therefore, in my judgment,

ther consideration upon their part. It would, therefore, in my judgment, be infinitely worse than an entire failure of all legislative enactment upon the subject. The latter would at least leave it open for future settlement. I, of course am not advised as to the statements of intention made by Mr. Hay to you in the conversations held with you prior to your message to Congress at the opening of the present session. I have always felt, and have so expressed myself to you, that the situation in the Congress was such that unless you personally exerted the power of your leadership you would not obtain any worthy results in this matter.

Mr. Hay has now made the open declaration of his intention. He announces

Mr. Hay has now made the open declaration of his intention. He announce that he does not intend to press for the enactment of the military policy advocated in your message. With respect to the regular army he does not advocated in your message. With respect to the regular army he does not purpose giving us the organizations asked for and imperatively necessary if the Federal volunteers (so-called continental army) are to be properly trained; he purposes adding a few thousand men to the enlisted strength of the army in its present organization, the adding of a few regiments of field artillery to the existing organizations of the regular army, the entire abandonment of the idea of a Federal force of national volunteers and the sing of a bill granting direct Federal pay to the enlisted men and officers of the State troops

In my judgment the effect of the enactment of Mr. Hay's program would be to set back the whole cause of legitimate, honest national defense in an entirely unjustifiable and inexcusable way. It would be, in my judgment a betrayal of the trust of the people in this regard. It would be illusory

and apparently, without any reality or substance.

There is, unfortunately, very little knowledge and very little intense personal interest in any of the members of the House concerning military affairs. Apart from the power that always resides in every chairman of committee, Mr. Hay has the additional power of dealing with a subject concerning which the rest of the House has no knowledge, and about which it has never concerned itself. In this particular instance his proposal of ttling this matter by voting money to the enlisted men and officers of the

State troops appeals to the direct personal political interest of the members.

In these circumstances it seems to me to be perfectly clear that unless you interpose your position as leader of the country on this great subject, the result will be the lamentable one which I have just described.

It seems to me equally imperative that your interposition should be immediate. If this proposed program of Mr. Hay is accepted by the committee and by public opinion and by the House as a real solution ot this vital matter, any position subsequently taken will be negligible so far as substantial, actual results are concerned.

sue must be plainly and clearly drawn. It has nothing whatever to do with the number of men to be raised or with the means of raising them as Mr. Hay would have it appear that it has. It is between two absolutely different systems, one of which is based upon the nation undertaking upon its own responsibility the raising and management of the national roops, and the other of which leaves us in the position that we have always since the institution of the Government-to rely upon the States doing this thing for the nation—a situation in which the nation is relying upon a military force that it does not raise, that it does not officer, that it does not train and that it does not control.

A mere statement of the situation shows that the two different proposals s wide apart as any two proposals upon any subject possibly can be.

Mr. Hay's proposal to include a draft or compulsory provision so that at the outbreak of war the nation could bring under its control these State at the outbreak of war the nation could bring under its control these State troops, utterly falls to meet the essential objections to the perpetuation of the militia system. The difficulty to be dealt with does not arise out of the Government not being able to take over these troops in the event of war, but arises out of its inability under the Constitution to have the essential unity of responsibility, authority and control in the raising, officering, training and governing of its military forces.

If the public obtains the impression that Mr. Hay's solution is merely another means of accomplishing the same end as your proposed policy, they

nother means of accomplishing the same end as your proposed policy, they will accept the same and rest content that their desires have been properly met. If, on the other hand, they are clearly and unmistakably advised that to adopt the policy suggested by Mr. Hay is to make a mockery of all that was worthy and virtuous in the proposal of a proper military policy, and that it is a delusion to consider such a solution as a real reliance or security, then there is hope that we can obtain results commensurate with the necessities of the case, and with a self-respecting consideration

I cannot, therefore, too strongly urge upon you my view of the imperative necessity of your seeking an occasion at the earliest possible moment to declare yourself with respect to the matter, and in doing so to make it clear beyond peradventure that nothing excepting national forces, raised by the nation and subject to its exclusive authority, responsibility and control, is any real settlement of this issue.

Sincerely yours, LINDLEY M. GARRISON.

The President.

WAR DEPARTMENT.

Washington, January 14 1916.

My Dear Mr. President.—What you said to-day by way of response to my letter of the 12th requires me to make my position perfectly clear to

You stated that Mr. Hay told you that your proposal of Federal volunteers could not be procured and that the same end for which you were striving could be procured by other means—by utilizing the State troops as the basis of the policy and making appropriations of pay to the States

conditioned on Federal control of the State troops.

You stated to him that you were not interested in any particular program or means of accomplishing the purpose of securing the men and would accept his proposal if it accomplished that purpose.

Since the policy that was recommended to you and adopted by you discarded as absolutely impossible a military system based upon State troops and asserted that the only possible basis for a military policy was national forces, it is entirely clear that the proposals are diametrically opposed to each other and are irreconcilable.

Those who are conscientiously convinced that nothing but national force can properly be the basis of a policy of national defense cannot possibly accept a policy based upon State forces. It not only does not in itself

offer an acceptable solution, but acts to prevent any proper solution.

If those who are thus convinced are faced with the necessity of declaring their position on the matter, they can only show their sincerity and good faith by declining to admit the possibility of compromise with respect to this essential fundamental principle.

I am thus convinced.

I feel that we are challenged by the existing situation to declare ourselves promptly, openly and unequivocally, or be charged properly with lack

of sincerity and good faith.

We cannot hope to see our program, based on this essential principle. cceed if we admit the possibility of compromise with respect to it

Yours is the ultimate responsibility; yours is the final determination as to the manner in which the situation shall be faced and treated. I fully realize this and I do not desire to cause you the slightest embarrassment on my account; if, therefore, my withdrawal from the situation would relieve you, you should not hesitate for a moment on that account.

Sincerely yours, LINDLEY M. GARRISON.

The President.

THE WHITE HOUSE.

Washington, January 17 1916. My Dear Mr. Secretary.—I am very much obliged to you for your letters of January 12 and January 14. They make your views with regard to adequate measures of preparation for national defense sharply clear. I am sure that I already understood just what your views were, but I am as I do, that the chief thing necessary is that we should have a trained citizen reserve and that the training, organization and control of that reserve should be under immediate Federal direction.

But apparently I have not succeeded in making the control of t glad to have them re-stated in this succinct and striking way.

But apparently I have not succeeded in making my own position equally clear to you, though I feel sure that I have made it perfectly clear to Mr. Hay. It is that I am not irrevocably or dogmatically committed to any one plan of providing the nation with such a reserve, and am certainly

willing to discuss alternative proposals.

Any other position on my part would indicate an attitude toward the Committee on Military Affairs of the House of Representatives which I should in no circumstances feel at liberty to assume. It would never be proper or possible for me to say to any committee of the House of Representatives that so far as my participation in legislation was concerned they would have to take my plan or none.

I do not share your opinion that the members of the House who are

charged with the duty of dealing with military affairs are ignorant of them, or of the military necessities of the nation. On the contrary, I have found them well informed, and actuated by a most intelligent appreciation of the grave responsibilities imposed upon them. I am sure that Mr. Hay and his colleagues are ready to act with a full sense of all that is involved in this great matter, both for the country and for the national parties which they represent.

My own duty toward them is perfectly plain. I must welcome a frank interchange of views and a patient and thorough comparison of all the methods proposed for obtaining the objects we all have in view. So far as my own participation in final legislative action is concerned, no one expect me to acquiesce in any proposal that I regard as inadequate or illusory.

If, as the outcome of a free interchange of views, my own judgment and that of the committee should prove to be irreconcilably different, and a bill should be presented to me which I could not accept as accomplishing the essential things sought, it would manifestly be my duty to veto it and go to the country on the merits. But there is no reason to anticipate or fear such a result, unless we should ourselves take at the outset the position that only the plans of the Department are to be considered; and that position, it seems to me, would be wholly unjustifiable.

The committee and the Congress will expect me to be as frank with them hope they will be with me, and will, of course, hold me justified in fighting for my own matured opinion.

I have had a delightfully frank conference with Mr. Hay. I have said to him that I was perfectly willing to consider any plan that would give us a national reserve under unmistakable national control and would support any such scheme if convinced of its adequacy and wise policy More he has not asked or desired.

Cordially and sincerely yours

WOODROW WILSON. Hon. Lindley M. Garrison, Secretary of War.

WAR DEPARTMENT.

Washington, February 9 1916. My Dear Mr. President.—Two matters within the jurisdiction of this Department are now of immediate and pressing importance, and I am constrained to declare my position definitely and unmistakably thereon. I refer, of course, to the Philippine question and the matter of national defense. You know my convictions with respect to each of them.

I consider the principle embodied in the Clarke amendment an abandonment of the duty of this nation and a breach of trust toward the Filipinos so believing, I cannot accept it or acquiesce in its acceptance.

I consider the reliance upon the militia for national defense an unjustifiable imperilling of the nation's safety. It would not only be a sham in itself, but its enactment into law would prevent, if not destroy, the opportunity to procure measures of real, genuine national defense. I could not accept it or acquiesce in its acceptance.

I am obliged to make my position known immediately upon each of these questions—in a speech on Thursday afternoon upon the national defense question, and in a communication to the House committee having charge of the Philippine question.

If with respect to either matter we are not in agreement upon these fundamental principles then I could not with propriety remain your seeming representative in respect thereto. Our convictions would be manifestly not only divergent but utterly irreconcilable.

You will appreciate the necessity of timely knowledge upon my part of the determination reached by you with respect to each of these matters, so that I may act advisedly in the premises

Sincerely yours, LINDLEY M. GARRISON.

The President.

WHITE HOUSE.

Washington, February 10 1916.

My Dear Mr. Secretary.—In reply to your letter of to-day let me say First, that it is my own judgment that the action embodied in the Clarke amendment to the bill extending further self-government to the Philippine is unwise at this time, but it would clearly be most inadvisable for me to take the position that I must dissent from that action should both House of Congress concur in a bill embodying that amendment. That is a matter upon which I must, of course, withhold judgment until the joint action of the two Houses reaches me in definite form.

What the final action of the Houses will be no one can at this time certainly forecast. I am now, of course, engaged in conference with Mr. Jones and others with regard to the probable action of the House of Representatives in this matter and do not yet know what it is likely to be. The one obvious thing, it seems to me, is the necessity for calm and deliberation of the probable action on the control of the House of the one obvious thing, it seems to me, is the necessity for calm and deliberation of the probable action of the House of the control of the House of erate action on our part at this time, when matters of such gravity are to be determined, and not only calm and deliberate action, but action which takes into very serious consideration views differing from our own

Second, as I have had occasion to say to you, I am not yet convinced that the measure of preparation for national defense which we deem necessary can be obtained through the instrumentality of the National Guard under Federal control and training, but I feel in duty bound to keep my mind open to conviction on that side and think that it would be most unwise and most unfair to the committee of the House which has such a plan in mind to say that it cannot be done. The bill in which it will be embodied has not yet been drawn, as I learned to-day from Mr. Hay. I should deem it a very serious mistake to shut the door against this attempt on the part of the committee in perfect good faith to meet the e

of the program set forth in my message, but in a way of their own choosing.

As you know, I do not at all agree with you in favoring compulsory enlistment for training and I fear the advocacy of compulsion before the committee of the House on the part of representatives of the Department of War has greatly prejudiced the House against the proposal for a continental army, little necessary connection as there is between the plan and the opinion of the Chief of Staff in favor of compulsory enlistment.

I owe you this frank repetition of my views and policy in this matter, which we have discussed on previous occasions in the letters which we have exchanged and in conversation. I am very much obliged to you for your own frank avowal of your convictions. I trust that you will feel no hesitation about expressing your personal views on both these subjects on the two occasions to which you refer, but I hope that you will be kind enough to draw very carefully the distinction between your own individual views and the views of the Administration.

You will, of course, understand that I am devoting my energy and attention unsparingly in conference with members of the various committees ss to an effort to procure an agreement upon a workable and practicable program. This is a time when it seems to me patience on the part of all of us is of the essence in bringing about a consummation of the purpose we all have in mind.

Very sincerely yours,
WOODROW WILSON.

Hon, Lindley M. Garrison, Secretary of War.

WAR DEPARTMENT.

Washington, February 10 1916.

My Dear Mr. President.—I am just in receipt of yours of February 10 in reply to mine of February 9. It is evident that we hopelessly disagree upon what I conceive to be fundamental principles. This makes manifest the impropriety of my longer remaining your seeming representative with respect to those matters.

Secretary of War, to take effect at Sincerely yours, LINDLEY M. GARRISON. your convenience.

The President.

THE WHITE HOUSE.

Washington, February 10 1916. My Dear Mr. Secretary.—I must confess to feeling a very great surprise at your letter of to-day offering your resignation as Secretary of War. There has been no definite action taken yet in either of the matters to which your letter of yesterday referred. The whole matter is under debate and all the influences that work or clarity and judgment ought to be available at this very time.

But since you have felt obliged to take this action, and since it is evident that your feeling in the matter is very great indeed, I feel that I would be only imposing a burden upon you should I urge you to retain the Secretaryship of War while I am endeavoring to find a success relieve you at once, and do hereby accept your resignation, because it is so evidently your desire that I should do so.

I cannot take this important step, however, without expressing to you my very warm appreciation of the distinguished service you have rendered as Secretary of War, and I am sure that in expressing this appreciation I am only putting into words the judgment of our fellow-citizens far and

With sincere regret at the action you have felt constrained to take, Sincerely yours.

WOODROW WILSON

Hon Lindley M. Garrison, Secretary of War.

Secretary Garrison, who was to have been a speaker at the convention of the Chamber of Commerce of the United States on Thursday, cancelled his engagement with his resignation from the Cabinet.

AUSTRIA AND GERMANY TO ATTACK ARMED MER-CHANTMEN WITHOUT WARNING.

Advices to the effect that Germany and Austria would from Feb. 29 treat armed merchantmen as warships and would attack such vessels without warning were conveyed to Secretary of State Lansing by Count von Bernstorff, the German Ambassador, and Baron von Zwiedinik, the Austrian Charge d'Affaires, on the 10th inst. As was indicated in these columns last week, Secretary Lansing on Jan. 27, following the recent arrival of several armed Italian vessels, communicated to all the belligerent countries a suggestion that they subscribe to a declaration of principles governing attacks on merchant vessels and forbidding the arming of such vessels. We further noted that the declaration of principles would provide:

That non-combatants may expect protection under the rules of inter-national law and the principles of humanity when traveling on merchant ships; that warning must be given before a merchantman is attacked; that belligerent-owned merchant ships must obey warnings to stop; that mer-chantmen shall not be fired on except in case of resistance or flight; that no merchantman shall be sunk except where it is impossible to supply a prize crew or until passengers and crew are placed in safety; that merchantmen shall not be permitted to mount arms.

The following is the text of the memorandum communicated by the Austro-Hungarian Foreign Office on the 10th to the representatives of neutral Governments announcing the decision of Austria-Hungary to treat as warships armed merchantmen of countries at war with this nation.

It is not unknown to the Governments of neutral Powers that the British Admiralty in the course of the year 1913 caused a number of large British liners to be armed. The First Lord of the Admiratly declared in the House of Commons on March 26 1913 that the armament of the vessels in question was only to protect them from dangers threatening them from hostile ships converted into auxiliary cruisers, and to serve exclusively for defense

Experiences gained in the present war show that a considerable number of British merchantmen used the guns installed aboard against hostile warships, and not solely with the intention to escape legitimate exercise of the prize right, but also to attack and destroy enemy warships.

As is evident from the memorandum which the Imperial German Government to-day communicated to neutral States, instructions have been found aboard British steamers which prove that the British Government itself incited its merchantmen to illegal acts, and this in complete contradiction to assurances which it communicated to the State Department at Washington. Its allies, particularly France and Italy, followed the example of Great Britain during the course of hostilities

Without wishing to enter into an examination of the surprising claim advanced by the British Government, according to which liners armed by that Govenment retain their inoffensive character while merchantmen armed by the enemy are regardable by the British naval forces as auxiliary cruisers, the Austro-Hungarian Government limits itself to establishing that every merchantman provided, for any purpose whatever, with cannon loses through this fact alone the character of a non-com-

Under these conditions the order has been given to the Austro-Hungarian naval forces to treat such ships as combatants—an order which, how-ever, will be in force only from Feb. 29 1916.

This delay is granted in the interests of neutral Powers in order that

they may be placed in a position to warn their nationals of the danger to which they will expose themselves if they entrust their persons or property to armed merchantmen of States at war with Austria-Hungary, and also to notify those of their nationals who may already be aboard ships of the above-mentioned character.

The Ministry of Foreign Affairs has the honor to request the Embassy (or legation) to bring the above telegraphically to the attention of its Govern-

Since the arrival and departure of the four armed Italian vessels noted in our issue of last week, still another Italian steamer, the Stampalia, of the Veloce Line, has reached here with mounted guns. She is scheduled to depart to-

EARNINGS OF NATIONAL BANKS IN NEW YORK CITY DURING 1915.

The following interesting article dealing with the earnings of the local national banks during the year just closed, appeared in the "Wall Street Journal" of Jan. 27:

Notwithstanding the low rates for money that generally prevailed, last year appears to have been a profitable one for the banks, judging by their rnings and the maintenance of relatively good dividends; in some cases substantial increases or extra dividends. Irrespective of the general money market, there were several new and unusual opportunities for the banks to make money last year. They were called upon to finance much of the Government war orders received here from abroad in addition to lucrative investments in foreign loans for long and short periods.

Some of the earnings of the national banks at this center last year were

in fact remarkable. A convenient illustration is afforded owing to there having been a call for the condition of national banks at the end of 1914 and again at the end of 1915. This gives a complete year's comparison, with the inclusion of the dividends generally declared by the banks at the windup of the calendar year. Analysis of such earnings are interesting because they show that it is not necessarily the banks with the largest resources that earn most. Laurels go sometimes to the smaller banks which can show a relatively large return on their available funds.

There are three ways of computing the earning power of a bank. One is on the capital, another the capital and surplus (both of which might be said to belong to the stockholders) and yet another on their total funds, composed of capital, surplus and net deposits. The last is sometimes regarded as the st significant, since it is thereby shown how successfully the bank is employing the funds on deposit with it.

The bank that shows the largest earning power in New York City is the First National Bank. It lays claim to this distinction not alone in respect of capital, but it apparently employs its surplus and total funds to better advantage than most other institutions. The First National, which has a capital of \$10,000,000, earned last year \$7,164,000. It paid out dividends to the amount of \$5,000,000, or at the rate of 50%, which includes 12% from the First Security Co. On capital, therefore, the First National Bank earned 71.6%, on capital and surplus 28.6% and on total funds 4.88%.

The average earnings of the New York City national banks on capital last year was 21.4%, on capital and surplus the average earnings were

last year was 21.4%; on capital and surplus the average earnings were 10.1% and on total funds 1.38%

Following close behind the First was the Liberty National Bank with earnings of 62.6% on capital, 20.9% on capital and surplus and 2.19% on total funds. However, the Chatham & Phoenix must be accorded first place as regards earnings on capital and surplus, which amounted to 29%, and second place on earnings on total funds, which amounted to 3.51%. It occupies third place in regard to earnings on capital, which was 37.3%. It is these varying results which make the calculation of earnings of the banks on the counts interesting for comparison.

The National City Bank earned last year \$6,024,000, which is the second largest amount. It paid \$3,100,000 in dividends, including \$600,000 from the National City Co. On capital this works out to 24.1%, on capital and surplus 10% and on total funds 1.87%.

The following table gives the capital of the principal national banks of this city, with their net earnings, after comparing surplus and profits on Dec. 31 1914, with Dec. 31 1915, and adding the amount paid out in dividends; and the per cent of earnings to capital, capital and surplus and total funds, comprising capital, surplus and profits and net deposits.

SECRETARY REDFIELD DECLARES AMERICAN TRADE FIGURES ARE ACCURATE.

In an address on the 9th inst. at the annual meeting of the Chamber of Commerce of the United States, Secretary William C. Redfield of the Department of Commerce, pointed out that, thanks to the improvements made in the last year, American export statistics are trustworthy. His statement was in reply to the recent widely published statement that the foreign trade statistics, and especially the export statistics published by the Department, are grossly inaccurate and misleading. He said the course of Department was one calling for neither excuse nor defense but which needed only to be stated to win approval. According to Secretary Redfield the principal faults in the trade statistics in the past have resulted from inadequate entries furnished by exporters and importers. The existing laws made in 1821 had not served to correct this condition, but the errors that had occurred could not be attributed to the Treasury Department or the Department of Commerce

because it fell to the staffs of these two Departments to compile statistics from the available entries at hand. He said

So far as was possible without a change of law, the conditions rec criticised had already been remedied after months of continuous labor when the complaints were made. The Secretary of the Treasury and the Secretary of Commerce, September last, prescribed new export regulations designed to correct the most crying abuse—namely the failure to obtain for all shipments export declarations prepared by the shipper himself or his agent. These regulations are now in effect. No vessel may now clear from our ports without a declaration being filed for every shipment on pard or a bond given to produce the missing declaration within a reas able period. These regulations correct the errors so recently complained of. The Departments have strenuously insisted upon the sailent provisions, notwithstanding vigorous protests against them by many large exporters. It can not be doubted that a high degree of accuracy and completeness has resulted.

Whether new legislation could accomplish the same purpose.

Whether new legislation could accomplish the same purpos Whether new legislation could accomplish the same purpose with less inconvenience to the shippers was a matter that may well be debated by the Chamber of Commerce of the United States. Whatever recommendations the Chamber may make will carry great weight with the Departments. The Chamber has taken a very active interest in the matter of collecting trade statistics, and while the Department of Commerce feels that some injustice has been done its work by recent criticisms issued by the Chamber, which were published in exaggerated forms in some quarters, it is confident that its present reforms have already borne fruit and that hearty co-operation between the two bodies will insure improvements in nearty co-operation between the two bodies will insure improvements in

So far as import statistics are concerned the chief source of error pointed out in the recent criticisms is the lack of a careful statistical examination of the entry before it is accepted by the customs. Now there are three men with statistical experience who go over every entry presented before permits are issued. By this arrangement the errors complained of will be avoided. It should be borne in mind, however, that errors in imports tatistics have never been serious, and that the error in the total value of statistics have never been secious, and that the error in the total value of imports has been so slight as to be of no importance whatever. The chief cause of error as to imports has been the failure to differentiate between two articles dutiable under the same tariff provision, but classified separately in the statistical reports in order to meet the needs of our business men for definite information. Under the new method, one set of clerks will verify the correctness of the classification for duty purposes, another set of men the accuracy for statistical record. For example, the duty or certain solution of a given firewess is the same whether it is bleested. on cotton cloth of a given fineness is the same whether it is bleached, or mercerized, or dyed in the piece, or printed, or colored. The entry clerk, therefore, need not require that distinctions be made. For a long period it For a long period it was impossible to separate those classes, notwithstanding the demand for their separation by cotton manufacturers. Under the new arrangement, this difficulty will be entirely avoided because no entry will be accepted until the required details are furnished.

MERCHANTS' ASSOCIATION PROTESTS AGAINST AMENDMENT TO INCOME TAX LAW.

The Merchants' Association of New York in its "Bulletin" of this week announces that it has written to the Secretary of the Treasury protesting against his suggestion that the provision of the Income Tax Law requiring corporations to withhold the tax in paying interest or dividends be abolished. The "Bulletin" states that the proposal was carefully considered by the committees on commercial law, of which Edward D. Page is Chairman, and on taxation and public revenue, of which Professor Joseph French Johnson is Chairman. The report of these committees was approved by the board of directors and the letter to Secretary McAdoo was signed on behalf of the Association by President William Fellowes Morgan. In part the letter says:

As the Inter-State Commerce reports show over \$9,000,000,000 of rail-road bonds alone in the hands of the public, and inasmuch as this is probably not more than 70% of all such corporate indebtedness, it may be safely estimated that the policy of relieving corporate indebtedness, it may be safely estimated that the policy of relieving corporations from the responsibility of withholding the tax would affect an indebtedness of something like \$13,000,000,000. It is probable that the only source of knowledge as to how many individual taxpayers are involved are to be found in the records of the Department of Internal Revenue, but a very large number of persons certainly would be adversely affected by such a proposed amendment. They have now become fairly well trained to the present methods and are tisfied with the simplified forms of declaration which have been intro-

duced by the Internal Revenue Department during the past year.

We do not doubt but that you will recognize the seriousness of the pra tical objections which we have outlined, at least so far as they affect the holders of corporate indebtedness. If it be urged that the withholding of the tax at the source is a burden to the debtor corporation or its agents, it may be urged per contra that such businesses are much more efficiently organized than individual creditors to attend to such details, and that every transaction being handled by them in bulk can be effected with a small restriction of the inconvenience and cost which would inevitably result were its tion of the inconvenience and cost which would inevitably result were its creditors, as individual taxpayers, obliged to handle the transactions under the conditions of petty detail above outlined. And with a burden laid upon the corporation to supply information at the source, especially with respect to obligations payable to bearer, such a change would not benefit them in the least degree, but rather increase their difficulties.

INCOME TAX REGULATIONS APPLYING TO TRUSTEES OF ESTATES.

The regulations requiring return and payment of tax by fiduciaries under trust estates has been amended so as to provide that in certain cases the fiduciary shall withhold and pay to the collector the normal tax of 1% upon the distributive interest when such interest is in excess of \$3,000. The new ruling amends Treasury Decisions 2,231, which was printed in our issue of Jan. 22, page 306. We give the latest regulation below:

Mr. -

(T. D. 2289.)

Amendment of 2231 of July 26 1915, requiring return and payment of tax by fiduciaries under trust estates

TREASURY DEPARTMENT, Office of Commissioner of Internal Revenue. Washington, D. C., Jan. 28 1916.

To Collectors of Internal Revenue:

T. D. 2231 is hereby amended to provide that fiduciaries having control of any portion of income accruing during the year to known beneficiaries, other than trust estates, as provided in T. D. 2231, but not distributed or paid to the beneficiaries during the year, shall, in rendering their annual return (Form 1041) give the name and address of each of said beneficiaries having a distributive interest in said income, and shall furnish all the in-formation called for in such returns. In all such cases the fiduciaries shall formation called for in such returns. In all such cases the fiduciaries shall withhold and pay to the collector, as provided by law, the normal tax of 1% upon the distributive interest of each of said beneficiaries when such interest is in excess of \$3,000, the same as if said income were actually distributed and paid to the beneficiary. Exemption under paragraph C, however, may be claimed by the beneficiary or his legal representative by filing his claim for exemption with the fiduciary agent.

When the normal tax on undivided annual net income has been so with-held, such tax shall not be again withheld when such portion of the income is actually distributed and paid to said beneficiary, but the beneficiary will account for such income in his return of income for the year in which the same is actually received by him, entering in column "A" the amount of

income on which the normal tax has heretofore been paid.
G. E. FLETCHER, Acring Commissioner of Internal Resenue. Approved: W. G. McADOO, Secretary of the Treasury.

CORPORATION TAX-RECOVERY OF BACK TAXES FROM CORPORATION.

The Treasury Bulletin of Jan. 27, in printing a memorandum attached to the judgment, under the Corporation Tax Law, in the case against the Minneapolis Threshing Machine Co., points out that (1) an action of debt may be brought against a corporation to recover back taxes; (2) suit is main tainable notwithstanding no assessment can be made; (3) suit is not barred by the 3-year limitation in Section 38, Act of Aug. 5 1909. We give the memorandum below as printed as Treasury Decisions:

(T. D. 2285.) TREASURY DEPARTMENT.

Office of Commissioner of Internal Revenue.

Washington, D. C., Jan. 22 1916.
The appended memorandum attached to the order for judgment in the case of the United States v. Minneapolis Threshing Machine Co. is published for the information of internal revenue officers and others con G. E. FLETCHER,

Acting Commissioner of Internal Revenue.

Memorandum. It is contended by the defendant that an action such as the pres which may be considered an action of indebitatus assumpst, will not lie under the facts in this case, and that inasmuch as no assessment had been formally made by the collector of internal revenue, no action will lie; and, finally, that no assessment can be made nor action maintained because it is barred by the 3-year limitation clause contained in the fifth paragraph of Section 38, Chapter 6, 36 Statutes at Large, said section containing the provision under which the excise tax involved in this controversy was au-

The eighth paragraph of said Section 38 contains the following clause:

"All laws relating to the collection, remission and refund of internalrevenue taxes, so far as applicable to and not inconsistent with the provisions of this section, are hereby extended and made applicable to the taxes

d by this section

In United States v. Chamberlin (219 U. S., 250), which was a case arising under the War Reveune Act of June 13 1898, the Court construed Section 31, which makes applicable "all administrative, special or stamp provisions of law, including the laws in relation to the assessment of taxes not heretofore specifically repealed," as authorizing an action of debt under authority conferred by Section 3213, Revised Statutes, for the recovery of the amount of the stamp tax payable but not paid under said war-revenue Act.

The Court in its opinion said:

"Whether an action of debt is maintainable depends not upon the ques-tion who is the plaintiff or in what manner the obligation was incurred, but it lies whenever there is due a sum either certain or readily reduced to cer-

The language contained in Paragraph 8 of the Act under consideration in the present case is much clearer and broader than the language considered in the case of the United States v. Chamberlin, *supra*, and clearly authorizes the present action. To the same effect see King v. United States (99 U. S., 229); Dollar Savings Bank v. United States (19 Wall., 227), and United States v. Little Miami RR. Co. (1 Fed., 700). This last case was reversed in the Supreme Court (108 U. S., 277), but on another point.

That no formal assessment is necessary, see Dollar Savings Bank v. United States (19 Wall., 227); King v. United States (99 U. S. 229), and United States v. Little Miami RR. Co. (1 Fed., 700).

That neither the limitation of time upon the action of the Commissioner of Internal Revenue, contained in paragraph 5 of said Section 38, above referred to, nor any other statute of limitation is binding upon the United States in bringing an action like the one at bar, see United States v. Thompson (98 U. S., 486); United States v. Insley (130 U. S., 263); United States v. Norris (222 Fed., 14, C. C. A., 8), and United States v. Little Miami R. Co. (1 Fed., 700).

WAR REVENUE ACT-DEEDS EXECUTED BY STATE,

A ruling to the effect that deeds executed by a State, county, town or other municipal corporation are not taxable under the War Revenue Act was issued under date of January 19, as follows:

(T. D. 2,283.) TREASURY DEPARTMENT Office of Commissioner of Internal Revenue,

Washington, D. C., January 19 1916.

—In response to your communication of the 14th instant, you are advised that a deed executed by the State of Washington for the conveyance of rael property to your company would not be taxable under the Act of

October 22 1914. It is the duty of the grantor to affix revenue stamps required upon a deed or other instrument conveying real property, and it was not the intention of Congress in enacting this law to impose a tax upon any State, county, town, or other municipal corporation.

Respectfully,

DAVID A. GATES, Acting Commissioner of Internal Revenue.

ADMINISTRATION'S NEW SHIP PURCHASE BILL.

Hearings on the Administration's new ship purchase bill began on Thursday of this week before the Committee on Merchant Marine and Fisheries. The bill was introduced on Jan. 31 by Representative Alexander, and was immediately referred to the Committee. Mr. Alexander is Chairman of the Committee. Essential differences between the new bill and the one which failed in the Senate last year consist in modifications of the Government-operation feature and a broadening of the powers of the Shipping Board provided for in the bill. Government-operation, under the new bill, would be entered upon only as a last resort if private capital fails to respond. As in the old bill, the Shipping Board would consist of five members; it would be made up of the Secretary of the Navy and the Secretary of Commerce, and three members to be appointed by the President. The bill would empower the Board to construct in American shipyards or navy yards, or to purchase or charter vessels of a type "suitable for use as naval auxiliaries and army transports or for other naval and military purposes, with a view to chartering, leasing or selling such vessels to any corporation, firm or individual a citizen or citizens of the United States, desiring to use them in the transportation of the foreign commerce of the United States with foreign countries, or with Alaska, the Panama Canal Zone, the Philippine Islands, the Hawaiian Islands, or the Islands of Porto Rico, Guam and Tutuila." An issue of Panama Canal bonds to an amount not to exceed \$50,000,000 is provided for to carry out the purposes of the bill. Unlike the bill passed by the House last year, the present bill fixes no time limit within which the Government would withdraw from the shipping business. Vessels controlled by the Board and those which pass into private hands by lease or charter would be subject at all times to the call of the President for use in times of war or other emergency. Power similar to that possessed by the Inter-State Commerce Commission in the matter of the regulation of rates of railroads is conferred upon the Board under the pending bill. These powers are set out in Section 9 of the bill, as follows:

Sec. 9. That the Board hereby created shall have the power and authority to regulate the operation of all corporations, firms or individuals engaged as common carriers in the transportation of passengers and property by water between the ports of the United States, and not entirely within the limits of a single State, and between the United States and foreign countries, and between the United States and its territories and possessions, and beand between the United States and its territories and possessions, and between the territories and possessions of the United States, and to determine and prescribe just and reasonable rates or charges to be demanded or collected for the transportation of passengers and property in such trade, and just, fair and reasonable classifications, regulations, or practices to be followed with regard thereto: *Provided*, however, that the Board may prescribe preferential rates covering the transportation aforesaid, if, in its judgment, such rates are necessary in order effectually to carry out the purposes of this Act. And when property may be and is transported by common carriers from a point within the United States to foreign countries or to or from the territories or possessions of the United States, the caror to or from the territories or possessions of the United States, the carriage being by a railroad or railroads or other means of transportation, within the United States, and a vessel or vessels operating under American registry or enrollment, the Board is hereby authorized to determine and prescribe through routes between and over such rail and water lines, and just and reasonable joint rates or charges to be demanded and collected for the transportation of property over such routes, and to determine and prescribe just, fair and reasonable classifications, regulations or practices to be adopted and followed in regard to such traffic, including the issuance d form of through bills of lading and permits for shipments for specific sailings, which shipments are hereby expressly authorized: Provided, how-ever. That the Board may prescribe preferential rates covering the transportaever. That the Board may prescribe preferential rates covering the transporta-tion aforesaid, if, in its judgment, such rates are necessary in order effectually to carry out the purposes of this Act. And whenever the carriers between and over whose lines joint routes have been established and prescribed, as aforesaid, shall fail to agree among themselves upon the apportionment or division of the joint rate prescribed by the Board, as aforesaid, the Board may, after a hearing, prescribe the just and reasonable proportion of such joint rate to be received by each carrier party thereto, provided that in determining the just and reasonable proportion of such joint rate to be received by any railroad company or companies the Board shall act in conjunction with the Inter-State Commerce Commission with regard thereto and the prior publication of such rates as provided by the Inter-State Commerce Act shall not be required.

The Board shall also have power and authority to make diligent inve tions into the navigation laws of the United States and into the organization, conduct and management of the business of all corporations, firms or individuals engaged as common carriers in the marine tra said, and to gather and report to the President of the United States such information and data as will enable him to recommend to the C legislation for the regulation of such commerce and for the promotion and development of the American merchant marine.

In order to accomplish the purposes declared in the foregoing provisions of this section, the provisions of the Act to Regulate Commerce, approved Feb. 4 1887, and all Acts amendatory thereof and supplementary thereto, are hereby extended to include common carriers engaged in the transportaengers and property by water between the ports of the United States, and not entirely within the limits of a single State, and between the United States and foreign countries, and between the United States and its Territories and possessions, and between the Territories and possessions of the United States, so far as applicable, except that in respect to such common carriers the Board hereby created shall be substituted in lieu of the Inter-State Commerce Commission mentioned therein.

Representative Alexander had the following to say re-

garding the new measure on Jan. 30:

Many are interested to know if the bill contains a provision authorizing ownership and operation of merchant vessels by the Government. It provides that the Board may, if necessary, subscribe to and purchase the majority of the stock in a corporation and vote such stock and do all things necessary to protect the interest of the Government, and may at any time, with the approval of the President, sell such stock.

Vessels owned by such corporation or corporations will be operated and their business conducted like the business of any other corporation, except that the Government will retain control by majority stock ownership. This method is suggested by the plan of ownership, control and operation of vessels by the Panama Railroad Co., in which the Government owns all the stock, and which has been in operation for ten or twelve years past. I would make it plain, however, that the power would not, in my opinion, be exercised except as a last resort, and then only to meet conditions that private concerns are not willing to meet or feel that they are not able to meet, and where the exigencies of our foreign trade demand adequate ocean facilities.

One of the most important provisions in the bill is contained in Section 9, which vests in the Board plenary power to regulate common carriers by water. It should be noted, however, that the exercise of such power is not made mandatory, and should not be, as conditions of traffic by water are very different from those by rail, and it will take time and experience in administering the law to determine how far the power to regulate rates may be wisely exercised in ocean transportation, and particularly in the foreign trade, where American shipping will come in sharp competition

with foreign shipping.

One of the most valuable provisions of the bill is that which requires all common carriers by water, foreign as well as American, to have a Government license, revocable if the provisions of the Act or the rules or regulations made by the Board pursuant thereto are violated. This will be an effective method of enforcing compliance with the law. At the same time it will enable the Shipping Board to prevent unfair competition of foreign vessels with American vessels, because through the power to revoke the licenses of foreign vessels operating in our waters they can be prevented from entering into trusts or combinations on the high seas which will be hurtful to American shippers and to American ship-owners.

The Board is given power to make thorough study of our navigation laws and into the organization and conduct and management of common carriers by water, and to make reports to the President, who in turn will be enabled to make recommendations to Congress of needful legislation for the further

development of our merchant marine.

It is evident that foreign Governments or foreign citizens are beginning to buy up American vessels and transfer them to foreign registry. This is extremely hurtful to our situation, where we are suffering already from a scarcity of tonnage. Other Governments have laws, some of them recently passed, prohibiting transfers of vessels of their registry to other flags. In self-protection this Government must quickly enact legislation which will prevent vessels of American registry from being transferred to foreign flags without consent of the Shipping Board. If the Ship bill presented in the last Congress had been passed we could have purchased 600,000 or 700,000 tons of excellent merchant vessels which would now be under our control and would have made the present congestion of our foreign commerce in the port of New York and other places impossible.

That there is need for legislation to relieve the present situation is attested by the unanimous voice of commercial and industrial organizations all over the country. Ocean freight rates have increased from 100 to 1,000%, and even at these exorbitant rates there is a great lack of tonnage and our commerce is suffering immense losses. Our opportunities to extend our trade are handicapped and in many directions thwarted by the lack of ships. It is a situation that demands a speedy and efficient remedy.

Secretary of Commerce Redfield appeared before the Committee in support of the bill with the opening of the hearings on Thursday. W. H. Douglas, Chairman of the Merchant Marine Committee of the Chamber of Commerce of the United States, was also heard by the Committee at the first day's hearing. The latter declared there was a deep-rooted feeling against the Government entering the shipping business, but that a subsidy and subvention plan would have the hearty co-operation of shippers and would result in an immediate restoration of the American flag to the seas. He suggested a time limit of five years on Government operations of any ships to be bought.

HOUSE AGAIN PASSES CHILD LABOR BILL.

The Keating bill, intended to prohibit the shipment of child-labor products in inter-State commerce, was passed by the House of Representatives on Feb. 2 by a vote of 337 to 46. The bill makes it unlawful for any producer or dealer to ship in inter-State commerce commodities produced wholly or in part in mines or quarries by children under sixteen years of age or by children under fourteen years of age in mills, canneries, workshops or manufacturing establishments. Where children are employed at night or more than eight hours a day in this latter class of industries, sixteen years is fixed as the minimum age instead of fourteen. An amendment, excepting from the provisions of the bili unincorporated canning clubs formed by girls and boys, is carried in the bill as it passed the House. Responsibility for the observance of the law falls on the shipper and not on the railway. According to the "Journal of Commerce." the bill contains a section which in effect provides that no dealer shall be convicted who shall be able to establish a guaranty from the manufacturer that children had not been

employed in the manufacture of the goods in question contrary to the provisions of the Act. The purpose of such a guaranty, it is stated, is to avoid the dilemma of either making the law practically unenforcible by demanding proof of guilty knowledge on the one hand, or upon the other, of making it an altogether unjustifiable hardship upon the public by punishing those who had violated a law without every reasonable opportunity being afforded them of avoiding such violation.

A similar bill was passed by the House on Feb. 15 1915 but failed in the Senate at that session of Congress.

AMENDED TREATY WITH COLOMBIA FAVORABLY REPORTED.

By a vote of 8 to 7, the Senate Committee on Foreign Relations on the 2nd inst. ordered a favorable report on the proposed treaty with Columbia as amended. As prepared when William J. Bryan was Secretary of State, the treaty expressed its regrets for the incidents leading up to the American acquisition of the Panama Canal Zone and agreed to pay Colombia \$25,000,000 for the separation of Panama; the treaty as reported by the Committee, reduces the indemnity to be paid by the United States to \$15,000,000 and makes the expression of regret mutual to both the United States and Colombia. This section sets out that

The Governments of the United States of America and the Republic of Colombia, in their own names and in the names of their respective peoples, wishing to put at rest all controversies and differences between them arising out of the events from which the present situation on the Isthmus of Panama resulted, express sincere regret that anything should have occurred to interrupt or to mar the relations of cordial friendship that had so long sub-

sisted between the nations.

The vote in favor of the amended treaty was east by eight Democrats; six Republicans and one Democrat—Senator

Clarke of Arkansas—voted against it.

It is reported that a formal statement vigorously disapproving the amended treaty has been drawn up on behalf of Colombia by Julio Betancourt, the Colombian Minister. On the 9th inst. it was stated that during a call made upon Secretary Lansing on that day by Minister Betancourt, the latter was assured that President Wilson has not given his approval to either of the amendments.

FAVORABLE REPORT ON NICARAGUAN TREATY.

A favorable report on the treaty with Nicaragua was ordered by the Senate Committee on Foreign Relations on the 2nd inst. This treaty provides for the payment of an indemnity of \$3,000,000 to Nicaragua in return for which the United States would obtain exclusive right to build an interoceanic canal and would secure certain islands in Fonseca Bay for a naval base. These rights are sought with a view to preventing any other nation or private interests from building a canal in competition with the Panama Canal. A motion of Senator Borah for the consideration of the treaty in open session was voted down in the Senate on the 10th inst. The Government of Salvador on the 8th inst. instructed its Minister at Washington to lodge a protest against the The Government contends that the treaty violates the neutrality of Honduras, which, it points out, the United States guaranteed through conventions with the Central American States, and that a committee of the Senate at Washington approved this treaty previous to the conclusion of pending negotiations and in spite of previous protests from Salvador.

LIQUIDATION OF GERMAN FIRMS IN HONG KONG.

The following report, forwarded by Consul-General George E. Anderson from Hong Kong, China, under the date of Dec. 4, with regard to the liquidation of German firms in Hong Kong, appeared in the issue of Commerce Reports (issued by the Bureau of Foreign and Domestic Commerce, Department of Commerce) for Jan. 17:

The liquidation of the business of German firms in Hong Kong under the direction of the British Government, and growing out of the war, has proceeded with more success and less friction and trouble than was anticipated. Taking all lines of business into consideration and allowing for many special cases, it is generally understood that the work of winding up the immense business of all these firms is about 75% complete. In most cases all business has been so arranged that further liquidation is a matter of periodical action from month to month, terminating within a short period.

Government Instructions Prevented Demoralization.

The disposal of stocks of goods of all kinds on hand at the time liquidation was commenced has presented the greatest difficulties. It was the part of wisdom, not only in the protection of the interests of German firms, but their British bankers and their British competitors as well, that goods be not dumped on the market in such a way as to demoralize it, and prevent British and other holders of similar goods from realizing upon their own stocks in a fair and profitable way. Instructions of the Hong Kong Government were carefully drawn to prevent any such demoralization. However, the disposal of such stocks has so far proceeded that the Government has fixed April 30, or another five months' period from the time the

order was issued, as the time by which it expects all stocks of goods to be itation of some adequate reason by liquidator such sales have not been made.

Rise in Silver Exchange Helpful—Loss on Machinery and Parts.

In general, stocks of goods have been sold to better advantage than had been anticipated. The shutting off of supplies of many lines of goods from Europe has enabled the stocks of such goods still held here to be sold at satisfactory prices. Cotton piece goods, which constituted the largest item among such assets of most German firms, have been held until recently, when they have been disposed of at good prices. The recent rise in silver exchange has been particularly helpful in that line

Goods in the nature of luxuries, such as wines and liquors, have usually been sold at a loss or at best about cost. Machinery has been sold at a loss, since by reason of unusual business depression there has been little demand for machinery of any sort except for special purposes for which special machines must usually be ordered. A serious drag on some of the firms handling machinery has been stocks of spare parts and supplies. The forced sale of such stocks would realize almost no return, while, on the other hand, it is manifestly impracticable to hold such stocks indefinitely for the sale of such supplies as they may be needed for consumption.

Stocks and Bonds Not Easy to Manipulate-American Agencies. There has been considerable difficulty in handling stocks and bonds and similar assets of firms as a result of the depressed condition of business generally and especially in view of the bearish result which would follow the offering of any considerable portion of such assets on the Hong Kong Stock Exchange. Gradually, however, such property is changing hands and the liquidation of such assets has been effected without as much loss as might reasonably have been anticipated.

In addition to changes noted in former reports, other business concerns

of Germans have been bought or taken over by British purchasers and are now being developed as British concerns. New American agencies are being arranged rapidly, and it is significant that most of the more important re either developed into branch houses or are turned over to substantial Chinese interests. It is significant also that Chinese capitalists prominence and ability are establishing new connections, and in some ca even new houses for the handling of American products

PAYMENT BY GERMANY FOR CARGO OF SEIZED PASS OF BALMAHA.

About \$500,000 was paid by the German Government for the cotton cargo on board the American sailing vessel, Pass of Balmaha, according to Robert M. Harriss of the firm of Harriss, Irby & Vose, cotton merchants, of this city, who arrived here on Jan. 24 after a three-months' trip to Germany. As noted in our issue of Aug. 7 last, the vessel, bound for Archangel with a cargo of cotton, was compelled to put into Cuxhaven after being stopped by a German submarine, which placed an officer on the vessel as a prize crew. Germany subsequently ordered the ship held for prize court proceedings at Hamburg on the ground that her transfer from Canadian to American registry after the war began was illegal. Last November the United States instructed Ambassador Gerard at Berlin to protest to the German Government against the detention of the vessel; it was understood that the latter, in asking for the release of the vessel, was directed to impress upon the Berlin Foreign Office the fact that the ship was virtually owned in the United States even before the change of registry, and is now wholly owned in this country. It was announced in December that the Hamburg prize court had decided to treat the ship as "an enemy vessel," its evidence, it was stated, having established that the ship was under the British flag until the end of 1914 and was sold to an American company after the outbreak of the war. The court ruled that "as the cargo is neutral, the net proceeds of the sale must be released.

DAMAGE SUITS AGAINST KRONPRINZESSIN CECILE DISMISSED.

The libel suits against the North German Lloyd Steamship Co. as owners of the steamer Kronprinzessin Ceeile were dismissed by Judge Hale in the United States District Court at Boston on Feb. 2. The Cecile, it will be recalled, sailed from New York on July 27 1914 (just before the outbreak of the war) with a consignment of nearly \$11,000,000 in gold for bankers in Paris and London. When nearing Plymouth, instructions were received by her officers to return at once for the nearest American port as war was imminent. For several days, until her arrival at Bar Harbor, Me., on Aug. 4, nothing was known as to the whereabouts of the vessel. Actions for alleged breach of contract caused by the failure of the steamer to reach the other side were brought by the Guaranty Trust Co. of New York, the National City Bank of New York, Charles W. Rantoul Jr. of New York and Maurice Hanssens of Brussels. The two institutions sought to recover for the non-delivery of their gold shipments; the individuals named were passengers. The trust company's gold shipment, destined for London, amounted to \$4,942,937, and it claimed damages of \$1,040,468; the National City Bank had on board a consignment of \$1,-061,719 of gold for London and \$2,104,254 for Paris, and placed its damages at \$446,828. Mr. Hanssens sought damages of \$200,000 for the failure of the ship to land him at Plymouth, claiming that if he had arrived in time he

would have been able to reach his home in Brussels before it was seized by the Germans, in consequence of which he alleges he has been deprived of his property. Mr. Rantoul asked for \$5,000 damages because the liner failed to land him in Plymouth. The claims in all cases were denied by Judge Hale, his opinion, given in the case of the Guaranty Trust being made to apply to the other three libels. In its findings the court contended that the master of the vessel was justified in turning back; Judge Hall said in part:

It is not necessary to decide what would have happened if the steamship had proceeded on her voyage. It is sufficient to say that the claimants directors acted with reasonable apprehension of imminent peril when they sent the wireless message to their captain. They must be judged by the information within their reach at the time of sending the message. When so judged, their conduct must be held to be reasonable and justifiable.

Upon the information received, Captain Polack acted with a reasonable apprehension of impending danger. He was justified in deviating from his direct course eastward; and in doing this he was acting with a due regard for the safety of his ship, his passengers and his cargo. In the he knew his clear duty was to turn about at the time he did. In the light of what

FEDERAL RESERVE BOARD DISCOUNTENANCES SEP-ARATE ORGANIZATION OF STATE BANKS.

The movement in New York State having for its aim the formation of an association of banks to be made up solely of institutions under the jurisdiction of the State Superintendent of Banks is believed to be responsible for the issuance by the Federal Reserve Board of a statement deprecating the disposition to create further cleavage between national and State banks in any State, "such as would result from a plan for breaking up the Bankers' Association of such State into two separate organizations." "It appears to the Board," says the statement, "that a common ground for both groups of banks should be sought, rather than ground for separa-We give the statement below:

The Board from the beginning has taken the attitude that it does not desire to interfere in any way with matters of State legislation or State organization. What the Board is trying to bring about is the co-operation between national and State banks on a fair and equitable basis, and the Board regrets, therefore, that there should be felt in any State a disposition to create further cleavages between these banks such as would result from a plan for breaking up the Bankers' Association of such State into two sepa-rate organizations, one for the national banks and one for State banks. It appears to the Board that a common ground for both groups of banks should be sought rather than ground for separation.

The States as such do not give up any of their privileges with respect to their banks by encouraging these banks to join the Federal Reserve system, and the Board has gone to the limit of its powers in keeping intact the powers of State banks which may join the system. The States have the same interest as the national Government in the maintenance of high banking standards. It is to be hoped that wise counsel will prevail, the conviction gradually asserting itself that there should be no feeling of competition etween State and national Governments which might produce a tendency to legislate downwards as to banking standards, or to create conditions of uncertainty rather than safety for the mere purpose of making one system more attractive from the profit-making standpoint than the other.

As stated above, the interest of both is the same; that is, to stand for the highest possible banking standards, and to promote the greatest possible degree of safety and banking efficiency.

REPORT OF FEDERAL RESERVE BANK OF CLEVELAND -CORRECTION.

In giving last week the report of the Federal Reserve Bank of Cleveland, a typographical slip occurred which escaped the watchful eye of the proof reader. The slip consisted in the omission of a line in the first paragraph of the second column, on page 484 of the "Chronicle," and affected the sentence beginning "on Dec. 31 we had in investments, &c."; the correct reading of this should be as follows: "on Dec. 31 we had investments and discounts in amount equal to 110% of our paid in capital. Our earnings for the month of December last were \$4,102 27 in excess of current expenses for that month." The part italicized is the portion which was left out in our issue of Saturday last.

ROMAINE A. PHILPOT ON ACCEPTANCES AND DISCOUNTS.

Speaking on "Acceptances and Discounts," Romaine A. Philpot, Chairman of the Forum Committee of the New York Chapter of the American Institute of Banking, at the regular Forum meeting on the 2d inst., pointed out that the establishment of a market for commercial paper with facilities for discounting and re-discounting is the one principal feature of the Federal Reserve Act. "While the principle," he said, "of rediscounting is of great importance to business in general, and when unforeseen contingencies, panics and crises require it, its greatest value will be evidenced when unusual and abnormal conditions will create emergencies requiring extension of credit facilities, such as will present themselves with the hoped-for end of European hostilities, when the tremendous destruction of property abroad and wastage of capital will be followed by a marked advance in interest In

rates abroad, which is bound to attract our capital."

part his remarks are given below:

What is a "rediscount"? It may be briefly explained in the following manner: A merchant wishes to convert into cash a note or acceptance of his customer. He endorses it and discounts it with his bank, the proceeds being credited to his account. At some future time his bank, requiring additional funds, endorses this same paper and procures its discount at a Federal Reserve bank. The paper has now been "rediscounted," and has a threefold security, emanating, firstly, from the credit standing of the maker; secondly, from the weight which the endorsement of the merchant carries with it, and thirdly, from the value which is given it by the endorsement of the bank, which has discounted it with the Federal Reserve bank. And what is an "acceptance"? Heretofore, when a merchant sold goods and what is an "acceptance"? Heretolore, when a merchant sold goods in the domestic trade, he would receive either cash or a note in payment, or would charge the invoice amount in account. An adoption of the acceptance system, as it has been carried on in trades with foreign lands, would be of much advantage to him. It is the simplest, safest and most economical method of handling the credits arising out of the ordinary exchange of goods. It involves a minimum risk to the shipper of the goods. The procedure may be described as follows: He draws a draft on the buyer with shipping documents attached sends this draft to his local bank with and with shipping documents attached sends this draft to his local bank with instructions to deliver the documents to the drawee upon due acceptance of the draft only. The bank, in turn, forwards these papers with corresponding instructions to a bank in the city of the purchaser. The purchaser runs a minimum risk in accepting the draft, for he only does this upon receipt of the shipping documents, which are evidence that the goods have been shipped. The result is a double-name paper. The purchaser of this paper has an investment clearly showing that it arose out of a commercial transaction, as it bears the names of all parties concerned, while a cial transaction, as it bears the names of all parties concerned, while a promissory note, given by a merchant, so far as face evidence goes, might have arisen out of a transaction other than such as make paper eligible for rediscount by the Federal Reserve bank. It is such "trade acceptances," which the regulation of the Federal Reserve Board under date of July 16 1915 is trying to encourage.

From the practice of accepting commercial paper may be derived distinct ges both to banks and their customers, which evidently are even now being recognized throughout the country, judging from the increased and responsive rendency toward the creation of such paper, a considerable ortion of which has of late found its way to New York's discount market Among these advantages there are the following few worthy of especial mention: The bank customer may borrow more readily and cheaply by means of an acceptance than a promissory note. The use of acceptances enables financial institutions to conveniently arrange their customers' legitimate business transactions without employing their own funds. Banks having surplus funds may invest in prime acceptances, to be placed in portfolio until maturity, or, when funds are again required, to be sold in the open market. And a remunerative business feature may be gained by banks and trust companies as acceptors on behalf of their customers, in consideration of a commission, of drafts arising out of importation and exportation of merchandise, and by State banks as acceptors of domestic "trade paper." According to the Federal Reserve Act, as set forth in Sectrade paper. According to the rederal Reserve Act, as set forth in Section 13, acceptances by a bank are limited to an amount, in the aggregate, not more than one-half of its paid-up capital stock and surplus—seemingly a wise measure and restriction to assure a cautious inauguration of the bank-acceptance business, in which the American banker, broadly speaking, has had little experience. In their entirety, however, the provisions in Section 13 advocate the creation of an acceptance market in the United States similar to that existing in Europe, the most important medium through similar to that existing in Europe, the most important medium through which European countries have developed their ocean-borne trade, and the establishment of this newly created acceptance market is bound to prove of greatest value to our international merchant in the furtherance of his for-Prevalent conditions in the world markets and the ensuing requirements of our newly acquired foreign trade, attended by an abatement of foreign trade objection to dollar drafts and supported by the actual establishment of a discount market in the United States, are a pronounced impetus to the development of this newly inducted acceptance market, and it may be confidently expected that as time advances, and a transition from the abnormal to the normal state of internationia relation has taken place, the worthiness of American bank acceptances will become ognized by the European buyer of commercial paper, to an extent that will enable American importers to finance their transactions by means of 'dollar drafts" through American banks, instead of following old methods.

In this connection, it may be of interest to explain the bank-acceptance business prevalent in foreign countries. In the large European money centers there exists a class of financial institutions known as "acceptance houses." They do not discount paper nor accept deposit accounts, but confine their business almost entirely to accepting drafts. A merchant whose paper is not salable on his own credit, and who wishes to effect either a domestic or foreign purchase, applies to such an acceptance house for accommodation. The latter, after a satisfactory investigation regarding the merchant's responsibility, will, for a commission, extend to the merchant the privilege of having drafts drawn upon them, which they henceforth accept upon presentation. If the acceptance house is of highest financial standing, this double-name paper becomes of highest rating and may be readily sold to discount houses, including many important financial institutions. tutions. This system of accepting has been a source of revenue of highly remunerative nature to the acceptance houses, while our national banks in the past have been prohibited from accepting time drafts. charged for accepting drafts depends upon the life of the acceptance, the financial responsibility of the client on whose account acceptance is given, and the collateral security, if any, underlying the transaction. Practically the identical fundamental banking principles as in England have been practically the security of the client of the collateral security. ticed in European Continental countries. Through the medium of the open discount market, English banks employ their loanable funds by the purchase of bankers' and prime merchants' acceptances. This practice of rediscounting paper in the open market is not only customary and in constant operation, but constitutes one of the most important branches of banking throughout Europe. In fact, in London there are many discount house who specialize in discounting paper.

RESERVE BANKS MAY HANDLE ACCEPTANCES SECURED BY CHATTEL MORTGAGE ON CATTLE.

In indicating that a banker's acceptance secured by a chattel mortgage on cattle may be accepted by the Federal Reserve Banks, the Federal "Reserve Bulletin" of February prints the following informal ruling of the Board in the

Your letter of January 4, stating that a large cattle loan company has taken up with a New York banking institution an arrangeme which it may draw drafts with maturities to ninety days, attaching to the

draft a chattel mortgage on cattle securing the amount, has had the consideration of the Federal Reserve Board.

It is the view of the Board that cattle should be considered as marketable commodity and that the Federal Reserve Bank of St. Louis may consider as eligible a bankers' acceptance secured on a chattel mortgage

on cattle.

ESTABLISHMENT OF BRANCHES BY CONSOLIDAT-ING NATIONAL BANKS.

The question as to whether the establishment of branch banks would be permitted under certain circumstances involving the consolidation of three national banks, has been decided in the negative by M. C. Elliott, counsel for the Federal Reserve Board. His conclusions are set out as follows in the February issue of the "Federal Reserve Bulletin."

Sir.—The following question has been referred to this office for opinion: Whether the Federal Reserve Board would permit the establishment of branch banks under the following circumstances:

"The capital of the A National Bank, at present, is \$300,000, and it is contemplated increasing the capital to \$500,000. In doing so, it is proposed to take over, with the increased capital, the present capital stock of the B National Bank, which is \$100,000, and the C National Bank, which is \$50,000. The balance of the increase in the capital stock of the A National

Bank to be distributed as the stockholders elect."

It is not entirely clear, from the question submitted, just what method of procedure is proposed. If it is contemplated that the A National Bank, as a corporation, is to become the purchaser of the stock of the other two banks, such an arrangement would be contrary to the provisions of the National Bank Act, which do not permit national banks to hold stock in other corporations. If, on the other hand, it is proposed to purchase from the B National Bank and the C National Bank their assets, paying therefor with stock in the A National Bank are used to purchase the liquid to the liquid the liquid to the liquid the liquid to th with stock in the A National Bank, such a course will involve the liquida-tion of the two banks purchased, and the A National Bank, as the surviving corporation, cannot, under the law, establish branches in the city in which it is located or anywhere in the United States.

I am of opinion, therefore, that the plan submitted cannot be carried

out without violating the provisions of the National Bank Act

Respectfully,
M. C. ELLIOTT, Counsel.

To HON. CHARLES S. HAMLIN, Governor Federal Reserve Board.

RICHMOND RESERVE BANK'S OFFER FOR THE PUR-CHASE OF GOVERNMENT BONDS.

In a circular letter issued to the members of the Federal Reserve Bank of Richmond on the 3d inst., Governor George J. Seay announces that the bank is prepared to purchase, at par and accrued interest, \$2,000,000 in Government 2% bonds actually owned by the member banks, whether now securing circulation or not. We publish the letter herewith: February 3 1916.

To Members of the Federal Reserve Bank of Richmond: In our Circular Letter No. 32, dated Nov. 15 1915, we advised you of

the steps necessary to be taken when making application to the Treasurer of the United States to sell United States bonds in order to retire circulation in whole or in part, as provided for in the Federal Reserve Ac The Federal Reserve Board may, in its discretion, require the Federal Reserve banks to purchase bonds so offered for sale in order to retire circulation to an amount not exceeding \$25,000,000 in any one year, and such

urchases, if made, will be at quarterly periods.

The first quarterly period at which such authority may be exercised by

In the most its ruling, will be March 31 1916.

In the meantime, this bank is authorized by the Act to purchase Government bonds in the open market, from members or others, and bonds so purchased, under the ruling of the Board, will offset any bonds which it might otherwise be required to purchase from members under the Act, as

For the purpose of giving member banks of this district an opportunity to realize upon part of their Government bonds at once, should they so desire, we now advise them that we are prepared to purchase, at par and accrued interest, \$2,000,000 in Government 2% bonds actually owned by the banks offering them, whether now securing circulation or not

This amount is more than the pro rata share of the entire \$25,000,000 of bonds which could be allotted to this bank for the whole year should the

Federal Reserve Board exercise its authority under the Act.

Should more than the \$2,000,000 be offered to us by member banks, the

mount purchased will be prorated to each bank according to the amount

Payment will be made by arrangement with each bank

Offers of bonds will be received up to Feb. 15, but will not be acted upon until after the close of business on that day, when each bank will be notified of the amount accepted.

In offering the bonds, please use the accompanying form. Respectfully, GEO. J. SEAY, Governor.

EARNINGS OF FEDERAL RESERVE BANK OF BOSTON.

Earnings of \$125,459 against expenses of \$129,797 are reported by the Boston Federal Reserve Bank from the date of its organization on Nov. 16 1914 to Dec. 31 1915. With reference to these results the report states:

It is the accounting practice of the Federal Reserve Bank to credit only earned discount and interest in current earnings, consequently on dis counts and investments already made there was, Dec. 31 1915, a credit to unearned discount and interest of \$35,438, which will, in due course, be credited to current earnings. It must be borne in mind that since the opening of the bank demand for rediscounts for member banks has been comparatively small, and that the bank has had to depend for its earnings on purchases in the open market of acceptances, city and town notes, &c. regulations under which these purchases could be made were not formulated until some time after the banks had been in operation, consequently the bank had for a time no earning capacity whatever except from such small amounts of rediscounts as were offered

Because of the admirable facilities provided by the Foreign Department of the Boston Clearing-House Association, the check collection facilities offered by the Federal Reserve Bank of Boston have been availed of less than has been the case with most of the other Federal Reserve banks. Since the opening of the Federal Reserve Bank of Boston, 3,315 shares have been surrendered through changes in capital and surplus or liquidation of member banks, and 9,359 shares have been issued, either through increase of capital and surplus or admission of new member banks, making a net increase from Nov. 21 1914 to Dec. 31 1915 of 6,044 shares. Of the 9,359 shares issued, 7,200 shares were issued to the Old Colony Trust Co. of Boston. The report points out that the Old Colony Trust is the largest State bank or trust company as yet admitted to membership in the Federal Reserve System.

H. PARKER WILLIS ON "THE TRUE PLACE OF THE RESERVE BANK."

The January number of the Philadelphia "Chaptergram", the monthly publication issued by the Philadelphia Chapter of the American Institute of Banking, contained an address on "The True Place of the Reserve Bank," delivered by H. Parker Willis, Secretary of the Federal Reserve Board, before the Chapter at its December meeting. Mr. Willis, in his remarks, referred to the fact that there are some who are fond of comparing the Federal Reserve banks "with a

Still others choose to draw an analogy between a reserve bank and an extra dynamo in a power house.

The most correct comparison is that which regards them of as being similar to what we know as a bank—the reserve bank is neither a reservoir, a fire engine nor a power house, but it is a bank; and in order to do its work with success, and to give the banking results which experience has indicated are necessary, the reserve bank must work on banking lines and guide itself by banking principles in the conduct of its operations." We quote the address below:

The question whether or not to have Federal Reserve banks has been settled, and, I believe, settled permanently. The institutions have proven their utility, and I have the faith to forecast a period of continuous and uninterrupted usefulness for them. They have already rendered great service, which the sober second thought of the public will recognize. They are in position to render much greater service, a fact which will become more and more obvious as time goes on. I do not believe that the fundamental question to be considered now is the utility of the Federal Reserve bank, but is rather that of the scope and functions which shall be accorded to them at the present time. I am the more inclined to this belief because of the fact that difference of view on this subject has existed throughout the whole history of banking legislation in the United States. Many persons have held from the beginning that it was not desirable to attempt to establish anything more than provision for exceptional and unusual conditions in the United States, and that, therefore, we could safely content ourselves with legislation providing for emergency currency, or emergency treatment of banking needs. This was the underlying idea of the Aldrich-Vreeland Law, a law which after lying dormant for some years, and being amended, served a valuable purpose during the stringency of 1914.

assed that the Federal Reserve banks had been recognized not as emergency banks but as permanent aids to sound finance in the United States, the cooperative expression of the best sense of the banking community upon general conditions affecting all bankers in greater or less degree, and, as such, interesting to all. Now we have had a year's experience in the operation of the Federal Reserve banks, and the older question has reappeared in a new form. The question is directly raised whether Federal Reserve banks should be active institutions, playing a direct part in the financial life of the community, or whether they should be sporadic and occasional in operations called into play only when necessity requires. This question may be discussed from two standpoints. We may consider what the act itself has provided, and what effect it is wise and desirable, from the standpoint of banking theory, that it should have upon others than those who are charged with its administration. The Federal Reserve Act is clear and unmistakable on the first point. It provides for rediscounts to member banks as the first and primary function of the Federal Reserve institutions. But it also provides for what are called open market operations, the latter to be engaged in at the will of a reserve institution, and as conditions seem to dictate. What was the object of the framers of the Act in making this provision? There can be no doubt as to their essential purpose. They recognized that there would probably be times when, through lack of rediscount offerings, the banks would be unable to exert that direct effect upon the market which would be necessary if they were to perform their full function as holders of the ultimate reserves of the country. It was the intention of the Federal Reserve Act to provide a means whereby the banks could make their rates of discount effective in the same sense in which that operation is performed by foreign banking institutions, such as the Banks of England and France. It was intended to vest them with the

And in this view of the functions of the Federal Reserve banks the Federal Reserve Act based itself firmly upon experience. There are, so far as I am aware, no banking institutions in foreign countries which deal only with banks, and are cut off from any communication with others. Either by direct dealing with the public at large and the continuous discounting of paper irrespective of its amount, provided it conforms to certain other requirements, or by direct dealing with specific classes of makers or owners of commercial paper, these banks exert the weight of their influence in the market, and do what they can to stabilize gold movements, render rates of discount uniform and fair to all, and at the same time make provision against future market developments that might otherwise be left to work themselves out according to circumstances. When the Federal Reserve Act was first taken under consideration, it was suggested in influential quarters that the banks be given power to receive deposits from and deal directly with individuals. The matter was carefully considered, and for a variety of reasons it was not deemed wise to take this step. Later it was suggested that the Government should practically supply the basic funds and operate the proposed new banks in order that it might fully and entirely control their dealings and their effect upon the market. This, also, after being considered, was laid aside, and in its place there has been substituted a system of co-operation between the Government and the banks, in which the latter have control of their own funds, and can do with them as they please, notwithstanding that they are recognized as being vested with a public interest. Will they hesitate to see these funds used like the reserve funds of foreign countries for the purpose of bringing about a condition of stability and balance in the money market, or will they persevere rather in the view that emergencies are to be allowed to create themselves, and that on such occasions, and then only, the combined power o

I have heard the Federal Reserve banks compared to many diverse objects. There are some who are fond of comparing them with a reservoir of water, and others with a set of fire engines, while still others choose to draw an analogy between a reserve bank and an extra dynamo in a power house. To me the most correct comparison is that which regards them as being similar to what we know as a bank—the reserve bank is neither a reservoir, a fire engine nor a power house, but it is a bank; and in order to do its work with success, and to give the banking results which experience has indicated as necessary, the reserve bank must work on banking lines and guide itself by banking principles in the conduct of its operations. It, in fact, differs in no essential respect from the best type of bank as we know it to-day, save that it lays special stress upon maintaining the liquid-

ity of its assets. In this connection let me call your attention to the langge employed by the Federal Reserve Board in its first annual report,

where the following statement was made:

"It should not, however, be assumed that because a bank is a Reserve bank its resources should be kept idle for use only in times of difficulty, or if used at all in ordinary times, used reluctantly and sparingly. should it be assumed that because a Reserve Bank is a large and powerful bank all its resources should be in use all the time or that it should enter nto keen competition with member banks, distributing accommodation with a free and lavish hand in undertaking to quicken unwisely the pace of Such a policy would be sure, sooner or later, to invite disaster. Time and experience will show what the seasonal variations in the credit demands and facilities in each of the Reserve banks of the several districts will be and when and to what extent a Reserve bank may, without violating its special function as a guardian of banking reserves, engage in banking and credit operations. The Reserve banks have expenses to meet, and while it would be a mistake to regard them merely as profit-making concerns and to apply to them the ordinary test of business success, there is no rea son why they should not earn their expenses, and a fair profit besides, without falling to exercise their proper functions and exceeding the bounds of produce in their management. Moreover, the Reserve banks can never become the leading and important factor in the money market which they were designed to be unless a considerable portion of their resources is regularly and constantly employed."

This statement covers the ground and clearly sets forth the purpose of the Reserve Act. We may sum up the functions of the Reserve bank in Biblical language by suggesting that, while the bank must be in the world, it does not need to be of the world; that is to say, if it is to be of service, it cannot withdraw itself like a financial hermit from the ordinary run of transactions. Neither can it be guided by the profit-making spirit and subordinate every other policy to that of the making of dividends. It is the wise and safe middle course that the Reserve bank must follow, and

through which it will attain its highest usefulness. In this it is essential to have the co-operation of the member banks of the nation.

Mr. Willis was also a speaker at the conference held at Chicago on Jan. 20 under the auspices of the Banking and Currency Committee of the National Association of Credit Men, and his remarks on that occasion were somewhat along the lines of those above. In his Chicago address, however, he touched upon one or two other points, and in referring to the criticism directed against the Federal Reserve Board because of the alleged number and complexity of its circulars, he said:

There has been a good deal of criticism of the Board in various places because of the alleged great number and complexity of the circulars that have been gotten out. Some bankers have said they could not read them all, they were so numerous; furthermore, that the Reserve banks had been reduced to practically nothing more than red-tape Government offices; that when they wanted to do anything there would come a wire or telegram from Washington and then the board of directors would simply

have to meet and register what was desired.

That isn't the way it appears to me. It is not true that there has been such a complexity of circulars. Here the circulars are. There were twentyone issued during 1915, and of those twenty-one there are eleven that deal with the question of commercial paper in some form. Out of those eleven, four were re-issues—changes, as conditions altered; so that the work of the Federal Reserve Board to-day stands embodied in seven of those circulars, and that represents what the Board thinks with reference to commercial paper at the present time. I am not going into those circulars in too great detail, but I am merely going to call your attention to the main features of them, because I can do it in five minutes. In circulars 2, 3 and 4 the Board has provided that any Federal Reserve bank may discount for its members paper presented to them with endorsement, no matter whether single name or double name. Double name is essentially the paper presented in liquidation of an actual purchase and accepted by the buyer. Single paper is the same except that it is in single form and not accepted. The circulars which I have noted make plain that the Board desire to have borrowers file statements for use both by the Board desire to have borrowers file statements for use both by the leading bank and the Federal Reserve bank, although it waives this requirement in the case of smaller loans and in the case of accepted paper. In Circular 17 the Board provides for re-discounting of notes protected by invadiately marketable moderately. paper. In Circular 17 the Board provides of re-discounting of trade acceptances has been provided for. That is the same as covered in No. 3. It was put into a separate circular in order to emphasize it, and the propriety of giving a low rate. Circular 19 provides for the purchase or rediscount of bankers' acceptances whether made by national or State banks, and provides for all reasonable safeguards. Finally, Circular 20 provides for purchase in the open market of bankers' acceptances, trade acceptances, and bills of exchange, as described in the other circulars.

When you simmer it down, it just amounts to this: First, the idea of a regular financial statement to be furnished by the borrower to the bank, and second, the substitution of actual evidence of indebtedness to open accounts, and third, the encouragement of the guarantee of such paper wherever possible or desirable.

TEXT OF BILL FOR TARIFF COMMISSION.

We give below the text of the Administration's bill creating a Tariff Commission, as introduced by Representative Henry T. Rainey on the 1st inst. Reference to the bill and its provisions was made in these columns last week, page 477. A BILL

ties, and for Other Purposes,

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That a Commission is hereby created and established to be known as the United States Tariff Commis sion (hereinafter referred to as the Commission), which shall be composed of five members, who shall be appointed by the President, by and with the advice and consent of the Senate, not more than three of whom shall be members of the same political party. The first members appointed shall continue in office for terms of two, four, six, eight and ten years, respectively, from the date of the taking effect of this Act, the term of each to be designated by the President, who shall designate the Chairman and Vice-Chairman, but their successors shall be appointed for terms of ten years, except that any person chosen to fill a vacancy shall be appointed nly for the unexpired term of the member whom he shall succeed.

person shall be eligible for appointment who has been elected to or served in the House of Representatives or Senate. No member shall engage in any other business, function, or employment. Any member may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy shall not impair the right of the remaining members to exercise all the powers of the Commission.

Sec. 2. That each Commissioner shall receive a salary of \$12,000 per

year, payable monthly. The Commission shall appoint a Secretary, who shall receive a salary of \$6,000 per year, payable in like manner, and it shall have authority to employ and fix the compensations of such special experts, examiners, clerks, and other employees as the Commission may from time to time find necessary for the proper performance of its duties.

With the exception of the Secretary, a clerk to each Commissioner, and

such special experts as the Commission may from time to time find necessary for the conduct of its work, all employees of the Commission shall be a part of the classified civil service, and shall enter the service under such rules and regulations as may be prescribed by the Commission and by the Civil Service Commission.

All of the expenses of the Commission, including all necessary expenses for transportation incurred by the Commissioners or by their employees under their orders, in making any investigation, or upon official business in any other places than in the city of Washington, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the Com-

mission.
Unless otherwise provided by law, the Commission may rent suitable offices for its use

The Auditor for the State and Other Departments shall receive and examine all accounts of expenditures of the Commission.

The principal office of the Commission shall be in the city of Washington, but it may meet and exercise all its powers at any other place. Commission may, by one or more of its members, or by such agents as it may designate, prosecute any inquiry necessary to its duties in any part of the United States, or any foreign country.

Sec. 3. That it shall be the duty of said Commission to investigate the administration and fiscal effects of customs laws of this country now in force or to be hereafter enacted, the relations between the rates of duty on raw materials and finished or partly finished products, the effects of ad valorem and specific duties and of compound specific and ad valorem duties, all questions relative to the arrangement of schedules and classifica-tion of articles in the several schedules of the tariff law, and in general shall investigate the operation and effect of the customs tariff laws, including their relation to the Federal revenues, and shall submit from time to time to Congress reports of its investigations.

That the Commission shall put at the disposal of the President of the United States, the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate, all information at its command, and shall make such investigations and reports as may be requested by the President or by either of these committees. Sec. 5. That the Commission shall have power to investigate commercial

treaties, preferential provisions, the volume of importations compared with domestic production, and all conditions, causes and effects relating to un-fair competition of foreign industries with those of the United States, including dumping.

That upon the organization of the Commission the duties and sponsibilities of the Cost of Production division in the Bureau of Foreign and Domestic Commerce in the Department of Commerce shall be transferred to said Commission, and clerks and employees of said division shall be transferred to and become clerks and employees of the Commission at their present grade and salaries, and all records, papers and property of the said division, and of the former Tariff Board, shall be transferred to and become the records, papers and property of the Commission.

Sec. 7. That for the purposes of this Act the Commission or its duly authorized agent or agents shall for the purpose of examination and investigation at all reasonable times have access to and the right to copy any documentary evidence of any person, firm, co-partnership, corporation or association, engaged in the production, importation, or distribution of any article under investigation, and in such connection said Commission shall have power to summon witnesses, take testimony, administer oaths, and to require any such person, firm, co-partnership, corporation, or association to produce books, or papers relating to any matter pertaining to such investigation. Any member of the Commission may sign subpoenas, and members and agents of the Commission may administer oaths and affirmations, examine witnesses, and receive evidence.

Such attendance of witnesses, and the production of such documentary

evidence, may be required from any place in the United States at any designated place of hearing. And in case of disobedience to a subpoena the Commission may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of documen

tary evidence

Any of the district courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any corporation or other person, issue an order requiring such corporation or other person to appear before the Commission, or to produce documentary evidence if so ordered, or to give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

Upon the application of the Attorney-General of the United States, at

the request of the Commission, the district courts of the United States shall have jurisdiction to issue writs of mandamus commanding any person or corporation to comply with the provisions of this Act or any order of the

Commission made in pursuance thereof.

The Commission may order testimony to be taken by deposition in any proceeding or investigation pending under this Act at any stage of such proceeding or investigation. Such depositions may be taken before any person designated by the Commission and having power to administer oaths. Such testimony shall be reduced to writing by the person taking the deposition, or under his direction, and shall then be subscribed by the Any person may be compelled to appear and depose and to produce documentary evidence in the same manner as witnesses may be compelled to appear and testify and produce documentary evidence beon as hereinh

Witnesses summoned before the Commission shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same shall verally be entitled to the same fees as are paid for like services in the courts of the United States: Provided, That no nautral person so testifying shall be exempt from prosecution and punishment for perjury committed in so

testifying.

Sec. 8. That the said Commission shall in appropriate matters act in conjunction and co-operation with the Treasury Department, the Department of Commerce, the Federal Trade Commission, or any other departments, and that such departments shall co-operate fully with the Commission for the purposes of aiding and assisting in its work, and it shall report to Congress from time to time the results of its investigation, and the several departments and bureaus of the Government, when directed by the President, shall furnish to the Commission, on its request, all records, papers and information in their possession relating to any of the subjects of investigation by said Commission, and shall detail, from time to time, such session relating to any of the subjects of inofficials and employees to said Commission as he may direct.

Sec. 9. That the franking privilege is hereby extended to the said Com

mission.

That there is hereby appropriated, for the purpose of defraying Sec. 10. the expense of the establishment and maintenance of the Commission, including the payment of salaries herein authorized, out of any money in the Treasury of the United States not otherwise appropriated, the sum of

RIGHT OF NATIONAL BANKS TO INCREASE THE AMOUNT OF ITS CIRCULATING NOTES.

Two matters recently passed upon by M. C. Elliott, Counsel for the Federal Reserve Board, involved the question as to whether there is anything in the Federal Reserve Act that prohibits a national bank from increasing its circulation over the amount it has outstanding, or whether there is anything that prohibits a national bank which has, since the passage of the Act, withdrawn circulation, from again taking out circulation up to or beyond the amount it had outstanding when the Act was passed. Mr. Elliott expresses the view that national banks may increase their circulation to an amount equal to their capital by deposit of the necessary bonds, and that this may be done whether a national bank has reduced its circulation since the passage of the Federal Reserve Act or not. We print the opinion below:

December 4 1915.

Sir.—I have your memorandum asking—
(1) Is there anything in the Federal Reserve Act or in its construction by the Board or the Treasury that prohibits a national bank from increasing

its circulation over the amount it has outstanding?
(2) Is there anything that prohibits a national bank which has since the passage of the Act withdrawn circulation from again taking out circulation up to or beyond the amount it had outstanding when the Act was passed? In reply I beg to advise that the provision of the Federal Res

which amends the previous statutes relating to circulation reads as follows: Sec. 17. So much of the provisions of Section 5159 of the Revised Statutes of the United States, and Section 4 of the Act of June 20 1874, and Section 8 of the Act of July 12 1882, and of any other provisions of existing statutes as require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds is hereby repealed.

It will be observed that this section repeals only those provisions of certain statutes which "require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds." The effect of this amendment is that national banks are not required as a condition precedent to doing business to take out circulation, but it does not provide that banks which do take out circulation shall not be subject to those statutes which contain the conditions and limitations relating to the issue of national bank notes.

In answer to your inquiries, therefore, it is the opinion of this office that national banks may increase their circulation to an amount equal to the capital stock of such banks by deposit of the necessary bonds and that this may be done whether a national bank has reduced its circulation since the passage of the Federal Reserve Act or not. I understand that this practice is being approved by the office of the Comptroller of the Currency

Respectfully,
M. C. ELLIOTT, Counsel.

To HON. CHARLES S. HAMLIN, Governor Federal Reserve Board.

BANKING, LEGISLATIVE AND FINANCIAL NEWS.

The sales of bank stock at the Stock Exchange this week aggregate 155 shares and were all of National Bank of Commerce stock. No bank or trust company stocks were sold at auction.

Shares. BANK—New York. Low. High. Close. 155 Nat. Bank of Commerce.... 170 171 171 Last previous sale. Feb. 1916- 170

Robert H. Bean, President of the American Institute of Banking, announces Sept. 20, 21 and 22 as the dates for the Fourteenth Annual Convention of the Institute to be held in Cincinnati. This will follow very closely the convention of the Ohio Bankers' Association to be held at Columbus, Ohio, Sept. 12-14, and precede the Forty-Second Annual Convention of the American Bankers' Association, to be held in Kansas City, Mo., Sept. 25-30, inclusive.

Several local bankers started this week with their families on a pleasure trip to the Pacific Coast and Honolulu. The party includes Albert H. Wiggin, President of the Chase National Bank; Seward Prosser, President of the Bankers Trust Co.; Gates W. McGarrah, President of the Mechanics & Metals National Bank, and William H. Porter. of J. P. Morgan & Co.

Col. William P. Hepburn, author of the Inter-State Rate Law prohibiting rebates and discriminations by railroads, and Congressman of the Eighth Iowa District for twenty years, died in Clarinda, Iowa, on the 7th inst. Mr. Hepburn was elected to Congress in 1880 and served as a member of the forty-seventh, forth-eighth and forty-ninth Congresses; he became Solicitor of the Treasury in 1888 and held that office until 1893, when he was again elected to

Congress, serving consecutively from the fifty-third to the sixtieth Congress. He was eighty-three years of age.

Peter J. Maloney, floor member of the Stock Exchange firm of Finley Barrell & Co. of 74 Broadway, was found technically guilty by the Governing Committee on the 10th inst. of doing business with a "bucket shop." The usual penalty was remitted, however, since the committee found it apparent that the offence was unintentional and that the firm had made every reparation in its power. Mr. Maloney, it is stated, discovered some time ago that a bucket shop account was being carried by the manager of one of the firm's branches; his prompt action in advising the Exchange of the violation of the rules, and in dismissing the employees responsible therefor, caused the Governors to refrain from imposing the usual punishment.

George M. La Monte was reappointed on the 7th inst. as New Jersey Commissioner of Banking and Insurance. Mr. La Monte's present term expires Feb. 25.

Hugh N. Kirkland, Vice-President and Cashier of the Mutual Bank of this city, has been elected a director of the institution.

Richard Limburg, who until his recent retirement from business was a member of the Board of Governors of the New York Stock Exchange, and senior member of Ladenburg, Thalmann & Co. of this city, died on Feb. 5. Mr. Limburg, who was a son of Abraham Limburg, one of the founders of the latter firm, was well known as an arbitrage broker. He retired from the Exchange in 1910. At the time of his death he was in his fifty-ninth year.

John R. Higbee, President of the Bank of Babylon, of Babylon, L. I., was killed on Feb. 5 when a combination automobile engine and hose cart of the local fire department, on which he was riding as a volunteer fireman, was struck by a train.

A temporary injunction restraining certain directors and stockholders of the Perth Amboy Trust Co. of Perth Amboy, N. J., from diverting assets of the latter to the Mechanics' Trust Co. of Bayonne was granted by Vice-Chancellor Backes in the Court of Chancery at Trenton on Jan. 26. The temporary injunction will run until the final hearing in Newark in April. Negotiations for the acquisition of control of the Perth Amboy Trust Co. by George A. Viehmann, President of the Middlesex Title Guarantee & Trust Co. of New Brunswick, were concluded in December. Mr. Viehmann and Isaac Alpern, a stockholder of the Perth Amboy Trust Co., are the plaintiffs in the injunction suit, under which they ask that the defendants, including De Witt Van Buskirk, President of the Mechanics' Trust Co. and Second Vice-President of the Perth Amboy Trust Co., and Sidney Riddlestorffer, Vice-President and Treasurer of the latter, be restrained from transferring the trusteeship of the \$500,000 estate of W. A. Connor from the Perth Amboy Trust Co. to the Mechanics' Trust Co. and that a gratuity of \$12,500 voted to Vice-President Riddlestorffer be returned to the company. It was claimed that these steps were taken at the time Mr. Viehmann had arranged to purchase the controlling interest in the Perth Amboy TrustCo., and that they constituted a fraud upon the other stockholders, including the complainants. Vice-Chancellor Backes ruled that the directors of the Perth Amboy Trust Co. acted beyond their scope. He stated that the directors act as agent of the corporation, the same as an agent acts for a coal company, and that they had no more right to divert these assets than a coal agent would to distribute coal without getting a return for his firm.

Superintendent of Banks Eugene Lamb Richards has approved a change in name of the Commonwealth Trust Co. monwealth Trust Co. was acquired by the Bank of Buffalo in April 1915.

The Middletown National Bank, of Middletown, Conn., which recently acquired the business of the Middlesex County National Bank, moved last week to the latter's banking quarters and will be located there until the completion of its new building on the site of its former home. The combined institution opened for business on the 7th inst.

Treasurer of the Industrial Trust Co. of Providence, on account of ill-health.

John E. Gale, who was recently elected Chairman of the Board of the Haverhill National Bank of Haverhill, Mass., died on Feb. 1. Mr. Gale was President of the bank from 1892 until January of this year, when he retired on account of ill-health and was elected Chairman of the Board. Previ ous to his election to the Presidency, Mr. Gale was Vice-President, to which office he was elected in 1888; he had served continuously on the directorate since 1873. He was seventy-five years of age.

A deal involving the merger of the National Bank of the Northern Liberties, Philadelphia, with the Bank of North America was completed on the 5th inst. The first-named bank will be placed in voluntary liquidation and its stock disposed of to the Bank of North America at \$295 per share; the last sale of the stock was at \$240. The deal became effective on the 8th when the business of the National Bank of the Northern Liberties was transferred to the Bank of North America. The stockholders at a meeting called for March 6 will formally vote on the proposition. One of the reasons for the sale was the desire of Joseph Moore Jr., President of the National Bank of the Northern Liberties, to relinquish that office because of important outside duties. Mr. Moore is President of the Pennsylvania Salt Mfg. Co. and a director in many other companies. directors, finding it difficult to agree on a successor to Mr. Moore, arranged for liquidation of the bank's assets if a suitable offer were made. At a meeting of the directors of the Bank of North America on the 10th, S. D. Jordan, heretofore Cashier, was elected a Vice-President. E. S. Kromer and C. A. McIlhenny, who were respectively Cashier and Assistant Cashier of the National Bank of the Northern Liberties, were elected respectively Cashier and Assistant Cashier of the Bank of North America. The stockholders of the latter at a special meeting called for March 9 will vote to amend the by-laws so as to permit the directorate to be increased from twelve to twenty-four members for the purpose of making provision for the directors of the absorbed bank.

The Bank of North America was organized in 1781 and is the only national bank under the Federal Government relieved of the necessity of using the word "National" in its name. According to its last statement, it had a capital of \$1,000,000, surplus and undivided profits of \$2,390,588, and gross deposits of \$15,452,331. The National Bank of the Northern Liberties was organized in 1810 and its last statement showed capital of \$500,000, surplus and undivided profits of \$957,529, and gross deposits of \$3,960,234.

Lincoln Godfrey, for many years Vice-President and a director of the Philadelphia National Bank, died on the 8th inst. Since the early part of 1914, when he was stricken with paralysis, Mr. Godfrey had relinquished many of his business connections. He resigned from the Vice-Presidency of the bank in January 1914, having held that office from 1889, and he resigned from the board at the election last month after having served since 1880. Mr. Godfrey was a director of the Pennsylvania RR, from 1900 to January of this year, when he resigned and was succeeded by Levi L. Rue, President of the Philadelphia National Bank. He was senior member of the dry goods firm of Wm. Simpson, Sons & Co. This firm later incorporated as the Eddystone Print Works, and Mr. Godfrey was elected President. He had also been a director of the Philadelphia Trust, Safe Deposit & Insurance Co., the Argo Mills Co. and the Insurance Co. of North America, and manager of the Western Saving Fund Society of Philadelphia and the Merchants' Fund. He was in his sixty-sixth year.

Coincident with the annual meeting of the Fidelity Trust Co. of Philadelphia on the 8th inst., a luncheon was tendered to the shareholders to commemorate the fiftieth anniversary of the company's incorporation, which occurs on March 22. The event has been marked by the distribution of illustrated booklets containing a description of the principal activities of the institution, a list of the directors and officers, tabular statements showing capital, surplus, deposits, trust funds and dividends for each year, and this year's balance sheet. Net earnings of \$1,730,291 are shown in the annual report for the fiscal year ending Jan. 31 1916. Out of these earnings \$25,000 was added to the Rudulph Ellis Gratuity Fund of the company, constituted by a gift | Cleveland, at a meeting on Feb. 3, elected two new Vice-

H. Howard Pepper resigned on the 1st inst. as Assistant | of \$100,000 made by Rudulph Ellis, the late President of the institution, making the principal of the fund \$125,000; \$191,451 was charged to profit and loss in reduction of the value of the office building, and \$960,000 was paid in four quarterly dividends of 6% each; the remainder, \$553,840, was added to the undivided profits of the institution, bringing that item up to \$1,843,649. During the ten years from Jan. 31 1906 the deposits have grown from \$24,672,155 to \$34,295,953. During the same period the trust department shows a large increase in the amount of trust estates. On Jan. 31 1906 the total amount of real and personal property in the charge of the company was \$108,376,665; on Jan. 31 1916 it reached \$204,112,405, showing an increase of \$95,-735,740. On Jan. 31 1906 the capital was \$2,000,000; the surplus \$7,000,000, and the undivided profits \$564,676. On Jan. 31 this year, the capital stood at \$4,000,000; the surplus at \$11,000,000 and undivided profits at \$1,843,648, making a net increase in the surplus and undivided profits of \$5,278,-973. This increase, it is stated, has been attained after paying in dividends the sum of \$6,880,000, and distributing gratuities to employees aggregating \$176,138. The Fidelity has the largest capital, as well as the largest combined capital and surplus, of any financial institution in Philadelphia. William P. Gest is President.

> Theodore E. Wiedersheim, a Vice-President of the Girard National Bank of Philadelphia, died suddenly on the 10th inst. after addressing a banquet at Wayne, Pa. Mr. Wiedersheim, who was a veteran of the Civil War, and a retired National Guard officer, was stricken with apoplexy following the close of an appeal for national preparedness.

> Eugene L. Ellison, President of the Insurance Co. of North America and of the Alliance Insurance Co., and formerly a director of the Central National Bank of Philadelphia, died on the 8th inst. Mr. Ellison was at one time connected with the Philadelphia Clearing House as Assistant Manager.

> The Farmers' Deposit Savings Bank of Pittsburgh published a statement on the 6th inst. in which it said that the investigation conducted by its officials "to determine the cause of the recent run on that institution has disclosed that it was the result of a conspiracy carefully planned and systematically put into effect. Evidence gathered from many sources has made the plot an open book and shows it a cunningly devised scheme to make trouble for the banks in Pittsburgh." The statement adds:

> The first intimation of the attack received by the officials was shortly after this bank, with other financial institutions of Pittsburgh, had subscribed to the Anglo-French war loan. A few days following publication that the bank was a subscriber to the loan they received a large numb threatening letters and postal cards. All were unsigned. gave no heed to the threats, and later they were repeated.

> Shortly thereafter, according to the statement, a move was was made to arouse suspicion in the minds of depositors by the circulation of rumors regarding the officers, intimating that large sums of money had been lost by them in speculation, thereby weakening the bank. The effect of the circulation of these rumors was noticed about a month ago when seven depositors inquired as to the bank's stability. These inquiries continued daily, accounts in some instances being withdrawn, until Saturday, Jan. 29, when the run on the bank was experienced; by Feb. 1 the run was practically over. The officials state that the run had little effect on the institution; of the more than 30,000 depositors, less than 2,000 withdrew their accounts. The investigation will be continued and a reward of \$5,000 for the arrest and conviction of the guilty parties has been offered by the bank.

> Walter S. Mitchell and A. W. McEldowney, respectively Cashier and Assistant Cashier of the Mellon National Bank of Pittsburgh, have been made Vice-Presidents of the institution. B. W. Lewis, Assistant Cashier, has been made Cashier.

> William H. Bosley, of the banking firm of John S. Gittings & Co. of Baltimore, and a member of the Baltimore Stock Exchange, died on Jan. 28. Mr. Bosley had been active in railroad affairs; besides having been President of the Suffolk & Carolina RR., he was at one time receiver for the old Baltimore & Lehigh RR., now the Maryland & Pennsylvania RR. He was likewise identified with the management of other railroad properties.

The directors of the Lake Shore Banking & Trust Co. of

Presidents, namely J. Horace Jones, heretofore Treasurer, and Walter S. Bowler, who had served as Secretary. George Shultz has been elected Treasurer, L. C. Kollie, Secretary, and C. H. Hill, Assistant Secretary. The capital of the institution was recently increased from \$200,000 to \$350,000.

J. F. Brand, President of the Commercial National Bank of Saginaw, Mich., retired on Jan. 20, and George A. Alderton, previously Vice-President, was elected to the Presidency. Congressman J. W. Fordney, who has been a director fourteen years, was elected a Vice-President. R. T. Maynard, who was formerly Cashier of the State Bank of Merrill, Mich., and who only recently became associated with the Commercial National, was also elected a Vice-The retiring President, who has been a member of the board of directors since the bank was organized in 1888, retains his place on the directorate. He was elected Vice-President about 1894 and President in 1902. Mr. Alderton, the new President, has been a director since 1888 and had served as Vice-President since 1902.

M. M. Reynolds, President of the Guthrie County National Bank of Panora, Iowa, a brother of George M. Reynolds and Arthur Reynolds of Chicago, is reported to have committed suicide by shooting on the 10th inst. was attributed to ill-health and despondency. M. Reynolds has been critically ill at Los Angeles during the past two weeks; he suffered an attack of grip with his arrival on the Coast on Monday, Jan. 31; his condition later became more serious, the attending physician on the 4th inst. diagnosing the case as acute bronchial asthma. Messages to the bank on the 6th stated that the crisis had been passed, and that Mr. Reynolds's quick recovery was expected.

The City National Bank of Omaha, which was absorbed in October by the State Bank of that city, has been placed in voluntary liquidation. The combined institution opened for business Oct. 11 1915, as we reported at that time.

The Fourth National Bank of Fayetteville, N. C., closed its doors on Feb. 4. The following statement in explanation was issued by President H. W. Lilly:

On account of losses sustained several years ago there have been disquiet-ig rumors concerning the bank that have had the effect of greatly restrict ing its business and have led to the withdrawal of many deposits. This condition has recently become more acute and there have been constant and steady withdrawals that have so depleted the liquid assets of the bank as to greatly hamper it in its operations. Being unable to promptly realize on its securities, the directors felt that in justice to the depositors they could not safely continue the business and therefore requested the National Bank Examiner to take charge of its affairs. It is confidently believed that all depositors will be paid in full.

We regret very much the necessity for this action. It is a temporary blow to our city. It does not in the least affect the other two banks. They are strong and sound, and able to take care of the business interests of the

An announcement was also made by the Comptroller of

the Currency at Washington, which stated:

The Fourth National Bank of Fayetteville, N. C., capital \$100.000, deposits about \$500,000, failed to-day. This bank has been on the special list for some months past. Its failure is the result primarily of loose management and bad banking in the past, which new elements in its administration were unable to over

Chief National Bank Examiner Howard has been placed temporarily in charge. The Examiner reports that there is reason to hope that the ba may eventually pay its depositors in full, although no authoritative statement on this subject can be made at this time.

The Fourth National according to the Raleigh "News & Courier," was originally organized as a State bank, under the name of the Bank of Fayetteville, shortly after the Civil War, and continued as such until 1905, when it temporarily suspended business and within a short time reopened as a national bank under the present name.

The executive committee of the Washington Bankers' Association at a meeting in North Yakima on Jan. 22 decided on Everett as the meeting place for the convention which will be held June 15 to 17.

THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Jan. 20 1916:

GOLD. The external movements have been slightly in favor of the Bank of

The following amounts were received by the Bank:

Jan. 14— £7,000 in bar gold.

175,000 " sovereigns released on miscellaneous account.

15— 1,000 " bar gold.

18— 9,000 " " "

19- 634,000 " " "

Withdrawals were made as under

Jan. 13—£350,000 in sovereigns for Spain.
51,000 " " Canada.
25,000 " " South America.
14— 300,000 " " set aside on Egyptian account.
18— 100,000 " " for the U. S. A.
9,000 " " " Canada.

During the week the net reduction amounted to £9,000.

It is of interest to know that the privilege conceded by certain banks to their customers, who happen to be manufacturing jewelers, of being accommodated with amounts of sovereigns, has been practically withdrawn.

The fact is satisfactory, for a drain could otherwise be made upon the

gold resources of the country to an unwarrantable extent, by melting the

A good deal may be said in favor of building up the manufacture of gold jewelry in this country, a trade which before the war had been diverted largely into the hands of a country now hostile to Great Britain. But gold should not be drawn from the currency, over which the Government ought to possess absolute control in the interests of the nation. SILVER.

The undertone has remained steady, notwithstanding that the price dipped from 27d. to 26%d. on Monday. The mark was overshot, and

The reduced wise here we waiting shipment.

The reduced price, however, proved tempting to China and other ope tors, who saw a chance to snatch a profit. The appearance of the market seems to indicate movements within somewhat narrow limits, for America is a rather hesitant seller, and continental and other demand is bound to arise on a fair scale.

The stock in London is far from large at the present time, being in the neighborhood of 5,500,000 ounces fine. An Indian Currency Return for the 15th inst., gave details in lacs of rupees as follows:

Notes in circulation 61.31
Reserve in silver coin 26.40
Gold coin and bullion 12.74
Gold in England 8,17
It is to be noted that the reserve of silver coin has fallen about a crore and a half during the last week, as it did to a similar extent the week before.
The stock in Bombay consists of 5.700 bars as compared with 5,900 last reck.

week. No shipment has been made from San Francisco to Hong Kong during the week.

TRADE AND TRAFFIC MOVEMENTS.

UNFILLED ORDERS OF STEEL CORPORATION. The United States Steel Corporation on Thursday, Feb. 10, issued its regular monthly statement showing the unfilled orders on the books of the subsidiary corporations at the close of January. From this statement it appears that the aggregate of unfilled orders on Jan. 31 was 7,922,767 tons, recording an increase of 116,547 tons over last month, when the amount of outstanding orders was 7,806,220 tons. These figures have been surpassed but once, namely on Dec. 31 1912, when the amount of outstanding orders was 7,932,164 tons. In the following we give the comparisons with the previous months:

Tons.	Tons	Tons.
Jan. 31 1916 7.922.767

The Federal Reserve Banks.—Following is the weekly statement issued by the Federal Reserve Board on Feb. 5:

The statement indicates decreases of 8.7 million dollars in total cash reserves and of 7.9 millions in the combined gold reserves of the banks. The New York bank reports a decrease of 6.3 millions and the Chicago and St. Louis banks like decreases of about 2 millions each, a combined decrease for the reserve banks in the three central reserve cities of 10.2 millions, offset in part by gains of gold shown for the Boston, Richmond, Cleveland, Philadelphia. Kansas City and San Francisco banks. The decrease in gold reserve is accompanied by an increase of nearly 3 millions in the amounts of United States bonds held, a decrease of 1.7 millions in the total of other earning assets, a decline in member bank deposits of 5.5 millions, a gain of about 2.1 millions in Government deposits and an increase of the "float" by 4.5 million dollars.

Considerable net liquidation of commercial paper is reported by some of the banks most active in the discount field, Atlanta, Chicago-and Kansas City and Sangas and the state of agricultural and live-stock paper maturing after 90 days is reported among the earning assets of the banks, as against 3.5 millions at the end of the preceding week.

Additional purchases of about 3 million dollars of United States bonds are reported by six banks. Of the total amount of bonds included among the assets of the banks 31,276,250 has been deposited by two banks with the United States Treasurer to secure bank notes which, however, have not provided the paper fluores than the weekled to the same and the same and is shown. New parks, and the provided among the assets of the banks 31,276,250 has been deposited by two banks with the United States Treasurer to secure bank notes which, however, have not provided the paper fluores than the weekled to the same paper fluore

Statement of New York City Clearing-House Banks and Trust Companies.—The weekly Clearing-House bank statement usually issued on Saturday was given out yesterday because of the holiday to-day. The summary for the week ending February 11 as published by the Clearing-House will be found on page 585 of to-day's "Chronicle." We give here, in the usual way, the detailed statement for the week ending February 5, so that there will be no break in the continuity of our record. The figures for the separate banks are the averages of the daily results. In the case of the totals, actual figures at the end of the week are also given.

In addition to the returns of "State banks and trust companies in New York City not in the Clearing House" furnished by the State Banking Department, the Department also presents a statement covering all the institutions of this class in the whole State. The figures are compiled so as to distinguish between the results for New York City (Greater New York) and those for the rest of the State, as per the following:

For definitions and rules under which the various items are made up, see "Chronicle," V. 98, p. 1661.

The provisions of the law governing the reserve requirements of State banking institutions were published in the "Chronicle" March 28 1914 (V. 98, p. 968). The regulations relating to calculating the amount of deposits and what deductions are permitted in the computation of the reserves were given in the "Chronicle" April 4 1914 (V. 98, p. 1045).

Imports and Exports for the Week.—See third page preceding.

Bankers' Gazette.

Wall Street, Friday Night, Feb. 11 1916.

The Money Market and Financial Situation.—During the early part of the week public attention was largely absorbed in what it is hoped will prove to be the final diplomatic correspondence over the long-drawn-out Lusitania affair; and to-day the announcement of another break in the Cabinet at Washington is the leading topic of conversation on the Street and elsewhere. The former affair had more or less depressing effect in the financial district, but the latter is, at the moment, more generally discussed in political circles and at the clubs. Both are, however, inseparably linked with matters which may have a wide and

important influence before the end of the year.

Business at the Stock Exchange was tersely described as "dull and meaningless," but beginning on Thursday more animation and a more definite tone developed. The advices from Washington then received were reassuring and otherwise the general situation was, and is, as favorable as in the recent past. Some of the iron and steel plants, especially those equipped to handle heavy pieces, are reported to have booked orders up to their full capacity on that class of goods for the remainder of the year and practically all others are not in a position to promise delivery on new orders before July or later. It is well known, morrover, that the demand for copper metal has forced the price up to just about double what it was for a considerable time before the unusual war demand began to make itself felt last year the unusual war demand began to make itself felt last year. Copper shares are of course much sought and prices have advanced sharply this week.

Poreign Exchange.—The market for sterling exchange has ruled quiet and about steady throughout the week. The German and Austrian exchanges were strong during the

early days, but subsequently reacted.

State and Railroad Bonds.—Sales of State bonds at the Board include \$5,000 New York 4½s, at 114½; \$1,000 N. Y. Canal 4½s, at 114½; \$1,000 N. Y. Canal 4½s, 1965, at 107½ and \$7,000 Virginia 6s, deferred trust receipts,

The market for railway and industrial bonds has been slightly less active than last week, but transactions at the Exchange averaged daily a par value of \$3,850,000. Of a list of 30 more active issues 12 are lower—the declines being mostly fractional—11 are higher and 7 are unchanged from last week. A list of exceptionally active issues includes Anglo-French, New York Railways, Inter. Mer. Marine, Dist. Securities Corp. and Rock Island. The latter have been notably weak, presumably on the prospects in reorganization. Inter. Mer. Marine also lost about 2 points under similar conditions. Lackawanna Steel 5s lost nearly 2 points in sympathy with weakness in the shares. New York Railways, on the other hand, have been in such request as to cause an advance of 2 to 3 points. The Anglo-French 5s have fluctuated between 94½ and 95¼, selling only to-day at the higher figure

at the higher figure.
Sales s-20-f aggregate for the week \$544,500 par value.

United States Bonds.—Sales of Government bonds at the Board are limited to \$2,500 Panama 3s, coup., at 103; and \$1,000 3s, coup., at 102½. For to-day's prices of all the different issues and for weekly range see third page following.

Railroad and Miscellaneous Stocks.—Trading in stocks has been somewhat restricted this week, especially in the railway group, the total transactions averaging little more than 500,000 daily. On Tuesday they aggregated only 431,-191 shares, the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the smallest day's business of the year thus for the year thus for the smallest day's business of the year thus for and fluctuations were generally so narrow as to be wholly uninteresting. Not until Thursday did the volume of business assume anything like normal proportions, and on that day railway issues came into prominence for both activity and strength. To-day's market was irregular and profes-sional on the news from Washington noted above, the announcement from Germany that on and after March 1 all armed merchant ships of its enemies will be destroyed without warning, and the approaching double holiday. All classes of stocks under these influences moved promiscuously.

Canadian Pacific has been strong throughout the week and scored a net gain of 6½ points. Reading and New Haven

are nearly 3 points higher, New York Central and Union Pacific 2 and Northern Pacific, Pennsylvania and Southern Pacific between 1 and 2.

The industrial list has again been errate in movement, with widely varying results. General Motors sold on Thursday 20 points higher than last week. Int. Nickel is 10½ points higher, Texas Co. 8 and many others from 3 to 5. On the other hand, Crucibie Steel, Lackawanna Steel, Cuban-Am. Sugar and Inter. Merc. Marine are from fractions to 5 points lower.

For daily volume of business see page 599.

The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

Outside Market.—A good volume of business was transacted on the "curb" this week and while prices moved with considerable irregularity the result was a higher range of values generally. Owing to the important happenings in Midvale Steel, that stock was by far the most heavily traded in. It weakened at first from 67¾ to 66¼, then rose to 70¼ and on the report of the acquirement of the Cambria Steel Co. jumped to 73½. When it was realized that to finance the deal new stock would probably be issued, there was a slump to 65¼, followed by a recovery, the close to-day mance the deal new stock would probably be issued, there was a slump to 65½, followed by a recovery, the close to-day being at 69½. The "rights" were traded in up from 7-16 to 7½ and down to 2¾ finally. Baltimore Tube com. was conspicuous for an advance from 73½ to 112 reacting finally to 108. Chandler Motor made little response to the initial dividend of 1½% declared this week, though in the general upward movement it gained 2 points to 92¾. Chevrolet Motor improved from 127 to 133, but dropped back to 130. Cuba Cane Sugar com, reported heavy transactions between Cuba Cane Sugar com. reported heavy transactions between 51 and 54½, the close to-day showing a reaction to 52½. Driggs-Seabury after early weakness and a drop from 144 to 141, moved up to 146; it ends the week at 143½. Haskell & Barker Car made an important gain of some 7 points to 52¾ and finished to-day at 50¾. Submarine Boat eased off from 37¼ to 36¾ and then sold up to 39¾, closing to-day at 38 Tobacco Products companyoned 3 points to 26 and off from 37¼ to 36¾ and then sold up to 39¾, closing to-day at 38. Tobacco Products com. improved 3 points to 36 and was finally traded in at 35. Oil and copper shares came in for a considerable share of attention. Outside of Standard Oil issues, Sapulpa Oil made good gains on heavy purchases. It eased off at first from 11½ to 10¾, then ran up to 16¼, with the close to-day at 14½. Cosden Oil was also active and rose from 19½ to 22¾ and finished to-day at 22⅓. Midwest Refg. rose some 9 points to 63 and closed at 62. Standard Oil issues all made substantial improvements. Atlantic Refining was up from 660 to 718, Ohio Oil from 225 to 221, to 260 and to 235 finally. Prairie Oil & Gas from 416 to 405 to 430 to 420; South Penn Oil 365 to 378 to 375; Standard Oil (Ind.) 500 to 515 to 508; Standard Oil of N. J. 512 to 508 to 535. In copper shares, Kennecott Copper advanced from 51½ to 54⅓ and ends the week at 54⅙. Cerro vanced from 51½ to 54½ and ends the week at 54¾. Cerro de Pasco declared an initial dividend of \$1 and the stock rose from 39½ to 42½, closing to-day at 42. Fair activity in bonds and prices steady. Regarding the N. Y. State 4s recently sold on the "curb" under "when issued" contracts, a committee was appointed this week to adjust matters, the traders in such bonds being unable to make deliveries owing to the fact that the entire issue was awarded to one bidder, the First National Bank Outside quotations will be found on page 599.

Investment and Kailroad Intelligence.

HAILROAD GROSS EARNINGS

The following table shows the gross earnings of every STEAM railroad from which regular weekly or menthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including the latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought together separately on a subsequent page.

ANNUAL REPORTS

Annual Reports.—An index to annual reports of steam railroads, street railways and miscellaneous companies which have been published during the preceding month will be given on the last Saturday of each month. This index will not include reports in the issue of the "Chronicle" in which it is published. The latest index will be found in the issue of Jan. 29. The next will appear in that of Feb. 26.

New York Central Railroad.

(Report on Development of Property 1831 to 1915.) The interesting statement presented by President A. H. Smith regarding the development of the company and its property from 1831 to 1915 will be found at length on subsequent pages of this issue of the "Chronicle."

The result of operations for the late calendar year are shown below under the heading "New York Central Lines."

—V. 102, p. 522.

Detroit United Railway.

(15th Annual Report-Year ending Dec. 31 1915.)

Pres. J. C. Hutchins, Detroit, Feb. 1, wrote in substance: Liberal expenditures have been made for the maintenance of tracks, rolling stock and other properties. Depreciation reserve was \$2,707,227, and during the year \$19,200 charged against oper. exp. and \$750,000 out of the income of 1915 was added to that amount, leaving a balance, Dec. 31 1915, of \$3,476,427.

On Dec. 1 1915 the Detroit Ry, bonds, amounting to \$50,000, fell due. n Dec. 1 1915 the Detroit Ry. bonds, amounting to \$50,000, fell due were taken up by the Detroit United Ry.

Report for Fiscal Year ends	
Pres. Wm. Butterworth, Moline, Results.—Sales declined during the year a ductions being in the Southern States, in countries. The factories operated on an avo Owing to the economies put into effect last factories produced a greater proportion of to on the reduced volume have been considera During the year the company sold to th sary and hospital equipment, consisting	about 1216%, the principal re- Western Canada and in foreign

On the reduced volume have been considerably larger than for 1914.

During the year the company sold to the French Government commissary and hospital equipment, consisting of ambulances, wagons, carts, &c., to the value of \$1,923,000. This equipment was built during the quiet period of factory operations and was of material benefit both to the company and to its employees.

We have still further reduced our inventories, the total at Oct. 31 1915 being \$13,390.657 against \$15,945,943 at Oct. 31 1914. The inventories are now at a very low point, and with a return to normal business conditions will probably be somewhat increased.

Collections were good in all sections of the country, and resulted in a decrease in total receivables of \$1,084.597. Total liabilities have been reduced \$3,841,132, while the cash account has been increased \$1,123,688. The net working capital has increased \$1,232,243, the total quick assets (\$38,255.091) being now equal to 361% of total liabilities, against 283% in 1914.

Number of Preferred Stockhoiders Dec. 31.—3,842, as compared with 3,599 at Dec. 31 1914.

Bonds.—The total liability of the company and its subsidiaries for serial notes, debentures, bonds and mortgages amounted to \$2,264,000 at Oct. 31 1915, a reduction of \$1,350,000, as follows: Decre & Co., serial notes, \$1,000,000, and debentures, \$50,000; subsidiary companies' bonds and mortgages, \$300,000.

General.—The financial condition of the farmers of the United States has considerably improved during the past year, owing to the abundant crops and the high prices. The farmers are buying very conservatively, however, as far as implements are concerned, and their feeling in this regard is reflected by the implement dealers. Stocks of goods all over the country are at rather a low point. The company will continue to operate on a conservative basis, both in the factories and the branch houses.

People's Gas Light & Coke Co., Chicago.

(19th Annual Report-Year ending Dec. 31 1915.) Pres. E. G. Cowdry, Chicago, Feb. 10, wrote in subst.:

Pres. E. G. Cowdry, Chicago, Feb. 10, wrote in subst.:

Results.—The gross receipts were \$17,037,894 against \$16,800,538 in 1914. During the year 64 miles of mains were laid as extensions, the total amount of mileage now being upwards of 2,976 miles. The increase in meters set was 21,960, in gas stoves installed 24,204, and in arc lamps 468.

Rates.—During the year litigation arising out of the Rate Ordinance of July 17 1911, although abandoned by the city for nearly four years, has been revived. It is sought to recover from the company the amounts collected in excess of the ordinance rates. This litigation is in its first stages. (Compare V. 94, p. 1190, 1253; V. 93, p. 349, 536, 1606.)

During the year two petitions were filed before the State P. U. Commission, seeking to procure a reduction in the price charged by the company. The Commission itself has become a petitioner in one of these proceedings, and the company will be required to defend its present rate before that body. In these proceedings the State P. U. Commission caused its auditors to examine our books and, after long investigation, a report was made showing comprehensive analyses of the company's revenues and expenses, and in addition reported a "permanent investment," which, it afterwards developed, was based not on the company's books or its actual property, but on unsupported statements, erroneous and unjust, from a brief prepared in 1896 by persons who were interested in preventing a consolidation of the various gas companies then existing in Chicago.

The foregoing activities have made it necessary for us to take some action to determine the present fair value of the company's property. To that end engineers of national reputation have been engaged to make a complete appraisal of the company's property in order to set at rest for all time the relation between the present value of the property and the issued securities.

Need of Coal Gas Plant, &c.—In previous reports reference was made to plans for a coal gas plant. The water gas now manufa

of Chicago in reference to this matter is also been a change report.]

In addition to the increase in the price of oil, there has also been a change in the quality of oil procurable, with the result that it now requires more oil to manufacture a thousand cubic feet of gas than it did a year ago. This increase in price and decrease in quality of gas oil makes a substantial increase in the cost of manufacturing gas. If the change in the standard of gas is sanctioned, the company will not only be in a position to protect itself against the great fluctuations in the price of petroleum products, but will be able to avail itself of increasing economies in the manufacture of gas.

Underwood Typewriter Co., Inc., New York. (Report for Fiscal Year ending Dec. 31 1915.)

Pres. John T. Underwood, N. Y., Feb. 5, wrote in subst.: The year has shown the general improvement in a very marked manner, the final net surplus being \$1,336,586, after making liberal appropriations for depreciation. During the first 6 months sales were not as satisfactory as was hoped for, but the last 5 months business exceeded our estimates, and the reports now in our hands indicate a still more satisfactory outlook for 1916. The result obtained by the domestic selling organization has been most gratifying, and the foreign business, notwithstanding the unusual conditions prevailing throughout the world, has shown decided improvem to During the year 1915 \$100,000 pref. stock (at par) was retired as provided by the company's charter at a cost of \$110,716 and the stock canceled, thus reducing the net of pref. stock as of Dec. 31 1915 \$4,500,000.

American Real Estate Co., New York.

(Report for Fiscal Year ending Dec. 31 1915.)

An authoritative statement with reference to the annual statement, published last week page xiv., says in substance:

Status.—The statement shows real estate owned of a valuation of \$24,627,746, less underlying mortgages, \$9.952.970, leaving a net valuation of real estate owned, \$14.674,776. Additional assets, including mortgages owned of \$1,025,604, and cash on hand, \$408,459, bring the total assets up to \$16,773,361. The total liabilities, including the bonded debt, are \$14,196,350, leaving a capital stock and surplus, above all liabilities, of \$2,577,011.

Sales, &c.—During the year 1915 the gross sales of real estate amounted to \$4,860,049, and real estate acquired, \$2,807,628.

Indebtedness.—There has been in 1915 a net reduction of \$1,757,990 in mortgage indebtedness, \$512,405 in full-paid coupon bonded debt and a net reduction in the total bonded debt of \$128,687.

reduction in the total bonded debt of \$128,687.

Property Purchase.—The company's most important purchase during the past year was the Kouwenhoven property in the Astoria section of the Borough of Queens. This property contains over 1,100 lots and will be made readily accessible by the Second Ave. elevated extension of the dual subway system, which will be operated during the present year. Improvements on the property are already under way and the construction of apartment houses will be started in the near future. Other advantageous purchases were made and the company's policy of making investments along rapid transit lines at or near station points is continued with promise of profitable return as these lines near completion.

(The) J. G. Brill Company, Philadelphia.

(Report for Fiscal Year ending Dec. 31 1915.)

Pres. Samuel M. Curwen, Phila., Feb. 9, wrote in subst.: The total output of our five plants amounted in sales value to \$4,403,117, comparing as follows (000s omitted):

The total output of our five plants amounted in sales value to \$4,403,117, comparing as follows (000s omitted):

1907. 1908. 1909. 1910. 1911. 1912. 1913. 1914. 1915

\$9,211 \$3,845 \$4,261 \$5,960 \$5,870 \$7,842 \$9,154 \$4,904 \$4,403

The combined profit for the year 1915 was \$280,299 after charging \$174.897 for all maintenance and repairs; there was also set aside into the reserves for depreciation \$163,973, leaving \$116,326. The total reserves for depreciation now aggregate \$1,738,817.

The general business of electric car and truck manufacturing reached a condition of depression, during 1915, without parallel in the history of the industry. Our company obtained at least its full share of all the orders placed during the year, but the prices resulting from the competition brought about by such conditions were, of necessity, extremely low.

We were able to obtain orders for the manufacture of material for export as the result of existing conditions in Europe, including principally motor transport bodies and shell forgings. Many unavoidable delays prevented the completion of a large measure of these shell orders, with the result that much of the profit which it was hoped would be realized thereon in 1915, was not earned in that year. An extension of the time of delivery under these contracts, well into the present year, has been granted.

The directors deemed it inadvisable during the year to increase the preferred stock dividend to the regular 7% annual rate.

The general conditions governing the particular industry of your company began to improve during the latter part of 1915, and the improvement is continuing and increasing. This present year, therefore, is begun under much more hopeful conditions than did 1915.

On Feb. 5 1916 the combined orders of the company and its subsidiaries was \$4,765,985, compared with \$1,147,100 of work on hand Feb. 6 1915.

Chicago Pneumatic Tool Co. (of N. J.), Chicago, Ill. (14th Annual Report-Year ending Dec. 31 1915.)

Pres. W. O. Duntley, Chicago, Feb. 4 1916, wrote in subst.:

Business conditions generally were most unfavorable until the latter part of the year, the depression being even greater early in 1915 than it was in 1914. Competition in all our products was exceedingly keen for this reason, and on account of the increased cost of our materials and labor, most orders obtained were on a closer margin of profit than ever before. It is, therefore, gratifying to note a substantial increase in the net earnings for the year 1915 compared with those of 1914. By comparison with former reports, it will be found that the net results for 1915 are about normal.

The foreign subsidiary companies are making satisfactory progress. It is found advisable to permit them to retain their earnings to enable them to finance themselves for the expansion of their business. The European subsidiaries are now both under government control and will probably remain so until the end of the war.

All the plants of the company are being operated to their capacity. Substantial additions have been made, and their physical condition has been kept up to standard. Improvements have been made in the products and some new designs marketed. The company has paid all sinking fund charges on its bond issue and after investing the money now in their possession, the trustees of the sinking fund should have about 1,017 bonds on hand retired for this purpose. The regular dividends have been maintained. In order to meet the increased demand for material, pay all bills promptly and take advantage of discounts thereon, an additional \$200,000 was borrowed which is included in bills payable, amounting to \$430,000. The amount so borrowed has been more than offset by the additional assets the amount of interest payable on this loan.

Electric Boat Co. and Sub. Cos., excl. N. Lon. S. & E. Co.

(Report for Fiscal Year ending Dec. 31 1915.)

President Henry R. Carse, Feb. 8 1916, says in substance:

President Henry R. Carse, Feb. 8 1916, says in substance: Unfinished business on hand Jan. 1 1916 was about \$25,000,000; in addition to which the foreign licensees are working on large orders, the exact details of which we are not advised, and our profits from which cannot be known until the war ends. Our technical force is the largest and most competient in its line in the world; it has surmounted many difficulties and accomplished an enormous amount of work during the past year in record time and is prepared to continue production along the same lines. Submarine boats have now demonstrated their inestimable value as a military instrument, both for defense and offense, and there is every expectation that in the future all nations will use them. This company owns the Holland patents, which are basic, for the construction of any submarine boat in all countries having patent laws. The Holland type is the only one that has operated successfully in the United States, England, Russia, Austria, Holland and in Japan, and boats of this type are now being constructed under our patents in all those countries as well as in other European countries. Our patents are so unassailable that a German court has rendered a decision in favor of the Electric Boat Co. in its action against the Krupps for patent infringement in the construction of the German submarine boats. It is our purpose to uphold and defend these patents against all infringements.

Pettibone Mulliken Co., Chicago and New York.

(Report for Fiscal Year ending Dec. 31 1915.)

Pres. A. H. Mulliken says in substance:

Pres. A. H. Mulliken says in substance:

The year 1915 was similar to 1914 in respect to political agitation, low tariff, experimental legislation, untried new laws, war, lack of confidence and business depression, with the exception that in October the continued demand for war supplies created a domestic demand, which was reflected in higher prices for steel products. Beginning with October there was a slight improvement in the demand for material manufactured by our company. This improvement continued through November, and in December there was a very decided increase in business.

During 1914 1,532 miles of new road were built against 933 miles in 1915, which was the smallest mileage constructed in any year for 50 years.

The increase in net income was due to the increase in business during the last 3 months of 1915. The total earnings for the years 1912, 1913 and 1914 were \$1,260,448, and, adding the net income for the year 1915, makes a total of \$1,493,259, or an average of \$373,315 per annum for the last 4 years, which is more than twice the annual dividend requirement on the last and 2d pref. stocks, and more than 3 times the amount required for dividends on the 1st pref. stock outstanding.

During the year full dividends were paid on the 1st and 2d pref. stocks. \$220,000 of the 1st pref. stock was acquired through the staking fund and canceled, leaving outstanding and in the treasury Jan. 1 1916 \$1,995,000.

In June 19 5 we decided to build a munition plant, as a permanent department of the business, not only to secure orders during the present war, but to supply the U. S. Government with munitions, which it will undoubtedly require in order to prepare for national defense. Your company has a war contract which will show a fair profit, and with the increased demand for the company's regular products I look foward to the most prosperous year in the history of the corporation.

Ontario Power Co. of Niagara Falls.

(Report for Fiscal Year ending Dec. 31 1915.)

Pres. J. J. Albright, Buffalo, Feb. 2, wrote in substance:

Pres. J. J. Albright, Buffalo, Feb. 2, wrote in substance:

Business.—The growth of the business is shown by the following:

Number of Kilowatt Hours Generated (000s omitted).

1908. 1909. 1910. 1911. 1912. 1913. 1914. 1915.

139,816 226,744 310,736 382,180 510,965 639,081 743,630 757,714

The surplus earnings for the first quarter of the year were \$70,093 for the last quarter of the year segregated \$463,819, for the last quarter \$555,323.

There is every reason to believe that the growth of business referred to will continue. The company is now buying considerable power in order to meet the full demands of its consumers in the territory supplied. Because of these facts your directors have decided to proceed at once with the construction of the third conduit and the installation of sufficient additional units to meet the increasing demands upon our generating capacity. It is estimated that these enlargements will require expenditures within the next two years of approximately \$3,000,000.

Of our 1st M. bonds, \$1,421,000 remain unissued and are available for enlarging the works. These bonds, however, will not cover the cost of the enlargements to be made; therefore, provision must be made for a further issue of bonds, or the company must pay the balance, as the work progresses, out of its surplus earnings. A further issue of bonds would require the refinancing of a large portion at least of the company's funded debt. In view of the general conditions now prevailing, we believe that any large amount of refinancing at this time would be prohibitively expensive and therefore unwise.

On the other hand, the company now has surplus earnings of \$934,044, which, if retained, may be used in payment of construction costs, and in this way refinancing at this time can be avoided. Feeling sure that this course will most beneficially serve the best interests of the company, we recommend that no dividend for the year ended Dec. 31 1915 be declared.

La Belle Iron Works, Steubenville, Ohio.

(Official Statement Dated Dec. 27 1915.)

In connection with the sale to Lee, Higginson & Co. of \$3,500,000 First and Refunding Mortgage 5% gold bonds dated Dec. 1 1915, President R. C. Kirk, from Steubenville, Dec. 27 1915, wrote in substance:

Description of Bonds.—Authorized issue, \$7,500,000, interest rates to be fixed at time of issue, not exceeding 6% per annum. Trustee, Penn. Co. for Insurances on Lives & Granting Annuities, Philadelphia. Dated Dec. 1 1945; due Dec. 1 1940; interest J. & D. Denom. \$1,000 and \$500 c*. Initial issue of \$3,500,000 5% bonds, callable at company's option, as a whole of in part, on any interest date, at 105% and int.; principal and interest payable in U. S. gold coin of the present standards without deduction for any taxes (other than succession and inheritance taxes), assessments or other governmental charges, except the Federal income tax—and so far as permissible by law, without deduction for the present normal Federal income tax—which the company or the trustee may be required to pay or retain under any present or future law, Federal, State or local. Followed by capital stock [\$9,915.400 each of common and 8% cum. pref.] having a market value of over \$17,000,000. Present Pennsylvania 4-mill tax to be refunded to Pennsylvania holders.

The remaining \$4,000,000 authorized bonds may be issued for not exceeding at face value the cost of future additions and improvements, or to acquire a controlling stock interest in subsidiary companies, provided that all indebtedness of such companies (other than current operating accounts) as well as the stock, is pledged under this mortgage or else bonds of this issue are reserved to an amount equal to such indebtedness.

An annual sinking fund will retire and cancel, at or below 105 and int., \$100,000 of these bonds on each Dec. 1, 1916 to 1919 incl., and on Dec. 1 1920 to 1939 such ratable proportion as will retire before maturity at least 66 2-3% (optionally more) of the total bonds issued.

Purpose of Issue.—(1) To retire \$1,580,000 existing 1st M. 6% bonds, (called for payment June 1 1916.) Sufficient funds for that purpose will be deposited with the trustee, thus insuring that after June 1 1916 the new bonds will be a first mortgage on substantially all the properties; and (2

1 brass and iron foundry,
2 steam plants,
(2) Opposite Steubenville, in W. Va., 167 acres with 94 coke oven plant,
to be completed by July 1.
(3) In Wheeling, W. Va., plant occupying about 4½ acres and comprising
2 plate mills, nail and tack factories.
(4) Controls or leases iron ore properties in Minnesota, estimated tonnage 15,000,000 tons, sufficient to supply company's requirements for 30
years at present rate of consumption.
(5) Owns or controls coal properties in W. Va., Pa. and Ohio, production
in 1914 137,440 net tons.

Earnings 101/2 Years'-Net Applicable to Bond Int. (Dec. 1915 Est.)-1905-06. 1906-07. 1907-08. 1908-09. 1909-10. 1910-11. Annual interest charges on the \$3,500,000 bonds will be \$175,000.

The year 1914 was one of almost unprecedented depression in the iron and steel industry. This depression continued during the first five months of 1915, when conditions were much below normal, notwithstanding which the net earnings for the calendar year 1915 (one month estimated) will be more than \$900,000. Present net earnings are at the rate of about \$1,500,000 per annum, which is about equal to the average of the last 10½ years. The outlook for the year 1916 indicates earnings in excess of this rate. The new by-product coke plant, which will be financed out of the proceeds of these bonds, is expected to yield large profits.

Deductions from Net Profits as Shown Above for 101/2 Years. GENERAL INVESTMENT NEWS

RAILROADS, INCLUDING ELECTRIC ROADS.

Algoma Central & Hudson Bay Ry.—Plan, Etc.—The company and its receivers, Thomas John Kennedy and Vivian Harcourt, will apply to the Parliament of Canada, at

Vivian Harcourt, will apply to the Parliament of Canada, at the next session, for an Act for the following purposes:

(1 & 2) Confirming the sale by the company to the Algoma Central Terminals, Ltd., of certain properties described in instrument of Nov. 1 1912 and now in use as terminals at Sault Ste. Marie and Michipicoten Harbor, Ont.; and also confirming the lease dated Nov. 1 1912 made by the last-named company to the said railway company of terminal properties at Sault Ste. Marie and Michipicoten Harbor, Ont., as the said lease has been modified by a further agreement dated Doc. 1914. See next paragraph.

(3) Approving an agreement for the reorganization of the railway company and the adjustment of relations between it and the Algoma Central Terminals, Ltd., set forth in an agreement to which the railway company, the Terminals Company and the lat M. bondholders' committees thereof. Terminals, Ltd., set forth in an agreement to which the railway company, the Terminals Company and the 1st M. bondholders' committees thereof, respectively, and the Lake Superior Corporation, inter alia, are parties, whereby the terms of the said lease dated Nov. 1 1912 are modified and the rights of the bondholders, stockholders and creditors of the railway company and the terminals company, respectively, are defined, and empowering the railway and the other parties to the agreement to do all acts necessary to give full effect to the said agreement.—V. 101, p. 1464, 1012.

Birmingham & Northwes tern Co., Del.—To Pay Notes. We are informed that the \$450,000 6% collateral trust notes, due Mar. 1, will be paid at maturity. These notes are secured by the entire stock (\$300,000) and bonds (\$800,000) of the Birmingham & Northwestern Ry.—V. 96, p. 1295.

Boston & Albany RR.—Annual Statement.— See New York Central Lines under "Reports" above.—V. 100, p. 1078.

Chicago & Eastern Illinois RR.—Sub. Co. Receiver. See Evansville & Indianapolis RR. below.—V. 102, p. 344.

Chicago Great Western RR.-Lease Ends.-

Effective as of Feb. 1 this company has resumed possession of the line between Mankato and Randolf, Minn., 57 miles, which it leased to the Minn. St. Paul Rochester & Dubuque Electric Traction Co. in July 1914. See V. 99, p. 195; V. 101, p. 1552.

Chicago & North Western Ry.—Bonds.—Kuhn, Loeb & Co. have purchased from the company \$5,000,000 General Mortgage 5% gold bonds, due 1987, issued in part for refunding purposes and partly for betterment work. The bonds ing purposes and partly for betterment work. The bonds have been selling at 116 and it is understood that the present issue is being offered privately at about that price.

These bonds are a part of the authorized issue of \$165,000,000 General Mortgage bonds, of which \$76,381,000 will now be outstanding, including \$30,827,000 3½s, \$30,554,000 4s and \$15,000,000.—V. 101, p. 1188, 943.

Chicago Rock Island & Pacific Ry.—Report on Property.

—The Amster Stockholders' Committee has had an indedependent investigation of the physical and financial condition of the road made by Harrington Emerson whose report was made public on Feb. 9.

Mr. Emerson believes the road should be ableduring the roat for 7 years.

report was made public on Feb. 9.

Mr. Emerson believes the road should be able during the next 6 or 7 years to earn 6% yearly on its \$75,000,000 capital after paying out of earnings for all necessary improvements. Mr. Emerson is an engineer, acting as counsel to the operating departments of both the Baltimore & Ohio and the Atchison systems.

Mr. Emerson says: "It is quite obvious that, except for refunding and other financial obligations which I understand are unusually light for a railroad system the size of the Rock Island, the property does not need any new capital. There is no reason why economies that have proved workable on other railroads will not work on the Rock Island. I have subdivided Mr. Kendrick's estimates (see V. 101, p. 1713) into four groups, as follows:

Group A—To accomplish savings of \$7,643,761 annually, Mr. Kendrick points out that the company will have to spend only \$47,200, to be charged to operation, and \$129,437, to be charged to new capital, for additions and betterments, or total investment of \$176,637.

Group B—On a total investment of \$176,637.

Group B—On a total investment of \$1,937,260. The investments called for under this group, for track maintenance, fences, new locomotives, ties, &c., are very remunerative and they should all be carried out; yet my own rule as to new capital investments has always been to invest it in that direction where the money will produce the largest return.

Group C—This comprises desirable betterments which do not lower costs, such as heavier rails, bank widening, &c. Here we have a proposed investment of \$4,132,630, without any promise of immediate return. The property improvements under Group C are advisable and should be planned for, but the company's officials should be given to understand that only when they have demonstrated their ability to achieve the economies and savings tabulated under Group S a and B would the company furnish them with the \$4,132,630 to carry out the improvements under Group C. In Group D Mr. Emerson itemizes the large

Notes.—The \$7,500,000 2-year 6% notes due Feb. 16 will be extended through the Bankers Trust Co., N. Y., for six months as obligations of the receiver, bearing the same rate of interest and with the same collateral (compare V. 98, p. 999, 1078).—V. 102, p. 344.

Chicago St. Paul Minneapolis & Omaha Ry.—Bonds.— The N. Y. Stock Exchange has listed \$400,000 6% Consols, making the total amount listed \$18,883,000. The additional bonds replace \$400,000 lst M. bonds of Sault Ste. Marie & S. W. Ry., matured Nov. 1 1915.—V. 101, p. 1885.

Chicago Union Station Co.—Guaranteed Bonds—Oversubscribed.—The initial issue of \$30,000,000 1st M. 4½% gold bonds, due July 1 1963, offered on Thursday, was at once largely oversubscribed. The bonds were offered by Kuhn, Loeb & Co., Lee, Higginson & Co., the Illinois Trust & Savings Bank of Chicago, the National City Bank of N. Y. and the First Nat. Bank of N. Y. An advertisement for record purposes appears on another page. record purposes appears on another page.

nd the First Nat. Bank of N. Y. An advertisement for record purposes appears on another page.

Digest of Letter from President J. J. Turner, New York, Feb. 8 1916. These bonds are to be unconditionally guaranteed by endorsement as to both principal and interest, jointly and severally, by the Chicago Burlington & Quincy RR. Co., the Chicago Milwaukee & St. Paul Ry. Co., the Pittsburgh Cincinnati Chicago & St. Louis Ry. Co. and the Pennsylvania Company, in whose interest the station company has been incorporated under the laws of Illnois and each of which companies owns one-fourth of the company's outstanding capital stock, amounting to \$2,800,000 par value, which has been fully paid.

The Union Station Co. has acquired extensive station and terminal properties in the city of Chicago, including the property herotofore used as a terminal by the guarantor companies, and properties adjacent thereto, the entire development extending for about 11 blocks from Carroll Ave. to West 12th St., principally between the Chicago River and North and South Canal St. and including the present city block bounded by West Adams, West Jackson, Clinton and North Canal streets, on all of which properties (subject as to certain parts thereof to easements of no material importance) the new bonds will be secured by a first mortgage.

The purpose of the sale of these bonds is to reimburse the company for its expenditures in acquiring these properties and to pay in part for their improvement, which is to include the erection of a modern passenger station, with the necessary approaches and yard facilities.

These bonds are to be part of an issue limited to \$60,000,000 to mature July 1 1963, secured by 1st M., dated July 1 1915, to the Illinois Trust & Savings Bank as trustee. The present issue is to bear interest at the rate of 4½% per annum, payable semi-annually (J. & J.), is to be redeemable in whole or in part at the option of the company on Jan. 1 1921, or any interest date thereafter at 105% and Int. on 90 days' notice. The principal a

Columbus (O.) Ry., Power & Light Co.—Called Bonds.

The following bonds have been called for payment on the date and at the price (& int.) named below out of the proceeds of the bonds offered last week:

Columbus Electric 1st 6s, 1897 \$446,000 110 Mar. 6 N.Y.Cen.Tr. Col. Ed. El. Lt.1st 5s, 1899 300,000 100 Mar. 1 Colum. Pub. Serv. 1st 6s, 1904 182,000 101 Aug. 1 do Colum. Lt., H. & P. 6s, 1908 511,000 101 Aug. 1 do See bond offering, V. 102, p. 521.

Consolidated Traction Co., Pittsburgh, Pa.—Car Trusts.—The Colonial Trust Co., Pittsburgh, the trustee for the issue, is offering at par and int. \$200,000 5% ear trust gold bonds, to be dated April 1 1916 and due \$20,000 annually on April 1 1917 to 1926, incl. Denom. \$1,000 (e*). Interest A. & O. Free from Pa. State tax.

A first lien on 25 double-truck steel motor cars and 25 double-truck steel trailers, costing \$221,000, of which amount \$21,000 is to be paid in cash representing an equity of about 10%. Title to equipment remains in the trustee for bondholders until all the installments are paid. Company incorporated in 1895; length of track, 225.54 miles (operated by Pittsburgh Rys. Co.). Capital stock, except small number of shares, is owned by the Philadelphia Company.—V. 88, p. 882.

Detroit Toledo & Ironton RR.—Earnings.—For the 6 months ending Dec. 31 1915, the net, after taxes, rentals and hire of equipment was \$224,806.—V. 101, p. 1370.

Erie RR.—Equipment Trusts Authorized.—The N. Y. P. S. Comm. on Feb. 5 authorized the company to issue \$4,275,000 4½% 10-year gold equipment trust certificates.

This issue, with the Central Trust Co. and Edward T. Stotesbury as trustees, will cover the following rolling stock, costing over \$5,000,000, on which the Erie will make a first cash payment of \$805,000, viz.: 1,000 dropend gondolas, 1,000 self-clearing hopper cars, 19 all-steel cars for passenger service; 66 locomotives (23 of the latter to come from the Baldwin Co., 38 from the American Locomotive Co. and 5 from Lima Locomotive Corp.)—V. 102, p. 345, 66.

Evansville & Indianapolis RR.—Receiver.—Wm. P. Kappes was on Feb. 5 appointed receiver of this property by Judge Anderson in the Federal Court at Indianapolis.

Suits for the foreclosure of the two mortgages, aggregating \$2,500,000 (1st M., \$647,000; consol. M., \$1,853,000), has been filed in the Federal Court by the Farmers' Loan & Trust Co., N. Y., interest payments being in default. The road has been operated by the Chicago & Eastern Illinois, being controlled through ownership of the entire capital stock. Compare V. 99, p. 119, 342; V. 100, p. 982.

Fort Dodge Des Moines & Southern RR.—Dividend.—A quarterly dividend of 13/4 was paid Feb. 10 on the \$1,500,000 preferred stock.—V. 101, p. 1972.

Havana Electric Ry., Light & Power Co.—Notes Called for Payment—Sale of Bonds.—

The \$2,000,000 outstanding 6% 2-year secured notes dated Sept. 1 1914 have been called for payment at 10034 and int. on Mar. 1 1916 at Guaranty Trust Co., N. Y., trustee. It is understood that a part of the \$4,000,000 gen. M. 5% bonds due Sept. 1 1954, heretofore pledged as collateral for the notes is being sold to provide funds to pay off the notes.—V. 101, p. 1272.

Illinois Central RR.—Bonds Offered.—Graham & Co., Philadelphia, are offering a small block of the new equipment trust $4\frac{1}{2}\%$ bonds, Ser. "D," due 1919 to 1926, at prices to yield from 4.10% to 4.25%.

Part of a new issue of \$1,900,000, dated Jan. 1 1916, maturing in semi-annual installments on July 1 and Jan. 1 of each year from July 1 1916 to Jan. 1 1926, inclusive. Commercial Trust Co., Phila., trustee. Interest J. & J. Free of Penn. State tax. These equipments are issued on the "Philadelphia plan" and are secured by a first lien on 50 locomotives and 1,000 refrigerator cars, costing in the aggregate about \$2,409,000. Compare V. 102, p. 345.

Kanawha & Michigan Ry.—Annual Statement.— See New York Central Lines under "Reports" above.—V. 101, p. 2071.

Kansas & Colorado Pacific Ry.—Default Feb. 1 .-See Missouri Pacific Ry. below.—V. 86. p. 1042.

Lake Erie & Western Ry.—Annual Statement.— See New York Central Lines under "Reports" above.—V. 100, p. 1341.

Lehigh Valley RR.—Suit Against Government.—
This company on Feb. 5 filed a bill of equity in the U. S. Dist. Court at Philadelphia against the United States to enjoin the I.-S. C. Commission from enforcing the order under the Panama Canal Act of 1912, divorcing the railroad from the Lehigh Valley Transportation Co., which operates vessels on the Great Lakes between Buffalo and Chicago, and whose stock is owned by the railroad company. Upon application of R. W. Barrett, of New York, one of the counsel for the railroad, the Court granted an order fixing next Saturday for a hearing of the application for a preliminary injunction. The case likely will be heard by Judges McPherson, Buffington and Woolley.—V. 102, p. 153.

Long Island RR.—New Debentures.—The New York P. S. Commission on Feb. 5 authorized the company to issue \$13,000,000 4% 10-year debentures to reimburse the Pennsylvania RR. for improvements since 1909.

The company authorized in 1909 \$16,500,000 4% 10-year debentures, of which \$13,000,000 have heretofore been issued. The present authorization consists of an additional \$3,000,000 of the issue of 1909 and \$10,000,000 new gold debentures. It is expected the entire \$26,500,000 will ultimately be held by the Pennsylvania RR. for advances made for improvements.—V. 102, p. 522, 345.

Louisville Bridge Co.—Exchange of Stock.—The Philadelphia "News Bureau" under date of Feb. 4 said:

delphia "News Bureau" under date of Feb. 4 said:

"More than 90% of the minority stockholders of the Louisville Bridge Co. have deposited their stock under the plan of the Pennsylvania RR. Co. to exchange 7 shares of Southern Pacific for 6 shares of Bridge Co. stock. Most of this stock was in estates, and the committee expects the balance of the stock to be deposited.

"The company has awarded a contract for two spans of the new bridge at the Indiana end to the Pennsylvania Steel Co. at Harrisburg, Pa., involving an outlay of \$250,000. Contracts will be made early in February for the balance of the spans, except the draw span, at an estimated cost of \$1,500,000 more. The company's suit against the Government to determine its right to use the old piers is pending in the District Court here.

"The Bridge Co. has \$1,500,000 stock, par value \$100 a share, of which the Pennsylvania Co. owns \$902,000. The transaction would call for \$697,200 in Southern Pacific stock in payment for all the minority stock."

—V. 100, p. 1257.

Manhattan Railway Co.—Offering.—This company, as announced by adv. on another page, will receive sealed proposals until noon Feb. 17 at its office, 165 Broadway, N. Y., for \$4,523,000 (auth. \$5,409,000) 2d M. 4% gold bonds due June 1 2013, secured by its 2d M. made to the Equitable Trust Co. of N. Y., as trustee, dated June 1 1913, int. J. & D.

Trust Co. of N. Y., as trustee, dated June 1 1913, int. J. & D.

The mortgage is a second lien upon the company's extensive elevated railroad properties, described in the mortgage. The bonds are redeemable in whole but not in part at 105 and accrued int. on any interest day on notice as provided in the mortgage. Tax-exempt in N. Y.

The company's lines are leased to the Interborough Rapid Transit Co. The lease and the mortgage limit the issue of bonds to be secured by the 2d M. to \$886,000, in addition to those hereby offered, and upon the issuance of this additional amount the capital accounts of this company will be closed and all further capital expenditures upon the company's property must be provided by the lessee.

Under the terms of the lease, the payment of interest on all bonds of the company, including this issue, and the payment of 7% dividends upon the capital stock, are assumed by the Interborough Co. The Interborough Co. has pledged its interest in the lease by the mortgage securing its issue of 1st and Ref. M. 5% bonds.

Net earnings of the property, as operated by the Interborough Co., during the 6 months ending Dec. 31 1915, yielded a surplus of \$704,720 after charges, including interest on \$40,684,000 bonds and 7% dividends on the \$60,000,000 stock. Future net earnings are expected to increase, by reason of enlargements and additions now in progress to be paid for by the lessee.

Interest from Dec. 1 1915 will be added to the prices bid; 25% of the purchase price will be payable at the Equitable Trust Co. on acceptance of bid, and the balance 30 days after, or payment may be made in full when allotment is made.—V. 97, p. 1504.

The Paylikashe C.

Manila RR.—Purchase of Stock.—
The Philippine Commission on Feb. 4 passed the Assembly bill authorizing the purchase of all the outstanding capital stock of the Manila RR. by the Philippine Government for \$4,000,000 cash from the Manila Ry. Co. (1906) Ltd.—V. 102, p. 251.

Michigan Central RR.—Notes.—The \$3,000,000 1-year 41/2% notes due March 1 will be paid off at maturity. It is understood that the company will borrow funds to meet the payment.

Annual Statement.—
See New York Central Lines under "Reports" above.—V. 101, p. 2145.

Middle West Utilities Co., Chicago.—Collateral Bonds. A block of \$4,500,000 10-year 6% collateral gold bonds of 1915 is being placed at 96%, to yield $6\frac{1}{2}\%$. This issue will reimburse the treasury for improvements, additions, &c., and will retire all the outstanding 3-year 6% notes due June 1 1916, making the \$6,500,000 collateral 6s now to be outstanding the company's only funded obligations.

The bonds are offered by the Illinois Trust & Savings Bank, Russell Brewster & Co., McCoy & Co. and N. W. Halsey & Co. of Chicago. A. H. Bickmore & Co. and William P. Bonbright Co. For full description of issue see V. 100, p. 73, 2006; V. 101, p. 1714.

Data Furnished by President Samuel Insull, Chicago, Jan. 25 1916. Capitalization as of Jan. 25 1916.

Capitalization as of Jan. 25 1916.

Authorized. Outstand'g.

Pref. stock...\$12.000.000 \$9.971.800 3-year notes...\$3,500,000 \$2.6.2,300

Com. stock...\$12.000.000 \$8,836.300 These bonds. (See below) 3,400,000

The proceeds of the bonds offered will be used to retire the remaining \$2,652,300 3-year 6% collateral gold notes due June 1 1916 (of which issue \$847.700 have already been retired) and to reimburse the treasury for funds used in the development of subsidiaries. The total authorized issue of the bonds must not exceed 75% of the outstanding capital stock; total bonds authorized by directors and now to be outstanding, \$6,500.000.

The subsidiary companies operate in Ill., Ind., Ky., Mo., Mich., Okla., Neb., Wis., Me., N. H., Vt., N. Y., Tenn. and Va. Aggregate population served (estimated), about 920,000. [This includes the Electric Transmission Co. of Va., recently acquired, and wire lines in Tenn. See V. 101, Earnings for Years ending April 30 (2) and the state of the state

Minneapolis St. Paul Roch. & Dubuque El. Trac. Co. See Chicago Great Western Ry. above.—V. 100, p. 1832.

Missouri Pacific Ry.—Defaults Feb. 1.—In addition to the bonds noted in last week's "Chronicle" as being in default upon Feb. 1 coupons, we learn that the following, not previously in default, remain unpaid:

Missouri Pacific, Lexington Division 1st 5s of 1880, due Aug. 1 '20 \$650,000 Kansas & Colorado Pacific 1st Ref. 6s of 1908, due Feb. 1 1938___3,972,000 Compare V. 102, p. 522, 154.

Morris & Essex RR.—Offering of Bonds Guaranteed by D. L. & W. RR.—Colgate, Parker & Co., Robert Winthrop & Co. and Freeman & Co., all of New York, are offering, by adv. on another page, at 87½ and int., \$1,488,000 First Refunding Mtge. 3½% Gold Bonds of 1900, due Dec. 1 2000, principal and interest unconditionally guaranteed by endorsement, by the Del. Lack. & Western RR. Co. Auth., \$35,000,000; outstanding, \$25,129,000. Denom. \$1,000c*&r. Tax-exempt in New Jersey. Interest payable in full without deduction of normal U. S. income tax. The bankers say:

We are advised that these bonds are a legal investment for savings banks

deduction of normal U. S. income tax. The bankers say:

We are advised that these bonds are a legal investment for savings banks in New York, New Jersey, Connecticut and Rhode Island.

The Delaware Lackawanna & Western RR. Co. has leased the property for the term of charter and any renewals thereof, and guaranteed payment of principal and interest of its bonds and 7% dividends on its stock, of which \$15,000,000 is outstanding. These First Refunding Mtge. bonds are a first lien on all railroad, terminals, lands, buildings, &c., owned by the Morris & Essex RR. Co., subject to the 7% bonds, which were purchased by funds advanced by the Delaware Lackwanna & Western RR Co. The road is part of the main line of the D. L. & W., and, through direct ownership of terminal yards and passenger station at Hoboken, N. J., it provides the latter company with its only entrance into Hoboken and its only terminal at the New York end of the system.

The D. L. & W. RR. Co. has no mortgage debt, and for the past ten years has paid 20% per annum on its \$42,277,000 capital stock.

The price range of these bonds on the New York Stock Exchange since 1908 has been from 84 to 96 ¼.—V. 101, p. 1553.

New York Chicago & St. Louis RR.—Dividends Re-

New York Chicago & St. Louis RR.—Dividends Resumed.—This company, \$2,503,000 of whose \$5,000,000 lst pref. stock is owned by the New York Central RR., has declared a dividend of 5% on that stock, payable March 1 to holders of record Feb. 18. This is the first payment since March 1914, when $2\frac{1}{2}$ % was paid The Central also owns large blocks of common and 2nd pref. stock.—V. 100, p. 1666.

New York New Haven & Hartford RR.—Plans for Refinancing.—With regard to the refinancing of the company's \$27,000,000 1-year 5% notes due May 1, Pres. Howard Elliott has issued the following:

\$27,000,000 1-year 5% notes due May 1, Pres. Howard Elliott has issued the following:

There was a meeting of the special finance committee of the board on Feb. 1 to consider the payment of \$27,000,000 5% notes due May 1 1916.

During the winter of 1915 certain changes were made in the laws of Connecticut, Massachusetts and Rhode Island, under which the company now has the legal right to obtain new capital by creating a mortgage and issuing bonds thereunder and by issuing preferred stock, conditional upon the approval of the stockholders and P. S. Commissions of those three States. The General Court or Legislature of Massachusetts ordered at the same time the P. S. Commission of that State to make an investigation into and report upon the financial affairs of the New Haven road, and it is expected that this report will be made public in the latter part of Feb. It is hoped the report will contain a recommendation that will enable the Legislature to take any action necessary to remove any doubt as to the legal status in Massachusetts of investments of the company made by and under lawful authority of other States.

The committee also considered the advisability of recommending an increase in the capital of the company by an issue of preferred stock. There are good reasons why such a plan would strengthen the financial position of the company. The proportion of capital stock to indebtedness at par is in the ratio of 100 to 171—that is to say, for every \$100 of capital stock issued, the stockholders have authorized the company to borrow \$171. This is a disproportionate amount of indebtedness to capital stock, creating unusually heavy fixed charges, and it would be much better if the relations of stock and debt were on a more even basis. The company is credit would be strengthened if the stockholders were to show their confidence in the property by contributing to an increase of its capital, which would result in a corresponding decrease in its indebtedness and fixed charges.

The committee concluded, however, that

Northern Electric Ry., California.—Deposits Not Yet Sufficient.—The deposits under the plan (V. 101, p. 1273, 1371) on or about Feb. 4 included claims amounting to \$6,967,159, leaving \$3,069,965 still out. The committee says:

\$6,967,159, leaving \$3,069,965 still out. The committee says:
Unless the holders of the outstanding claims conclude to come in the plan
will be abandoned. In such event the probable result will be that the
underlying bond mortgages will be foreclosed, and that Messrs. Sloss. Hammon, De Sabla and Lilienthal will be forced into bankrputcy. As between
these alternatives we think no creditor should hesitate.

As to bankrputcy, the schedules on file show that the claims against
Leon Sloss, W. P. Hammon, E. J. De Sabla Jr. and E. R. Lilienthal, upon
their endorsements alone and irrespective of any stockholders' liability,
aggregate more than \$6,000,000. Leon Sloss testified in court on Jan. 21
that he and his brothers had invested more than \$1,700,000 in cash and
had loaned over \$350,000 in marketable securities to this enterprise; that
they had no other real or personal property of any kind or character, and
that their claims against the roads for the moneys and securities so advanced
and loaned were all to be canceled, if the plan of reorganization became
effective. It would, therefore, appear that the creditors cannot look for
much relief from this source through bankruptcy proceedings.

Furthermore, the creditors should bear in mind that the property which
was turned over by Mrs. Sarah Sloss to help the situation, and the present
value of which is more than \$1,000,000, and about half of which would be
available to the Northern Electric creditors, was transferred by her under
an agreement dated Jan. 31 1914, which provides that in case any of the
first parties (that is, the railway companies, &c.), or if any of the sons of

the said Sarah Sioss shall be adjudicated bankrupt * * * then the Sloss Corporation and Sarah Sloss shall have the right, if either shall so elect, with the written consent of the trustees, to cancel and annul the guaranties and obligations to pay the claims or demands, &c.

Under the proposed plan the railway creditors will receive the benefit of \$500,000 in place of their uncertain interest in the guaranty fund, and the claims of the creditors against W. P. Hammon, E. J. De Sabla Jr. and E. R. Lilienthal will remain in full force and effect unless each shall obtain his release by the payment of \$500,000 within the time limited in the agreement.—V. 101, p. 1371, 1273.

Northern Ohio Traction & Light Co.—New Stock.—
This company has applied to the Ohio P. U. Commission for authority to issue \$518,400 6% pref. stock, to be sold at not less than 95, to provide chiefly for betterments and additions. This will increase the outstanding pref. stock to \$4,000,000, leaving \$1,000,000 of the \$5,000,000 authorized unissued.—V. 101, p. 1371.

Norton & Taunton Street Ry.—Foreclosure Sale.—
This property has been sold under foreclosure for \$250,000 to the bond-holders. See V. 101, p. 449.

Philadelphia Co., Pittsburgh.—Car Trusts, &c.—
See Consolidated Traction Co. above and United Traction Co. below.V. 102, p. 523.

Pittsburgh Railways.—Sub. Co. Committee.-See United Traction Co. of Pittsburgh below.-V. 100, p. 475.

Richmond Fredericksburg & Potomac RR.—Dividend.
The stockholders on Feb. 10 voted to authorize \$1,555,600 dividend obligations with which to pay the 50% dividend approved by the directors Dec. 16 1915 on the \$1,316,900 capital stock and \$1,794,300 dividend obligations now outstanding.—V. 102, p. 346, 68.

Southern Railway.—Consolidated Fives.—
J. P. Morgan & Co. have sold Frazier & Co. of Philadelphia \$1,500,000 of the company's 1st consolidated 5% bonds. It is understood a public offering will be made shortly.

New York Offices Moved .- The offices have recently been moved to the Equitable Bldg., 120 Broadway.

Offices moved: Southern Ry., Mobile & Ohio RR., Alabama Great Southern RR., Cincinnati New Orelans & Texas Pacific Ry., Georgia Southern & Florida Ry., Virginia & Southwestern Ry., Mobile & Birmingham RR.—V. 102, p. 346.

Texas & Pacific Ry .- Minority Income Bonds .- In view of a pending application for a receiver the minority holders of the 2d M. Income bonds are invited by the committee named below to deposit their holdings with the N. Y. Trust Co., depositary, for protection purposes.

Committee: Mortimer N. Buckner (Chairman), Owen F. Roberts, and Edward Schafer, with Alfred A. Cook as counsel and Herbert W. Morse, Secretary, 26 Broad St., New York.

There are about \$24,663,000 of these bonds outstanding, of which approximately \$24,000,000 are held by the St. Louis Iron Mountain & Southern Ry.—V. 102, p. 154.

Toledo & Ohio Central Ry.—Annual Statement.— See New York Central Lines under "Reports" above.—V. 100, p. 1250.

United Railways & Electric Co. of Baltimore.-Offered.—Alexander Brown & Sons, Baltimore, offered this week at 99 and int., to yield 5¼%, \$2,750,000 5% 5-year gold notes, to be dated Feb. 1 1916 and to mature Feb. 1

gold notes, to be dated Feb. 1 1916 and to mature Feb. 1 1921. A circular shows:

Denom. \$1,000 c*. Interest F. & A. Redeemable, all or part, at any time at 101 and int. upon 30 days' notice. Principal and interest payable at office of Alex. Brown & Sons, Baltimore. (Company may also establish a N. Y. agency for payment.) Trustee, Safe Deposit & Trust Co. of Baltimore, trustee.

The company operates all of the street railways in Baltimore and vicinity, comprising over 403 miles of single track. Considered one of the best systems of the kind in the U. S. Its credit is high. It has no floating debt; physical condition is excellent.

No new mortgage upon the present property can be created while this issue of notes is outstanding, without giving the notes equal security with the bonds issued under such new mortgage. Company will agree to pay the normal Federal income tax so far as it may be lawful for it to do so.

The notes are being issued to retire \$500,000 underlying bonds (Baltimore Catonsville & Ellicott's Mills Ry. 1st M. 5s) due July 1 1916, \$1,000,000 of short-term notes due June 1 1916, the 5% 2-year collateral trust convertible notes which are to be called for payment at par and int., and to provide for certain capital improvements during the next five years.

The annual report for 1914 showed gross receipts for the cal. year 1914 \$9,228,560, and the earnings after fixed charges were \$1,847,843 (of which \$560,000 was paid to holders of income bonds and pref. stock, \$469,395 credited to depreciation reserve and \$818,448 was paid to common stockholders). The interest on the above notes amounts to \$137,500, an increase in fixed charges of only \$62,500. See also V. 102, p. 523.

United Traction Co. of Pittsb.—Pref. Stock Committee.—

United Traction Co. of Pittsb.—Pref. Stock Committee.—
This company, having failed to declare dividends for three successive periods on the \$3,000,000 5% cum. pref. stock, the committee named below invites all holders to deposit their stock with the Philadelphia Trust Co. Phila., Pa., depositary. Committee: Henry G. Brengle, Chairman, Vice-Pres. Phila. Trust Co.; J. C. Neff, V.-Pres. Fidelity Trust Co.; Arthur V. Morton, V.-Pres. The Penn. Co. for Insur. on Lives & Granting Annuities; Howard A. Loeb, Pres. Tradesmens Nat. Bank; and Charles Biddle, with George Wharton Pepper as counsel.—V. 100, p. 1169.

Western Maryland Ry.—New Notes.—

Western Maryland Ry.—New Notes.—

The Maryland P. U. Commission on Feb. 10 granted the company's application to issue \$450,000 par value 5% Series "B" equipment notes, to be used for the purchase of 15 locomotives. These notes have all been sold w. i. by Blair & Co., N. Y., at a price to yield 4¾%. Compare V. 102, p. 523.

Wheeling & Lake Erie RR.—New Committee for Equip-ment Bonds.—The receiver having defaulted payment of the installments of the sinking fund due Jan. 1 1915 and Jan. 1 1916 on the \$1,298,000 20-year equipment 5s of 1902 due Jan. 1 1922, and having failed to provide funds for payment of coupons matured on like dates, the following protective committee urges the deposit of these bonds with coupons maturing July 1 1915, and subsequently, with one of the depositaries named below:

Committee: Frank N. B. Close (Chairman), V.-Pres. Bankers Trust Co., N. Y.; Henry L. Cohen, V.-Pres. Railways Development Corp., N. Y.; John D. Howard & Co., Baltimore; Lucius Teter, Pres. Chicago Savings Bank & Trust Co. F. A. Judson, Secretary, 16 Wall St., N. Y. Alexander & Green, counsel.

Depositaries: Bankers Trust Co., 16 Wall St., N. Y., depositary, or the Mercantile Trust & Deposit Co. of Baltimore, or the Chicago Savings Bank & Trust Co., Chicago, agents of the depositary.—V. 102, p. 346.

INDUSTRIAL AND MISCELLANEOUS.

Adams Express Co.—Dividends Increased.—
A quarterly dividend of \$1 50 has been declared on the \$10,084,000 stock, payable Mar. 1 to holders of record Feb. 14. This compares with 1% quarterly since Dec. 1914.—V. 101, p. 1552.

Aetna Explosives Co., Inc., N. Y.—Plan Approved.—
The stockholders on Feb. 8 approved the plan of changing the common stock from 70,000 shares of \$100 par value to 70,000 shares of no par value, and also approved the increase in the total number of common shares to 630,000 and the other provisions of the refinancing plan for securing new working capital. Under the terms of the plan stockholders have until Feb. 15 to take up their rights on the new common stock. For plan in detail, see V. 102, p. 438.

Allis-Chalmers Mfg. Co.—Sales for Cal. Year—Unfilled Orders Dec. 31 1915, \$11,056,584 Agst. \$2,400,662 Dec. 31 '14.

The sales billed and the net profit or loss for each of the 12 months in 1914 and 1915 were reported last week, the total result for the year 1915 being a net profit of \$1.078.352, contrasting with a loss in 1914, after allowing for \$53.904 chargeable to reserve, estab. Apr. 16 1913, of \$25,068.

Cambria Steel Co -Merged .-

See Midvale Steel & Ordnance Co. below.—V. 102, p. 439.

Canada Iron Corporation, Ltd.—Deposit of 6% Bonds.
Holders of 6% 1st M. sterling bonds are notified that the Montreal Trust
Co., London, Eng., is receiving deposits of these bonds and exchanging
them for an equal nominal amount of 6% "B" debenture stock plus 10%
of that amount in fully paid ordinary shares of the Canada Iron Foundries,
Ltd., in accordance with the plan of reorganization.—V. 101, p. 925.

Canada Iron Foundries, Ltd.—Exchange of Stock.— See Canada Iron Corporation, Ltd., above.—V. 101, p. 925.

Central Union Telephone Co.—No Merger. See Indianapolis Telephone Co. below.—V. 95, p. 1210.

Cerro de Pasco Copper Corporation.—Initial Dividend.
An initial quarterly dividend of \$1 per share has been declared on the 1,000,000 shares of stock, payable Mar. 1 to holders of record Feb. 21 1916. One-third of the company's stock is held in the treasury for the conversion of \$10,000,000 6% bonds recently issued. See V. 101, p. 1976.

Chalmers Motor Co., Detroit.—New Stock.—This company has offered to its preferred stockholders \$500,000 new % cum. pref. stock at par, to be subscribed at par pro rata.

7% Guim. pref. stock at par, to be subscribed at par pro rata. Proceeds from the sale of this stock are to be used chiefly for additional buildings and equipment "made necessary through increased production from 7,000 to 30,000 cars per year." The company has \$2,000,000 pref. authorized, of which \$1,500,000 has heretofore been issued; \$175,000 is retired annually by the sinking fund.

The Chalmers Motor Co. of Canada, Ltd., was incorporated under the Canadian Cos. Act on Jan. 22 with an authorized capital of \$1,000,000 par \$100. Company's offices are to be at Windsor, Ont. Incorporators: Hugh Chalmers, C. A. Pfeffer, S. H. Humphrey and Wm. P. Kiser, all of Detroit, Mich., and Alexander R. Bartlett of Windsor, Ont.—V.101,p.1274.

Chalmers Motor Co. of Canada, Ltd.—Incorporated. See Chalmers Motor Co. above.

Chandler Motor Car Co.—Initial Dividend.—
An initial quarterly dividend of 1½% has been declared on the \$7,000,000 common stock, payable April 1 to holders of record Mar. 7. See V. 101, p. 1555.

Chicago Telephone Co.—New Stock, &c.—
This company has applied to the Illinois P. U. Commission to issue
\$3,000,000 new stock to provide for extensions and betterments. It is
understood the new stock will be offered to shareholders at par, pro rata,
one share of new stock for each nine shares now held.
The proposition that the company be allowed to purchase the Automatic
Telephone Co. property is pending before the Chicago City Council.—
V. 102, p. 525.

Clinchfield Coal Corporation.—Guaranty.— See Clinchfield Navigation Co. below.—V. 100, p. 903, 2088.

Clinchfield Navigation Co., Inc.—Guaranteed Bonds. Blair & Co. are offering at prices to yield 6% per ann. for the later maturities and 4, 4½, 5, 5½ and 5¾%, respectively, for the first five semi-annual installments, \$1,000,000 First Lien Marine Equipment 6% gold bonds, Series A, of 1916, guaranteed principal and interest by endorsement by Clinch-field Coal Corporation (V. 100, p. 903).

Dated Jan. 1 1916. Interest J. & J. Principal due in 20 semi-annual installments of \$50,000 each, July 1 1916 to Jan. 1 1926 incl., but redeemable in whole or part at 105 and int. Denom. \$1,000 c*. Trustee, Bankers Trust Co., New York.

Data from President Charles E. Bockus, New York, Jan. 1 1916.

Consolidated Mining & Smelting Co. of Canada, Ltd.

-Acquisition—New Stock.—

Formal notice was given on Jan. 25 that under the Canadian Cos. Act the capital stock had been increased from \$7,500,000 to \$15,000,000, par \$100. The shareholders, it is stated, subsequently voted (a) to reduce the par value of the stock from \$100 to \$25, to be exchanged on a basis of 4 shares of new for each share of old stock held, (b) to take over the West Kootenay Power & Light Co., Ltd., of Montreal (V. 101, p. 1971). The Canadian Pacific Ry. owns 11,000 of the 20,000 common and 550 of the 4,000 preference shares of the West Kootenay company, and 26,190 of the 58,052 shares of the Consolidated company.

The company was incorporated in Canada on Jan. 1 1906 and is the owner of a large number of mines in British Columbia. The company has no bonded debt. Officers are: Pres., W. D. Mathews; V.-Pres., George Sumner; Sec., J. Kitto.—V. 89, p. 1413.

Continental (Fire) Insurance Co., N. Y.—Stock Listed. The N. Y. Stock Exchange has listed \$9.619.700 capital stock in shares of \$25 each, and will add a further \$380,300 of said stock on issuance in exchange for outstanding certificates of stock of \$100 par value, making the total amount to be listed \$10,000,000. Compare V. 101, p. 1716; V. 102, p. 70, 156.

Crocker-Wheeler Co.—2% Extra Dividend.—
An extra dividend of 2% has been declared on the common stock, pay able Mar. 1 to holders of record Feb. 18.—V. 100, p. 1590.

Cuba Cane Sugar Corporation.—Pref. Stock Offering. Eugene Meyer Jr. & Co., are offering for public subscription at 97½ and div., to yield 7.18%, 7% cumulative preferred shares of this new merger corporation, convertible share for share into company characteristics. share into common shares at any time at option of holder. Dividends Q.-J. Redeemable at 120 and div. Preferred as to assets and dividends. A circular says in substance:

a conservative estimate of the investment required for a sugar plantation and mill in Cuba is believed to be \$15 per bag of annual capacity. The preferred stock represents almost wholly machinery, expense of clearing and planting, and cash for working capital, the land having been secured at very moderate prices. The large assured earnings of the present year will provide for a material increase in the value of the assets underlying the preferred stock, providing in addition to whatever sums, if any, may be disbursed as dividends on the common stock, a very material amount for additions and betterments.

Men of wide experience and high standing in the sugar industry and also in finance have allied themselves with the new corporation. The principal officers will be: Manuel Rionda, Sr., President; Regino Truffin, Vice-Pres.; Albert Strauss, Vice-Pres.; Alfred Jaretzki, Vice-Pres.; William S. Cox, Sec. and Treas.

A list of the directors of the new corporation and the letter sent by Manuel Rionda to J. & W. Seligman & Co. regarding the merger, were in V. 102, p. 254.

Curtiss Aeroplane & Motor Corporation, N. Y.— Announcement.—The corporation has acquired the services W. Starling Burgess, of the Burgess Co., Marblehead,

of W. Starling Burgess, of the Burgess Co., Marblehead, Mass., and his organization. An authoritative statement says: Under the arrangements for acquiring the services of Mr. Burgess and his organization, the Curtiss Company will become the owner of the stock of the Burgess Company, but the Burgess Company will continue under its present operating organization, and will continue to build those types of aeroplanes, especially those of inherently stable design, which have created its distinctive demand from the Government and private sources in America and abroad, and will also absorb a targe part of the surplus business which the Curtiss Co. cannot handle in its own plants.

W. Starling Burgess will at once become a director of the Curtiss Co. and he and his associates will become actively engaged in the business of the Curtiss Co. This addition to the forces of the Curtiss Co. is of immense importance to the aeroplane industry.

The Burgess Co. has under construction (or just completed) 13 aeroplanes for the U. S. Government, in addition to a number of machines for use of the National Guard or naval militia of the various States. There are also several craft under way for the use of sportsmen, a field in which the Burgess Co. has taken prominent rank. Where one building and six men were possible in the Burgess plant in 1910, now more than a dozer structures and 200 men are kept busy. Mr. Burgess in 1913 secured the sole American rights for the Dunne type of machine, which commends itself to general use, since it is self-balancing and does not depend for equilibrium on the manipulation of controls. Compare V. 102, p. 70, 254.

Defiance (O.) Water Works Co.—Successor Co.—

Defiance (O.) Water Works Co.-Successor Co.-

This company was incorporated Dec. 31 1915 in Ohio with \$150,000 capital to succeed the Defiance Water Co., sold under foreclosure. Incorporators, Julian H. Tyler and others.

Detroit (Mich.) Edison Co.—Stock Listing.—
The N. Y. Stock Exchange has authorized the listing of \$3,354,500 additional capital stock on official notice of issuance in exchange for outstanding convertible debentures, making the total amount authorized to be listed \$17,004,500.—V. 102, p. 440, 525.

Eastern Car Co.—Dividends.—
A dividend of 9% has been declared on the \$750,000 pref. stock, payable Feb. 15 to holders of record Feb. 5. This, it is stated, will cover all arrears on the stock to date.—V. 95, p. 820.

This company's subsidiary, the Public Utilities Co., has applied to the Indiana P. S. Commission for approval of an issue of \$320,000 of stock and \$1,109,000 lst Lien and Refunding bonds, and also for authority to issue additional bonds to retire its underlying bonds, viz.: \$1,200,000 of Evansville Electric Ry. bonds; \$350,000 of Evansville & Princeton Traction Co. bonds; \$1,208,000 Evansville & Southern Indiana Traction C. bonds; \$1,250,000 Evansville & Southern Indiana Traction C. bonds; \$1,250,000 Evansville & Southern Indiana Traction C. bonds; \$1,250,000 Evansville & Southern Indiana Traction C. bonds in 25,250,000 Evansville P. S. Co. bonds. The company seeks to sell the \$1,109,000 bonds for improvements and additions.—V. 96, p. 1301.

General Development Co.-Dividend .-

This company has declared a dividend of \$1.25 on the capital stock, payable Mar. 1 to holders of record Feb. 19. In view of the recent reduction in the par value of the stock from \$100 to \$25, this disbursement is at the rate of \$20 per share annually, as compared with \$12 annually as declared in the last previous quarter.—V. 101, p. 1717.

General Roofing Mfg. Co., East St. Louis.—Pref. Stock.

—Leading banking houses have placed, at 101 and int., the present issue of \$900,000 7% cumulative pref. stock.

Preferred as to assets and dividends and cannot be redeemed by the company. Authorized, \$900,000; outstanding, \$900,000. Dividends Q.-J. Par \$100. Tax-exempt in Illinois and Missouri. Listed on the St. Louis Stock Exchange and will ask to list on the Chicago Stock Exchange

company. Authorized, \$900,000; outstanding, \$900,000. Dividends Q.-J. Par \$100. Tax-exempt in Illinois and Missouri. Listed on the St. Louis Stock Exchange and will ask to list on the Chicago Stock Exchange Digest of Statement by President Geo. M. Brown. East St. Louis, Dec. 10 1915.

Incorporated in Illinois in April 1904. Manufactures a general line of roofing materials, building papers, insulating papers, tarred felt, outdoor paints, &c., &c. We operate three large, up-to-date plants, with modern machinery and equipment, at East St. Louis, Ill., Marseilles, Ill., and York, Pa., a full line of roofing and building papers being manufactured at each plant. We believe we manufacture 30% of the entire roll roofing made in the United States. We estimate that 72% of the roofing in the United States is wood shingles and 24% metal, tile, &c., the remaining 4% being materials similar to that we manufacture. Roll roofing, we believe, is rapidly crowding out some of the other lines. We have spent and charged off over \$1,000,000 for advertising and building up our trade-marks and good-will, and carry this item on our books to-day at \$1, although we believe it to be of great value.

Capitalisation—

Bonds (\$222,000 paid at maturity an 1 canceled). \$790,000 x*\$558,000 country in the world, the "Certain-teed" trade-mark being universally known. Our increased business this year has not been due to war orders. The management is in the hands of experienced men, and the common stock is largely held by those engaged in the business.

The pref. stock is offered by John Burnham & Co., Counselman & Co. and Curtis & Sanger, all at Chicago, and by A. G. Edwards & Sons at St. L.

Great Western Power Co .- Application of Proceeds of

Recent Debenture Issue .-The California RR. Commission on Jan. 18 authorized this company to spend the proceeds of the \$5,000,000 10-year 6% convertible gold debentures recently sold, as follows: (a) To buy \$4,998,000 face value of the capital stock of the City Electric Co., but the purchase price to be applied only as the Commission shall authorize; (b) to buy from the Western Power Co., at not over 90, \$849,000 1st M. 5% 40-year sinking fund gold bonds of the Great Western Power Co. and \$1,050,000 1st M. 5% 30-year sinking fund gold bonds of the City Electric Co. Pres. Mortimer Fleishhacker testified that the change in the original clan was found necessary on account of the complex nature of the interelationship of the old subsidiary corporations, that it really amounted to nothing more than a change in bookkeeping and that all of the money would be used for betterm'ts and extensions.—V.101, p.2147; V.102, p.440.

Guggenheim Exploration Co.—Shareholders to Receive in Liquidation, About April 15, \$12 Cash, per Share and for Four Shares one of Yukon-Alaska (Liquidating) Trust.—The shareholders will vote Mar. 9 on completing the liquidation and on ratifying the creati on of the "Yukon-Alaska Trust," to manage and gradually dispose of the non-liquid assets and to settle contingent and other indebtedness.

to manage and gradually dispose of the non-liquid assets and to settle contingent and other indebtedness.

Digest of Letter from Pres. Daniel Guggenheim, N. V.. Feb. 4 1916.

More than 90% of the stockholders have expressed a desire for complete liquidation. After making the recent distribution there remain:

(1) Cash and demand loans amounting approximately to \$11,000,000.

(2) Upwards of 2,800,000 shares of stock of Yukon Gold Co., out of a total of 3,500,000 shares.

(3) Demands against the Yukon Gold Co. (see that company below) aggregating \$5,000,000, covering advances and the purchase price of the Gold Run property, secured by its eight 5% serial promissory notes, each for \$625,000, dated Feb. 1 1916 and due, respectively, in 1, 2, 3, 4, 5, 6, 7 and 8 years from that date, with interest payable semi-annually.

(4) 500 shares pref. stock, Series A, of American Smelters Securities Co. (5) Various causes of action and miscellaneous mining property rights, contracts and interests of uncertain or speculative value.

(6) Office furniture, equipment and fixtures.

The sale of the assets not included in the cash and the demand loans in the open market, or a distribution among the stockholders, would unquestionably result in a great shrinkage in values. Your directors have therefore caused to be executed a deed of trust assigning to William Loeb Jr., Charles K. Lipman, Charles Earl and Roger W. Straus, as trustees, of what has been termed the Yukon-Alaska Trust, the property, property rights and securities referred to in the foregoing sub-divisions 2 to 6, both inclusive, and \$1,000,000 of the cash referred to in sub-division 1, that sum being required to meet the actual and contingent liabilities of the company and to facilitate the operation of the trust. The trustees are to exercise full control and management of the trust fund, voting all shares of the shares and other assets.

The trustees have issued to this company, in consideration of the foregoing transfer, the entire 208,433 shares of beneficial interest

Habirshaw Electric Cable Co., Inc., N. Y.—Merger.—
This company was incorporated at Albany, N. Y., on Jan. 26
1916 with \$925,000 of auth. capital stock, in \$100 shares,
\$600,000 being com. stock and \$325,000 7% cum. non-voting
pref. stock, and thereupon authorized an issue of \$200,000
1st M. 6% serial gold bonds dated Feb 1 1916. On Feb. 1
the new corporation took over the properties of the Habirshaw Wire Co. of Yonkers, N. Y., the wire and cable department of the Waterbury (rope) Co. of Brooklyn, N. Y., and
important contracts for supplying wire to the various Edison
companies and several transportation companies of N. Y.
City. The Electric Cable Co. of Bridgeport, Conn., a company with \$1,000,000 of auth. capital stock, has, without
change in its own organization, acquired a controlling interest
in the stock through ownership of 3,001 com. shares and
guarantees the interest on the bonds and the dividends on
the pref. stock. Further particulars follow: the pref. stock. Further particulars follow:

the pref. stock. Further particulars follow:

All the common stock and \$242,600 pref. stock is outstanding. The pref. has voting power only in case two years' dividends are in default. The bonds will mature in eight installments of \$21,000 to \$31,000 each, in 1920, 1923, 1926, 1928, 1930, 1932, 1934 and 1936, but are subject to call at 105 and int. at any interest date in blocks of \$25,000 or multiples. Denom. \$1,000. Int. F. & A. at Empire Trust Co., N. Y., trustee.

An authoritative statement adds: Besides having a strong banking connection, it will be backed by practically the same interests which controlled the acquired properties. The Habirshaw Wire Co. was owned by the J. P. Morgan and John W. Sterling interests, and the Waterbury Co. by Harry Payne Whitney. By this consolidation of wire interests whose annual output has a value of between \$4,000,000 and \$5,000,000, the Electric Cable Co. will be in a position to take care of orders for every form of insulated wire and cable. No one of the three companies affected manufactures all kinds of insulated wire and cable, and for that reason it was necessary in the past in many cases to split large orders, involving some confusion and loss of business. A feature, however, of more significance is attached to the central management of the properties by the Electric Cable Co. Expenses will thereby be reduced and larger earnings should result. The officers of the new company are: Pres., Edwin W. Moore, of the Electric Cable Co.; V.-Pres. & Treas., J. Nelson Shreve, of the Electric Cable Co.; Sec., G. F. Waterbury. Directors: R. S. Satterlee, Cortland Betts, J. Nelson Shreve, Thomas C. Perkins, G. F. Waterbury and Edwin W. Moore.

Armstrong & Keith, attorneys, 40 Wall St., effected the combination and will act as counsel to the new company.

Harmony Mills, Cohoes, N. Y., and Boston.—Stock Inc.
The shareholders voted on Feb. 8 to increase the 7% cum. pref. stock
from \$1,500,000 to \$2,250,000 (see V. 102, p. 525); also to pay on Feb. 15
all accumulated pref. dividends amounting to 154%. The balance sheet
of Jan. 1 1916 and the net earnings for the cal. year were in V. 102, p. 525.

(The) Hartman Corporation, Chicago.—Stock All Sold.
—Hallgarten & Co. announce that all of the stock of the Hartman Corporation acquired by that firm has been sold. The company has authorized and outstanding \$12,000,000 capital stock, all of one class, in shares of \$100 each, and it owns all of the capital stock of the Hartman Furniture & Carpet Co. of Chicago and its affiliated companies, conducting a mail order and retail business in the Middle West. The ing a mail order and retail business in the Middle West. net profits for the year ended Dec. 31 last amounted to \$1,net profits for the year ended Dec. 31 last amounted to \$1,-256,775, as against \$854,499 in the previous year. Net assets as reported amount to over \$7,000,000, each share of stock of the Hartman Corporation having, it is stated, a net asset value, exclusively of good-will, &c., of over \$58 and a net current asset value of over \$51 50. See adv. on another page and further particulars in V. 101, p. 2147.

Herring-Hall-Marvin Safe Co.—Deferred Dividends.— On Jan. 27 1916 the company paid 7% on its \$400,000 pref. stock, covering the deferred divs. of April 1 and Oct. 1 1914 (not 1915).

This company has petitioned the Indiana P. U. Commission for approval of a merger whereby it will become sole owner of rights, properties, franchises, &c., of the New Telephone Co. (V. 88, p. 235) and the New Long Distance Telephone Co. (V. 90, p. 450), both of Ind. The plan is to issue \$1,900.000 of pref. stock and \$1,150.000 common, with which to take up and cancel (a) \$870.000 of the stock of the New Long Distance Co.; (b) \$400,000 of the stock of the New Long Distance Co.; (c) \$600,100 of the pref. stock of the Indianapolis Telephone Co. now outstanding; (d) \$400,000 of the common stock outstanding; (e) \$299,500 ist M. bonds of the Long Distance Co.; (f) \$44,000 ist M. bonds of the New Telephone Co., and (g) \$150,000 3d M. bonds. Total of stocks and bonds of \$2,763,600, together with \$400,000 in cash, aggregating \$3,163,300, and to assume the additional \$1,556,500 outstanding bonds of the two merging companies.

It is reported that the board of directors will be reorganized, and William Fortune of Indianapolis will be Pres. and Samuel G. McMeen of Columbus, O., a V.-Pres. The board of directors will consist of 15 members. It is said relations between the consolidated company and the Ohio State Telephone Co. will be close. Plans dating from 1911 to merge the Central Union Telephone Co. with the Indianapolis Co. have been dropped, due to the impossibility of effecting a consolidation with rates agreeable to the public.—V. 95, p. 1211.

International Mercantile Marine Co., N. Y.—Pref. and

International Mercantile Marine Co., N. Y.—Pref. and Common Stockholders Fail to Agree—Pref. Stock Committee Propose to Formulate Plan Independently.—It was announced on Monday that the committees representing respectively the pref. and common stocks had found it impossible to agree on a plan of reorganization, and that the pref. stock committee had therefore decided to proceed independently with the preparation of a plan involving the retirement of the present bonds. At the end of the negotiations, it is said, the pref. stock committee took the position that they could not allow the common stock in the reorganization to have more than a one-ninth interest, a proposal which the common stock committee consider impossible of consideration. stock committee consider impossible of consideration.

Statement by Pref. Stock Committee, James N. Wallace, Chairman. At the time of the formation of the committee, the holders of preferred stock were threatened with the practical extinction of their interest through the consummation of the reorganization plan which had been promulgated in the interests of the holders of the outstanding bonds. The danger of the consummation of that plan has passed, as the preferred stockholders have united for the protection of their interests by depositing with the committee over 83% in amount of the outstanding preferred stock, and as the investigation made by the accountants for the committee demonstrates that the properties have a value largely in excess of the amount of the outstanding bonds, the committee is in a position effectively to protect the interests of the preferred stockholders.

In view of the early maturity of the outstanding bonds, the validity of which has not been questioned, the committee deemed it advisable, in view of present financial conditions, to formulate a plan of reorganization involving the retirement of the existing bonds. In formulating such a plan of reorganization, your committee has been met with demands for recognition on behalf of the common stock, in no wise based on any valuation of property, and of such magnitude that in justice to the holders of the preferred stock (with accumulated dividends thereon amounting to 89% on April 1 1916), it was impossible to accode thereto, notwithstanding your committee was desirous of recognizing and liberally treating any potential or prospective value in the common stock.

In order that the rights of the various interests may be determined, your committee will endeavor to have the legal questions involved in the foreclosure suit speedily littigated and determined. If the pending proceedings result in a determination that the bonds are not due and a restoration of the property to the possession of the Marine Company, the present large earnings should give to the holders of preferred stock reasonable expec Statement by Pref. Stock Committee, James N. Wallace, Chairman.

ferred stockholders.

Statement by John W. Platten, Chairman Common Stk. Committee. I confirm the press reports of the last two or three days of the serious differences between the views of the two committees. The position of the Common Stockholders' Committee is stated in my letter of Feb. 3 1916 to the Preferred Stockholders' Committee, from which I quote as follows:

"The company is now in a position to pay its debts and this should be done forthwith and the property returned to the company and put under the control of its stockholders without change in the status of the stock. We shall be very glad to co-operate with you for the purpose of arranging the payment of the debts and securing the prompt teturn of the property. When this has been completed, we shall be pleased to take up with you the question of the adjustment between the two classes of stockholders."

If the property is so restored, it will be returned to the company under the control of the stockholders without change in the status of the stock.

The restoration of the property to the company would leave an important point on which we still differ with the Preferred Stockholders' Committee, namely, the continuation of the existing bonded debt to its full amount. This, we think, in view of its amount and early maturity (1922), would be a mistake. The Preferred Stockholders' Committee's last proposed reorganization plan, now abandoned, provided for the reduction and refunding of this indebtedness; such proposed treatment of the debt was the one feature of that plan which had our approval. The former and wiser counsel should prevail, and the present large current earnings should be devoted to the reduction of the bonded debt rather than to the payment of dividends in arrears, and in such reduction and refunding of the bonded debt we are ready to co-operate.

The lavestigations of both stockholders' committees lead them to the

rears, and in such reduction and recommendation of the co-operate.

The investigations of both stockholders' committees lead them to the same conclusion, i. e., that there ought to be no foreclosure, but that the property should be restored to the company and the debt refunded, using the present cash in the treasury to reduce the amount, but they have been

unable to reach an agreement as to the ratio of distribution of securities be tween the two classes of stock under a reorganization plan. The course to be pursued seems clear, namely, to reduce the debt to a point at which it ceases to be a menace to all securities holders and leave the two classes of stock undisturbed.—V. 102, p. 526, 348.

Interstate Electric Corporation, N. Y.—Purchase, &c.
This company on Feb. 1 1916 purchased the Ballinger Electric Light &
Power Co., which serves the city of Ballinger and adjacent territory with
electricity for domestic, commercial and power purposes. The Interstate
Electric Corporation is erecting a high-tension transmission line from its
present generating station at San Angelo to Ballinger and Winters, Texas,
which will also serve the intervening territories.
The Interstate Electric Corporation for the 12 mos. ending Sept. 30 1915
reports gross earnings of \$520,118; operating expenses, \$311,523; net earnings, after the payment of taxes, \$208,595.—V. 102, p. 71.

Kaufmann Department Stores, Inc.—Stock Decrease.—
The shareholders will vote Feb. 21 on decreasing the capital stock from \$9.800,000, consisting of \$2,300,000 pref. and \$7,500,000 common, to \$9.700,000, by reducing the pref. stock issue to \$2,200,000, a further \$100,000 thereof having been retired by the sinking fund.—V. 100, p. 980.

Kings County Electric Light & Power Co., Brooklyn. Report.—For cal years, incl. Ed. Ill. Co. of Brooklyn: Cal. Total Net, after Other Bond Fixed Dividends Balance, Year. Income. Tax., &c. Inc. As to orders, see also "Trade and Traffic Movements" in V. 101, p. 2075.
Vice-President Taylor, commenting on the abandonment of merger negotiations with the Cambria Steel Co. and the Youngstown Sheet & Tube Co., states: "The Lackawanna people entered upon these negotiations several months ago in the belief that the merger would be of benefit to the stockholders. While the negotiations were pending, however, the cambany's business has greatly increased and the officers have been of opinion for some time that more advantageous arrangements than those originally ontemplated should be undertaken, if possible. For this reason we are pleased at the breaking off of the negotiations."

[The merger price for the stock, it is said, was to have been \$90 per share, par \$100. The company is reported to have orders booked to full Espacity for the balance of the year.—V. 101, p. 2075.

Lee Rubber & Tire Comporation (of N. V.) Gonshounders.

Lee Rubber & Tire Corporation (of N. Y.), Consho-

hocken, Pa.—Listed.—
The N. Y. Stock Exchange has listed temporary certificates for the 100,000 shares of capital stock, without nominal or par value, the same to be replaced later by permanent engraved certificates. Compare V. 101, p. 1977. 2148.

Lindsay Light Co.—Common Dividend Increased.—
A quarterly dividend of 2% has been declared on the common stock, payable Feb. 29 to holders of record Feb. 19. This compares with 1% in Nov. and ½ of 1% in Aug. See V. 101, p. 1555.

Los Angeles Union Terminal Co.—Bonds Taken.—
E. H. Rollins & Sons and the Anglo-London-Paris National Bank of San Francisco have taken the company's \$3,250,000 1st M. 6% bonds. This project is similar to the Bush Terminals.

Louisville Gas & Electric Co.—Bonds Sold.—Harris, Forbes & Co., N. Y., and Harris Trust & Savings Bank, Chicago, have sold at 101¼ and int. an additional \$500,000 First & Ref. M. 5-year 6% bonds dated July 1 1913. (Fully described in V. 97, p. 54.) The amount outstanding including the present issue is \$9,000,000.—V. 101, p. 2148, 1811.

Merchants & Miners Transportation Co., Baltimore

Merchants & Miners Transportation Co., Baltimore.

—Bonds.—The new 25-year 1st M. sinking fund 6% gold bonds offered by a syndicate headed by the Mercantile Trust & Deposit Co. at 101 and int. were heavily over-subscribed.

Data from Pres. J. H. Jenkins, Baltimore. Jan. 4 1916.

Organization.—The company has been in continuous operation since 1854 and occupies a foremost place in the freight and passenger steamship traffic of the Atlantic seaboard. Its fleet of 21 steamers, aggregating about 57,000 gross tonnage, maintains frequent and regular service between Baltimore, Philadelphia. Norfolk, Newport News, Jacksonville, Savannah, Boston and Providence. Value of company's property: Floating equipment, \$3,694,865; terminal, wharf and other properties, \$3,229,312; excess of working assets over working liabilities, \$452,462; total, \$7,376,639.

Capitalization—Stock and Bonds.

Mexican Telephone & Telegraph Co.—Bonds.—
The committee consisting of Charles E. Rogerson, James A. Parker and E. Elmer Foye, which last summer invited deposits of the two issues of bonds of the company, have extended the time for deposit to Feb. 29. The committee state that concerted action is desirable for the protection of bondholders.—V. 101, p. 611, 617.

Michigan Light Co.—Bonds Sold.—Hodenpyl, Hardy & Co. and associates have sold \$1,125,000 First and Refunding Mortgage 5% 30-year gold bonds, dated Mar. 1 i916 and due Mar. 1 1946, but redeemable at 105 and int. on any interest date on 30 days' notice. Denom. \$1,000, \$500 and \$100. Interest M. & S. Union Trust Co., Detroit, Mich. trustee. A circular shows: Mich., trustee. A circular shows:

Mich., trustee. A circular shows:

Capitalization approved by the Michigan RR. Commission (a) bonds: first and refunding 5s (this issue), \$1,125,000; reserved to retire outstanding bonds, \$1,959,000, viz.: Jackson Gas Co. 1st 5s due 1937, \$350,000; Kalamazoo Gas Co. 1st 5s due 1920, \$400,000; Bay City Gas Co. 1st 5s due 1920, \$500,000; Filint Gas Co. 1st 5s due 1924, \$500,000; Oon that Light Co. 1st 5s due 1927, \$209,000; b) pref. stock, \$2,350,000; c) com. stock, \$3,153,100. These bonds are secured by an absolute first lien on properties of the company situated in the cities of Saginaw and Manistee, Michigan, and by a lien on the properties of the company situated in Jackson, Kalamazoo, Bay City, Flint and Pontiac, subject only to \$1,959,000 bonds outstanding. Reproduction value of physical properties as appraised on behalf of Michigan RR. Commission is in excess of outstanding bonds and pref. stock. The earning capacity of the company is thoroughly established, and for the calendar year 1915 net earnings available for interest charges were approximately four times the amount required on all bonds outstanding. Value of preferred and common stocks shows an equity of more than \$5,000,000 in excess of total amount of bonds outstanding.

Midwals Steel & Ordnance Co. New York.

Midvale Steel & Ordnance Co., New York.—Merger.— It was learned on Monday that the negotiations for the combination of the Cambria Steel Co., the Lackawanna Steel Co. and the Youngstown Sheet & Tube Co. had been abandoned, and that other negotiations had been practically completed looking to the sale of the control of the Cambria Steel Co. at \$81 per share to Midvale Steel & Ordnance Co.

The Cambria Steel Co. has outstanding \$45,000,000 stock in \$50 shares, and \$3,000,000 6% notes due Oct. 1 1917, but no bonds other than some \$3.559,000 1st M. 5% bonds of Manufacturers' Water Co.—guaranteed.

\$3.559,000 1st M. 5% bonds of Manufacturers' Water Co.—guaranteed.

On Wednesday, Feb. 9, it was announced officially at the office of President William E. Corey in N. Y. City that the Midvale Steel & Ordnance Co. would buy at \$81 a share all stock of the Cambria Steel Co. that may be offered at the office of Drexel & Co. in Philadelphia till and including Feb. 18, under a contract entered into with E. T. Stotesbury of Drexel & Co., W. H. Donner, President of the Cambria company, and J. L. Replogle, head of a syndicate controlling 350,000 shares of Cambria stock.

This purchase will be financed as follows:

(1) The Midvale Steel & Ordnance Co. will issue and sell to the Guaranty Trust Co., National City Bank and Lee, Higginson & Co., \$50,000,000 of its 20-year 5% collateral trust sinking fund bonds, convertible into stock at any time at \$100 a share.

at \$100 a share. (2) The company will offer to shareholders, at \$60 a share, its \$25,000,000 of treasury stock, one share of new for three of the old present stock (\$75,000,000 outstanding). This

of the old present stock (\$75,000,000 outstanding). This offer already has been underwritten by a strong banking syndicate, which will be managed by A. Barton Hepburn, Frank A. Vanderlip and Charles H. Sabin.

"Financial America" on Feb. 9 reported:

Those who are familiar with affairs of the Midvale contend that the company, through the purchase of the Cambria, is now a well-rounded-out concern and is assured of substantial earnings even after the war is over. Its orders now are sufficient to keep all its plants working at capacity for the remainder of the current year, while the same may be said regarding the Cambria company.

Earnings of the company are known to be large and friends of the property maintain that within a reasonable time substantial dividends will be paid. On the basis of \$95,000,000 of stock outstanding, the company, it is maintained, should show a large percentage earned after payment of 5% interest on the \$50,000,000 of bonds. It will require \$2,500,000 a year interest for bonds and it is asserted by those familiar with the situation that the Cambria alone this year will show enough net to pay the interest and show considerably over 10% on the \$95,000,000 of stock. It is apparent, therefore, that the company enjoys a comfortable position in the iron and steel world.—V. 102, p. 256.

Montgomery Ward & Co. Chicago.—Report — Dividend

Montgomery Ward & Co., Chicago.—Report.—Dividend.

The annual report on a preceding page of this issue shows the payment of a dividend of \$3 per share on the common stock out of the surplus of Dec. 31 1914 (not 1915), understood to be Dividend No. 1. Action on a further dividend on common stock will be taken about Feb. 21. The stock is all closely held.—V. 100, p. 551.

New England Cotton Yarn Co.—Proposals.—
In accordance with the plan outlined in V. 102, p. 256, the New England Trust Co. was prepared to receive sealed proposals up to noon Feb. 10 for the sale of 1st M. 5% gold bonds due Aug. 1 1929 in an amount sufficient to take up \$750,068.—V. 102, p. 526.

Rome (N. Y.) Brass & Copper Co.—Gwynne Brothers in a circular dated December 1915 say in substance:

Organized in 1866 as the Rome Iron Co.; capital, \$100,000, was increased in 1870 to \$300,000 by a 100% stock dividend and sale to stockholders of \$100,000. In 1907 absorbed Rome Metal Co. by issuing \$400,000 bonds, which it has been buying back "as fast as they are offered." In 1910 the capital was increased by a stock dividend of 300%, by exchange of \$200,000 for stock of Rome Tube Co. and the stockholders subscribed for \$200,000 new stock at par, making the present capitalization \$1,600,000. Company manufactures brass and copper plates, wire, rods, tube, &c., and operates a smelting and refining department, foundries, brass machine shop, rolling mill and tinning and brazing departments. Dividends aggregating 462% have been paid since 1893, as follows:

1893. "94-"95. "96." '97. "93." '99. '00."01-"02. "03-"07. "08-"09. '11-"15

Sapulpa Refining Co.—Div. Increased.—New Stock.—
A monthly dividend of 1½% has been declared on the stock, payable
Mar. 1 to holders of record Feb. 20, an increase of ½%. See V.101,p.1719.
Common and pref. stockholders of record Feb. 19, it is said, will have the
right to subscribe for \$250,000 new common shares at \$9 per share to the
extent of 1 new share for every 3 shares held. Of the proceeds some \$200,000, it is stated, will be used to retire a like amount of 6% bonds and the
remainder as additional working capital. About \$200,000 preferred is still
outstanding, but it is thought may soon be conv. into com.—V.101,p.1719.

Sears, Roebuck & Co., Chicago.—Common Stock.—
In the balance sheet as of Dec. 31 1915, as published in last week's 'Chronicle," the common stock appeared as \$68,000,000, the correct mount being \$60,000,000.—V. 102, p. 527, 519.

Southern California Edison Co.—Valuation, &c.—
Hearings are in progress before the Calif. RR. Commission in regard to
the proceedings of the City of Los Angeles to acquire the distributing
system of the company in order that the city may utilize the power from its
aqueduct water supply. Various reports as to the valuation of the contested properties have been submitted by the city, by the company and by
the Commission's engineers:

**Report on Valuation by—

Gity Company Commission**

\$2,500,000 of its 6% debentures. Compare V. 100, p. 1758.]—V.102,p.527.

Southern Counties Gas Co. of Cal.—Purchase.—

President F. R. Bain and Eastern capitalists associated with him on Jan. 26 made the initial payment on account of their purchase, subject to the approval of the Cal. RR. Commission, of the gas properties of the Southern California Edison Co. at Pomona, Long Beach, Venice, Santa Monica, San Ped.o, San Dimas, Lordsburg, Ocean Park and Clairmont, Cal. Press reports from San Francisco state that steps will be taken immediately to develop the present \$2,000,000 company into a \$10,000,000 corporation to embrace its old and new holdings in the Southwest. The purchase includes the property of the Long Beach Consolidated Gas Co. See Southern California Edison Co. in V. 102, p. 527.

A resolution has been adopted by the board of directors authorizing an increase in common stock from \$500,000 to \$2,500,000 par value.—V. 100, p. 1836.

Springfield (Mass.) Body Corporation.—Pref. Stock.—Renskorf, Lyon & Co., New York, have sold at par (\$100 a share) and divs. the unsold portion of the present issue of \$750,000 preferred stock, entitled to 8% cum. pref. dividends, profit-sharing after common has received 4%, and redeemable at \$200 at option of co. The bankers report:

deemable at \$200 at option of co. The bankers report:

Organized in N. Y. State on Jan. 22 1916 with \$1,000,000 authorized pref. stock and \$1,500,000 common stock (par \$100) to take over the business of the Springfield Metal Body Co., a Massachusetts corporation.

Data from Letter Addressed to the Bankers by Pres. Walter Fry. The Springfield convertible bodies are the natural result of a universal public desire for a convertible body which combines the beauty, comfort and utility of both the limousine and touring car without sacrificing any of the advantages of either—easily adaptable at any time, any place, instantly. Convertible bodies were designed and developed for the Springfield Metal Body Co., the first and original manufacturers of metal bodies in the world. Recognizing the demand for the Springfield convertible bodies, the following leading automobile manufacturers have placed large orders, adopting them as regular equipment: Chandler, Studebaker, Paige-Deroit, Maxwell, Overland, King and Abbott. Our present plant is located at Springfield, Overland, King and Abbott. Our present plant is located at Springfield, Overland, in the production is being put on the basis of an output of 50 bodies per day, 15,000 a year, which should show a conservative profit of about \$785,000. Appreciating that Detroit is the center of the automobile in instry, we have arranged to establish a plant in that city, and purpose to attain an output of 60,000 bodies a year.

Assets \$2,250,000 Offsetting \$750,000 Pref. Stock and \$1,500,000 Common.

Assets \$2,250,00,0 Offsetting \$750,000 Pref. Stock and \$1,500,000 Comm

Springfield (Ohio) Light, Heat & Power Co.—
The Ohio P. U. Commission has authorized the Springfield Light, Heat & Power Co. to Issue \$181,000 of its 20-year 5% Gen. & Ref. M. bonds and \$100,000 of its 6% pref. stock. Sale of \$150,000 of bonds and all of the capital stock will relimburse the company \$220,000 for capital expenditures up to Sept. 30 1915. The proceeds from the remaining \$31,000 will reimburse the company for the amount paid from income into the sinking fund under the provisions of its first mortgage.—V. 100, p. 1923.

Submarine Boat Corporation.—Sub. Co. Earnings.—
See "Annual Reports" on previous page.—V. 101, p. 1979.

Sun Life Assurance Co. of Canada.—No Merger.—
The Canadian Superintendent of Insurance having objected to the proposed absorption of the Manufacturers' Life Insurance Co. on the ground that its policy holders do not need reassurance, their company being strong and prosperous, the two interests have decided to drop all negotiations.— V. 101, p. 2149.

Swift & Co., Chicago.—Bond Offering.—The First Trust & Savings Bank, Chicago, is offering at 97½ and int. an additional block of 1st M. 30-year sinking fund 5% gold bonds of 1914. Due July 1 1944. Authorized, \$50,000,000; outstanding, \$29,450,000. Compare previous offering, V. 100, p. 647; V. 101, p. 698.—V. 102, p. 350.

United Cigar Stores Co.—Par Value—Change to \$100.—
The stockholders will vote on Mar. 3 on changing the par value of the shares from \$10 to \$100. On Aug. 14 1914 the par value of the stock was reduced from \$100 to \$10 (V. 99, p. 124), but it has been found unsatisfactory to deal in the shares on the \$10 basis, which accounts for the contemplated change.—V. 101, p. 1556.

United Dry Goods Co.—Plan.—Cornelius N. Bliss Jr. Chairman of the reorganization committee of the Associated Merchants and United Dry Goods companies, urges stock-

Merchants and United Dry Goods companies, urges stockholders who have not yet deposited their stock under the plan (V. 102, p. 72, 64) to do so immediately. The time for deposits will expire Feb. 15. A circular says in substance:

A majority of each class of stock has already been deposited and large amounts either owned in Europe or held here for foreign account are promised for deposit as soon as the necessary formalities can be complied with. No dividends can be paid under the present condition of each company until the impairment of capital assets has been made up, which would inevitably take many years. The deposit of stock is essential if the plan is to be consummated.—V. 102, p. 72.

United Drug Co., Inc.—Merger Effected.—This company was incorporated at Albany, N. Y., on Feb. 7, with \$53,-100,000 authorized capital stock, to carry out the plan for the merger of the United Drug Co. of Boston and the Riker & Hegeman Co., of New York. On Feb. 5 the Riker & Hegeman Co. stockholders voted their approval of the plan.

Capitalization of New Company-Par. Authorized. Outstand'g. \$100 \$35,000,000 \$20,050,000 50 7.500,000 5,086,350 100 10,600,000 9,109,000

United States Smelting, Refining & Mining Co., Boston.—Convertible Notes Sold.—Lee, Higginson & Co., Hornblower & Weeks and the First National Bank (of Boston) on Tuesday Feb. 8 offered for subscription at 103½ and int., \$12,000,000 10-year 6% Convertible Gold Notes. dated Feb. 1 1916 and due Feb. 1 1926. The issue was largely over-

Convertible at any time, at the option of the holder, into common stock of the company on the basis of \$75 in notes for each share (par \$50). Callable as a whole at 110 and int. on any int. date upon 60 days' notice, but if so called may be converted at any time prior to the date of payment. Denom. \$500 and \$1,000 (c*). Int. payable F. & A., in Boston and N. Y. Capitalization (When This Financing Is Completed)-Other Official Data.

Common stock. 17,553,837

Proceeds of these notes, together with other funds on hand, will retire the existing \$4,000,000 5% notes of this company and the \$10,000,000 Utah Co. 6% notes, guaranteed by this company, to be called for redemption on June 1 and April 1 1916, respectively, thus reducing the funded and guaranteed debt by \$2,000.000.

The company has no mortgage debt, and (except in the case of the Utah Co.) there is no mortgage debt on the properties of any of the subsidiary corporations in which the company owns a majority of the stock. No mortgage may be made by the company, without equally securing these notes, and none may be made upon any of the properties of its subsidiary companies except on the coal properties controlled by the Utah Co. and on the Utah Railway.

Net earnings in 1915, applicable to interest charges, were about \$7,400,000, or over ten times interest on these \$12,000,000 notes. This was after deducting nearly \$800,000 for depreciation, improvements and exploration. After paying 7% on \$24,313,725 pref. stock, these earnings were equal to about \$14 per share (28%) on the common stock. For several months past the earnings have been at the rate of about \$25 per share (50%).

Present market value of the company's pref. and com. stock, representing the equity above these notes, is more than \$44,000,000, or 3½ times the amount of these notes. Present rate of dividends 7% on pref., 6% on com.—V. 102, p. 443.

United States Steel Corporation.—Orders Jan. 31.—See "Trade and Traffic" on a previous page.—V. 102, p. 443, 350.

West Kootenay Power & Light Co., Ltd.—Acquired. See Consolidated Mining & Smelting Co. above.

Winchester Repeating Arms Co.—Report, Etc.—
Contrary to expectations, the company has undertaken no new plan of financing. At the annual meeting Feb. 9 the directors were authorized to issue securities at their discretion to provide for future contingencies. No stock or cash dividend was declared. Stockholders were informed that 1915 earnings were gratifying, but the company was compelled to borrow \$8,250,000 to provide for expansion of business.

The "Wall Street Journal" on Feb. 10 published the following, showing for the year ended Feb. 5 1916, gross business of \$20,309,089 (an increase of \$7,983,115 over previous year), divided approximately as follows: Domestic business, \$1,500,000, and was business, \$8,500,000.

Yukon Gold Co., N. Y .- Status-Outlook .- O. B. Perry Consulting Engineer and Gen. Mgr., in letter addressed to the President and directors New York, Feb. 1, says in subst.:

Consulting Engineer and Gen. Mgr., in letter addressed to the President and directors New York, Feb. 1, says in subst.:

The company now owns dredging and hydraulic mines located near Dawson, Yukon Territory; dredgint properties in the Iditarod and Ruby districts in Alaska; and on the Feather River, Butte Creek, and American River in California. It has also 11 dredges, with power plants and other equipment; a 70-mile ditch system and complete hydraulic plant.

The company has for several years past adopted the policy of purchasing new properties to add to its holdings and replace its older mines as they eventually become worked out. During the last two years it has thus acquired gold dredging properties in Alaska and California which, it is estimated, will yield over \$3,000,000 of net profits. In the acquisition of new properties, particularly in Alaska and Yukon Territory, the company has the advantage of a trained staff of men who are experts in the investigation, equipment and operation of such properties.

The company now owes \$1,375,000 to the Guggenheim Exploration Co. for advances made for working capital, additional equipment and other purposes. The Exploration Company owns adjacent to your holdings a series of contiguous claims on Gold Run, in the Klondike District, with equipment consisting of two 7½ cu. ft. bucket dredges. This desirable property can be purchased for \$\$93,000, and I recommend its acquisition.

If our present policy is to be continued and the properties operated to the best advantage, it is necessary that the company shall have \$2,732,000 additional working capital with which to purchase and equip new properties, complete such equipment as is now under way, and for other corporate purposes. This sum, together with the present debt to the Guggenheim Exploration Co. and the purchase price of the Gold Run property and equipment, will aggregate, including all floating debt, \$5,000,000. This indebtedness it is now proposed shall be funded by the issuance of eight serial promisory notes cov

CURRENT NOTICE.

—A maturity booklet has been gotten out by the Mercantile Trust Co. of St. Louis, embodying a complete statement of the maturities and interest payments coming due between Jan. 1 and Dec. 31 1916, on all first mortgage real estate notes issued by the company under its plan of dividing the principal into notes of the denominations of \$500 and \$1,000 each.

It is set out that the purpose of the book is threefold:
"1. It is of especial interest to those who have purchased first mortgage real estate notes from us;

"2. It will act as a ready reference to the makers of these mortgages;
"3. Prospective investors will find in it a convincing argument that first mortgage real estate notes, such as we offer, are a superior form of investment."

The book contains a list of about 169 outstanding first mortgage re estate note issues. In addition to the specific date of the maturities of the respective issues and the due dates of the coupons, the statement indicates what payments, if any, have been made on the total amount borrowed on any particular property. The company points out that no investor has ever lost one dollar, principal or interest, in such investments. The Mercantile Trust is a member of the Federal Reserve system.

—Barclay, Moore & Co. of 123-125 South Broad St., Philadelphia, members of the New York and Philadelphia Stock Exchanges, are distributing the eighth edition of their book entitled "Pennsylvania Tax-Free Bonds, Classified." Included in this edition are listed the various underlying bonds of the New York Central System which have become free of tax in Pennsylvania, through the consolidation of the Lake Shore & Michigan Southern with the New York Central.

—Colgate, Parker & Co., Robert Winthrop & Co. and Freeman & Co. of this city are jointly advertising and offering \$1,488,000 Morris & Essex Railroad Co. first refunding mortgage 3½% bonds, due Dec. 21, year 2000, at 87½ and interest. The principal and interest of these bonds are unconditionally guaranteed by the D. L. & W. RR. Co. and are tax-exempt in New Jersey. The bankers have been advised that the bonds are a legal savings bank investment in New York, New Jersey, Connecticut and Rhode Island.

—The financial advertising service firm of Russell Law, at 52 Broadway, this city, have reprinted the speech delivered by Frank A. Vanderlip, President of the National City Bank, on "Some Elements of National Trade Policy," at the National Trade Convention in New Orleans Jan. 28. This address on financial and trade preparedness will be mailed to interested inquirers by Russell Law.

—Frank M. Brown, for many years resident partner of Torrance, Marshall & Co. of Los Angeles and San Francisco, announces that he has taken over the San Francisco business of that company and will hereafter continue it at the same address as heretofore, 300 Sansome St., under the firm name of F. M. Brown & Co. The firm will deal in municipal and corporation bonds.

—W. H. Humphrey announces his withdrawal from the firm of Wells, Humphrey, Nicol & Ford of Detroit. He will carry on a similar business under the name of W. H. Humphrey & Co., Penobscot Building, Detroit. The concern will buy and sell high-class municipal and corporation bonds. and will also carry on a general brokerage business in listed and unlisted securities

-Alfred H. Ebert of Alfred H. Ebert & Co. and Horace P. Michaelis, —Alfred H. Ebert of Alfred H. Ebert & Co. and Horace P. Michaelis, formerly of Wheatley, Matchett & Co., have formed a partnership under the firm name of Ebert, Michaelis & Co. for the transaction of business in investment securities at 60 Broadway, New York. This firm will succeed to the business of Alfred H. Ebert & Co. at same address.

—Arthur Lipper & Co., 20 New St., cor. Exchange Place, announce that Maurice. Dannenberg, member of the New York Stock Exchange, was admitted to the firm on Feb. 1. Mr. Dannenberg was originally connected with The Dannenberg Co., Inc., jobbers and importers, of Macon, Ga.

-Cummings, Prudde Co. of Toledo, Ohio, dealers in municipal bonds, have opened a New York office at No. 111 Broadway. Powhatan Bolling and C. W. Whitis will be associated with them in the management of the New York office.

R. M. Grant & Co. have purchased an issue of \$800.000 San Autonio Independent School District 5% bonds, due in forty years, optional in twenty years from date. Denomination \$1,000 each, interest payable semi-annually.

-P. W. Chapman & Co., Chicago, announce the opening of a New York office, corner of Pine and William streets, under the management of Truman L. Chapman, who has been admitted to partnership in the firm.

—Coggeshall & Hicks, 128 Broadway, New York, are issuing their Financial Graphic and Investment List for February 1916.

Reports and Documents.

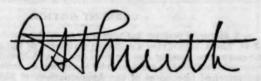

THE NEW YORK CENTRAL RAILROAD

HISTORY AND DEVELOPMENT 1831-1915.

The New York Central Railroad, as now constituted, represents 186 predecessor companies, and the final consolidation of these companies on Dec. 23 1914, created one of the greatest railroad organizations in the United States, and at the same time planted an important landmark in the history of railroad transportation.

Each of these constituent companies, large and small, passed through many vicissitudes of construction and financing; struggles with popular opinions and laws; until finally a great transportation machine was completed for the public good.

A brief sketch of this evolution of the New York Central Railroad, from its beginning to the present time, may be of interest to those who have been the students of the development, and especially to those who have participated in it for so many years with heart, mind and money.

BARLY DEVELOPMENT IN NEW YORK STATE

The Mohawk & Hudson Railroad Company was chartered in 1826 to build a line from Albany to Schenectady, and the road was opened to the public on August 9 1831. Inclined planes, up which stationary engines pulled the cars by ropes, raised the passengers one hundred and eighty-five feet at Albany and one hundred and fifty feet at Schenectady to the level of the new road. Between these planes are to the level of the new road. Between these planes extended the strap rails, a distance of sixteen miles, on which, if all circumstances were favorable, the little engine "De Witt Clinton," with its remodeled stage coaches, might attain a maximum speed of fifteen miles an hour. The whole train then had but a fraction of the weight of a modern locomotive alone, and this great difference is but typical of the growth that has taken place in railroading in these eighty odd years.

eighty odd years.

The tiny Clinton and its midget coaches are still preserved at West Albany, as a reminder of the comparatively insignificant beginnings of "America's Greatest Railroad" and of the early efforts to satisfy the need for improved methods of transportation of transportation.

of transportation.

In the face of vigorous opposition from those who could see in it nothing of good, the road prospered; the De Witt Clinton was succeeded by other locomotives, larger coaches were provided, and by 1844 a new road had been completed which made it possible to abandon the inclined planes.

In 1826, five years before the Mohawk & Hudson Railroad began operations, the Erie Canal had been opened. The State had contributed large sums to its building and fostered its growing commerce in every possible way. Therefore, it does not seem so surprising that an application, made in 1831, for a charter to construct a railroad from Schenectady to Buffalo, was refused by the Legislature, as establishing a dangerous competitor to the canal. Even in 1836, when, in response to urgent demands of the public, establishing a dangerous competitor to the canal. Even in 1836, when, in response to urgent demands of the public, a line from Schenectady to Utica was permitted, it was not allowed to carry anything but passengers and their ordinary baggage. In 1837, however, mails were added, and in 1844 consent was given to carry freight during the canal's closed season. Not until 1847 was this permission extended to cover the entire year, and then only upon condition that the railroad should pay to the State the same toll per mile for the freight carried as the canal would have earned had it transported the property.

This restriction was enforced on all lines within thirty miles of and competing with any canal in the State of New York, and was not removed until 1851.

A road was opened from Rochester to Batavia in 1837; one from Utica to Syracuse in 1839; one from Auburn to Rochester in 1841; one from Batavia to Buffalo in 1842; and the following year saw the closing of all gaps and the completion of a line from Albany through to Buffalo.

A FOND HOPE REALIZED.

A FOND HOPE REALIZED.

These various roads were under separate names, ownerships and managements, but the hope expressed at the dinner which celebrated the opening of the first of them all, the Mohawk & Hudson, that one might "breakfast in Utica, dine in Rochester and sup with friends on the shore of Lake Erie," was now realized.

A historian of these early days writes: "By the beginning of 1843 there was a rail route by which it was possible to

of 1843 there was a rail route by which it was possible to

travel from Albany to Buffalo in thirty hours without changing cars more than six times. There were no through tickets or no baggage checks. A ride over each of the seven independent roads was a complete transaction in itself. When the passenger got to the end of the road, he hunted up his baggage, if he had any, had it chalked to the next stopping place, bargained with expressmen and hackmen for transfer to the station of the next road in line, bought a new ticket and took a fresh start. By 1850, the science of railroading had progressed so far that the traveler could purchase through tickets between Albany and Buffalo for \$9.75; though he could not obtain, at any price, any information upon which he could rely about the movement of trains."*

In 1848, a schedule was made for through trains from the Hudson River to Buffalo in the unprecedented time of twenty-two hours. The railroad now known as the Boston & Albany having been previously opened, there was thus created a through line from the Atlantic Ocean to the Great Lakes, except for the ferry across the Hudson at Albany, which river was not bridged until 1866.

THE ORIGINAL NEW YORK CENTRAL RAILROAD.

THE ORIGINAL NEW YORK CENTRAL RAILROAD.

Having a through line, it was generally agreed that it would be better to unite the various roads, so that they might be operated as one, under a single management. To this end, application was made to the State Government, and on the second of April 1853 an Act was passed sanctioning the arrangement. In May of the same year, an agreement was entered into by the ten companies concerned, looking toward their consolidation into one corporation under the name of the "New York Central Railroad." Directors of the new company were elected at Albany on the sixth day of July 1853 and it began to operate the line with its own officers on the first of August following. Thus, sixty-two years ago, the name "New York Central" came into existence. First applied to those lines which ran through the middle of New York State, it now represents a network of tracks affording transportation to the most prosperous and densely populated section of our country. prosperous and densely populated section of our country.

THE HUDSON RIVER RAILROAD.

When the Mohawk & Hudson Railroad was opened, in 1831, steamboats between New York and Albany had been operated for twenty-four years. It was long believed impossible to excel in speed the palatial steamers which plied the Hudson; and the rate of fare between the two cities of the dellar which comparison to the first state of the state of th

the Hudson; and the rate of fare between the two cities of one dollar, which competition reduced at times to fifty cents, and occasionally to twenty-five, discouraged early attempts at railroad building. Then, too, the physical difficulties of constructing a line close along the rugged shore of the river were many and severe.

The Harlem Railroad Company also opposed the plan for a river road. The Harlem Railroad was planned so as to reach Albany from New York by a route far enough back from the Hudson River to avoid direct competition with the popular steamboats and at the same time to furnish means of transportation during the closed season of navigation.

Applications for charters for railroads along the river shore were made from time to time, but the opposition was strong and all were refused until 1846, when the Legislature gave its consent, and in July 1847 the Hudson River Railroad was opened from what is now West Thirty Second Street to Breakneck Hill, fifty-three miles from New York and near the present station called Storm King. In 1849 the road reached Poughkeepsie and on the first of October 1851 operations were extended to the town of East Albany.

WHEN HORSES DREW THE CARS.

WHEN HORSES DREW THE CARS.

Meanwhile a passenger station had been located at Chambers Street, from which point the cars were hauled by horses up to Thirtieth Street. The line thrived as the country became more thickly settled and its freight business, as well as passenger, took on goodly proportions. In 1868 the road opened a large freight station opposite St. John's Church, where a park of the same name formerly existed, which was a favorite resort in those days for New Yorkers. That name the station still bears and, amid its now changed surroundings, it still presents to view the wonderful bronze frieze that depicts, on either side of the statute of Commodore Vanderbilt, the marvels of land and water transmodore Vanderbilt, the marvels of land and water transportation.

The operation of passenger trains down the west side of Manhattan Island continued nearly twenty-five years; for it was not until November 1 1871 that the completion of the Spuyten Duyvil & Port Morris Railroad, which connected the Hudson River and the Harlem Railroads, permitted them to reach the new Grand Central Depot, then just dedicated to the public service.

just dedicated to the public service. *Carter: "When Railroads Were New."

An item of interest, indicating the prosperity of the Hudson River Railroad, is found in the fact that in 1866 it ordered from England six thousand tons of steel rails, which, it is believed, was the earliest introduction of such rails, in quantity, into the United States. With the bridging of the Hudson River at Albany in 1866

there was a continuous rail line from New York to Buffalo, controlled by two separate companies. Consolidation of

there was a continuous rail line from New York to Buffalo, controlled by two separate companies. Consolidation of these followed as the natural and desirable next step, which was taken by an agreement dated September 15 1869.

The new company was called the New York Central & Hudson River Railroad. Under this name the "Central" led the way in that era of railroad development following the Civil War, and it soon became known the world over as typifying the highest standards in railroading. In the acquisition of feeder lines and by gaining control of a number of other roads, it also became the nucleus of the great system known as the "New York Central Lines."

THE LAKE SHORE & MICHIGAN SOUTHERN.

In the same year that the two roads connecting New York and Buffalo were consolidated, the Lake Shore & Michigan Southern Railway Company was formed by bringing together the three principal companies owning the roads between Buffalo and Chicago. The history of these roads, however, runs back to the early days of railroad promotion.

Once the railroad had demonstrated its practical value, the people west of the Alleghanies were as clamorous for their introduction as were their friends on the seaboard. The Territory of Michigan, with a population at that time of but 35,000, chartered the Erie & Kalamazoo in 1833. This road was laid with a thin iron ribbon on oak stringers and was opened for traffic in 1837, the motive power at first being horses. This company is still in existence, but for years its property has formed a part of the Lake Shore System under a perpetual lease.

Another road was built by the State of Michigan from Monroe, on Lake Erie, to the interior and was opened for traffic as far as Hillsdale, sixty-seven miles, in 1843.

The story of railway construction in this territory is one of great financial difficulties, bankruptcies, contending factions and communities, and disastrous competition. In 1853 it was planned to change the gauge of a short section of road so that through trains might be run, but the innovation was so strongly resisted by the citizens of Erie that some of them resorted to mob violence, which came to be known as the "Erie war" and it was finally put down only by establishing martial law.

Out of a large number of incorporations and small roads there naturally evolved a trunk line connecting important

known as the "Erie war" and it was finally put down only by establishing martial law.

Out of a large number of incorporations and small roads there naturally evolved a trunk line connecting important traffic centers. This, with its feeders, became an important factor in the upbuilding of the country and incidentally made a strong corporation which afforded better security to its owners and greater service to its patrons.

In May 1852 the first train ran between Toledo and Chicago; in 1853 between Toledo and Cleveland, and in the following year between Cleveland and Buffalo.

To a Quaker named Nehemiah Allen is given credit for first proposing a railroad along the shore of Lake Erie. At that time "the idea of a railroad presuming to compete with the large luxurious and swift steamers plying between Buffalo, Cleveland and Detroit seemed so preposterous that he was regarded as a crank. No move was made to build a road east of Cleveland until July 4 1849, when books were opened for subscriptions for the stock of the Painesville Ashtabula & Geneva Railroad, which was opened for traffic November 20 1852. In spite of all predictions that a railroad could never compete with the lake, this road earned dividends. A small stock investment reluctantly made by the city of Cleveland formed the principal part of that city's famous sinking fund."*

Having the adventures of a very superior location on what famous sinking fund."

Having the advantages of a very superior location on what is practically a water-level route, and being a pioneer in a country which enjoyed a very rapid growth and great material prosperity, it is not strange that the Lake Shore Railroad prospered. In pursuance of a policy perhaps ultraconservative, for many years that company provided for its improvements and growth wholly out of its earnings, with a result that it had a great reserve strength to carry it over hard times and to enable it to meet the fierce competition to which, in common with other roads, it was frequently

As soon as a through route had been established between Buffalo and Chicago, nothing was more natural than that the Lake Shore should ally itself with its strong neighbor to the east, with whom it might exchange the heavy traffic moving between the principal ports on the Atlantic seaboard and the Western gateways.

In 1873 Commodore Vanderbilt, who was then President of the New York Central & Hudson River Railroad Com-

of the New York Central & Hudson River Railroad Company, became President of the Lake Shore & Michigan Southern Railway Company, and from that time down to the recent consolidation the general policy controlling these two large properties has been the same.

THE NEW YORK CENTRAL OF TO-DAY.

On December 23 1914 the New York Central & Hudson River Railroad Company, the Lake Shore & Michigan Southern Railway Company and nine of their subsidiaries—

having altogether about 5,600 miles of road and about 14,000 miles of single track, or about half the girdle of the globe—were consolidated into one company under the name of the

New York Central Railroad Company.

It is difficult, from mere statements of figures, to give an idea of the extent of the operations of the New York Central Railroad, but these are of great interest when properly interpreted.

Its trains traverse eight States. Two-fifths of the population of the United States live here and produce twenty-five per cent of the farm crops, forty-eight per cent of the mine products and sixty-five per cent of the manufactures, while occupying but ten per cent of the area of the land. The New York Central, with its directly controlled lines, reaches twenty-two of the fifty cities in the country which have each a population of 100,000 or more.

The prosperity of the New York Central clearly is bound up with the industries which it serves. Business conditions which bring the wills into full coveration, keep the fact view.

which bring the mills into full operation, keep the factories busy and cause the coal to move as fast as it can be mined, create for the railway an enormous volume of traffic. It is then that the company's 3,700 locomotives, 147,000 cars and 75,000 employees are able to render full service to the great population from which its revenues are drawn

It has approximately 400 points of contact with other carriers. It owns a majority of stock of the Michigan Central Railroad and the Cleveland Cincinnati Chicago & St. Louis Railway Companies, and affords to them and to the vast regions which their railroads traverse the highest class of service for the people and the industries of the East and Middle West.

FACILITIES AND EARNINGS.

The enormous increase in facilities and earnings which have taken place between the dates of the first and latest consolidations may be seen from the following:

In 1853.	In 1914.
Ten Companies consoli-	Twelve Companies con-
dated into the New York	solidated into the New
Central Railroad from Al-	York Central Railroad
bany to Buffalo.	from New York to Chicago.
307Passenger Car	8 3.608
1,702 Freight Cars	143.414
\$3,151,514Passenger Ear	nings \$62.273.848
\$2,479,820Freight Earning	ngs8105.858.426
563Miles of Track	c operated 14.537
\$1.125.506Dividends	\$12.127.525

In the thirteen years ending December 31 1913 the gross revenues of the roads now making up the New York Central Railroad doubled and the growth has been steady as well

A comparison between 1914 and prior years should only be made with the fact in mind that the industrial depression made with the fact in mind that the industrial depression of 1914 brought about a condition which made it impossible to utilize the plant of the company in any degree corresponding to its normal capacity. The results also indicate the effect upon the revenues of other factors which have combined to deplete the net earnings of all roads in the country during the past few years. The most important of these is the general rise in prices which has, in turn, brought about demands for higher wages, the awarding of which, frequently by arbitration boards, it was not possible to offset by any adequate change in the rates of transportation. The results are reflected in increases on what is now the New York Central Railroad since 1910 of \$14,594,343, or 21 per cent in wages, as compared with an increase of less than 14 per cent in revenues. cent in revenues.

RESULTS OF EFFICIENCY IN OPERATION.

In the year 1914 the revenues of the New York Central were reduced by \$18,000,000, but this enormous loss was met in part by retrenchment in operating expenses to the extent of \$15,500,000, of which \$6,000,000 was in the direct cost of transportation. Drastic measures were necessary to effect this economy; many employees had to be laid off in all departments; the program of improvements was largely postponed and the expenditure of every dollar for the purchase of supplies was scrutinized.

In periods of declining business, it is very difficult to reconcile the public mind to a reduction in service corresponding to the loss in business. Necessarily, the big machine must be slowed up gradually and everything that reasonably could be done was accomplished, except that sacrifices were not permitted where questions of safety in operation were involved. involved.

Operating efficiency is by no means a thing of recent development. For years the management has been constant in its labors to promote it. Improved methods in shops, yards, round houses, offices, everywhere, in short, that there was an opportunity for them; improvements in appliances that would enable better results to be had with a lesser effort; improved methods of firing engines, making for economy in the use of coal; improvements in engine construction, for the same purpose; the strictest economy in the use of supplies; these are some of the many ways by which the ratio of transportation expenses to gross earnings was kept at the same figure in 1914 as in 1906.

CARE OF EQUIPMENT.

The New York Central has, in round numbers, 3,700 locomotives and 147,000 cars, which, coupled together would reach from New York to Chicago and considerably beyond. To maintain this enormous amount of equipment in high-class condition requires an army of over 15,000 men,

^{*} Carter : "When Ballroads Were New."

with five large locomotive shops, five large car shops, 30 district car shops and 75 engine terminal shops, involving an annual outlay in wages of \$20,000,000 and in material of about \$15,000,000.

OFFICIAL COMMENDATION.

How well this work is done is shown by the report of the Public Service Commission, Second District, of the State of New York, upon its inspection of the motive power of the New York Central & Hudson River Railroad in 1913,

which stated:

"We consider that the power of this railroad is at the present time in better condition than that of any other railroad of its importance in this section of the country."

The report of the same Commission of its inspection in

1914 stated:
"The locomotive equipment was found to be in general good condition and better than at any previous inspection made by the Equipment Department.

CONSTANT OUTLAYS REQUIRED.

Standards of physical condition upon railroads have been raised rapidly in recent years, partly in response to public opinion, but also because of the efforts of the management to increase the capacity of the road in advance of actual traffic needs. Every expenditure for the elimination of grades or curves, or for better station facilities, or for improved devices upon tracks or equipment, means in the proved devices upon tracks or equipment, means in the end an ability to handle the traffic with less friction and with greater despatch, thus increasing the capacity for handling new business

Almost the only class of improvements in the railway "plant" in which the general public takes a direct interest, or in which it is able to appreciate the tangible results gained, is in the erection of new passenger stations. For this reason, the building of the Grand Central Terminal in New York the building of the Grand Central Terminal in New York City is regarded as perhaps the greatest public triumph of the New York Central. Other splendid stations have been erected recently, notably the one at Utica, costing, together with yard improvements, some \$4,500,000, and that at Rochester, costing \$2,500,000.

But the public should not forget that other improvements and betterments are constantly being carried on at huge cost, though many of them are hidden from the public eye.

Some of the more important recent outlays for betterments are the following:

ments are the following:

For four-tracking along the Hudson River during the past five years, with the necessary new signalling and new station

For four-tracking along the Hudson River during the past live years, with the necessary new signalling and new station facilities, over \$25,500,000 7,500,000 7,500,000 The Rome improvement, undertaken in connection with the construction by the State of the Barge Canal, amounted to nearly 1,000,000 The building of the immense Gardenville freight yard, to enable trains to be handled outside of the congested districts of Buffalo, involving also the elimination of several crossings of highways at grade, required to complete over 3,000,000 Grade crossing elimination in the City of Buffalo and track work in connection with same, reached 3,000,000 Other station and yard improvements east of Buffalo came to 1,500,000 New signalling cost Work on yards, stations, shops and other facilities west of Buffalo Electrification in New York City suburban territory with necessary equipment, power houses, &c., cost nearly 20,500,000 MILLIONS FOR NEW CONSTRUCTION.

MILLIONS FOR NEW CONSTRUCTION.

Summed up, over \$78,000,000 have been put into physical improvements, the most of it in the four years prior to 1914. All this work has been of the most enduring character. It has been done in the best manner known to the art of modern railroad construction. Into it have been placed the best materials obtainable, evolved from processes which are the results of thorough and scientific investigations.

Therefore, when it is stated that since January 1 1900 the New York Central & Hudson River Railroad and the sub-sidiaries now consolidated with it, have expended in additions, betterments, new construction and new equipment, the enormous sum of \$400,000,000, it should also be emphasized that this money was expended in the most careful manner and in ways calculated to produce the best possible results from the investment.

ELECTRIFICATION.

The electric installation is now complete from New York to Harmon, on the Hudson River, and to North White Plains, on the Harlem line.

The service has been extended to a considerable distance beyond the limit prescribed in the Act of the Legislature requiring that electric operation be installed through Park Avenue. Whether this has resulted in any substantial increase in commuting traffic beyond its normal growth is questionable. Owing to the present great cost of equipping railroads for electric operation and of operating them, it has been deemed inadvisable to extend the electrification has been deemed in a proper to the electric grant beyond the restricted area included in the electric zone.

In this problem of operating high speed trains by elec-icity, the New York Central was practically the pioneer in the world; and in the reliability and safety of the new service, the Company has established a record of which it may well be proud.

The adherence to schedules in the electric zone is remarkable. Of course, it is not always possible to equal the record of August 7 1914, in which twenty-four hours not a delay occurred on the Electric Division to any one of the three hundred and ninety-eight revenue trains that were run over its rails, but daily this unending stream of travel flows and ebbs with scarcely ever a delay.

THE PASSENGER SERVICE.

The consolidated New York Central Railroad is the eatest passenger-carrying road in the United States. It is difficult for the mind to grasp the full meaning of the state-ment that in the year 1914 the three lines now forming the chief constituents of the united roads transported 62,161,954

enief constituents of the united roads transported 62,161,954 passengers, or a number greater than three-fifths of the population of this country. The distance traveled would have been equal to the carrying of 2,520,439,275 passengers one mile, a figure staggering to the imagination.

And, notwithstanding this great volume of travel, its trains are operated with a seldom failing regularity of schedule, and what is more important, with a high degree of safety. In the four years ending with December 31 1914 not a single passenger fatality occurred in a train accident on the lines now composing the new organization, though they carried in that period passengers numbering more than

on the lines now composing the new organization, though they carried in that period passengers numbering more than twice the entire population of the United States.

A well-known illustration of its passenger service is afforded in the Empire State Express, the first high-speed passenger train of the United States, now in its 25th year of operation on the New York Central Railroad, with a record of over 6,000,000 miles run and 8,000,000 passengers carried setals to destination

carried safely to destination.

During these 25 years of railroad evolution the weight of this train has increased 200 per cent, due to the demands for steel equipment. It is now hauled by a powerful modern Pacific type locomotive having a weight 200 per cent greater than that of the famous old No. 999 which hauled the Empire State Express during the early days of its history and which attained such an enviable reputation throughout the country.

The cost of the train has advanced 300 per cent: the wages

The cost of the train has advanced 300 per cent; the wages of employees have increased 45 per cent; the number of passengers handled per train has increased only 75 per cent and the revenue earned per passenger-mile has remained

Since the inauguration of this world-famous train, which has come to be looked upon as a New York State institution, millions of dollars have been expended for modern signals, heavier rails and bridges and for many other track and equipment appurtenances necessary to make such evolution

This train is an illustration of the additional cost of railroad operation made necessary by the demands of modern travel and it emphasizes the necessity for appreciation by the public of the need of the railroads for consideration and legislation which will make the continuation of such service possible. LEADERS IN "SAFETY FIRST."

"Safety First," as of paramount importance, was first emphasized on the New York Central in 1909, several years before the campaign for safety attained its present large proportions. At that time an officer of the Company delivered an address before the National Association of Railroad Commissioners, held in Washington, D. C., on the subject of progressive safety in railroad operation, and the New York Central & Hudson River was one of the first railroads to adopt the slogan and post it upon poles, bridges, buildings, &c. This railroad was also the first to employ a man whose whole time would be given to the teaching of this one principle and to inspecting the yards, shops, engine houses and other places where men work engine houses and other places where men work.

In the physical equipment of this railroad, many things In the physical equipment of this railroad, many things have been done to advance this cause. Electric block systems have taken the place of the old manual blocking on some lines and of the station telegraph block on others. Machinery has been protected and safety appliances added in shops and engine houses. Modern equipment of all kinds has been purchased. With the increase in the weight of the newer cars and larger locomotives, the weight of the rails has kept pace, until now, in the high speed tracks, there is none weighing less than 100 pounds to the yard and for a considerable mileage east of Buffalo it is all of 105 pounds. pounds.

THE HARRIMAN GOLD MEDAL.

Due recognition of the results attained came to this Company in February 1915 when the American Museum of Safety, having in its hands for disposition the Gold Medal offered by Mrs. E. H. Harriman for "the utmost progress in safety and accident prevention," awarded it to the New

York Central.

The splendid condition that had been reached on this railroad is best outlined in the words of the presentation: "The points upon which the award was made are: block signals, improved roadbed, steel equipment, modern safety devices, a safety bureau, the elimination of curves and grade crossings, high standard of efficiency of employees, improved ventilation, cleaning and disinfecting."

In accepting the medal, President Smith said in part:

"The gold medal to the company is for the stockholders, the directors and executives who, with their financial means, their constructive and executive ability, have determined and made possible the class of service which ought to be rendered.

"This service, however, could not have been rendered without the cooperation of the great army of 50,000 men in the field, each having a distinct duty to perform, and yet all inseparably connected. Safety meant that every mad had to do his duty—the laborers upon the track had to place their spikes and rails properly, and keep them in that condition: the men upon the trains had to be vigilant in watching their signals and performing their work; the men in the shops, yards, stations, offices, in the chemical and physical laboratories, and every officer of the company, all had to be alert to see that his own duty was done and that the needs of his fellow men were met. It has been a question of eternal vigilance and co-operation, which is our duty as public servants, and which we hope to continue.

"The award to the individual is in recognition of individual effort, and fortunately has gone to a man who has conserved his life in the service as a locomotive engineer to his seventieth year, having followed that occupation over forty years without a blemish on his record and, during the latter part of his life, for a period of sixteen years, having operated our 'Empire State Express,' one of the fastest trains in the world. This is the kind of service we need in the individual throughout the ranks to get perfect safety."

GOVERNMENTAL REGULATIONS.

Attention has been called to the fact that new standards of operation have followed the country's development and in no less degree have other requirements been imposed upon the company by the processes of legislation. The cost of many of these will, no doubt, be absorbed in time, but the immediate effect has been to reduce net earnings. With the increasing cost of government, the railroads have been called upon to pay higher taxes, the amount of which has grown out of all proportion to property or revenues. Unfortunately, other burdens have also been imposed upon the Company by governmental agencies which add nothing to safety, comfort or convenience of operation, and contribute nothing to the support of government. However, there is some evidence of a better understanding of these problems on the part of the public, and it is hoped that the reaction which appears to be setting in will correct some of the abuses that have grown up under the guise of public regulation.

GRAND CENTRAL TERMINAL.

A story of the New York Central would be incomplete without at least a brief description of the Grand Central Terminal. It has been stated that with the single exception of the Panama Canal, no more difficult work has been undertaken in this age.

Incident to erection of that terminal, many hundreds of thousands of dollars had to be expended upon substantial but not permanent construction; new tracks, new signals and many other minor details had to be provided for temporary use, only to be torn out as the great work progressed. Whole areas of switches and tracks in service were lowered over night. The old train shed was taken down over the heads of passengers. New buildings were erected over

heads of passengers. New buildings were erected over moving trains and street travel maintained at several points over the construction. Gas, water and sewer pipes were changed without interruption to the service. Buildings in which people were living and working were underpinned.

Over three million cubic yards of earth and rock were excavated, requiring the exploding of more than a million pounds of dynamite. More than 125,000 tons of steel were erected and more than 350,000 cubic yards of concrete put in. And so eareful was the planning and so faithful the execution, that in all the years the work was going on the travel passed through this growing terminal without noticeable delay or the curtailment of a schedule or an accident to a passenger, though more than 150,000,000 passengers used the station while the construction progressed.

THE OLD HARLEM RAILROAD DEPOT.

In a technical sense, the Grand Central Terminal is not located upon the line of the New York Central Railroad, but it occupies (and extends far beyond) the site of the Old Grand Central Depot, the first up-town depot of the Harlem Railroad.

That company was incorporated in 1831 and the next year a short portion of the road was opened for business. terminus was first at Centre Street, near City Hall. 1837, it was in operation to Fordham, then in Westchester County, a distance of twelve and one-half miles, and was, as an early account quaintly specifies, "traversed for nearly three-fourths of its length by steam power." Horses hauled the carraiges from the City Hall to a station located near the present site of Madison Square Garden.

One of the wonders of this railroad was the tunnel, which

One of the wonders of this railroad was the tunnel, which, our authority tells us, "extends along the Fourth Avenue from 91st to 94th Streets," and which, "among the thousands who are almost daily conveyed through it, a vast majority is impelled by a desire to examine."

FIRST GRAND CENTRAL DEPOT.

In 1857 the Centre Street station was abandoned and in 1869 the first Grand Central Depot was commenced. Commodore Vanderbilt selected the site and gave the station its name. The wood which fed the locomotives of those days was cut in an open lot adjoining the site of the present Hotel Belmont, the saw being run by a treadmill operated by horses, whose efforts to clamber up the never-ending incline were inspired, it is said, by wisps of hay suspended from poles just out of reach of their noses.

The new station, then well uptown, was an attraction that

The new station, then well uptown, was an attraction that called visitors from far and near. It had fifteen tracks; and eighty-three trains, three of them through expresses to and from the West, arrived and departed every day. During its opening year four million people passed through its doors.

MORE ROOM NEEDED.

Before thirty years had elapsed the Grand Central Depot, Before thirty years had elapsed the Grand Central Depot, which had been thought an enormous structure at its opening, was far too small and in 1900 it was considerably enlarged. But these additional facilities failed to provide for the rapid increase in travel. It was now felt that provision must be made for many years of expected growth and plans were begun accordingly.

In 1902 came the mandate of the Legislature requiring electrical operation through Park Avenue tunnel. This requirement proved the key-note of the harmonious sym-

phony of this splendid work. Without steam or smoke every track might be covered, if need be, and upper and lower levels could be provided, allowing the separation of through and suburban travel.

BUILDING FOR THE FUTURE.

Thus it was determined to build for the future, and early in 1904 the actual work was commenced, continuing year after year, slowly but none the less surely. On February 1 1913, though the project was not fully completed, its utility and magnificence were for the first time disclosed to an appreciative public.

The stately simplicity of the waiting room appeals to every-

one and the immensity of the concourse, whose lofty ceiling displays the starry heavens and the signs of the Zodiac,

impresses itself on every traveler.

COMFORT OF TRAVELERS.

Ample cause for favorable comment is found, too, in the manner in which everything has been made so easily available for the traveler. The spacious waiting rooms give opportunity for rest, if desired, before starting on the journey; in the concourse, conveniently arranged, are all the facilities necessary for departure—information bureau, railroad and Pullman tickets and baggage checking; here are the gates leading to departing trains, reached without the inconvenience of stairways.

Inclines take the place of stairways wherever possible; even a passenger from the commutation distrist, arriving in the lower level, forty feet below the street, finds himself out in the open air without climbing a step and without undue exertion. There is no crossing of the streams of travel and the through and local passengers are entirely

separated.

The great station provides, too, all reasonable comforts for its patrons. There are rest and smoking rooms, restuarants of different prices, little shops of many kinds, which the hurrying suburbanite may patronize at the last moment, even rooms where one may dress for an evening's entertainment—in short, all that careful forethought could devise to make the station most useful.

SOME FACTS ABOUT THE GRAND CENTRAL TERMINAL. The main building at the street level is 600 feet long, 300

feet wide and 105 feet high; below the street level is 600 feet long, 300 feet wide and 105 feet high; below the street level it is 745 feet long and 480 feet wide. The floor space of the station could accommodate 30,000 people at one time.

In 1914, including Sundays, there passed through the Terminal an average of 64,585 passengers per day; since January 1st it has averaged a little higher. It should be remembered that these are figures covering a period of acute financial depression. In addition, an actual count made some time ago established the fact that over 50,000 people per day not passengers enter and leave the station to patron-

per day not passengers enter and texture its various concessions, visit offices, &c.

During the year 1914 174,564 trains and 7,805 engines

and left the terminal. The number

cars moved in and out numbered 1,124,531. In comparison with the first Grand Central Depot of 1871 with its eighteen tracks, the new Grand Central Terminal has forty-two tracks on the upper level and twenty-five on the lower. The area of the terminal of 1900 was twenty-three acres; that of 1913 is seventy-nine acres. The old terminal had a capacity in 1900 of 366 cars; the present plant will accommodate 1 140 will accommodate 1,149.

The Terminal is not a mere monument to Transportation, but rather if should be regarded as the Gateway of the Metropolis of the New World.

THE KEYNOTE OF A GREAT ORGANIZATION-SERVICE. The fundamental idea upon which the whole organization has been built is "service"—service not alone to the traveling public, but to shippers, manufacturers and whole com-

In order to develop transportation facilities between the great centers of population, the railroads have had to acquire, by lease or purchase, branch lines known as feeders. They have also had to gain through routes on which, by means of one common organization, the service might be standard-ized and the greatest economies effected. This movement has sometimes been viewed with distrust, sometimes actively opposed. But a large part of the public to-day realizes that transportation, more than any other industry, must be conducted on a large scale in order to gain the greatest economies. Not only does the public at large gain by the extension of uniform methods of operation over a large area, but hundreds of small communities enjoy the advantages

of a high-grade service which an independent local road could not afford to give.

The New York Central, like some of the other great systems in this country, has followed out this policy—the history and results of which have already been told. It remains only to draw the moral—that the law of progress is

the law of growth, of unity and of service.

Over the main entrance of the Grand Central Terminal

may be seen these words:
"To those who with head, heart and hand toiled in the construction of this monument to the public service, this is

May not this same sentiment be applied to all those who, with foresight and patient labor through many years, have erected a greater public utility—the New York Central Railroad?

The Commercial Times.

COMMERCIAL EPITOME

Friday Night, Feb. 11 1916.
Unusual activity is still the distinguishing note of American trade for this time of the year. In the steel trade sales as far ahead as the first half of 1917 are reported and prices confar ahead as the first half of 1917 are reported and prices continue to advance. Other metals like copper, lead and spelter are also active and rising. Copper is up to 28½c. Railroad business is enormous. Textile mills are hard put to it to keep up with their big orders for woolen, silk and cotton fabrics, all of which are bringing good prices. The stock of wool in this country is being rapidly depleted. Wheat exports for the week reached the large total of 11,500,000 bushels, and new export business is important not only in exports for the week reached the large total of 11,500,000 bushels, and new export business is important not only in wheat but in oats, with foreign buying also of corn and barley. Cold weather has stimulated trade in heavy goods. Attention is called to a significant increase in the demand for luxuries, like jewelry, furniture, pianos and other musical instruments, and eigars. Industries require larger and larger supplies of raw materials, often none too easy to obtain. But there are some drawbacks. Ocean freights are still scarce and high. There is congestion of foreign-bound freight scarce and high. There is congestion of foreign-bound freight at the seaports. Railroad embargoes affect the home trade at the seaports. in flour, &c. Raw materials are very high, notably iron and steel, as well as dyestuffs. Labor is restive. There may be trouble about wages on railroads and in the coal and textile trades. Still the general situation is such that cheerfulness

LARD in good demand; prime Western 10.40c.; refined to the Continent 10.90c.; South America 11c.; Brazil 12c. Futures have advanced, owing to higher prices for hogs and a better cash demand for some descriptions of provisions. A larger foreign demand for lard has been a feature. day prices advanced. Closing quotations were as follows:

TOBACCO has not been at all active; in fact trade in new erop has been rather quiet. At the same time old crop tobacco has been bought very readily, owing to the fact that the quality of the last yield was on the whole rather poor. Under such circumstances an interesting situation is develop-ing in binder tobacco, and before long it looks as though filler would be in the same position, i. e., scarce as far as really good quality is concerned. High prices have been paid for Ohio 1915. Meanwhile the date of the Amsterdam inscrip-

tion has been postponed to March 17. This was done in order to give American buyers chance to arrive there in time. Also exchange has been falling and America may not have to ship gold in payment for the Sumatra tobacco purchased at the inscription.

chased at the inscription.

COPPER active, excited and higher. Lake 28½c.; electrolytic, 28½c. Futures on both 26½@27½c. The tendency is believed to be upward, owing to rising prices in London and a sharp demand here. Electrolytic in London has risen latterly to £134. It is believed that the British Government has failed in its effort to control the market across the water by its purchases of 65,000 tons and an attempt to establish a maximum price, understood to be £100. Domestic consumers have latterly been buying here for delivery up to the end of July and to some extent for August delivery at 26½c. For May and June delivery sales have been made at 27c. and for April at 27¼c. Stocks in England and France are reported to be very small. Supsales have been made at 27c. and for April at 27½c. Stocks in England and France are reported to be very small. Supplies in this country are being heavily drawn upon. Tin was lower on the spot here at 41c., after being 41½c. early in the week, later 41¾c. Singapore and London declined. Spelter firm and higher on the spot at 20½c. London advanced. Lead was lower on the spot at 6.12½c.; later advanced to 6.20c. London is higher. Pig iron firm; No. 2 Phila. \$20@\$20 50, No. 2 Southern \$14 50@\$15, Birmingham. Pig iron has been for the moment rather quiet, though a revival of business is expected soon. For basic \$19 50 was accepted in Pennsylvania for 77.500 tons quiet, though a revival of business is expected soon. For basic \$19 50 was accepted in Pennsylvania for 77,500 tons for delivery in the last half of 1916. Tennessee iron has sold at \$14 50 Birmingham basis. There was an increased demand for prompt delivery at the close of the week, owing to railroad embargoes. The demand has come from New York State and Connecticut. Steel has continued in good demand. The situation, as regards sales and production, is unprecedented. Production for 1916 of heavy products like shapes and plates has been sold up by some of the leading companies. For the fourth quarter the supply of lighter products is said to be small. Important sales of shapes and plates have been made especially to shipyards, for delivery in the first quarter of 1917. Plates have sold at 2.10c. and in a few cases it seems at 2.25c., Pittsburgh, on such contracts. There is a steady and even insistent demand for the third and fourth quarters of the year. An advance of \$2 a ton on contract bars, shapes and plates was made on to 20 Pittsburgh for whates for all the formulates for the state of the year. advance of \$2 a ton on contract bars, shapes and plates was made, or to 2c. Pittsburgh for plates. On plates for delivery in three or four months, mills are obtaining 2.50c. to 2.60c. Pittsburgh, while 2.75c. and 3c. are usual prices on prompt plates.

COTTON

Friday Night, Feb. 11 1915.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 147,098 bales, against 167,472 bales last week and 142,804 bales the previous week, making the total receipts since Aug. 1 1915 4,989,536 bales, against 7,129,332 bales for the same period of 1914-15, showing a decrease since Aug. 1 1915 of 2,139,796bales.

Speculation in cotton for future delivery has been small, but as the market was short prices advanced. Liverpool bought at times quite freely. On one day it was estimated to have taken 30,000 to 40,000 bales, or even more. Also, the apparent settling of the Lusitania case had a rather steadying effect. At one time, too, there were reports of some decline in ocean freights. A stronger stock market also helped. And the levees along the White and Arkansas also helped. And the levees along the White and Arkansas rivers in Arkansas have at many points given way. Large areas have thereby been flooded. If the flood spreads it is conceivable that farm work and possibly planting in some sections of the Southwest may be delayed. Spot markets have, in the main, been steady and at times a pretty good business has been done. Then, too, on Thursday the exports rose to 52,000 bales, certainly a very respectable showing. Liverpoot has latterly been stronger, reporting little cotton for sale. On one day at least the spot sales there were 10,000 bales. England seems to be using up a good deal of cotton in spite of the shortage in the labor supply, so that, a ccording to a report of the Oldham Master Cotton Spinners' Association, the capacity of the machinery in Oldham and the district has been lessened 22%. At the same time the American consumption is well known to also helped. And the levees along the White and Arkansas the same time the American consumption is well known to be the largest on record. And it is expected that the Census report on supply and distribution, which will be issued next Monday, will show a very large American consumption is American ay, w u sno consumption in January. Some, indeed, look for figures of the size. That remains to be seen. But it seems clear enough that American mills are getting some of the trade of the Continental mills, which are naturally shut out by the war. And, while it is urged that the acreage in many parts of the South is likely to be increased, it is insisted at the same time that in the boll-weevil districts of Alabama and Georgia, at least, there is likely to be a decrease in the area, if for no other reason than that bankers will be unwilling to advance money in the infected districts. On the other hand, however, stocks are large, prices are high, exports are small and

the belief is general that there will be a large increase in the acreage this season, no matter what may occur in some boll-weevil districts. Meanwhile, too, speculation is dull. The trading is largely professional. The consensus of opinion is against the market. Ninety-nine men out of a hundred believe that if exports continue small the South will have to reduce its prices. And the capture of the Appam suggested unpleasant possibilities for the export trade in American cotton, seeing that it is largely carried on in British can cotton, seeing that it is largely carried on in British ships. Recently war risks advanced 200 per cent and reports that there was a subsequent reduction are denied. So that it would seem that things are not in very good shape for a large export business. And that is precisely what the country needs. Recently, too, the short interest has been reduced, not excepting the bear account in Liverpool straddles on this side of the water. In fact, the chief sustaining factor of late has been the covering of shorts. Certainly of bull speculation there has been comparatively little. Some recent bears in Wall Street covered and took the long side for a turn at the expense of the remaining short interest, but the same operators have declared themselves in effect to be bears for ultimate results. The latest rumor is that a German war vessel has blown up off the French coast, but this has not been confirmed. In the meanwhile it is a narrow trading market pending further developments. To-day prices declined on some long liquidation, with a lessened demand to cover. Exports were large—65,818 bales to-day. Liverpool was lower, with spot sales of only 5,000 bales. The closing here was barely steady. Spot cotton closed at 12.10c. for middling upland, a rise for the week of 10 points.

week of 10 points.

*Embraces receipts in Europe from Brazil, Smyrna, West Indies, &c. ^{ea} This total embraces the total estimated consumption by Southern mills, 1,944,000 bales in 1915-16 and 1,650,000 bales in 1914-15—takings not being available—and aggregate amounts taken by Northern and foreign spinners, 7,707,464 bales in 1915-16 and 6,645,047 bales in 1914-15, of which 5,476,464 bales and 4,936,047 bales American. b Estimated.

NEW GRADE STANDARDS FOR COTTON.—Eleven new grade standards for cotton have been promulgated by the Secretary of Agriculture under authority of the Cotton Futures Act. These eleven new grades relate exclusively to "yellow tinged," of which there are five grades; "yellow stained," of which there are three grades, and "blue stained," of which there are three grades. Under the Act only those grades listed, approved and promulgated by the Secretary of Agriculture can be offered for delivery on a legal future contract. In a letter to Henry H. Royce, President of the New York Cotton Exchange, informing him of this action, Mr. Brand, Chief of the Office of Markets and Rural Organization, said:

Members of the trade are of the opinion that these new grades will not have any effect on prices, as the current crop is said to contain practically none of the tinges and stains

FALL RIVER COTTON MANUFACTURERS' ASSO-CIATION.—At the annual meeting held Feb. 9 the Fall River Cotton Manufacturers' Association at its annual meet-ing elected officers as follows: President, George H. Hills; Vice-President, W. Frank Shove; Secretary and Treasurer pro tem, W. Frank Shove; Executive Committee for three years, James E. Osborn; Associate members of the Executive Committee each for one year, Edward Barker and William L. S. Brayton. The other members of the Executive Committee aside from the President and Vice-President, are Charles M. Shove and William N. McLane.

NEW BEDFORD MANUFACTURERS REFUSE FURTHER WAGE INCREASE.—Reports from New Bedford are to the effect that the cotton manufacturers have refused the demand of the cotton mill operatives for a second 5% wage increase. The mill men point out to the labor unions that they are already paying higher wages than other New England mills, that they have recently advanced wages 5%, and assert there is no good reason for a further advance at this time. at this time.

Advices from New Bedford on Thursday indicated that the Advices from New Bedford on Thursday indicated that the labor situation in the city was becoming more acute. Tuesday night the unions of carders and ring spinners and of weavers voted to empower their delegates to the Textile Council to take any action necessary to get the wage increase that the workers have demanded. The only proviso that the weavers place on their agreement to strike with the other operatives is that if they do strike for more wages the other operatives must strike with them later in the spring to secure a standard list of weaving prices. It is reported that the manufacturers are firm in their determination not to grant any further wage increase at this time and will shut their mills any further wage increase at this time and will shut their mills down first if the operatives strike, notwithstanding the prosperous condition of trade.

BREADSTUFFS

Flour has been steady but quiet. A few orthwestern mills have recently been doing a pretty good business. Most of them, however, have sold very little; that is, not over 25 to 50% of their output. Here in the East there has been a good deal of reselling from second-hands, owing to the good profits available. Also in Chicago there has recently been quite considerable reselling. Kansas City reports that stocks pretty much everywhere are light with purchases from hand to mouth. St. Louis has done a fair business, which might have been larger but for the firmness of mill prices. Recent resales in this country have in some cases been at 50 cents under millers' quotations. Here sales are small and oftentimes prices have seemed little better than nominal The freight congestion here remains about as bad as ever. Deliveries now being made by railroads of flour that has been on the track for some time.

on the track for some time.

Wheat declined. This was partly due to reports that Ger-This caused heavy selling by Wall Street interests and others, and last Monday prices in Chicago broke over five cents a bushel on May. There were reports that German cruisers had sunk a number of large British steamers in the South American trade. This led to a sharp advance in war risks. At one time it was reported that underwriters were refusing to write war risks. Also, for a time the Lusitania case overshadowed all markets. The world's shipments, too, increased to 13,860,000 bushels last week, and the quantity in passage to Europe increased

2,200,000 bushels. There was talk to the effect that the receipts at the Northwest would soon increase. Selling on stop-loss orders was large. In Argentina the weather has been fine, and at times prices at Buenos Aires have been depressed in sympathy with lower prices in America. In Liverpool buyers have shown a disposition to await larger shipments from Argentina and Australia. They are expected to increase shortly. Certainly Argentina has inadequate storage facilities, and it is supposed will be inclined to sell, especially if ocean freights become easier. In Australia the weather has been very favorable and harvesting is practically weather has been very favorable and harvesting is practically over. The crop there is large and the quality fine. This isthe general testimony. From the Balkan States crop accounts are generally favorable, and there has been free marketing of grain. The latest reports from Argentina are that negan freights are assign coving to an increasing in the latest reports. keting of grain. The latest reports from Argentina are that ocean freights are easier, owing to an increase in tonnage available. In this country there has been at times very heavy selling, partly, it is understood, as a hedge against European purchases made in Argentina and Australia. Furthermore, stocks in the United States are large. The visible supply is over 10,000,000 bushels in excess of a year ago. East of the Rocky Mountains the decrease last week was only 2,117,000 bushels, against a decrease in the same week last year of 3,553,000 bushels. The stock east of the Rocky Mountains is about 12,000,000 bushels larger than a year ago and 10,000. is about 12,000,000 bushels larger than a year ago and 10,000,000 larger than at this time in 1914. That is to say, it is 75,717,000 bushels against 63,892,000 bushels a year ago and 65,957,000 bushels at this time in 1914. The world's stock of American is put at 167,385,000 bushels against 65,000,000 less than this a year ago and 45,000,000 less in 1914. The world's stock of all kinds is put at 246,485,000 bushels against 64,000,000 less at this time last year and 46,000,000 less at this date two years ago. So that evidently the world does not really lack for wheat. Yet it should be borne in mind there is a wide gulf between producer and consumer. This is not merely in the matter of distance, but from the scarcity and dearness of ocean freights. It is one thing for the producing countries to have the wheat. It is another thing to get the wheat into the hands of consumers in Europe. So that latterly there has been a rally in prices. There is a persistent export demand in this country, whatever may be said about European buying in Argentina and Australia. Large sales, ranging from 600,000 to 1,400,000 bushels a day, have been made here and at the West for export. At Chicago country houses have been good buyers of July. The Northwestern crop movement has actually been light, whatever the predictions of increased marketing in the near future. Then from Italy weather and crop accounts are not favorable. from Italy weather and crop accounts are not favorable. The seeded area will be smaller than last year and the growth is thin. But the rapid rise in prices has been checked by the Government's requisitioning decree, and wheat is selling to customers at 59s. per 480 lbs. There is no scarcity as foreign arrivals at Italian ports continue liberal and additional purchases are authorized. But unfavorable crop reports have been received from Michigan, Illinois, Ohio, Indiana and the Southwest as regards the condition of winter wheat have been received from Michigan, Illinois, Onio, Indiana and the Southwest as regards the condition of winter wheat. In India reserves are light and holders are firm as more rain is needed. In France the weather has been unseasonably mild and there are many complaints of weedy fields. Native offerings there are small and the interior reserves are only moderate. From Southern Russia complaints are heard of lack of snow. Russian officials are holding large reserves and exports are trifling. In the United Kingdom the weather has been bad and it looks as though the acreage might be reduced. In Scandinavia crop conditions look rather unfavorable. And after all, the world's available supply of wheat decreased last week 2,547,000 bushels, as against an increase in the same week last year of 1,157,000 bushels. It is not surprising on the whole, therefore, that prices but have rallied as they did. The rumored capture of a German cruiser in the Atlantic had more or less effect. Yet it is also true in the Atlantic had more or less effect. Yet it is also true that prices towards the end were irregular; fluctuations have been wide. On declines, however, large interests have bought. To-day prices advanced in response to a rise in Liverpool. Stocks are small in European ports and exports are smaller than expected from Argentina and Australia. Western receipts are moderate and cash wheat notably strong. The Argentina crop is officially estimated at 183,-930,000 bushels, or 9.3% larger than that of last year. but the trouble is to get Argentina wheat to foreign markes, etc. DAILY CLOSING PRICES OF WHEAT FUTURES IN NEW YORK.

Indian corn has been irregular, declining early in the week and later rallying. A favorable circumstance was the re-moval of embargoes on shipments to Baltimore. Another was bad crop accounts from Argentina. Argentina advices reported prices steady with an insistent export demand. Also there have been reports that Sweden, Denmark and Holland want to buy American corn. Some export business has been done. On the one hand, however, corn has certainly sympathized at times with the depression in wheat. Also the weather has been favorable in the West for the movement of the crop, though it is true the scarcity of cars has had the effect of curtailing the marketing. And of late country offerings have been smaller, and receipts therefore not as large as expected. Actual export sales have not been

as large, however, as the persistent rumors of foreign demand had led people to expect. Still, the market of late has been firmer, partly under the stimulus of some export business at Baltimore. Moreover, the available supply last week increased only 1,442,000 bushels, against an increase in the same time last year of more than double this amount or 3,004,000 bushels. The total of American available supply is only 18,752,000 bushels, against 40,606,000 a year ago. To-day prices advanced and then reacted. The Dutch Government has recently bought considerable corn in this country. Liverpool was higher and strong.

Oats declined and then rallied. A very fair export business has been done; sales of anywhere from 100,000 to 500,000 bushels a day have occurred. This seaboard buying has undoubtedly been a sustaining factor. The other day Minneapolis reported sales for export of 900,000 bushels. But the weather has been good for marketing the crop and this has tended to check rallies in prices despite the foreign demand. Latterly, in fact, the European buying has slackened, and the domestic demand has been small. The available supply of American last week increased 159,000 bushels, against a of American last week increased 159,000 bushels, against a decrease in the same week last year of 1,433,000 bushels. And there is not such a very great difference between the supply this year and that of last year, whereas at one time this year's supply was very much smaller than at the corresponding date last year. Now it is 41,500,000 bushels, against 43,850,000 bushels last year. In 1914 to be sure, it was 45,100,000 bushels. Later on the crop movement is expected to increase materially. To-day prices closed easier after an early advance. after an early advance.

THE DRY GOODS TRADE

New York, Friday Night, Feb. 11 1916.

Greater activity developed in dry goods markets during the past week, and prices displayed a firm undertone. In staple cotton goods for future delivery, however, business is not so active. Selling agents have adopted a conservative policy in booking for future delivery, while buyers have covered their requirements for the time being. There is an exceptionally heavy demand for all classes of spring merchandise which both manufacturers and jobbers are taxed to meet which both manufacturers and jobbers are taxed to meet. Dress fabrics for the coming spring and summer have been Dress fabries for the coming spring and summer have been heavily sold and buyers are demanding prompt delivery when due. Manufacturers have difficulty in meeting their contracts, owing to the shortage of dyes and the delays in finishing. Jobbers report an exceptionally early demand for spring fabrics and they are forced to call upon mills for goods which they had not expected to use before the middle of March. There is a good attendance of out-of-town buyers in the market for the purpose of placing additional business in spring lines, and many are experiencing difficulty in getting the goods they want. Fall lines of napped goods recently placed on the market have become heavily sold, and agents are hesitating in accepting further business, particularly on colored goods. The scarcity of colored goods is causing a heavy business to be done in pure white and natural shades, which mills are in a better position to furnish. Buyers of woolens and worsteds are also experiencing trouble is getting additional supplies of spring goods. As manufacgetting additional supplies of spring goods. As manufacturers have no goods left on their hands through cancellations, they are not prepared to meet the late demand. The scarcity of dyes has made it difficult for many mills to successfully meet their contracts, not to speak of accepting additional business at this late date. Little change is reported in the export situation so far as regular markets are concerned. Lack of shipping facilities and high rates are restricting busi-

Lack of shipping facilities and high rates are restricting business. Many inquiries for colored goods are coming in from markets which have been canvassed by our manufacturers since war broke out, but owing to lack of dyes and inability to guarantee deliveries, few are in a position to accept business.

DOMESTIC COTTON GOODS.—Domestic cotton goods markets are active and irregular. On some staples, such as print cloths and gray goods, demand is backward and buyers are not willing to accept further business for future delivery at current high prices. Gray goods are a shade easier as a result of the lack of demand from printers and converters, whose operations are restricted by a shortage of verters, whose operations are restricted by a shortage of dyes. Print cloths are also slightly easier, buyers obtaining limited quantities of standard lines at concessions of an eighth cent per yard. A good trade is being transacted in fine and fancy goods and many lines have been heavily sold. The colored goods situation is becoming more unsettled, particularly concerning futures deliveries. Many buyers are in the larly concerning futures deliveries. Many buyers are in the market for additional supplies, but cannot find selling agents in a position to accept their offers. Dress ginghams have been marked up another half cent per yard during the week, and will likely go higher if the demand continues. The heavy business in spring and summer wash fabrics is a feature in the market. Jobbers are receiving more orders than they had prepared for and as a result many lines have been withdrawn from the market. Gray goods, 38-inch standard, are quoted unchanged at 56.

quoted unchanged at 5c.
WOOLEN GOODS.—Handlers of both dress goods and men's wear report an active demand for their lines. The fall 1916 season is now fully started and buyers are taking an active interest in all goods offered. Sales of women's an active interest in all goods offered. Sales of women's serges have reached a high point and many mills are not in a position to accept much more business. Cotton warp serges have sold most heavily and buyers are experiencing difficulty in closing further contracts on these. Fancy wool suitings and coatings are also selling well. A good business is being done in special fabrics designed to meet the demand for skating costumes. In men's wear departments, fancy worsted lines for fall have just been opened and buyers are taking an active interest. Formal price lists have not been published, but a large trade has been transacted on the basis published, but a large trade has been transacted on the basis of special agreement between buyer and seller concerning prices. This method of doing business, which has become prevalent during the current season, is coming in for much criticism, but the larger manufacturers seem to prefer to go ahead booking orders without making any formal announce-

ment of their offerings.
FOREIGN DRY GOODS.—There is an active demand for rorriers or jobbers to accept. Business in substitutes is porters or jobbers to accept. Business in substitutes is steadily expanding, owing to the shortage of genuine goods, and some of these substitutes, particularly household goods, are proving to be very serviceable. Advices from Belfast are proving to be very serviceable. Advices from Belfast are not very encouraging, manufacturers being handicapped by the high price and scarcity of flax and flax yarns, as well as lack of experienced labor to operate their mills, all of which makes it impossible for them to guarantee deliveries or accept business for future delivery in large volume. Burlaps are rather quiet, business being restricted by the scarcity of supplies. Prices remain firm, with light weights quoted at 7.25c. and heavy weights at 11.50c.

STATE AND CITY DEPARTMENT.

MUNICIPAL BOND SALES IN JANUARY.

We present herewith our detailed list of the municipal bond issues put out during the month of January, which the crowded condition of our columns prevented our publishing at the usual time.

The review of the month's sales was given on page 539 of the "Chronicle" of Feb. 5. Since then several belated January returns have been received, changing the total for the month to \$49,804,873. The number of municipalities issuing bonds was 285 and the number of separate issues 395.

Anglo-French Loan.—Admitted To New York Stock Exchange List.—The Committee on Stock List of the New York Stock Exchange on Feb. 7, under authority previously granted, directed that on and after Feb. 9 the \$500,000,000 5% 5-year Anglo-French External Loan, due 1920, be admitted to the list on official notice of issuance in exchange for outstanding temporary bonds of said issue.—V. 102, p. 2086.

Astoria School District, Clatsop County, Ore.—Litigation.—A newspaper report says that attorneys have been employed by Astoria citizens to contest the legality of the recent special election in Astoria School District, at which a bond issue of \$100,000 was authorized to purchase a site and erect a grade school building. A total of 341 votes was east at this election, the majority in favor of the bonds being only four. After an investigation, the attorneys assert that 21 votes were east by persons who are not taxpayers and thus are not legal electors.

Connecticut.—Legal Investments for Savings Banks.— Complying with Section 39 of Chapter 127 of the Public Acts of 1913, the Bank Commissioner issues every six months (May and Nov.) a list of bonds and obligations considered legal investment for savings banks under the provisions of Chapter 127. The list issued by the Commissioner in May 1915 was printed in full in the "Chronicle" of Sept. 18 1915, page 955. The list for November 1915 contains the following securities which were not included in the previous

list:

Bonds which are direct obligations of the cities of Chicopee, Mass., Johnstown, Pa., and Minneapolis, Minn.
Chicago Milwaukee & St. Paul System—Gen. & Refund. Ser. B 5s, due 2014.
Minn. St. Paul & S. S. Marie System—1st Consol. 5s, due 1938.

New York Central System—

Denver. Colo.—Judge Denison Denies Order to Increase

Denver, Colo.—Judge Denison Denies Order to Increase Valuation.—On Jan. 8 Judge John H. Denison of the District Court denied the joint application of the State Tax Commission and the State Board of Equalization for a writ of mandamus to compel Clair J. Pitcher to increase the valuation of the State Tax of the state ation something over \$55,000,000 on certain classes of property. Under date of Jan. 17 Jas. A. Marsh, City and County Attorney, writes the following concerning this case;

County Attorney, writes the following concerning this case;
In September 1913 the State Tax Commission directed the State Board o
Equalization to add \$104.000.000 horizontally on all property in Denver,
This horizontal increase was upheld by the Supreme Court of this State,
as will be seen by the opinion in 56 Colorado, to which Judge Denison
refers, and was afterwards upheld by the Supreme Court of the United
States in the Bi-Metallic case to which Judge Denison refers. The raise,
although approved by the State Board of Equalization, was upheld as an
Act of the Colorado Tax Commission.

A similar horizontal raise was made by the Tax Commission and approved
by the State Board of Equalization, amounting to \$90.000.000 for the year
1914. As this increase was made in the same manner, to-wit: horizontally
in the year 1914 as it was in 1913, the raise of 1914 was not contested by
Mr. Pitcher, local assessor of Denver.

In the year 1915, which is the year involved in Judge Denison's decision,
the Colorado Tax Commission did not attempt to impose a horizontal raise
on all of the property of Denver, but directed that the assessed valuations
of Denver should be raised \$55.000.000 and directed that it should be added
to certain classes of property only.

The Colorado Tax Commission sent a written recommendation to the
County Board of Equalization in September 1915 and recommended that
the \$55.000.000 should be added on Denver valuation, and that the said
raise should be put upon certain classes of property, but expressly added
that it should not be added to these classes horizontally.

The County Board of Equalization declined to follow this recommendation. Subsequently the Colorado Tax Commission directed the State
Board of Equalization to add this \$55.000.000 to Denver's valuation, and
made the raise horizontally upon the same classes of property which the

Tax Commission had recommended that the County Board of Equalization place it upon. The most substantial difference being that they told the County Board of Equalization that it should not be put on horizontally and directed the State Board of Equalization to put it on horizontally. There was a further discrepancy between the recommendation made to the County Board and the direction made to the State Board in that, in the recommendation made to the County Board, the Tax Commission said that horses and mules and motorcycles should be increased to a certain average, whereas this increase was entirely omitted from the direction made to the State Board of Equalization.

The City and County of Denver appeared before the State Board of Equalization and protested against the approval by the State Board of Equalization of the action of the Colorado Tax Commission in directing that the \$55,000,000 be added to Denver's valuation. But the State Board of Equalization overruled the protest of City and County of Denver, and approved the action of the Colorado Tax Commission in directing the raise on Denver property, and followed the direction made by the State Board of Equalization literally.

Mr. Pitcher, by and with the advice of the legal department of the City and County of Denver, declined to follow the order of the State Board of Equalization to place this increase on property in Denver, giving as the reason for his refusal that the action of the Tax Commission and the State Board of Equalization in making the raise was entirely arbitrary and capricious, and not based upon any fair or proper method or any fair or sufficient investigation whatever, and also alleging that the Colorado Tax Commission and the State Board of Equalization had no constitutional nor statutory power to order raises upon certain classes of property.

The effect of Judge Denison's decision was that the Colorado Tax Commission had no such power under the constitutional provision to which he refers, but if the State Board of Equalization had acted

Green County (P. O. Greensburg), Ky.—Compromise with Bondholders Rejected.—The Green County Fiscal Court on Jan. 29 refused, it is said, to enter into contract with bondholders to compromise judgments at 25 cents on the dollar. The amounts necessary to satisfy such a compromise is stated as \$90,000. See V. 96, p. 1507.

Illinois.—Legislature Adjourns.—The Forty-Ninth General Assembly ended its second special session on Jan. 26.

Lewis and Clark County (P. O. Helena), Mont.—Bonds Declared Valid.—District Judge R. Lee Word in a memoran-dum opinion handed down Jan. 15 held that neither the constitution nor the statutes prohibit the sale of the \$100,000 6% funding bonds mention of which was made in our issue of last week on page 362. According to the Helena "Independent," Judge Word states:

pendent," Judge Word states:

If it were true that the proposed bond issue contemplated a borrowing of money on the credit of the county and so created a new indebtedness, then under the provisions of our constitution the approval of the majority of the electors of the county would be necessary to give validity to the proposed issue of bonds.

But the proposed issue, while it will change the form of the existing warrant indebtedness of the county, will neither create a new liability against nor increase the indebtedness of the county within the constitutional prohibition, and therefore the approval of the majority of the electors was not and is not necessary in order to give validity to said bonds.

I am of the opinion that neither the constitution nor the statutes prohibit the issue and sale of the proposed bonds to be used in funding the outstanding indebtedness against the county, including the sum of \$32,-077 82, and therefore order judgment to be entered in favor of the defendant.

Marin Municipal Water District (P. O. San Rafael), Calif.—Writ of Mandate Asked to Compel Auditor to Sign Bonds.—A petition was filed in the State Supreme Court Feb. 4 for a writ of mandate to compel William Dodge, Auditor of the district, to countersign the \$3,000,000 bonds which were recently prepared for issuance.—V. 102, p. 453.

Maryland.—Board of Public Works Approves Sale of Northern Central Mortgage.—On Feb. 1 the Board of Public Works adopted a resolution approving the sale at not less than \$3,000,000 of the mortgage of \$1,500,000 on the Northern Central Ry. It is planned to sell the mortgage to the Northern Central, take in payment State bonds, turn these bonds over to the sinking funds, thus canceling them in effect, or cancel them outright, and then issue new bonds for \$1,500,000 to care for the deficit. The result will be liquidation of the deficit and a net reduction in the existing bonded \$1,500,000 to care for the dencit. The result will be inquidation of the deficit and a net reduction in the existing bonded indebtedness of \$1,500,000. The law requires that the Board give 60 days' notice before a sale is made. It is thought probable, however, that the Legislature will be asked to repeal this law so that a sale can be made at once.

repeal this law so that a sale can be made at once.

Mississippi.—Governor Bilbo Discusses State's Finances.—
In his inaugural address, delivered Jan. 18, Governor Theodore G. Bilbo urges upon the Legislature the necessity of remedying the defects in the present system of taxation and repairing the machinery which has brought the finances of the State into such "miserable disorder and confusion."
On this subject the new Governor says in part:

Taxation is the highest attribute of sovereignty, the most responsible prerogative of the State, the exercise of which, therefore, should be guided by the most scrupulous concern for justice, equity and equality in the distribution of the burden which it imposes. There are many philosophies of taxation expounded, many plans proposed, many theories propounded, each of which has its able and earnest adherents and advocates, and all of which are entitled to our respectful consideration, as the result of profound thinking; but in this matter, as in most other human affairs, practical results rarely libe with the logic of the theory; what is adapted to one condition does not fit another, and a scheme of taxation that would be ideal for Massachusetts might be ruinous for Mississippi; so for the present, at least, we will not consider any new philosophy of taxation, but seek to remedy the defects of our present system and repair the machinery that has brought the finances of the State into such miserable disorder and contuing for more money to meet its real needs. The revenues of the State are inadequate to its necessary expenditures, and while this defict may be diminished by material reductions in the cost of administration, and while certain economies may be practiced, that will affect a material saving, your attention to which will be specifically called in a special message, yet these economies will not avail to meet the gap between revenues and expenses; and a way to provide larger revenues must be found without the imposition of any undue burden upon industry. That is the

We must not longer go on borrowing money for current expenses of government, as has been the custom for the past ten years, a million and a quarter dollars worth of bonds having been issued only two years ago to meet such obligations. Neither should the tax levy be increased. The remedy lies in a complete revision of our whole fiscal system, under which, as at present operating, the tax burden is not only not equal and uniform, as provided in the constitution, but falls heaviest on those least able to bear it, and in its imposition is grossly unjust, uneaqual and inequitable. The State of Mississippi suffers under the most anomalous, paradoxical and illogical tax system ever devised by an enlightened government, because, perhaps, no other government anywhere in the world deliberately remounces all authority, control or supervision, even, in the matter of providing its own revenues for its own support, as does Mississippi. It not only renounces and alienates the control of its own alimony, but places that control in the hands of eighty different bodies whose primary motive and interest it is, as freely declared by many of them, to give the State as small a part as possible of the taxes that are gathered. And so well is this purpose accomplished, in many cases, that the State returns to the county for school purposes alone more money than is paid by the county into the State Treasury for all purposes of government. Eighty different boards of supervisors fix eighty different bases of assessment: the primary motive of each of which is to pay into the State Treasury as little money as possible. The tax levies of counties and municipalities during the past year have been deliberately raised, and the assessments correspondingly lowered, for the avowed purpose of reducing to a minimum the taxes pald to the State. But even where that unfillal motive is not present, the operation of the system of county assessments, as a basis of State revenue, is no less disastrous in its consequences. County assessment are usually base

upon a different basis of valuation, ranging anywhere from 20 to 75% of actual values, and the State must derive its revenues from such hap-hazard sources.

The deficit between revenues and expenditures during the past two years is, in round numbers, about \$750,000, as shown by the report of the State Treasurer. A bond issue of \$500,000 becomes due in July of this year, and not a dollar has been provided to meet this obligation. We must, therefore, not only provide for this excess of disbursements over receipts, amounting to three-quarters of a million dollars, but find a half million more for these bonds if we intend to pay them. That means a total deficit of \$1,250,000 which must be provided for during the next two years, if the receipts and expenditures of the coming blennial period remain unchanged. As already said, I will approve no additional tax levy; I am resolved to veto any bond issue for current expenses, nor will I sanction any appropriation in excess of the revenues of the State. Where, then, shall the remedy be found? That is for the Legislature to determine. But a careful study of the financial reports of the various State institutions convinces me that there is a considerable waste of money in the administration of many of them which should be promptly stopped.

I have said that I would approve no issue of bonds to meet current expenses of government, because that is fundamentally and radically wrong and grossly improvident; it is like a man mortgaging his home to get money to live on, and should we consent to such a financial policy our constituents should at once conclude that we are altogether incompetent and unfit to be trusted with the responsible business of government, and should be promptly recalled to a private station, better adapted to our limitations, and where we could do no harm to anybody but ourselves. But the increasing demands upon all of our educational and eleemosynary institutions, due to the continuous increase in population and a growing appreciation of their beneficial se

New York City.—Brown Legislative Committee Reports on City Finances.—The Legislative Committee headed by Senator Elon R. Brown, which has been investigating the finances of New York City, submitted its report to the Legislature on Feb. 7. The Brown Committee finds that the city has reached a crisis in its financial affairs and recommends measures intended to afford temporary relief. There is no promise of permanent relief, the Committee points out, unless fundamental methods are changed. The reforms sought by the Committee are incorporated in fourteen definite pieces of legislation, as follows: of legislation, as follows:

of legislation, as follows:

Bill changing time for collection of taxes from May and November to January and July.

Bill enacting the "pay as you go policy" into law.

Bill conferring on the city power, subject to referendum, to fix the salaries of its officers and employees other than judicial officers.

Bill placing county expenses, including salaries, subject to referendum, under control of the city.

Constitutional amendment making county bills in the city of New York, city bills.

Bill or bills giving control of all expenditures by the Water Supply Board, Court House Board and First District Public Service Commission to the city government.

Bill charging the State with the regulative expenses of the Public Service Commission of the First District.

Bill prohibiting further construction by the State of roads in cities and prohibiting further construction by the State of roads in cities and prohibiting the maintenance of county roads by the State.

Bill to take over the city's normal schools and maintain them at State's expense.

Bill to divide the automobile tay with the counties, subject to the restriction.

expense.

Bill to divide the automobile tax with the counties, subject to the restriction that it be expended on roads.

Bill providing that any additional excise tax be divided between State and city.

Bill to turn Sheriff's fees of New York County into the city treasury.

Bill abolishing the civil jail.

Bill giving the city government power to consolidate departments.

If this program is carried out, the Committee declares, the city may expect the following definite reductions in its tax levy as compared with the levy of 1916 from added income

and economy:
City's share of automobile tax.
City's share of additional excise tax.
Saving in interest on revenue bonds complete in 1920.
Regulative cost of Public Service Commission assumed by State City normal schools supported by State.
Saving in cost of administration through abolition and consolidation of departments.
Saving in bringing county government under city control.
Saving by conferring on city power to fix salaries. \$400,000 1,000,000 3,500,000 500,000 500,000 2,000,000 2,500,000 2,500,000

policies."

The chief complaint of the New York City Administration, of mandatory legislation that calls for the expenditure of \$49,500,000 over which the Board of Estimate has no control, is considered at length in the report. Of this amount 66% is for the Department of Education. Since 1899 the school attendance has increased 85%, while the salary list has increased

Of this amount 66% is for the Department of Education. Since 1899 the school attendance has increased 85%, while the salary list has increased 222%.

The laws responsible for these increased expenditures received the support of the New York City delegation in the Legislation and the approval of the Mayor. In order that the city may determine for itself the question of the fixing of salaries, the Committee has introduced a bill conferring on the city power to fix the salaries of its officers and employees other than judicial and elective officers with a referendum.

Another bill to be referred to the voters of the city in the event that the City Administration and the New York City legislators cannot reach an agreement on the question, places county expenses, including salaries, under control of the city.

The Committee recommends that the city be relieved of the expense of supporting its normal schools by having the State take them over and maintain them at State expense, as are the other normal schools.

The Committee recommends that large powers be conferred upon the Board of Estimate to abolish and consolidate departments, of which there are now 124 in the city, and says: "The financial situation requires some drastic action in seeking better government by having less government. Departmental activities should not increase several times faster than population."

Regarding the reduction of expenses the report says:

"The Committee is satisfied that the administrative expenses of the city can be materially reduced without injury to the public service, and that measures of relief are by no means limited to the recommendations of the Committee. It is a hard saying, but New York City will remain for many years in cramped financial circumstances, unless an economy obtains which not only checks increase of administrative expenses, but actually reduces them."

Of the difficulties in the way of retrenchment the report says:

not only checks increase of administrative expenses, but actually reduces them."

Of the difficulties in the way of retrenchment the report says:

"It is evident that the people of the city do not realize or will not acknowledge the city's true financial condition. The demand for new and greater expenditures is almost universal. Three schemes involving the expenditure of \$50,000,000 are on the verge of execution. Ten million dollars for the court house, \$10,000,000 for the marginal railway and \$25,000,000 for the Schoharie reservoir. If these are completed for less than \$60,000,000 they will stand as isolated monuments of economy. Their utility and desirability cannot be questioned, but the city must choose between public inconvenience for want of new utilities and public and private inconvenience from hopeless financial burdens. It must reject all plans for expenditure except the absolutely essential."

The report shews:

That the city spends \$40,000 a year to maintain the civil jail with an average population of 14 prisoners, or at the rate of \$2,857 a prisoner.

That the city has over 80,000 employees on its payrolls, which amounted last year to \$102,106,430.

That while the population increased less than 6% in five years 1910 to 1915, the payroll increased 20%.

That the city has no control over the Court House Board or the Water Supply Board, although both hoards were greated by legislation intitated.

That where the population increased less than 6% in five years 1910 to 1915, the payroll increased 20%.

That the city has no control over the Court House Board or the Water Supply Board, although both boards were created by legislation initiated by the city and approved by the city.

That about \$5,000,000 of county charges are mandatory and entirely beyond the control of the city administration.

That the city is paying the regulative charges of the First District Public Service Commission, which charges should be paid by the State.

That \$500,000 of city revenue is diverted to special service by law.

That there is no accurity for the city bonds in the hands of the public except the debt-paying capacity of the city.

That in fifteen years the population of the city increased 50%, and in sixteen years the city budget increased 130%.

That the city is always in debt from \$50,000,000 to \$100,000,000 for revenue bonds and bills insued in anticipation of the semi-annual tax levy.

That there is new outstanding \$8,700,000 of uncollectible taxes and assessments in the semi-annual tax levy.

That the city issues annually \$6,000,000 of special revenue bonds for current expenses, which is paid by a charge to "debt service" in the succeeding budget.

Senator R. F. Wagner made public the report of the minority of the Brown Committee. This report is summarized as follows:

marized as follows:

The suggestions in the majority report are good, so far as they go, but are wholly inadequate for New York City's needs.

If relief for New York City is limited to these suggestions, the city will believe that the Legislature is seeking merely to pacify it, and not to do, it real justice.

The majority report entirely omits reference to the city's protests against yearly appropriations by the State of \$3,000,000 for local up-State benefits. It omits reference to the city's protest against the yearly appropriation of \$1,880,000 for maintenance of local dirt roads in up-State townships. It omits the city's protest against the State paying taxes on State land for the support of up-State counties.

It omits the city's appeal that the \$4,000,000 stock transfer tax collected in the city be turned over to the city, to reduce taxes on real estate.

It omits the city's demand for its constitutional share of State highways, for which New York City is paying \$182,000,000 and receives nothingin return.

for which New York City is paying \$102,000,000 (1) \$1,000,000 of what it asks from the State and denies the city \$18,000,000. New York City will regard the majority report as an attempt to play with the city by giving it whatever costs the up-State nothing and denying it whatever means the lopping off of an up-State privilege or advantage, no matter how unjust.

Measures to work the substantial justice for New York City outlined in the minority report will be introduced in the Legislature.

Discussing in detail the hills which will embody its plans,

Discussing in detail the bills which will embody its plans,

the minority says:

To meet the causes for unrest and dissatisfaction in New York City outlined in this minority report, there will be submitted to the Legislature the following measures:

1. A constitutional amendment providing for a two-thirds vote upon all appropriations where the benefits sought are chiefly local, and another constitutional amendment providing for a legislative apportionment which will give New York City a representative in the Senate and Assembly sufficient to protect a majority of the population of the State from the financial domination of a minority.

2. A bill repealing the State aid law.

3. A bill providing that State property shall be exempt from taxation wherever located.

4. A bill apportioning to New York City its proper share of State high-

4. A bill apportioning to New York City its proper share of State high-

ways.

5. A bill apportioning the proceeds of the stock transfer tax to the localities where this tax is collected.

These measures can be enacted by the Legislature in deference to the wishes of the people of the City of New York, without working any hardship upon the citizens of the counties outside of New York City. If passed, they will substantially relieve the city's present financial situation.

Even more important than this result, however, will be the creation of a better feeling on the part of the people of New York City toward the State Legislature and the stimulation of the city's desire to do its full share in the development and the progress of the State as a whole.

The minority members who signed the report were Senators Wagner and Cullen and A. E. Smith, former Assembly leader, now Sheriff of New York County.

New York State.—Curb Transactions in Recent Issue of State Bonds to Be Arbitrated.—The unexpected purchase of the entire \$25,000,000 State bonds on Jan. 27 by a single bidder and the announcement that the \$22,000,000 50-year bonds contained in the lot had been bought by private interests who would take them off the market, has caused an un-usual situation in the Broad Street curb market where the bonds are always traded in in advance of a sale on "when issued" contracts. No transactions were reported on the Curb until the day bids for the bonds were opened, and then only the \$22,000,000 50-year bonds were traded in, as it was feared that the \$3,000,000 30-year bonds might go to private investors. Before it was learned that this had actually happened in the case of the longer-term bonds, about \$500,000 had been traded in and a short interest created which is variously estimated at from \$150,000 to \$300,000. In an effort to settle the differences in opinion caused by the inability to make deliveries, a meeting of the brokers holding open contracts for the bonds was held on Feb. 8 at the offices of Herrick & Bennett and a committee appointed to fix a settlement sued" contracts. No transactions were reported on the Curb rick & Bennett and a committee appointed to fix a settlement price and arbitrate all disputes that might arise in connec-tion with said outstanding contracts. Yesterday (Feb. 11) the committee announced that any party having long or short contracts on these bonds may have the matter adjusted if they will report their position to the Chairman of the com-mittee, on or before the close of business Tuesday, Feb. 15. The committee also announces that their respective firms have no interest in either long or short contracts, either directly or indirectly.

Pinellas County (P. O. Clearwater), Fla.—Supreme Court Dismisses Appeal in Bond Case.—The Florida Supreme Court on Feb. 2 dismissed the appeal filed by Willis Castaing to set aside the order of Circuit Court Judge O. K. Reaves validating the \$715,000 road and bridge bonds.—V. 102, p. 266.

Rhode Island .- Inheritance Tax Law Passed by House .-House Bill No. 89, providing for an inheritance tax system, was passed in the lower branch of the Rhode Island Legislature on Feb. 3 by unanimous vote. Representative Richard W. Jennings, who spoke in favor of the measure explained, its provisions as follows:

its provisions as follows:

This bill provides for a tax of half of 1% on the net value of all estates over \$5,000, also a tax at the same rate on the value of each share of an estate taken by any person. But if such a share goes to a grandparent, parent, husband, wife, child, brother, sister, nephew, niece, son-in-law, daughter-in-law, or any adopted child, it will not be subject to a tax, except upon its value in excess of \$25,000.

If the share goes to any other relative or to a stranger, the tax will be on the value of the share above \$1,000. So that the estate of a person distributed to his widow and children will pay no tax if the estate is valued at only \$5,000 or less, if it is valued at \$25,000 it will pay a tax of half of 1% on \$20,000, or \$100.

This estate of \$25,000, if left to the widow of a decedent, would pay in Massachusetts a tax of \$250, in Connecticut \$150, in New York \$200. An estate of \$125,000 distributed equally between a widow and four children would under this proposed law pay a tax only on the value of the net estate in excess of \$5,000, or a tax or \$600, and there would be no tax on the transfer of the shares to the widow and children, because none of the shares would exceed in value \$25,000. Such an estate of \$125,000 would pay in Massachusetts a tax of \$2,000, in Connecticut a tax of \$1,900 and in New York a tax of \$1,000.

Only such part of a non-resident's estate as consists of realty in Rhode Island is taxed, and the real estate in another State of a resident of this State is not taxed under this Act. Among the property and interests taxable are dower, curtesy, transfers made in contemplation of death, and property put in trust to be distributed after the death of the owner.

The administration of this law has been made as mobile as possible. Authority has been given the board, with the approval of the Attorney-General, to agree with representatives of the estates as to the amount of the tax to be imposed, and where this can be done it will save much time and trouble to all parties interested. But if in case of a controversy as to values an agreement cannot be reached, then provision is made for an investigation and appraisal by the board.

Mr. Jennings also explained that the Island.

Mr. Jennings also explained that the Inheritance Tax Act is the first of a series of Acts designed to increase the revenue of the State. The other measures which will be reported later embody a tax on savings deposits in national banks, a franchise and minimum tax on domestic corporations and an increase in the rate of the direct tax.

Seattle, Wash.—Bonds Upheld.—The \$75,000 5% bonds awarded Dec. 6 to the National City Bank of Seattle (V. 101, p. 2163) were declared valid in a decision rendered Jan. 25 by Judge John S. Jurey, of the Superior Court. The suit was brought by W. G. Perrow, a taxpayer, who contended that the bonds could not be issued without first submitting the proposition to a vote. The bonds are issued for the construction of a standpipe at Beacon Hill and the extension of the water-main system to the Rainier Valley. Principal and interest are payable from the revenues of the Water Depart-

Shreveport, La.—District Court Overrules Motion for New Trial in Bond Suit.—On Jan. 31 Judge T. R. Bell, in the District Court, overruled the motion for a new trial of the W. B. McCormick et al water-works bond issue suit. The bonds involved in the case are the \$1,200,000 municipal water-works-construction bonds, \$750,000 of which were sold Jan. 5.—See V. 102, p. 449.

Uruguay.—Loan.—Charge d'Affaires H. F. Arthur Schoenfeld reports that the National City Bank of New York, through its Montevideo branch, has advanced to the Uru-guayan Government the sum of 625,000 pesos (\$646,375 U. S. gold) at 6% interest, having discounted 6 months' Treasury bills to this amount. This transaction was effected in pursuance of authority granted by the Uruguayan budget law, which empowers the Executive to negotiate loans up to the sum of 1,000,000 pesos.

Bond Calls and Redemptions.

Birmingham, Ala.—Bond Call.—The following bonds were called for redemption during the month of December:

Graymont Improvement bonds Nos. 11 to 13, incl., of Series Jan. 1 1911 at the Jan. 1 1916 interest period.

City Public Improvement bonds Nos. 9, 47, 64, 65 and 77 of Series Jan. 1 1912 at the Jan. 1 1916 interest period.

The following improvement bonds were called for redemption during the month of January:

Bond No. 4 of Series 619; Nos. 15 to 20 incl. of Series 626; No. 5 of Series 647; No. 3 of Series 660; No. 2 of Series 713; No. 5 of Series 737; Nos. 3 and 4 of Series 746; No. 8 of Series 376; Nos. 12, 42 and 46 of Series Feb. 15 1911; No. 17 of Series Feb. 20 1911 and No. 15 of Series 510.

Bonds Nos. 25 to 29 incl. of Series 24, issued Feb. 26 1906, maturing Feb. 26 1916, will be paid at maturity.

Fairmont, Marion County, W. Va.—Bond Call.—Payment will be made on May 1 at the City Treasurer's office of \$30,000 First Mortgage water-works bonds of issue of May 1 1905, Nos. 29, 41, 138, 303, 146, 174, 153, 217, 329, 5, 233, 231, 323, 96, 243, 208, 82, 250, 237, 343, 109, 97, 81, 327, 201, 58, 169, 322, 205, 69, 194, 161, 125, 83, 77, 200, 159, 112, 44, 156, 118, 264, 23, 164, 266, 253, 110, 293, 352, 291, 261, 325, 357, 220, 310, 263, 333, 196 and 245, for \$500 each. for \$500 each.

La Grange, Cook County, Iil.—Bond Call.—Call was made for payment on Feb. 10 at the office of the Village Treas

urer of the following bonds, aggregating \$4,200:
\$200 special assessment No. 122, bonds No. 264, ser. 4, fourth installment.
1,000 special assessment No. 136, bond No. 78, ser. 5, fifth installment.
1,000 bond No. 80, series 5, fifth installment.
1,000 bond No. 85, series 5, fifth installment.
1,000 special assessment No. 137, bond No. 5, fifth installment.

Pacific, Franklin County, Mo.—Bond Call.—Water-works bond No. 4, for \$500, dated Jan. 1 1912, was called for payment Jan. 3 1916.

Slater, Saline County, Mo.—Bond Call.—Water-works bonds Nos. 27 and 28, for \$500 each, dated Dec. 31 1897, were called for payment Jan. 1 1916.

Sterling, Logan County, Colo.—Bond Call.—This city will exercise its option for payment at the City Treasurer's office, or at the office of James N. Wright & Co., Denver, of the following bonds:

Water bonds dated Jan. 1 1906, due Jan. 1 1921, optional for redemption Jan. 1 1916, Nos. 26 to 31, incl., and 37 to 44, incl., for \$1,000 each. Water bonds dated Apr. 16 1906, due Apr. 16 1921 and redeemable Apr. 16 1916, Nos. 1 to 5, incl., for \$1,000 each.

Bond Proposals and Negotiations this week have been as follows:

ACWORTH, Cobb County, Ga.—BOND ELECTION.—An election will be held Feb. 15 to decide whether or not this city shall issue \$2,500 water-works-system and \$2,500 electric-light-system-impt. 5% bonds. Due \$500 yearly Dec. 31 from 1917 to 1922 incl. and \$1,000 Dec. 31 1923 and 1924.

ALBANY COUNTY (P. O. Albany), N. Y.—BOND SALE.—On Feb. 10 the \$150,000 4½% registered court-house bonds (V. 102, p. 450) were awarded to the Mechanics' & Farmers' Bank of Albany at 101.04—a basis of about 3.70%. Other bidders were:
Bond & Goodwin, N. Y.\$151,555 00 | Farson Son & Co., N. Y.\$150,750 00 Kissel, Kin't & Co., N.Y. 151,440 00 | Hornblower & Weeks, N.Y. 150,750 00 J. S. Bache & Co., N.Y. 151,353 00 | Nat. Sav. Bk., Albany... 150,714 00 | Farmers L. & T.Co., N.Y. 151,072 50 | Stacy & Braun, N.Y...... 150,605 31

AKRON, Ohio.—BOND SALES IN 1915.—This city, during the year 1915, sold \$1,600,330 long-term municipal bonds. As a matter of record we show below the amounts sold, the dates upon which they were paid for, and the names of the purchasers.

CINCINNATI, Ohio.—BOND SALES IN 1915.—During the year 1915 the city of Cincinnati issued \$3,937,254 general bonds and \$398,689 assessment improvement bonds. All of the assessment bonds were taken by the sinking fund as it is not the policy of the city to offer such securities at public sale. Of the \$3,937,254 general bonds, \$935,254 were purchased by the sinking funds (\$39,900 to Bd. of Ed. Sink. Fd. and \$896,254 to City Sinking Fund) and \$3,002,000 sold to the public. These public sales were all reported in the "Chronicle" at various times during the year. The general bonds purchased by the sinking funds are described below:

* Subject to call after July 1 1954. *Subject to call after July 1 1954.

All of the bonds in the above table bear 4½% interest with the exception of the \$10,000 Cincinnati So. Ry. terminal bonds which bear 4%.

The \$300 Dorsey Street-impt. bonds shown above are part of an issue of \$60,800. Our records show that this issue was awarded on June 24 to Seasongood & Mayer, the Western German Bank and the Brighton-German Bank of Cincinnati. This sale was not consummated, we are now told, "because of the amount not being susceptible of being divided into coupon bonds of \$500 each." For this reason \$300 of the issue was taken by the sinking fund, as indicated above, and the \$60,500 sold to the German National Bank in July, as stated in the "Chronicle" at that time.

CLARKE COUNTY (P. O. Marshall), Iowa.—BOND SALE.—Geo. M. Bechtel & Co. of Davenport have been awarded an issue of \$22,000 41% funding bonds.

CLAYTON SCHOOL DISTRICT (P. O. Clayton), St. Louis County, Mo.—DESCRIPTION OF BONDS.—The \$125,000 4½% high-school-bidg, bonds awarded on Jan. 24 to Whitaker & Co. of St. Louis (V. 102, p. 451) are in denom. of \$1,000 and dated Feb. 1 1916. Int. F. & A. Due serially from 1925 to 1935, incl.

DAIRYLAND SCHOOL DISTRICT, Maderia County, Calif.—BOND SALE.—On Jan. 8 the \$2,500 6 % 1-5-yr. (ser.) building bonds were awarded to Beyth, Witter & Co. of San Francisco at 100.64. Denom. \$500. Date Jan. 3 1916. Int. ann. on Jan. 3.

DAYTON, Ohio.—BOND SALES IN 1915. During the year 1915 the city of Dayton sold general bond issues amounting to \$862,800. As a matter of record the details are printed below:

NEW LOANS

Sale of Municipal Bonds for the Line of the Cincinnati Southern Railway

SEALED PROPOSALS WILL BE RECEIVED at the office of the Board of Trustees of the Cincinnati Southern Railway until 12 o'clock noon of WEDNESDAY, the 8th day of March, 1916, for the purchase of 200 coupon bonds, each of the face value of \$500, bearing 4½ per cent interest, issued by the Board of Trustees of the Cincinnati Southern Railway.

These bonds are issued in accordance with and under the provisions of an Act of the General Assembly of the State of Ohio, passed May 17, 1911 (102 O. L., 111), entitled "An Act supplementary to an Act passed April 23, 1898 (93 O. L., 637), entitled 'An Act supplementary to an Act relating to cities of the first class having a population exceeding one hundred and fifty thousand inhabitants, passed May 4, 1869, 66 O. L., 80), and to all Acts supplementary to said Act of May 4, 1869, and authorizing the Board of Trustees, appointed under the Act of May 4, 1869, to issue additional bonds for terminal facilities and permanent betterments for the line of railway," and an Act of the General Assembly of the State of Ohio, passed March 5, 1913 (102 O. L., 112), entitled "An Act to supplement 'An Act supplementary to an Act passed April 23, 1898 (93 O. L., 637), entitled "An Act supplementary to an Act relating to cities of the first class having a population exceeding one hundred and fifty thousand inhabitants," passed May 4, 1869 (64 O. L., 80), and to all Acts supplementary to an Act relating to cities of the first class having a population exceeding one hundred and fifty thousand inhabitants," passed May 4, 1869 (65 O. L., 80), and to all Acts supplementary to an Act relating to cities of the first class having a population exceeding one hundred and fifty thousand inhabitants," passed May 4, 1869, 65 O. L., 80), and to all Acts supplementary to an Act relating to cities of the first class having a population exceeding one, hundred and fifty thousand inhabitants," passed May 4, 1869, 66, 0. L., 80), and to all Acts supplementary to an Act passed May 17, 1911 (102 O. L., 111), as sup

between the Trustees of the Cincinnati Southern Railway and the Cincinnati New Orleans & Texas Pacific Railway Company, the lessee of said railway, dated November 19, 1912, and November 15, 1915.

The said bonds constitute Series C, amounting to \$100,000, issued, or to be issued, under the corporate seal of said city for money borrowed thereon in the aggregate not to exceed \$500,000, authorized by the above Act of May 17, 1911, to be borrowed by said Board of Trustees of the Cincinnati Southern Railway as a fund for the completion of the terminal facilities and permanent betterments upon the line of railway of the Cincinnati Southern Railway as a fund for the completion of the terminal facilities and permanent betterments upon the line of railway of the Cincinnati Southern Railway—a line of railway owned by the said City of Cincinnati and extending from said city to the City of Chattanooga, in the State of Tennessee—and each bond is equally secured by a pledge of the faith of the said City of Cincinnati, and a tax in addition to all other taxes for municipal purposes, which shall be annually levied by the Council of said city on the real and personal property returned on the grand levy sufficient to pay the interest and provide a sinking fund for their final redemption.

The legality of Series B of the issue of bonds under the Acts of May 17, 1911, and March 5, 1913, was affirmed by the Supreme Court of Ohio in case of City of Cincinnati vs. Harris et al. (91 Ohio State).

The said bonds are to be issued under date of March 1, 1916, and are payable on the 1st day of March, 1965, at the American Exchange National Bank, in New York City, with interest thereon at the rate of 434 per cent per annum, payable semi-annually on the 1st days of September and March in each year, upon the presentation and surrender, as they severally mature, of the interest coupons attached thereto; payable both as to principal and interest in lawful money of the United States. Said bonds are redeemable to the retrieve of the retrieve of

accrued interest; all of said bonds are to be signed by the President of the Board of Trustees of the Cincinnati Southern Railway, and attested by the Auditor of the City of Cincinnati, and registered in his office, and also to be recorded in the office of the Trustees of the Sinking Fund of said city.

A certified check drawn on a national bank for the amount of 2 per cent of the par value of the bonds bid for, payable to the order of the Board of Trustees of the Cincinnati Southern Railway, must accompany each bid. This check shall inure to the benefit of the city upon the failure of the bidder to comply with the provisions of his bid or to take the bonds at the amount bid.

No bids for less than par and accrued interest to the day of delivery of the bonds will be accepted; the bonds to be delivered to the buyer at the Fifth-Third National Bank, in the City of Cincinnati, on any business day between the 8th day of Marchand the 20th day of March, 1916.

Bidders must enclose their bids in sealed envelopes and deposit the same with the Secretary of the Board of Trustees of the Cincinnati Southern Railway, Ingalls Building, northeast corner Fourth and Vine streets. Cincinnati, Ohio, on or before the 8th day of March, 1916, at 12 o'clock noon, and such sealed envelopes must have endorsed thereon the nature of the bid and the name and address of the bidder.

All bids must state the number of bonds bid for. Bids will be opened WEDNESDAY, the 8th day of March, 1916, at 12 noon, in the presence of the bidders, at the office of the Board of Trustees of the Cincinnati Southern Railway.

The Board of Trustees of the Cincinnati Southern Railway reserves the right to reject any or all bids.

By direction of the Board of Trustees of the Cincinnati Southern Railway.

By direction of the Board of Trustees of the Cincinnati Southern Railway. LEVI C. GOODALE, President.

STANLEY FERGUSON, Secretary.

Borough of Rutherford Bergen County, New Jersey

\$90,000, 41/2% Funding Bonds \$40,000, 41/2% Funding Bonds

Sealed proposals will be received by the Council of the Borough of Rutherford, at the Council Chamber. Borough Hall, on FEBRUARY 15. 1916, at 8 o'clock P. M., for the purchase of all or any part of two issues of Funding Bonds described as follows:

\$90.000 Funding Bonds, naturing three in each of the years 1917 to 1946, inclusive;
\$40,000 Funding Bonds, maturing February 1, 1946;
Said bonds will be of the denomination of \$1,000 each, dated February 1, 1916, bearing interest at the rate of 4½% per annum, payable semi-annually on the first days of February and August in each year. Both principal and interest of said bonds will be payable at the office of United States Mortgage & Trust Company, in New York City, in gold coin of the United States of America of the present standard of weight and fineness. Said bonds will be coupon bonds with the privilege of registration as to principal only, or as to both principal and interest.

Said bonds will be sold at not less than par and accrued interest from the date of the bonds to the date of delivery. The right is reserved to reject any and all bids.

Proposals should be addressed to F. A. Stedman, Clerk of the Borough of Rutherford, Rutherford, New Jersey, and enclosed in a sealed envelope marked on the outside "Proposal for Funding Bonds" and must be accompanied by a certified check upon an incorporated bank or trust company, payable to the order of F. P. Newman, Collector of the Borough of Rutherford, for 2% of the par value of the bonds bid for. Checks of unsuccessful bidders will be returned upon the award of the bonds. No interest will be allowed on the amount of checks of successful bidders and such checks will be returned upon the award of the bonds. No interest will be allowed on the amount of checks of successful bidders and such checks will be returned by the Borough through such failure.

The successful bidder will be furnished with the opinion of Messrs. Hawkins, Delafield & Longfeilow, attorneys of New York City, that the bonds are binding and legal obligat

as to the Borough of the Souncii.

By order of the Borough Councii.

Dated, February 2, 1916.
